My answer to that is that we have built the Panama Canal; I am very strongly in favor of that Canal, and was in favor of it at the time of its construction, because of its affording low transportation costs.

Mr. CLARK. I agree with the Senator; I think the Panama Canal should have been constructed.

Mr. PITTMAN. The answer, so far as the Mississippi Valley is concerned, is to take the Mississippi Valley as close to the same sea as it can be taken.

Mr. CLARK. I am in entire agreement with the Senator on that proposition.

Mr. PITTMAN. Therefore, I have always been in favor of making the Mississippi River and its tributaries as navigable as possible, to as great an extent as possible, and I think exactly the same principle applies to the St. Lawrence River.

Mr. CLARK. I agree entirely with the Senator from Nevada. I may say that my objection to this treaty has

always been based on what I see as a limitation in the future on the proper development of the Lakes-to-the-Gulf waterway.

Mr. PITTMAN. We know that there have been spent on the Mississippi River, largely, I admit, for flood control, many hundreds of millions of dollars, and now there is a project provided for on the Mississippi River and its tributaries contemplating an expenditure of $303,000,000. I am glad of it. I want to see that river made as navigable as possible to the greatest extent possible. On the other hand, the area of country back of the Great Lakes, extending to Montana and Utah, has been affected by the Panama Canal in just exactly the same way as has the Mississippi Valley. My State has been affected by it, but I am unfortunately in no position to remedy that condition.

The country immediately back of the Great Lakes, however, is isolated, just the same as Mississippi is isolated. That territory will be relieved by the navigation on the Mississippi River and that section back of the Great Lakes should be relieved by providing for as high a degree of navigation on the Great Lakes as possible.

Mr. CLARK. Mr. President, the Senator will see in the course of my remarks that I am not opposing the development of the St. Lawrence Seaway as a project. I am opposing the provisions of this particular treaty, because the treaty involves a limitation on diversion for the purposes of the Lakes-to-the-Gulf project, and I also object to the provision in the treaty which I consider a subsidy to Canadian labor and materials.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Illinois?

Mr. CLARK. I yield.

Mr. LEWIS. I think it proper to interpolate at this moment, in the colloquy between the able Chairman of the Committee on Foreign Relations [Mr. PITTMAN], the eminent Senator from Missouri [Mr. CLARK], and my able friend from Louisiana [Mr. LONG], as to the Panama Canal, to call attention to the fixed fact that the Panama Canal was never cut as a commercial undertaking; it was cut as a means of national defense, to be carried on and to be borne as a method and means of obtaining the ships from the Atlantic to the Pacific, our war vessels, when the necessity should arise. We were given evidence just before the war broke out, when Japan protested because of certain treaties, and there came from the State of my eminent friend the chairman of the committee, the Senator from Nevada [Mr. PITTMAN], and the distinguished Senator now presiding [Mr. MCCARRAN], both the States of Nevada and California, objections respecting the Japanese and the possession of land by them.

There was the ship which came from the Pacific coast by the way of the cape, round to Cuba, and the Atlantic coast, whose voyage took such a length of time that it was very apparent that in the event of a conflict great danger threatened the United States. The then President of the United States, Theodore Roosevelt, and the sentiment of America built the Panama Canal, that we might have an immediate short route from coast to coast for the national defense of the United States.

I thank the Senator for yielding to me.

Mr. CLARK. Mr. President, it is now seriously proposed in the highest quarters to add to the catastrophe in two most important particulars: (1) By affording to other sections of the United States and to Canada, in active competition with our industries and agricultural interests, immediate and cheap access to the sea, and (2) by forever closing the door on the development of our inland waterway system to lock us in permanently by preventing either our use of the new proposed seaway or the completion of the great national project for affording the Middle West access to the Gulf. Both these results inevitably flow from the limitation of 1,500 second-feet on diversion of water from Lake Michigan contained in article VIII of the pending treaty. This treaty strikes at the very vitals of the economic existence and well-being of the greater portion of the Mississippi Valley.

Mr. LONG. Mr. President, will the Senator yield to me?

Mr. CLARK. I yield.

Mr. LONG. I wish to call the Senator's attention to a point which escaped me when I was previously on my feet. The program of the Mississippi waterway development is so much more ambitious than any such thing as a 9-foot channel, and it is so much more possible of successful attainment, that I am sure the Senators who are supporting this treaty have never taken it into consideration. We do not know how far, with proper use of our water facilities, we may be able to take ocean liners.

Mr. CLARK. I do not think any man can estimate at this time the possible developments of the future, the possible development of engineering science, or estimate at this time what the requirements of the Lakes-to-the-Gulf project, or any other waterway project in this country—it may be 25 years from now, 50 years from now, or a hundred years from now.

If we were to consider, for the purpose of the argument, that 1,500 second-feet diversion at Chicago is at this time sufficient for a commercially successful Lakes-to-the-Gulf project, it by no means follows that it would be adequate for the interest of the country 10 years from now, or 25 years from now, or a hundred years from now.

At the time DeWitt Clinton conceived and constructed the Erie Canal, the greatest engineering project in history up to that time, it was believed on all sides that that canal would be adequate for all possible purposes for all time in the future; but the canal had not been constructed more than 35 or 40 years before its facilities proved entirely inadequate, and it has been deepened and deepened and deepened from time to time ever since.

Mr. LONG. In connection with that suggestion, if the Senator will permit, ocean liners, steamships, are now carried from the jetties on up to Baton Rouge, La. They go that far now. In other words, Baton Rouge is a seaport. It is some hundred miles up the Mississippi River. It is generally estimated that it would not be much of a task to deepen that river, with the proper use of our waterways and some straightening that should be done, to such an extent that those steamers could go up to Vicksburg. Others have said they could go to Cairo. It is not impossible that this river can be made an ocean thoroughfare clear up the entire waterway, with the proper use of our engineering facilities and the water. But we are bottling America just at a time of waterway development. We start in by locking the back gate against the United States, with all the possibilities of engineering and the use of water, and the impounding of these waters, so that we could have an all-year-round ship canal. We start in by locking the gate, saying to America, "You are limited. You are the only country that is limited. You have a limit. You can go only so far." Only ratify this treaty and thus make it irrevocable.

Mr. CLARK. Mr. President, I desire to make it perfectly clear that there has been very wide-spread misapprehension and misrepresentation as to the provisions of this treaty. For several years a lobby has been maintained in Washington with propaganda agencies throughout the country, the like of which has possibly never been seen in the country before. This lobby, headed by a man named Craig, has collected and expended literally hundreds of thousands of dollars, something in excess of half a million dollars, in the dissemination of propaganda throughout this country.

The other day the Senator from Michigan [Mr. VANDENBERG] entered into a lengthy explanation to show that none of the funds of this Craig lobby had been received from Canadian power interests. As far as I am concerned, I never charged that the funds were received from Canadian power interests, and it does not make any difference from whom the funds were received; a half a million dollars' worth of propaganda and misrepresentation is a half a million dollars' worth of propaganda, no matter where the funds come from.

Mr. PITTMAN. Mr. President, will the Senator yield to me?

Mr. CLARK. I yield.

Mr. PITTMAN. So that it may be known, the Senator from Michigan the other day disclosed very clearly where the money came from.

Mr. CLARK. There is no question about that.

Mr. PITTMAN. It was an appropriation by the land-locked States of the country, which are suffering as the Senator says the Mississippi Valley is suffering.

Mr. CLARK. Of course, that is perfectly true; and that is the most insidious thing this lobby has done through its propaganda. They even induced the State of Illinois and the Chicago Chamber of Commerce to contribute to their fund in the interest of a St. Lawrence Seaway, the general project, which we all favor. Then the State of Illinois and the Chicago Chamber of Commerce woke up and found that the funds they had contributed were actually being used for the dissemination of propaganda in favor of this particular treaty, as against the general project of a St. Lawrence Seaway, and the State of Illinois and the Chicago Chamber of Commerce very properly at that time cut off their contribution and denounced the efforts of the Craig organization.

Mr. LONG. Mr. President, the bad feature of it is that they did not let the Canadian power interests pay for this, instead of letting these poor people pay for it for the benefit of those interests.

Mr. CLARK. That is the worst feature of the Craig lobby. A deliberate effort has been made to confuse in the popular mind the general project of the St. Lawrence Seaway with the specific provisions of this particular treaty with its gigantic subsidy to Canadian labor and materials at the expense of the American taxpayers and its infamous surrender of American rights by the internationalization of Lake Michigan. The general project has received the commendation of hundreds of organizations and had the general sympathy of almost all believers in the development of water transportation. The pending treaty has the bitter opposition of many of those who were entirely in sympathy with the general seaway idea.

One of the most familiar claims of the Craig lobby is that both great national parties in their 1932 platforms declared for the ratification of this treaty. As a matter of fact, neither party declared for the treaty, and neither could have declared for it because the treaty had not been promulgated at the time of the adoption of the platforms, and no one in either convention gave any indication of knowledge as to the particular provision of this treaty at the time of the adoption of the party platforms. The Republican platform merely declared in broad, general terms in favor of the St. Lawrence Seaway, while the Democratic platform did not even specifically mention the St. Lawrence seaway.

It has been repeatedly and well said that the United States never lost a war or won a conference. While this statement is not, perhaps, accurate in its full entirety, it so nearly expresses the whole truth that it is applicable to the situation. After the War of 1812, when our commissioners met at Ghent to negotiate a peace with the representatives of the British Empire, it appeared that we had suffered defeat in the war. The Battle of New Orleans had not yet been fought. Our Capital City was in the hands of the enemy, and our Capitol Building and the residence of the President were put to the torch by the vandalism of British troops. Yet even in those circumstances the British demand for the surrender of our rights in the Great Lakes was rejected with such heat and scorn that Henry Clay declared our readiness to break off all negotiation and have 4 years more of war.

Our distinguished delegation at that conference, headed by Clay, Gallatin, and Adams, resisted with such effect that the Marquis of Wellesley later declared in Parliament that the British negotiators had been completely outclassed. But the rights which those great men refused to surrender, with our Capital in the hands of the enemy, are now to be docilely yielded over in a time of profound peace with a bonus of an unfixed amount running in hundreds of millions of dollars of American money thrown in for good measure. No wonder that the Canadian Prime Minister was able to make to his people on July 18, 1932, the following proud boast as to the result of the negotiations with the United States:

> The United States will meet the entire cost of these river works. But in respect to river works lying on the Canadian side of the boundary, Canadian workmen and Canadian material alone will be employed. Upon completion all river works on the Canadian side of the international boundary will be owned, maintained, and controlled by Canada. Compatible with the paramount obligation to safeguard our sovereign rights, the treaty insures a minimum of financial outlay by Canada. The estimated cost to the Dominion arising out of new capital expenditures will be less than $40,000,000—very small, compared with the enormous advantages which will accrue to Canada from the completion of the waterway.

I agree 100 percent with that statement of the Canadian Prime Minister.

No wonder the Canadian press and public were able to set up a paean of joy at the Canadian victory. No wonder that that most influential medium of Canadian opinion, the Toronto Mail and Empire, the recognized administration organ in Canada, Mr. President, is able to marvel at the extent and completeness of the Canadian triumph and to shout hosannas in the statement: "Not only this! The United States abandons its ancient contention that Lake Michigan is an 'American Lake.'" Why should not the Mail and Empire be happy in its recognition of the fact, "The cost of the undertaking is to be borne mainly by the United States"? Why should not Canadian statesmen and press rejoice in the fact that under the terms of the treaty Canada gets credit for every farthing expended on the Welland Canal or in any other part of the project and escapes with an obligation of less than $40,000,000, while the United States is given no credit whatever for the more than a hundred and fifty million already expended on the Great Lakes channels and harbors and is let in for obligations in an undetermined amount which certainly will not be less than two hundred and fifty million and may exceed six hundred million.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Louisiana?

Mr. CLARK. I yield.

Mr. LONG. I was just thinking that if it were a sound principle to let Canada deduct what she has spent on her waterway in Canada, would it not be almost as sound for us to deduct some of the expenditures we have made on the proposed waterway?

Mr. CLARK. I see no escape from the proposition, Mr. President, that Canada has been given credit for every penny that she has expended in every portion of the whole project, while the United States has been given no credit for the almost $160,000,000 that we have hitherto expended for the improvement of the Great Lakes channels and harbors.

Mr. LONG. And if we are obliged to make a treaty with Great Britain, Mr. President, as this treaty is made with Great Britain for Canada, I wonder why, if we desired to exercise some liberality, if we wanted to help the British Empire with the canal, we could not remit some of the war debts owing to us. I do not recall the exact number of billions of dollars owing to us by Great Britain, but under such circumstances we might say to them "We will at this time give you some of the war debts which you owe us." I was wondering if it be a question of liberality on our part, why we could not do something of that kind?

Mr. CLARK. If the Senator from Louisiana were able to induce the President to submit such a treaty to the Congress I might conceivably support its ratification.

Mr. President, the essential features of the Canadian triumph may be briefly summarized. Under the terms of article III, the high contracting parties agree to establish and maintain an International Rapids section commission of 10 members, half to be appointed by the Government of the United States and half by the Canadian Government, which shall have authority to construct the works in the International Rapids section—except a few specifically excluded in articles 1 and 2—and these works, wherever located,

are to be constructed by this joint commission out of funds which the United States undertakes to furnish as may be necessary from time to time.

As a matter of fact, Mr. President, many careful readings of the treaty have failed to disclose to me any limitation on the power of this international commission to construct works and call on the United States for funds, even though it might bankrupt the Treasury of the United States.

There is also this significant fact, Mr. President, that the parts of these works paid for by American money located in Canada shall be executed only by Canadian engineers and Canadian labor with Canadian material, and failing this, an equivalent proportion of the total of the works resulting from the expenditure of American money shall be employed for the benefit of Canadian engineers, labor, and material. The negotiators of the treaty graciously concede that the remainder of the cost of the works may be employed by the patient Uncle Sam in the employment of his own materials and the employment of his own taxpayers.

Article III, in order to further protect the interests of Canadian citizens, also makes specific provision that the International Rapids commission shall be responsible for any damage or injury to persons or property resulting from the construction of the works by the commission or from maintenance or operation during the construction period, and this tort liability is, of course, also to be financed through funds furnished by the generous and philanthropic Government of the United States. So that if there is any damage or injury caused to any Canadian citizen by the construction of works in Canada, under the direction of Canadian engineers, employing Canadian labor and material, the generous Government of the United States is to be called on to pay the bill.

Mr. LONG. Mr. President, the Senator from Missouri has found something in the treaty that I did not know was contained in it.

Mr. CLARK. If the Senator will read the treaty he will find that provision contained in article III.

Mr. LONG. It would be a very nice thing, would it not, for every man who claimed water had been diverted adversely to him to have the Canadian board assess the liability and the United States pay for it.

Mr. CLARK. There is no question that such would be the case under the provisions of the treaty.

Article V provides in effect that the works constructed by American money and Canadian labor and materials on the Canadian side of the line shall, as soon as the work is finished and the bill properly paid by the United States, become Canadian property.

Article VI grants either party the right to construct alternative channels within its own territories and to take water from the Great Lakes system for that purpose. This right is of no importance to the United States, but guarantees to Canada the right to take all the water it pleases from Georgian Bay in its long-cherished scheme for an all-Canadian waterway from the Lakes to the sea with a cut-off from Georgian Bay to the Ottawa River and coming into the St. Lawrence just above Montreal. The wonder is that our soft-hearted American negotiators did not obligate us to build this all-Canadian waterway at American expense.

Lake Michigan, Lake Huron, and Georgian Bay are on approximately the same level. Diversion of water from Georgian Bay will have precisely the same effect on lake levels as diversion of water from Lake Michigan at Chicago for the Lakes-to-the-Gulf project. But while article VI of this remarkable treaty guarantees to Canada in perpetuity the right to take all the water she pleases from her Georgian Bay, article VIII forever limits us to the beggarly pittance of 1,500 second-feet to be diverted from our Lake Michigan. Article VIII provides that the diversion at Chicago shall be reduced by December 31, 1938, to the quantity permitted as of that date by the decree of the Supreme Court of the United States of April 21, 1930, which is, of course, 1,500 second-feet, an amount totally inadequate for a commercially successful Lakes-to-the-Gulf project even at the present time and certain to be woefully and pitifully inadequate if that project should develop in the future as contemplated by Congress.

Article VIII then goes on to provide that in case the United States should ever—and I desire to emphasize these words—*in order to meet an emergency*, desire to temporarily divert more water, the matter should be submitted to a joint commission of three, one member to be appointed by each Government and a chairman to be selected by the two Governments. Such commission would have power to grant an increase for such time and on such conditions as it found necessary to meet the emergency, and to fix compensation to our Canadian friends for this use of our own water. But this provision is only to apply in case of emergency. Under all other circumstances, such as a demand for further permanent diversion to meet the permanent requirements of the Lakes-to-the-Gulf waterway, the matter shall be submitted to the International Joint Commission upon which Canada has equal representation and therefore an absolute veto power.

Mr. PITTMAN. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Nevada?

Mr. CLARK. I yield.

Mr. PITTMAN. I call the attention of the Chair and of the Senate to the fact that the unanimous-consent agreement is now in effect, and beginning at 12 o'clock speeches are limited in accordance with the agreement. I thought I should make that statement.

The PRESIDING OFFICER. The Senator from Nevada has stated the agreement correctly.

Mr. CLARK. I am glad that the Senator has reminded us of the agreement.

Mr. LEWIS. Mr. President, with the consent of the able Senator from Missouri, than whom no one is better acquainted with the subject nor can anyone debate it with more completeness than does the distinguished Senator, I invite to his attention, that, as I confessed yesterday in debate and from time to time in discussion my interest in the question approximates generally the interest of Chicago in the matter of the Great Lakes and the need of that community for the diversion of water from time to time for the protection of the health of its people. I invite the attention of my able friend now discussing a phase of the subject very important, to the fact that whereas there is a provision that in case of emergency more water may be had, I ask my eminent friend from Missouri if he will not regard for a moment that it is not provided as to who shall determine the emergency under which we may get extra water for the preservation of the health of the community of Chicago and of Illinois; but it is left open to be decided by Canada. She alone is to decide whether the emergency is sufficient for us even to get consent that the commission appointed determine quantity, whether this extra needed water should be granted.

Mr. CLARK. The Senator's statement is entirely correct.

Mr. OVERTON. Mr. President——

Mr. CLARK. I yield to the Senator from Louisiana.

Mr. OVERTON. On that point the treaty stipulates that in order to have a temporary increased diversion in case of an emergency there will be a commission of 3 members, 1 to be appointed by the Government of the United States, 1 by the Dominion of Canada, the two to select the third. In the event the Dominion of Canada should not wish to agree to this increased diversion, temporary in character and for an emergency, all that the Dominion of Canada would have to do would be not to agree upon a third member, and that would nullify the stipulation.

Mr. CLARK. There can be no question about that.

Mr. OVERTON. And there will be no way to compel Canada to appoint a third member nor to agree upon a third member, and therefore I consider that stipulation of the treaty as a nudum pactum.

Mr. CLARK. Mr. President, perhaps in nothing has the St. Lawrence lobby been more ingenious and more sinister

than in its deliberate cultivation throughout the country of the impression that the limit of 1,500 second-feet fixed by the treaty for diversion at Chicago was the result of a determination by the Supreme Court of the United States that this was the maximum amount which could legally be taken from Lake Michigan for navigation purposes on the Lakes-to-the-Gulf project. As a matter of fact, Mr. President, the Supreme Court decided no such thing. The issue of how much water the United States itself in its sovereign capacity could legally divert for a great national navigation project was not before the court, as is easily and completely demonstrable from the simple and undeniable fact that the decision of the Supreme Court was handed down before Congress had declared the national policy by the adoption of the Lakes-to-the-Gulf project.

The decision of the Supreme Court to which so much reference has been made was in a suit brought by the Lakes States to prevent further diversion of water by the sanitary district of Chicago. Let me say in passing that no stratagem of the St. Lawrence lobby has been more clever and more insidious in confusing the public mind than its effort to create the impression that the interests of the Chicago Sanitary District and of the Lakes-to-the-Gulf waterway are identical, one and inseparable. I cannot say with too much emphasis that most of us who are vitally interested in that great navigation project have absolutely no concern in or identity with the interests of the Chicago Sanitary District. Our only connection with the problem of that district is that our problem, as well as theirs, happens to concern diversion through the Chicago Drainage Canal and the Chicago River. But it is entirely possible, even probable, that an average diversion which would be entirely adequate for the necessities of the sanitary district would be entirely unequal to the requirements of navigation. In other words, the sanitary district, by diverting at a few seasons 10,000 to 12,000 second-feet for a few days at a time might be able to serve its purposes, and then, by cutting down to 300 to 400 second-feet for the rest of the year, stay within the 1,500 second-feet limitation; but the average of 300 to 400 second-feet throughout the rest of the year would be entirely inadequate for the navigation purposes of the Lakes-to-the-Gulf project.

The question of the power of Congress to authorize diversion at Chicago for navigation purposes was not before the Supreme Court in the litigation referred to, and it was so held by the Court. In the first report of Special Master Charles Evans Hughes, now Mr. Chief Justice Hughes, he treated the subject as though it had been submitted to the Court. That great lawyer in his luminous report reached the following conclusions:

> That Congress has power to regulate the diversion; that it is to determine whether and to what extent it should be permitted; that Congress has conferred authority upon the Secretary of War to regulate the diversion; that the permit of March 3, 1925, is valid and effective, according to its terms the entire control of the diversion remaining with Congress; that in the light of these conclusions the bill of the petitioner should be dismissed.

But, Mr. President, at that time Congress had never declared its policy by the authorization of the Lakes-to-the-Gulf waterway project. In view of this fact, the Court had no jurisdiction of this matter, and it referred the matter to Special Master Hughes with instructions to limit his investigation—

> To determine what diversion, if any, of water from Lake Michigan will be necessary for the purpose of maintaining navigation in the Chicago River as a part of the port of Chicago after the sewage-disposal works are in full operation.

This narrowed the case to the consideration of the issues presented in the action against the activities of the sanitary district for sewage disposal. Under these instructions Special Master Hughes therefore excluded all evidence of the amount of diversion necessary to a commercially successful Lakes-to-the-Gulf project, and in his report on rereference he recognized the limitation imposed upon him in these words:

> Under the opinion of this Court in the present suits, the question of the allowance for diversion of water from Lake Michigan in the interest of a waterway to the Mississippi is not deemed to be open for consideration.

He, therefore, in his finding, which was adopted by the Court specifically, excluded the question of the consideration of the amount of water necessary to be diverted from Lake Michigan for a commercially successful Lakes-to-the-Gulf project. But 4 months after the handing down of this decision, Mr. President, Congress did authorize a Lakes-to-the-Gulf project, and the reasoning of the present Chief Justice in his original report became applicable thereto. From that day to this no lawyer of real standing has come forward to controvert the assertion of Mr. Chief Justice Hughes that the matter of diversion for navigation purposes was properly within the control of Congress, and it may now be asserted without fear of successful contradiction that unless there should be a ratification of this treaty giving the force of law to this arbitrary limitation, the whole subject is properly within the control of Congress.

The attempt to create the impression either that the Supreme Court has decided, first, that Congress has not power under existing law to regulate and authorize diversion at Chicago for navigation purposes; or, second, that the Supreme Court has decided that a diversion of 1,500 second-feet at Chicago is adequate for a commercially successful Lakes-to-the-Gulf waterway, as contemplated by Congress in the act of July 3, 1930, is buncombe, pure and undefiled. No such thing has ever been decided by the Court, and its assertion involves a repudiation of the whole theory of the Government in this connection for more than 70 years.

Mr. President, the proposition of the Lakes-to-the-Gulf waterway is no passing fancy. It has been considered by our Government for at least three quarters of a century. Like the Panama Canal, which had been one of the noblest conceptions of mankind for generations before its actual construction, it possesses so many elements of logic, feasibility, and utility that it is a reflection on the daring, ingenious, and practical mixture of our people that it has not been fully consummated long since. Our national resources have been so vast and the opportunities for individual initiative so unlimited that until recent years altogether too little attention has actually been given to the development for the national good of the advantages of transportation bestowed upon us by the Almighty.

Yet a little consideration of the importance of geographical location in the original formation of communities brings us back to the importance of following waterways and utilizing unification of waterways. The Indian knew the value of portages in shortening long and hard journeys. The modern engineer with his genius and his modern facilities can substitute for the back-breaking portage of the Indian a canal, a cut-off, or a diversion of an ancient stream so that we may now have continuous and connected waterways, able not alone to float the canoes of the aborigines but to carry also on their breasts in barges the majestic commerce of the industrial and agricultural activities which have been developed in our inland empire.

That there was in earlier ages a Lakes-to-the-Gulf waterway there can be little geological or engineering question. Even in the early days of our own settlement of America there was in time of flood from Lake Michigan to the Des Plaines River a well-recognized and often-used route from Lake Michigan to the Gulf, fit for the primitive means of water transportation then employed.

Mr. President, how much time have I left?

The PRESIDING OFFICER (at 12 o'clock and 15 minutes p.m.). The Senator from Missouri has 5 minutes remaining on the treaty.

Mr. LONG. Mr. President, let us get this matter straight. We have 20 minutes on the treaty and 20 minutes on each amendment offered, have we not?

The PRESIDING OFFICER. Twenty minutes on the treaty and 10 minutes on each amendment or reservation.

Mr. LONG. Could not the Senator from Missouri take his time on an amendment now pending, or how will that be arranged?

The PRESIDING OFFICER. There is no amendment pending.

Mr. CLARK. Mr. President, the Vice President ruled the other day that amendments or reservations could be offered at any time to be considered as pending. On last Monday I offered four reservations which are now pending, according to the ruling of the Vice President.

The PRESIDING OFFICER. The present occupant of the chair is advised by the parliamentarian that those reservations must be considered after the resolution of ratification has been presented.

Mr. PITTMAN. Mr. President, as I understand, the unanimous-consent agreement provides that no amendment or reservation may be considered unless presented on or before this day, the 13th. The question which arose was as to whether or not the filing of reservations at the desk would make them acceptable as within the time.

Mr. CLARK. The Vice President ruled last week that amendments and reservations could be offered and considered as pending. If that is not done, then the time limit would go into effect and Senators would be precluded from having their amendments or reservations considered as pending. Under the terms of the unanimous-consent agreement it is necessary for more than one reservation to be offered and pending at a time before the going into effect of the time limit on debate.

Mr. LEWIS. Mr. President, I may add that the rule requires that amendments and reservations lie on the table. Under the contention of my eminent friend from Nevada [Mr. PITTMAN], if he makes the contention, the Senator from Missouri would be compelled to produce his amendments which would never go to the table and never lay over for the acquaintance of others who desire to know of them in order to know how to vote upon them. Therefore he could not comply with the rule. It is only under the ruling of the Vice President that he could comply with the rule. The Senator may now announce that he takes up one of his reservations which he has offered and which, under the ruling of the Vice President, is pending.

Mr. PITTMAN. Mr. President, I do not want to raise a point of order. However, there now being no amendments offered, but there being reservations intended to be offered to the resolution of ratification, I ask unanimous consent that the treaty may be reported to the Senate, and that, inasmuch as it is apparent no amendment is to be proposed to the treaty itself, I may be permitted to present at this time the resolution of ratification, to which the committee has reported a reservation, and that we may proceed to consider it.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada? The Chair hears none, and it is so ordered.

Mr. DIETERICH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIETERICH. Would that mean that committee reservations must be rewritten to conform to the resolution of ratification before they may be considered?

Mr. PITTMAN. No; they may be added to it. They are not rewritten at all.

Mr. DIETERICH. The reservations may be considered then as amendments to the resolution of ratification?

Mr. PITTMAN. Yes. I ask that the resolution of ratification be read at this time, with the committee reservation.

The PRESIDING OFFICER. The clerk will read the resolution of ratification.

The legislative clerk read as follows:

Resolved (two thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Great Lakes-St. Lawrence Deep Waterway Treaty between the United States and Canada, signed at Washington, July 18, 1932, this advice and consent being subject to and conditioned on the agreements, provisions, and interpretations set forth in an exchange of notes between the United States and Canada, dated January 13, 1933, respecting private diversions of water on the St. Lawrence River.

Mr. PITTMAN. Mr. President, I ask unanimous consent that the reservation of the committee itself, touching on the notes, be adopted so the Senator from Missouri may offer his reservation.

Mr. CLARK. I will speak on the committee amendment.

Mr. PITTMAN. The reservation now offered by the committee is before the Senate.

Mr. CLARK. I understand that I have 5 minutes of my original time on the treaty?

The PRESIDING OFFICER. The Senator is correct, and he has 10 minutes on the committee reservation.

Mr. CLARK. Mr. President, there has been much said during this debate about the question of watersheds. Those who most loudly and insistently support this treaty as a great national undertaking immediately begin to beat their breasts and talk of watersheds when any mention is made of a great national project of a Lakes-to-the-Gulf waterway involving diversion of water from Lake Michigan. So far from looking at that matter from a broad national viewpoint, as others are urged to view the St. Lawrence waterway, they fall back on the old doctrine of the private law as to riparian rights and howl of "watersheds." They pay no attention to the doctrine of watersheds at Niagara Falls and approve the allotment of diversion for power purposes there on the basis of physical location regardless of watershed contribution to the flow over the Falls.

A few days ago the Senator from Nevada [Mr. PITTMAN], in opening the debate on this measure unctuously quoted a former President of the United States as favoring this measure, although he later admitted that that particular President had never heard of some of the more controversial provisions of this particular treaty. Nevertheless the distinguished Chairman of the Foreign Relations Committee by implication adopted the theory of that statement as an argument for this project. The outstanding feature of that statement was a citation of the fact that certain European powers were agreeing on a project for connecting the Rhine, the Rhone, and the Danube, so as to make nearly universal water transportation over Europe. No one raised objection to that statement that it involved a diversion from one watershed to another, although it is perfectly obvious that there could be no connection of the Rhine, the Rhone, and the Danube without diversion from one watershed to another.

A few days later my genial friend from Minnesota [Mr. SHIPSTEAD] during an able speech in behalf of this treaty, placed on the rear wall of the Chamber as an argument for this treaty, a large scale map showing the waterways of Europe. Many of these waterways connections, exhibited with such pride, involved diversions of water from one watershed to the other.

It is regarded as a merit in some quarters and advanced as an argument for the pending treaty that there has been connection and diversion from one European watershed to another in a great international waterway; but when it is suggested that the proposed St. Lawrence seaway should be connected with the Mississippi-Missouri-Ohio-Tennessee-Arkansas system of inland waterways, our friends hold up their hands in holy horror and talk of the sanctity of watersheds.

For be it remembered, Mr. President, that those of us who vision a development of the inland waterways of the Nation wish access to deep water not only to the Gulf but to the Lakes and thence to the Atlantic. If a really national system of waterways is to be developed and maintained, the agricultural and industrial products of Montana and the Dakotas, of Iowa and Nebraska, of Kansas and Missouri, should be able to move down the Missouri River to its mouth, and then have the option of moving south to the Gulf or north to Chicago with access to the new seaway. Coal from West Virginia and Kentucky, steel and iron from Pennsylvania, should have the opportunity of moving either north or south from the mouth of the Ohio as commercial opportunity might demand and dictate. With the proper and ultimately inevitable development of the Tennessee and Arkansas Rivers, the facilities of the system would be correspondingly enlarged. By the same token the products of the Lake States would have the opportunity of moving by cheap water

transportation to the Mississippi Valley. At the same time adequate development of the Mississippi above St. Louis should give the States of the upper valley access to all the facilities of the connected system, including both the St. Lawrence seaway and the route to the Gulf, with its added access to the markets of the tributary rivers.

For it has been too little emphasized that the Lakes-to-the-Gulf project is also the Gulf-to-the-Lakes project; it is the Missouri-to-the-Lakes project; it is the Ohio-to-the-Lakes project and an upper Mississippi-to-the-Lakes project.

Such, Mr. President, is my conception of the proper development of a national system of waterways. Such a conception, as a matter of course, is not to be limited to the projects discussed, or to the Lakes and the Mississippi Valley, but necessarily implies the proper development of all the endless possibilities for exploitation of the waterways of the United States.

To return for a moment to the question of diversion between watersheds, let me cite the case of the Erie Canal—a conception as splendid and an achievement as gigantic for its day and time as the later construction of the Panama Canal or the pending project of the St. Lawrence seaway. The Erie Canal was, of course, a diversion of water from one watershed to another.

There is now pending before the Public Works Administration what is known as the "Devils Lake project", involving the expenditure of $30,000,000 in the construction of a great dam and the diversion of waters from the Mississippi-Missouri system into the waters of Hudson Bay. The chief proponent of this plan is my genial friend from North Dakota [Mr. NYE], one of the leaders in the agitation for the St. Lawrence pact. Evidently the Senator from North Dakota sees no vice in diversion from one watershed to another; and from the fact that the President is giving cordial consideration to the project it would seem that he does not consider this objection to the diversion at Chicago as the vital one.

Parenthetically, I may say that I do not know of a single Senator from the Missouri Valley who is opposing the Devils Lake project. I myself believe it to be a meritorious project, and in pursuance of my view that the resources of the United States should be used for the general good I am heartily in favor of it. But if the theory of some of the proponents of this treaty as to the sanctity of watersheds is to be pursued it must follow that all such projects as the Devils Lake diversion must lie in the limbo of forgotten things.

But more than that, Mr. President, the very treaty now under consideration contemplates and authorizes diversions into the St. Lawrence from other watersheds. Indeed, Mr. President, this very treaty recognizes the principle of diversion from one watershed to another. Canada has carefully preserved the right to divert water into the St. Lawrence from outside its own watershed. This is another provision which can be useful only to Canada. Paragraph (d) of article VIII provides:

> That in the event of diversions being made into the Great Lakes system from watersheds lying wholly within the borders of either country, the exclusive rights to the use of waters equivalent in quantity to any waters so diverted shall, notwithstanding the provisions of article IV (a), be vested in the country diverting such waters, and the quantity of water so diverted shall be at all times available to that country for use for power below the point of diversion so long as it constitutes a part of boundary waters.

The explanation of this paragraph in the treaty is very simple, and I can most easily explain it by quoting again from the leading administration paper of Canada, the Toronto Mail and Empire. I quote again from that journal:

> Ogoki Watershed as compensation: Canada gains another victory over the so-called "Ogoki diversion." It has been known for a long time the Ogoki Lake, lying north of Lake Superior and all the waters flowing into it, which now find their outlet in Hudson Bay, can be readily diverted into Lake Nipigon, and thus into the St. Lawrence River system. Canada thus gains the right to divert 4,000 cubic feet per second of water into Lake Nipigon for use in power development on the Nipigon, St. Marys, and St. Lawrence Rivers. It is estimated that this additional flow of water will furnish 520,400 horsepower, and this is all to belong to Canada. There is another important point in the fact that this access of water will compensate for the limited loss for the drainage canal which is to be allowed Chicago. In this connection it is to be added that the United States is to spend millions of dollars in compensation works in the Niagara and St. Clair Rivers. These works will, the engineers say, furnish adequate protection for navigation all down the Great Lakes system to Montreal.

So, Mr. President, Canada has by this treaty accomplished the hitherto unheard-of feat of eating its cake and keeping it, too. Moreover, both the United States and Canada, by authorizing this specific project by treaty, have demonstrated the complete hollowness of the clamor about watersheds as an obstacle to diversion at Chicago.

To return to the question of the Lakes-to-the-Gulf project and its history, as far back as 1866, the year after the Civil War, Congress authorized an examination of the question of the feasibility of the construction of a waterway to connect Lake Michigan and the Mississippi. General Wilson, Chief of Army Engineers at that time, after elaborate investigation, reported, in part, as follows:

> The Illinois River seems to have been especially designed by Nature as the lines by which the waters of Lake Michigan are to be connected with those of the Mississippi. A moment's consideration will show that at no remote period the waters of the lake must have been carried off by these streams as well as by the St. Lawrence.

Twenty years later, in 1887, the Chief of Engineers said in his annual report:

> The United States and the State of Illinois have long been committed to the project of opening a water communication between the Mississippi River and the northern Lakes of capacity sufficient for the wants of commerce, and for the exigencies of our national defense.

As a matter of fact, Mr. President, diversion of water at Chicago was actually begun as far back as 1848, with the opening of the old Illinois and Michigan Canal, which was constructed by the State of Illinois at the cost—enormous for that time—of six and a half million dollars. For nearly 40 years this diversion has been taking place through the Drainage Canal, and for more than 10 years, under permits granted by the Secretary of War, 8,500 second-feet have been taken. Yet it is now proposed, after Congress has authorized the Lakes-to-the-Gulf project, to cut this amount arbitrarily and forever by more than 80 percent.

So far as the navigation of the new St. Lawrence seaway is concerned, it would not be interfered with by a diversion at Chicago even much greater than the 8,500 second-feet taken for the past 10 years. It is the testimony of highly competent authorities that the diversion of 10,000 second-feet lowers the level of the lake about 6 inches in a period of about 4 years, and that thereafter the diversion has no further effect in lowering the level. But this lowering of 6 inches is of very little importance, since it is a fact easily demonstrable from the records of the War Department that due to differences in rainfall and melting snow at different times there is a variation of more than 4 feet over cycles of about 10 years in the level of the Lakes. Congress has recognized this fact by providing a system of compensating works which will raise the level of the Lakes about 18 inches as an aid to navigation in the lower cycles of this variation of lake levels. Indeed, General Pillsbury, Assistant Chief of Army Engineers, has testified that by properly constructed compensating works from thirty to forty thousand second-feet might be diverted without lowering lake levels or interfering with navigation.

Thus for navigation purposes on the new seaway there need be no conflict of interest between the requirements of the Lakes-to-the-Gulf and the St. Lawrence projects; but, of course, water which is diverted to provide for the navigation of the Lakes-to-the-Gulf project cannot be used to turn the wheels of Canadian power plants on the St. Lawrence. As a matter of fact, the Canadians themselves have never seriously contended either that they had a right to prevent diversion from Lake Michigan or that 10,000 second-feet was an unreasonable diversion. More than a quarter of a century ago the International Waterway Commission, half the members of which were Canadians, in their report recognized the right of the United States to the diversion, but suggested that, as a matter of equity, a limit

of 10,000 second-feet be placed upon it, in view of the fact that that amount was entirely adequate for all purposes.

Following the uniform course of the American Government on this matter, the American negotiators, in preparing the treaty of 1910, having to do with diversion of boundary waters, refused to include any mention of diversion from Lake Michigan, on the theory that it was an entirely American lake. That great international lawyer and publicist, Elihu Root, then Secretary of State, boldly asserted and maintained the proposition that neither the term "tributary waters" nor the term "boundary waters" could in any manner be held to include Lake Michigan, since it was wholly an American lake.

Mr. Secretary Root, however, frankly stated that this diversion at Chicago had been considered by our commissioners—that is, by the American members of the International Boundary Commission—in agreeing that, as a matter of comity and equity, Canada should be permitted to divert more water from Niagara Falls than is diverted by the United States, and this was in spite of the fact that two thirds of the watershed of Niagara Falls is in the United States and that two thirds of the water going over Niagara Falls originates in the United States.

This new St. Lawrence Treaty, therefore, presents the amazing spectacle of the Canadian Government having once been fully compensated for a right which it did not have; that is, to interfere with diversion at Chicago, now seeking to retain that compensation and, at the same time, to withdraw from us the exercise of a right which could have been exercised originally without any whatever. Of course, this amazing diplomatic triumph has caused delight and exultation in the Dominion of Canada. I do not wish to go into tedious detail or repetition, but, as illustrative of the general Canadian chorus of jubilation at the success of their negotiators, I wish to quote a few more brief extracts from the very frank and explicit analysis of the treaty in the Toronto Mail and Empire, to which I have heretofore referred as a leading administration paper in the Dominion of Canada. I quote from this Canadian chant of triumph:

On its face the St. Lawrence Waterway Treaty signed at Washington yesterday by Hon. W. D. Herridge and Colonel Stimson is more favorable to Canada than any previous arrangement ever made with the United States. It is more favorable than anyone outside a limited government circle could have hoped for.

Mr. President, that statement in this great Canadian organ of public opinion is undeniably true, and pity it is, it is true. I quote again:

Though executed at the American Capital, it concedes to this country practically all the conditions long insisted upon by the most jealous guardians of Canadian rights. Congress must ratify the instrument before Parliament is asked to do so.

And there must be a reason for that provision, Mr. President.

The cost of the undertaking is to be borne mainly by the United States.

As a matter of fact, it is to be borne almost entirely by the United States.

The Canadian two-stage plan in the international section is adopted in place of the United States single-stage plan. Canadian sovereignty over the works in Canadian waters is absolutely established. To this end there is a complete segregation of the properties on the two sides of the border.

Then the article continues:

Not only this, the United States abandons its ancient contention that Lake Michigan is an American lake. That great body of water—

Lying wholly within the boundaries of the United States, Mr. President, so this Canadian paper says—

That great body of water has become forever, through this new treaty, an international body of water which belongs to the St. Lawrence watershed instead of to the Mississippi watershed.

Naturally enough, Canadian opinion is happy in the acquisition of a right to this treaty, which was denied them after the War of 1812 and consistently ever since.

The article continues:

On the eve of the imperial conference the treaty announces the creation of a larger field and new facilities for empire trade.

Of course, Senators will remember and Americans will remember that the imperial conference was particularly called for the purpose of promoting trade between the various British Dominions and shutting the United States from their market.

No feature of the treaty is more surprising or more satisfactory than the low cost to Canada at which the undertaking is to be carried out. If the cost of construction were to remain as low as it is today during the years of construction, the outlay by the Dominion Treasury might not amount to more than $25,000,000. The cost to the United States is placed at $243,661,000. Most of the construction work will be done in Canada. All of the construction work on the national section will, of course, be done here, but there is more than that. Though the United States is to provide the $54,718,000 for works situated on the Canadian side in the International Rapids section, Canadian engineers, Canadian labor, and Canadian materials are to be used.

This is naturally and justifiably a matter of congratulation to patriotic Canadians to realize to how great an extent the Canadian depression is to be ended through exactions from American taxpayers.

The Mail and Empire then goes on to analyze article 5 of the treaty as follows:

Those who have been nervous about Canadian sovereignty should read article 5 of the treaty, which provides that each of the high contracting parties shall retain complete ownership of and complete legislative and administrative jurisdiction over all works lying on its own side of the international boundary, irrespective of the agency by which such works are constructed. Such works shall constitute a part of the territory and property of the country in which they are situated. This proviso is deliberately inserted to protect Canadian sovereignty over all structures lying on the Canadian side, even though these structures have been built with United States money.

The provision of the treaty which permits Canadian discretion in the diversion of water from the Great Lakes System, two thirds of whose watershed lies within the boundary of the United States, and at the same time restricts American development of economic waterways within the United States, naturally is a subject of jubilation to patriotic Canadians. A little later along in this enlightening Canadian story we find a song of triumph at the definite thwarting through this treaty, of the old, old project for a Lakes-to-the-Gulf waterway. Whatever Americans may think of the effect of the proposed treaty on the Lakes-to-the-Gulf project, Canadian opinion is clear.

I quote again:

As already noted, the treaty itself puts an end to Chicago's ambition to drain the Great Lakes for the benefit of a deep waterway to the Gulf of Mexico by way of the Mississippi Valley. It is the first time in history—

That statement, Mr. President, is undeniably true.

that the United States has agreed to place the abstraction of water from Lake Michigan under international control. This really means that Lake Michigan is admitted by the neighboring Republic—

That is, the United States.

to be an international waterway, like the other Great Lakes. Henceforth it belongs definitely by international agreement to the St. Lawrence Watershed and cannot be exploited for the increased benefit of the Mississippi Watershed.

Mr. President, I said a little while ago that I wish I might have an opportunity to read the whole of this illuminating expression of opinion put out on behalf of the predominant party in Canada, through its leading newspaper exponent, but since I cannot do this I can do no better than read the concluding paragraph of the article, in which it calculates from a Canadian viewpoint the policies which they are justly to acquire through the negotiations of this treaty. I quote again.

The negotiation—

And this is a party claim as well as a national claim, Mr. President, because this journal from which I am quoting is the recognized inside spokesman of the dominant party in Canada.

The negotiations and the conclusion of the treaty illustrate the present government's belief in the future of Canada. They also illustrate the driving power of the Prime Minister and his capacity for getting big things done.

Many Americans who have read the treaty must mournfully agree with that conclusion.

On the eve of the greatest empire conference the world has ever seen he has been able to announce this new Canadian and imperial arrangement with the United States. To Mr. Herridge—

That is, the Canadian Minister in Washington—

goes the main credit for the negotiation of the treaty.

The PRESIDING OFFICER. The time of the Senator from Missouri has expired.

Mr. OVERTON obtained the floor.

Mr. PITTMAN. Mr. President, may I ask if the Senator from Louisiana is about to address himself to the pending reservation of the committee?

Mr. OVERTON. I shall address myself to the treaty and then to the reservation.

Mr. PITTMAN. I thank the Senator.

Mr. DIETERICH. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. DIETERICH. In order to be clear on the parliamentary procedure I am now going to offer reservations submitted by myself on February 9 and February 13, as amendments to the resolution of the Senator from Nevada, and give notice that I will briefly address myself to those reservations tomorrow.

Mr. PITTMAN. A point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. PITTMAN. There is a reservation pending. There cannot be two pending at the same time. However, there is nothing I can see to prevent the consideration of these reservations in order as they come after the committee reservation shall have been disposed of.

The PRESIDING OFFICER. That is the understanding of the Chair.

Mr. OVERTON. Mr. President, within the limit of the time in which I may address myself to the pending treaty, I desire to confine my remarks mainly, if not exclusively, to one phase of it; that is, that stipulation of the treaty in reference to the diversion of water from Lake Michigan into the Lakes-to-the-Gulf waterway.

It has been stated by the Senator from Missouri [Mr. CLARK], in the very able address he has just delivered, that the construction of a Lakes-to-the-Gulf waterway is not a passing fancy, and that the energies and activities and moneys of this Nation and of the State of Illinois have been devoted to the consummation of that project for a long number of years.

Mr. President, it may be interesting, and it may add to the literature of this debate, if the statement were made that the first time that a Lakes-to-the-Gulf waterway was conceived was the first time when a representative of civilization undertook to pass from the Great Lakes into the Mississippi River. It was in 1673 when first the eye of the white man observed the Great Lakes and observed the Mississippi River. I shall quote a passage from volume 58 of the Jesuit Relations and Allied Documents, page 105, describing the voyage of Sieur Joliet and Father Marquette down the Great Lakes and into the Mississippi. This contemporary chronicler speaks of—

A very great and important advantage, which, perhaps, will hardly be believed. It is that we could go with facility to Florida in a bark, and by very easy navigation. It would only be necessary to make a canal, by cutting through but half a league of prairie, to pass from the foot of the Lake of Illinois to the River St. Louis. Here is the route that would be followed: The bark would be built on Lake Erie, which is near Lake Ontario; it would easily pass from Lake Erie to Lake Huron, whence it would enter Lake Illinois. At the end of that lake the canal or excavation of which I have spoken would be made, to gain a passage into the River St. Louis, which falls into the Mississippi. The bark, from there, would easily sail to the Gulf of Mexico.

So the first time the Lakes-to-the-Gulf waterway was visioned was the first time that the eye of modern civilization looked upon the connection between the Great Lakes and the Mississippi River. Since that time, up to the present, as has been frequently pointed out in the course of this debate, it has been the aspiration and the hope of those living in the Mississippi Valley and those otherwise interested that the Lakes-to-the-Gulf waterway should be completed and put into practical operation.

The Senator from Nevada [Mr. PITTMAN] a few days ago met that issue and indicated that, in his opinion, it was a paramount issue in respect to this treaty, and he undertook to show that, according to the statement recently made by General Markham, Chief of Army Engineers, those who were interested in the Lakes-to-the-Gulf waterway need entertain no apprehension in respect to this treaty, and he took the position, quoting from a letter written to him by General Markham, that there was no necessity for any diversion of water from Lake Michigan into the Mississippi River in order to make the Lakes-to-the-Gulf waterway a commercially useful channel.

Quoting from what General Markham said to him in that letter, he stated:

It has never been the view of this Department that the diversion of water from the Great Lakes into the Chicago Drainage Canal is an essential factor in the present and future development of the interior waterways system formed by the Mississippi River and its tributaries.

I entertain the very highest respect for General Markham, his ability as an engineer, and his integrity; but that statement made by General Markham is to be weighed and considered in the light of the statements made in the reports from which he made that deduction. It is to be considered in the light of the testimony which has heretofore been given, as shown in this record, by other Chiefs of Army Engineers and by various expert engineers.

In the year 1907, when the International Waterways Commission had under consideration the question of the amount of diversion necessary from Lake Michigan into the Lakes-to-the-Gulf channel, they reported that, in their opinion, it would be proper that there should be a diversion of 10,000 cubic feet per second. In 1921 Col. W. V. Judson, United States engineer, recommended a diversion of 7,500 cubic feet per second. In 1929 General Jadwin, Chief of Engineers, testified as to the propriety and necessity of a diversion of some 5,000 cubic feet per second. In 1930 Gen. Lytle Brown, Chief of Engineers, testified to the necessity of the diversion of 5,000 cubic feet per second.

Mr. President, in the light of those statements we must conclude that it is necessary that there should be some diversion from Lake Michigan into the Lakes-to-the-Gulf channel in order to make that waterway commercially navigable and commercially useful. Accepting the statement of General Markham as given to us by the Senator from Nevada, without being interpreted in the light of the reports upon which it was based, interpreting it at its face value, we must conclude that there is a considerable discrepancy and considerable diversity of opinion amongst the engineers who have considered this subject as to the quantity of diversion necessary.

I wish to quote further from the testimony of General Brown as it appears on page 593 of the hearings. In answer to a question by Senator VANDENBERG, "What is your present judgment as to the smallest flow of water that is necessary to develop a commercially useful waterway at this point?", referring to the diversion into the Chicago drainage canal, General Brown said:

The indications are, with everything in view, that something like 5,000 feet per second should be held available for that purpose.

On page 327 of another record, to which General Brown was testifying, he stated:

Well, my idea of about what the Supreme Court took into consideration is based on the testimony that General Jadwin gave them, and General Jadwin's testimony, as I remember, was based on Chicago Harbor only, and that was 1,500 cubic feet per second. We have got an entirely different proposition now than Chicago River only. We have got the waterway all the way from the Lakes to the Missippi River.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. LOGAN in the chair). Does the junior Senator from Louisiana yield to his colleague?

Mr. OVERTON. I yield.

Mr. LONG. I wonder whether our friend the Senator from Nevada could not be found and asked to come into the Chamber, because he has made a statement on the floor of the Senate indicating that there is practically no question about this water diversion not being necessary, and in order to back up that view he has brought in the statement of a subordinate engineer, and apparently that is about the only engineer who could have made that kind of a statement, judging by what my colleague is reading, because the Chief of Engineers, and the Chief before him, both put themselves on record to the effect that it would be necessary to have at least 5,000 cubic feet per second.

Mr. OVERTON. I should be very glad indeed were the Senator from Nevada here.

Continuing, I call attention to this statement made by Gen. Lytle Brown, Chief of Army Engineers:

I am of the opinion that at this time no definite figure on the amount of diversion necessary for navigation should be stated, and that future study of the completed waterway should be made to ascertain the quantity of water necessary for navigation. It is, therefore, recommended that any specified diversion be omitted from any authorized legislation.

Mr. President, how much more time have I?

The PRESIDING OFFICER. The time of the Senator will expire 5 minutes after 1 o'clock on both the treaty and the reservations.

Mr. OVERTON. I should like, had I the opportunity, to read from the reports that will be found in the CONGRESSIONAL RECORD submitted by the Senator from Nevada, and made by the different district engineers and by the division and other engineers who reviewed their reports, to show that it would be ill-advised at this time to undertake to place any limit upon the amount of diversion that ought to go out of Lake Michigan into the Lakes-to-Gulf waterway. I content myself with quoting from only one of these reports, which is the report of Col. George R. Spalding, of the Corps of Engineers, a division engineer. Colonel Spalding said:

No one can predict with certainty the effect in 1939 of * * * the reduction of diversion upon navigation below Lockport at any time prior to the completion of the sewage-treatment program. Sound procedure would be to carry out the full program of treatment-plant construction, reduce diversion as required by the Supreme Court decree, and—

What?—

observe its effect. A period of not more than 2 years of observation and study, after the completion of the treatment plants of the sanitary district of Chicago, and the full reduction of diversion to 1,500 cubic feet per second, should furnish conclusive data which will permit of positive determination whether any increase in diversion is necessary; and if so, by what amount.

A period of approximately 2 years, says Colonel Spalding, and in that he is supported by the reports made by the other engineers, of observation and study should be made after these purification plants shall have been completed, and after 2 years of observation determination can be made as to what additional diversion may be necessary in order to purify the waters of the Chicago Harbor and in order to provide sufficient water for the navigation of the Lakes-to-the-Gulf waterway.

With all the above—

Says Colonel Spalding—

I agree, but, in my opinion, it is desirable and necessary that the Chief of Engineers be authorized by law to direct such additional temporary diversions, not to be considered in the determination of the annual average, as may be necessary to flush pools and/or to maintain pool levels and as may not be inimical to Lakes navigation.

Therefore, Mr. President, the statement made by General Markham, predicated upon these reports, is to be interpreted in the light of the reports which he was reviewing at the time he wrote the letter to the Senator from Nevada.

Mr. President, I think it is wholly bootless and useless to stand upon the floor of the Senate and argue as to the quantity of diversion that may be necessary at the present time, or at any time within the next decade, in order to purify the waters in Chicago Harbor, in order to provide for pumping in its sewage plants, or in order to provide what may be necessary for present navigation in the Lakes-to-Gulf waterway.

It is sufficient to point out that, within the opinion of the engineers who have studied the question, it would be foolish, and, I may say, foolhardy, to undertake at this time to prescribe a definite quantity of diversion from Lake Michigan into this waterway, because it is a problem that can be settled only in the womb of time; it is a problem that can be settled only by actual experience; it is a matter that can be determined only after the Supreme Court decree shall have been put into effect, and after waiting for a period of years in observation of what will be the result.

Mr. President, we are not dealing now with a proposed act of Congress. We are not proposing to enact a law providing what may be a proper diversion from Lake Michigan. If that were the question before the Senate we might very well incorporate into an act of the legislature the decree of the Supreme Court of the United States. We might very well place any other limitation that in our judgment we thought proper, because if we were wrong, if experience should show that we were wrong, another Congress could repeal what we had done. But in the face of this uncertainty, in the face of the discrepancies in the opinion of the different engineers, in the face of their wholesome advice that it would be unsound at the present time to undertake to fix any definite quantity of diversion from Lake Michigan, it is proposed not for a decade, not for 100 years, but for all time to come that we enter into a compact with another nation placing a definite, prescribed limit upon the quantity of diversion. It is proposed that we now undertake to prescribe the limit of the waters it may be necessary to divert, either for the purification of the Chicago River or in order to make a commercially useful navigable waterway from the Lakes to the Gulf without any regard to future demands and future exigencies and future requirements.

We are asked to make this sacrifice on the part of an all-American waterway, on the part of a transcontinental waterway, on the part of the most important waterway in the American Continent, and, I may say, in the world.

What was the main purpose of the acquisition of the Louisiana Territory? Was it simply in order to acquire that vast domain, or did it have another purpose?

Mr. Jefferson, who negotiated the treaty, declared in unmistakable language that one of the main purposes in the acquisition of this Territory was in order to obtain "an uncontrolled navigation" and "an independent outlet" for our commerce through acquiring the property and control of the Mississippi River and its tributaries.

In his third annual message to Congress on October 17, 1803, Mr. Jefferson, as President of the United States, recommending the Louisiana Purchase, said:

While the property and sovereignty of the Mississippi and its waters secure an independent outlet for the produce of the Western States and an uncontrolled navigation through their whole course, free from collision with other powers and the dangers to our peace from that source, the fertility of the country, its climate and extent, promise in due season important aids to our Treasury, an ample provision for our posterity, and a wide-spread field for the blessings of freedom and equal laws.

It will be noted that Mr. Jefferson stressed, in recommending the Louisiana Purchase, that the Mississippi and its waters would become the property and under the sovereignty of the United States; that the Mississippi and its waters would provide an independent outlet for the produce of the Western States; and that we would enjoy an uncontrolled navigation through the whole course of that great stream and its waters; and that this uncontrolled navigation and this sovereignty would be free from collision with other powers and dangers to our peace from that source.

When the Senator from Illinois [Mr. LEWIS] not long ago in discussing the treaty referred to what Senator Lodge and other statesmen who had served in this Chamber in times past had to say with reference to the danger of collision with a foreign power if we should enter into a treaty of this character, under which we would not have an uncontrolled navigation and an independent outlet, but under which the sea-

way would be under the domination and under the control very largely, and in some parts exclusively, of a foreign nation, the Senator from Illinois could have cited as further authority for that contention the warning given by Mr. Jefferson that where a stream of vital importance is subject to dual control it is apt to bring us into collision with foreign powers and to offer constantly a menace to our peace and to our security. I now bring to the attention of the learned and eloquent Senator from Illinois that statement and that warning of Mr. Jefferson in his message to Congress in reference to the acquisition of the Louisiana Territory.

Mr. LEWIS. Mr. President, may I be pardoned if I interrupt the Senator from Louisiana?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Illinois?

Mr. OVERTON. I yield.

Mr. LEWIS. I merely desire to say that the able Senator from Louisiana has brought to my attention a document that I confide was unknown to me before. I thank him for his reference. I shall gladly avail myself of its contents.

Mr. OVERTON. Mr. President, following that thought for a moment, this is the question with which we are confronted: Shall we enter into a treaty that undertakes to place a control upon the most important waterway of these United States? Shall we undertake to enter into a treaty that surrenders the absolute independence of that great waterway which Mr. Jefferson had in mind when he acquired the Mississippi River in effecting the Louisiana Purchase? Shall we undertake to surrender, to a limited extent, at least, sovereignty over another great water, Lake Michigan, belonging to the United States and within its control and within its jurisdiction and within its domain? And shall we do all this in order to embark upon a venture that will give us—what? Not an independent outlet for our commerce, as suggested by Mr. Jefferson, not an uncontrolled navigation, not a stream that will not bring us into conflict with other powers and not be a menace to our peace and our security, but, on the contrary, to surrender our absolute control and dominion and sovereignty over an all-American waterway in order to enter into a pact with another nation that will be attended with all the evils that Mr. Jefferson prophesied in the statement he made to Congress in transmitting his message in reference to the Louisiana Purchase?

Mr. President, I stated that I appeared in the interest of the Mississippi Valley and that I wished to discuss this question solely from the standpoint of the interests of the Lakes-to-the-Gulf waterway. Much has been said in reference to the commerce of the Great Lakes and the commerce that would be carried through the proposed St. Lawrence seaway. I wish to submit some figures and have them incorporated into the RECORD in respect to the water-borne commerce on the Mississippi River and its tributaries. I take the figures from the Annual 1933 Report of the Chief of Engineers of the United States Army.

In 1932 the net total water-borne tonnage on the Mississippi River and its tributaries was 38,563,515; and the value of that tonnage was $504,236,182.

In 1932 the net total water-borne tonnage on the Mississippi from Minneapolis to New Orleans was 14,706,343, of a value $329,320,620.

In 1932 the net tons of water-borne imports into New Orleans were 1,938,698, of a value of $65,880,879.

In 1932 the net tons of water-borne exports out of New Orleans were 1,766,183, of a value of $118,359,802.

In 1932 the total net tons of water-borne commerce in and out of New Orleans were 10,491,084, valued at $448,898,262.

The PRESIDING OFFICER (Mr. LOGAN in the chair). The time of the Senator from Louisiana has expired.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXPENSES OF ADJUSTING CLAIMS WITH TURKISH REPUBLIC (H.DOC. NO. 283)

As in legislative session,

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed, as follows:

To the Congress of the United States:

I commend to the favorable consideration of the Congress the enclosed report from the Secretary of State, to the end that legislation may be enacted authorizing an appropriation in the sum of $90,000, or so much thereof as may be necessary, for the expenses of representatives of the United States to meet at Istanbul, Turkey, with representatives of the Turkish Republic, for the purpose of examining the claims presented by either Government against the other, and for the expense of proceedings before an umpire if necessary.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 13, 1934.*

(Enclosure: Reports of the Secretary of State.)

CLAIMS OF OFFICERS AND EMPLOYEES OF THE FOREIGN SERVICE (H.DOC. NO. 284)

As in legislative session,

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed, as follows:

To the Congress of the United States:

I enclose herewith a report which the Secretary of State has addressed to me in regard to claims of certain officers and employees of the Foreign Service of the United States for reimbursement of losses sustained by them by reason of catastrophes, war, and other causes, during or incident to their service in foreign countries.

I recommend that an appropriation in the amount suggested by the Secretary of State be authorized in order to relieve these officers and employees of the Government of the burden these losses have occasioned.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 13, 1934.*

(Enclosures: Report of the Secretary of State, with enclosures.)

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate, as in Committee of the Whole, and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed on July 18, 1932.

Mr. WALSH. Mr. President, for generations men have dreamed of constructing a deep waterway between the Atlantic Ocean and the Great Lakes. That dream has now taken concrete form in the St. Lawrence navigation and power project as embodied in the treaty with Canada now before us for ratification. We are no longer dealing with a theory but instead with a particular plan, the merits of which have been the subject of long and deep-seated controversy.

This stupendous undertaking is in no sense a Democratic Party issue. Its consideration was inaugurated under the Coolidge administration, and its leading official advocate since its inception has been Herbert Hoover. It is not an emergency measure. It is not an essential ingredient of the new deal except by adoption.

In its consideration on its merits I readily concede that we should put the national interest above local interest. I do not charge that the proponents of the St. Lawrence project are actuated solely by considerations of the benefits

which they profess to believe will accrue to their particular area. Similarly I deplore the claim of the proponents that those who do not agree with them and who oppose the undertaking are actuated by local and by selfish considerations.

New England, in large part, has believed that the St. Lawrence development would be detrimental to New England trade and commerce. It is hardly debatable that if the St. Lawrence waterway lived up to the claim now made for it, much commerce now enjoyed by the North Atlantic ports of our country would be diverted. I have stood ready to subordinate local considerations to the larger good of the country as a whole, had I been able to persuade myself that the ratification of this treaty and the execution of the vast enterprise therein provided for would be in fact of manifest national benefit.

After earnest and conscientious consideration I have been unable to reach any such conclusion. Instead, I conclude that the benefits and advantages are more fancied than they are real and that the drawbacks and defects have been grossly minimized or ignored and that the project as now conceived, in the light of present-day actualities, is economically unsound and deserves to be characterized as the great delusion.

Accordingly I am opposed to the ratification of the treaty, and shall so vote.

The proposition which we have before us is twofold. It is a navigation project and a power project. Each presents fundamental questions of public policy and of economic justification, concerning which there is the widest difference of opinion. But certainly the power development alone cannot afford justification for the navigation project if the latter is unsound.

It is entirely possible to be in favor of public development of hydroelectric power and, indeed, to be in favor of the particular power development herein proposed, and yet be opposed to the St. Lawrence project in its entirety, as is the junior Senator from New York.

My personal view has been that the power aspects of the St. Lawrence development have been greatly overemphasized and that the public benefits have been considerably exaggerated. Very serious questions have been raised as to whether the power can be disposed of in existing markets at a price sufficient to cover the cost of production and distribution. These considerations, however, need not concern us, but are rather the concern of the State of New York, because by the terms of Joint Resolution 43, now before the Senate, New York State is to have title to all the power on the American side and in return the State undertakes to pay to the Federal Government the sum of $89,726,000 as its share of the cost of the project.

The benefits or otherwise of the water-power development, therefore, can neither justify the St. Lawrence project as a whole, if, as a whole, it is economically unsound, nor afford ground for its rejection, if the project in its major aspects as a great inland waterway is worthy.

Incidentally, it is to be noted that the junior Senator from New York, who opposes the ratification of this treaty, but who is an ardent advocate of St. Lawrence power development, gives it as his opinion that the Canadian Government would assent to a reconsideration of the power project alone and that it would be entirely possible to work out an international agreement limited to power development.

It is to the waterway aspect of the proposition that I propose to address myself. Here, at once, we enter the realm of the most violent controversies as to what the total cost of the enterprise will be; as to what will be the character and extent of the commerce which will utilize the waterway; as to the extent of the reduction of transportation costs; as to the effect of such reduction on our export trade; as to the benefits to American agriculture; as to the effects upon existing transportation facilities; as to whether Canada or the United States will benefit more, or to what extent at the other's expense; as to water diversion in Lake Michigan; as to effects on our Mississippi waterway program, and so on ad infinitum.

Let us consider first those matters upon which there can be no dispute.

First, is the fact, that by reason of climatic conditions, the waterway will be impassable to navigation 5 months out of every year. Second, that the engineering plans now agreed upon, and upon which the cost estimates are based, provide for a channel of a depth of 27 feet; that such a depth excludes from the waterway the larger ocean-going vessels.

Obviously, the two foregoing factors place certain inescapable limitations upon the character of transoceanic shipping facilities which will utilize the waterway.

The Chairman of the Foreign Relations Committee, the distinguished Senator from Nevada [Mr. PITTMAN], says that according to the Interstate Commerce Commission 70 percent of the ocean-going tonnage of the world is at or below 26-foot draft. I do not dispute that statement. But I suggest, nevertheless, that it is not a question of percentage, but rather the fact that the very large number of ocean vessels of the so-called "first-class" now operated by established ship lines would be automatically excluded from the waterway.

Third, is the fact, and I believe it will be conceded by all fair-minded persons to be a fact, that railway traffic congestion alleged to have existed a decade ago has long since disappeared, and that as matters stand today existing rail facilities in the interior and shipping facilities at the seaboard are more than adequate for the movement of all of our freight. In other words, that we are not proposing to build the St. Lawrence waterway to provide facilities now lacking, but rather to supplant and supersede existing transportation facilities.

I am not arguing at the moment whether a shift of traffic from our own railroads and our own Atlantic coast ports to the St. Lawrence waterway is desirable or undesirable. I am merely pointing out that such a shift is an inherent factor in the waterways proposal.

I am mindful of the argument of many of the proponents, that the St. Lawrence waterway will enormously reduce transportation costs from the interior to the seaboard and overseas; that such reduction will prove such a stimulus to trade and commerce; that it will expand so greatly as to multiply freight tonnage so that even though the waterway is crowded with ships, our present traffic facilities will suffer no loss but will, in fact, be the gainers.

The Panama Canal is a favorite example to bolster this contention—the Canal was built and prospered, our country grew and prospered, our rail traffic increased, hence the Panama Canal helped the railroads rather than hurt them.

This process of reasoning, so far as the Panama Canal is concerned, I regard as of dubious validity; but, in any event, inapplicable to the matter now before us. I am not decrying the Panama Canal, but merely expressing the view that with or without the Panama Canal our country during the past 30 years was destined to go through an era of enormous expansion in agriculture and industry, in trade and commerce.

I see no such expansion ahead for the next 30 years, either with or without the St. Lawrence waterway. We are emerging from the depths of the depression. We are building a new economic and social order. We may achieve better distribution of jobs and of wages and profits. But no one is contemplating doubling or trebling production, either in agriculture or in industry. Indeed, our leaders are counseling that the way back to normalcy is to limit and to curtail production. Yet in the St. Lawrence waterway project we are proposing to create new and increased shipping facilities, when we expect to have less commodities to ship in the future than in the past.

I hold no brief for the railroads. I am quite willing to subscribe to much that has been said in this Chamber in the course of this debate in censure of the short-sightedness and greed of railroad managers. But I do not share the conviction expressed by the President, in his message to us—

> That the building of the St. Lawrence seaway will not injure the railroads or throw their employees out of work.

My own opinion is to the contrary. But, for myself, I should be willing to cast my vote for this project, even believing that its consummation will be prejudicial to the railroads, if I were convinced that the seaway will prove to be the great boon for the entire Nation which is claimed for it.

As I said earlier, in my own judgment this is a great delusion.

Let me turn now to the question of cost. Let us be fair and concede that the cost ought to be a factor to be reckoned with in measuring the economic desirability of the enterprise.

I am mindful of the present trend of the times when it comes to questions of governmental expenditures for public works, that the cost is of trifling consequence if the project proposes to be economically and socially desirable, and that from the standpoint of priming the pump of business, the bigger the expenditure the better. We now deal as freely with a billion dollars as we once did with a million dollars.

At a moment when the administration is trying to find new ventures into which to pour public funds as a means of recovery, and when Congress and the country applaud such a program, it may seem to be of small consequence what the cost of the St. Lawrence seaway may be, whether it be a quarter of a billion dollars or a half a billion or a billion. What does it matter? The Treasury will have no difficulty in floating bonds to provide the cash. The money will be spent for labor and materials. A dream of linking the Great Lakes to the Atlantic Ocean will be realized.

But for myself, I cannot so lightly pass over the question of the cost. If it is worth the price, let us pay the price, but not otherwise.

When we pass the appropriation bills for the ordinary purposes of the Government we scrutinize every item and haggle over a few thousand dollars. On the plea of economy and retrenchment we cut Government salaries 15 percent or 10 percent. We slash veterans' compensations. We refuse to cash the bonus certificates. But for public works the sky is the limit. We cannot know whether the St. Lawrence project is worth the price unless we know what the price is.

We have some cost estimates made by the Joint Board of Engineers. In round figures they assign $272,000,000 as the share of the cost of the project which the United States will be called upon to pay. In this total are some items already done and paid for with respect to lake channels. Approximately $14,000,000 has already been so spent, which, if deducted from the $272,000,000, leaves $258,000,000 as the prospective future cost so far as the United States is concerned. I shall not dispute these estimates. There is every reason to suppose that they are as accurate as is ever possible in an undertaking of this character.

But this much may be said: That engineering estimates on waterways projects have almost invariably been wide of the mark. Actual costs have usually vastly exceeded the estimates. The junior Senator from New York, in his very able and penetrating report in opposition to the treaty, has assembled some arresting examples on this score. He points out that in the case of the Chicago Drainage Canal; the estimate was sixteen million and the cost fifty-three million. The Suez Canal cost eighty million instead of thirty million. The first estimate for the Welland Canal was forty million. The estimate in 1926 of the Joint Board of Engineers was one hundred and fourteen million, the actual cost one hundred and twenty-eight million.

In the light of such past experience, what assurance can there be that the cost to our Federal Treasury and to our taxpayers will be only a paltry quarter of a billion dollars? The answer, it seems to me, is that there can be no such assurance.

I am aware also, that by deducting from the cost of the project the $89,000,000 proposed to be paid out of the treasury of the State of New York to the Treasury of the United States, the assumed net cost to the Federal Government is reduced by this sum and is stated to be in round figures $182,000,000.

There are, however, many elements of cost, if one is to arrive at the true total cost of the project, for which no estimate is included but which are none the less real and inescapable.

Eight years at least will elapse between the commencement of the expenditures and the opening of the waterway to service. It may be longer than that. For 8 years, at least, there will be no return on the investment. Meantime, the Public Treasury is paying interest to someone on the money borrowed and expended. When we begin to deal with several hundred millions of dollars over a term of several years, the interest item is a sizeable sum—two or three or four million dollars per hundred million per year, according to the rate. Senator WAGNER figures the interest item, prior to the opening of the seaway, as $40,000,000. Call it $25,000,000 if you prefer. Even so, it is the price of two hundred and fifty $100,000 post offices.

Harbor improvements and port development of the lake cities is another item, and a very large item, which has been entirely left out of the reckoning. I shall be glad to be corrected if I am in error, but my information is that none of the lake cities have harbor facilities and terminal facilities today adequate to the character and volume of ocean-going ships which this seaway project envisages.

In the light of our past history, we may properly anticipate friendly rivalry between the lake cities to outdo one another in their plans for deep harbors, for breakwaters, for docks, for piers, and all the other appurtenances of a seaport. And all out of the Public Treasury, Federal or local.

What shall we say as to this element of the cost of this new traffic artery from the Great Lakes to the Atlantic—$10,000,000 per port, or twenty million or thirty million? This is no flight of fancy. It is a very real part of the expenditures upon which we embark once we start this great project.

Let us not deceive either ourselves or deceive the country as to the financial side of the enterprise. If and when this project is carried to its final conclusion, the aggregate costs to our own country and our citizens in one way or another, will be nearer $500,000,000 than two hundred and fifty million; and, for myself, I am inclined to accept the view of those who say the cost will exceed five hundred million. Bear in mind that I am leaving entirely out of the reckoning the costs to be borne by Canada, which run into other hundreds of millions of Canadian dollars.

Once upon a time there was a popular notion that the power development, the by-product of the seaway, was going to support the navigation costs; that the revenues from the power would, in the final analysis, pay not only for the power, but pay the capital costs of the whole project.

If there was any validity to such a theory, it is now entirely destroyed by reason of the impending deal between the Federal Government and the State of New York whereby the State, upon the completion of the power project, purchases it in its entirety from the Federal Government for $89,000,000. That sum will reimburse the Government for that portion of the original construction cost assigned to power. After that payment it will leave the Federal Government with the seaway minus hydroelectric power, and with a total investment, whatever that total may be, minus $89,000,000.

It is going to cost something to operate the St. Lawrence seaway. Operation of the Panama Canal last year cost $10,000,000. The St. Lawrence will have more mileage, more harbors, winter ice to contend with, and 16 or 17 locks as compared with 6 at Panama. Is $12,000,000 too high an estimate of annual operating cost? I think not. The United States and Canada will each pay one half. So American taxpayers must assume a charge for operation of the waterway of not less than $6,000,000 per year in perpetuity.

But that is the least of it. What about the capital investment? When we borrow the money we pay interest on it. Are we to charge against the seaway the interest on the investment? Are we to charge depreciation and for a sink-

ing fund to amortize the cost? Is it to be a self-liquidating enterprise, about which it is now so popular to talk, or is the cost to be charged up to the general welfare as a bounty to our inland empire?

I know the answer of the proponents of the project to this aspect of the matter. It is that the Board of Army Engineers has calculated the cost of operation and maintenance, and of interest and amortization in 50 years, and that the engineers fix the figure at $9,300,000 as the total annual cost.

The fallacy of this calculation, in my view of the matter, lies in the fact that these calculations are based on an assumed net cost of less than $200,000,000, whereas our actual total expenditures will be double, perhaps treble, this amount.

There are no toll bridges on the high seas, no rights-of-way to buy and maintain, no tracks to lay, no switches to operate. It is perfectly easy to understand, therefore, why ocean transportation, mile for mile and ton for ton costs less than rail transportation. As it is visualized by the proponents of the St. Lawrence project, we are to construct a seaway which will permit the passage of ocean vessels from across the seas to the ports on our inland lakes and to give them this inland passage free of charge. Any schoolboy can comprehend that the transportation cost from the mouth of the St. Lawrence to Duluth can be less and ought to be less than the cost of a combination water and rail transportation from Duluth to Buffalo to Boston.

Let us recognize, however, that we are proposing a large subsidy. Let us recognize that if we assessed against every ton of freight which traverses the St. Lawrence seaway its pro rata share of cost and upkeep, then, mile for mile and ton for ton this transportation cost would equal, if not exceed, the transportation costs over existing routes and existing facilities from the interior to the seaboard.

Who will benefit by this subsidy? It is easy to talk in glowing generalities about the economic and transportation needs of a vast area. It is easy to theorize about what 5 cents or 6 cents or 7 cents per bushel of wheat in lowered transportation cost means in dollars to the wheat grower, assuming that he retains this extra price advantage.

The proponents of this project conjure visions of a great revival in export trade, not only in grains, but in other commodities, as a consequence of the physical ability of a ship not over 26-foot draft to move under its own power from the Seven Seas of the world to our cities on the Great Lakes.

I am unable to perceive any reality in such visions under present-day conditions in the world or for as far ahead as we can project the future. It seems to me perfectly apparent that our foreign trade in grains, or in any other commodity, is dependent upon a variety of factors in world affairs, many of them entirely beyond our control, and most of them of so fundamental a character that a trivial variation in transportation costs will not have the slightest appreciable effect.

I shall not take the time of the Senate to review and to analyze the mass of data relating to the potential volume of American freight tonnage which may be expected to utilize the St. Lawrence seaway, if it be built. Many hypotheses have been advanced by a wide variety of expert calculators who have reached widely divergent conclusions. It is pertinent to point out, however, that the estimates usually cited by the proponents, as evidencing a prospective large volume of traffic, are of predepression vintage at a time when our trade and commerce, domestic and foreign, was not only booming and at its near peak but when the prevailing assumption was that we were nowhere near the top. Furthermore, many of the estimates dealt with total available traffic without reference to how much or how little of it would be transferred from other existing transportation routes and facilities to the St. Lawrence route.

To quote the tonnage figures employed in these estimates as if they were definite and authoritative calculations of the actual St. Lawrence seaway traffic is utterly misleading in the light of present-day conditions.

I commend to the attention of every Senator who approaches this question with an open mind, the concise and penetrating analysis of the traffic aspect contained in the minority report of the junior Senator from New York [Mr. WAGNER]. I am quite prepared to reach the same conclusion that he does, that the total movement of United States trade on the route would amount to not more than 5,500,000 tons in normal times; very much less than that, of course, under present conditions when the export grain trade is at such low ebb.

I am mindful of the fact that, if I contend that the final consequence of the matter will be that the American taxpayers, through their shouldering of the capital costs of the project, are thereby to contribute $5 per ton, year in and year out, toward the movement of every ton of United States freight on the St. Lawrence seaway, it will be argued that I have overlooked the indirect benefits which will accrue if the St. Lawrence seaway serves to reduce transportation costs of all tonnage over all routes.

I have not overlooked that aspect of the question, but I am exceedingly skeptical as to whether any such general lowering of transportation costs would thereby result.

If existing transportation costs are excessive, there are ample remedies at hand to reduce them without spending a half a billion dollars to create a birch rod for that purpose. Every medium of transport in this country is today exerting itself as never before to obtain freight. There is not enough freight to support existing transport facilities at any rate, high or low. Why should we spend Government funds in huge amounts to add to the surplus of transport facilities when we are denouncing the short-sightedness of private business for their capital outlays in creating excess-production facilities?

We are advised by the President that in his opinion, if we do not build the St. Lawrence seaway in conjunction with Canada, the latter will ultimately complete a ship channel between the Lakes and Montreal entirely in Canadian territory on her own account and at her own expense.

I am unable to view that possibility as in the nature of a national calamity to the United States. Canadian trade and commerce will benefit much or little by a waterway from the Lakes to the sea, but how much or how little will not depend on whether the seaway is national or international, whether we pay for half of it or pay for none of it.

If Canada elected to close her waterway to our commerce—a most unlikely supposition—we would still have every transport facility we already possess; and they are ample. If our commerce were admitted to her waterway, even if we were charged something for the privilege, we would have escaped perhaps half a billion dollars of capital expenditures. The fact of the matter is that Canada has offered every inducement within her power to divert our export shipments from our own North Atlantic ports to Montreal, and is apt to continue to do so whether the seaway be international or wholly Canadian.

Bear in mind, also, that the St. Lawrence project as now conceived is of our seeking rather than Canada's seeking; that Canada has not ratified the treaty—declines to consider the treaty unless and until we ratify it. And there can be no explicit assurance that Canada will ever ratify it.

I have said nothing about an aspect of this treaty which agitates the Senator from Illinois and some others, whose constituencies are immediately concerned with the question of diversion of water from Lake Michigan. I have not undertaken to reach any conclusion on the water-diversion issue. It was unnecessary for me to do so by reason of the fact that I am opposed to the project for other and more fundamental considerations. Nor do I fear that this seaway exposes us to a foreign invasion by armed armadas.

I am opposed to the St. Lawrence project and to the ratification of this treaty because I conclude that the claimed benefits to our own trade and commerce are largely mythical, and I can find no justification for a stupendous expenditure of public funds in an enterprise of such dubious economic value.

The project is a heritage of the profligate past when we were dazzled by visions of limitless expansion of our trade and commerce, domestic and foreign, and when we dreamed of perpetual prosperity with a capital P. Examined in the sober realities of the present day, it is both unnecessary and imprudent.

I regret to differ from the President on this question, but I feel constrained to do so.

I believe that the Senate should withhold its sanction of the treaty.

APPROPRIATIONS FOR THE STATE, JUSTICE, ETC., DEPARTMENTS

As in legislative session,

Mr. McKELLAR. Mr. President, on March 10 the Senate passed House bill 7513, the State, Justice, Commerce, and Labor appropriation bill for 1935. I move that the Senate insist upon its amendments, ask for a conference with the House thereon, and that the Chair appoint conferees on the part of the Senate.

Mr. McNARY. Mr. President, is the motion made in legislative session?

Mr. McKELLAR. As in legislative session.

The PRESIDING OFFICER (Mr. ERICKSON in the chair). The question is on the motion of the Senator from Tennessee.

The motion was agreed to; and the Presiding Officer appointed Mr. McKELLAR, Mr. RUSSELL, Mr. PITTMAN, Mr. HALE, and Mr. NYE conferees on the part of the Senate.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate, as in Committee of the Whole, and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed on July 18, 1932.

Mr. LOGAN. Mr. President, I have listened during several weeks to the arguments advanced for and against the ratification of this treaty. I believe those who have argued against its ratification have done more to convince me that I should vote for it than those who have argued for it.

The Senators who oppose the treaty are of outstanding ability. They have made great research. Their investigations have gone far afield. Their arguments have been presented to this body and to the American people, but I am constrained to say that they are not convincing. If no other arguments can be presented—and I know they cannot, or these able and distinguished Senators would have presented them—I am quite sure there is every reason why we should ratify the treaty and almost no reason why we should not do so.

The opponents of the treaty base their opposition on technical matters, on small things. They find that Canada probably will use more labor of Canadian extraction than we think it should, or that perhaps Canada will furnish more material than some of the opponents of the treaty think it should furnish. Questions such as that are of almost no importance when it comes to the consideration of one of the greatest improvements of all ages.

It has always been considered by every nation that seacoast was of great importance to it. The greater the seacoast, the greater the nation. Wars have been fought in every age by nations seeking an outlet to the sea. Wherever there is seacoast, great cities grow up; industries are developed; business is increased; and, as I see it, if this treaty shall be ratified there will be many great seacoast cities that never can exist or develop if it shall not be ratified.

Wherever we have industry we have work, and where we have work we have purchasing power, and when we have purchasing power widely distributed we have prosperity.

There is another, as it seems to me, convincing reason why we ought to ratify this treaty which has not been greatly discussed. I am somewhat surprised at the senior Senator from Louisiana [Mr. LONG], who is always making speeches to this body about the distribution of wealth. Wealth has been concentrated in the more populous districts of the East because of the fact that they have control of commerce by reason of their location on the sea.

I do not know of anything that would distribute population and wealth and industry more widely than the construction of the great St. Lawrence seaway. Instead of those who invest in industry being forced to go to the great cities of New York or Boston in order to find a place where they may advantageously start a business, they could do so in Duluth or in any of the other towns, now small, which surround the Great Lakes. Instead of everything going through a few of the ports on the Atlantic seaboard, we would have business developing on a coast 3,000 miles in length.

It seems to me that those who oppose the ratification of the pending treaty are very much in the attitude of a visitor who might view the great painting of Leonardo da Vinci, The Last Supper. He looks upon it and finds that perhaps there is a wrinkle in the coat sleeve of Peter, or that perhaps Judas Iscariot has one more eyebrow over one eye than he has over the other, or that there is some little dot or speck in the countenance of one of the Twelve Apostles, and because he finds these few things, which he thinks are defects, he at once condemns that great painting and says that it ought to be discarded because there are imperfections in it.

We find the same attitude on the part of those who oppose the treaty. They advance one small reason and another small reason; but when we analyze them all we find there is but one reason, and that is selfishness, a failure to take a national view, to attempt to do that which will be for the best interests of all the people throughout the entire United States.

I know that we are prone to look at our own homes and our own States, and we seek to secure for them that to which they are not justly entitled, perhaps, and in doing so we leave uncared for many of the great regions of the United States which are justly entitled to our consideration.

I believe that the Senate of the United States ought to take a national view of all questions which may arise. I can well understand why the cities of the East may oppose this treaty; it would take from them, perhaps, something they already have; but, in my judgment, it would develop even a greater business. As was said by the distinguished Senator from Nebraska yesterday, we may have some changes in industry or in transportation, but they will all adjust themselves; and I am persuaded that in the end we will have greater industry and more transportation than we have ever had in the past. When the railroads, looking at the proposal in a short-sighted manner, as it seems to me, contend that they will lose business, I think they are wholly wrong, as they nearly always have been about all public questions which concern their interest. It seems to me that, instead of the railroad companies being greatly harmed, the new business which will be developed about the Lakes will make for more transportation and that they will be better off.

Mr. President, I am very greatly impressed with the suggestions made by the Senator from Nebraska yesterday when he said those States on the Western plains have helped us in many of our great national enterprises, and yet some of us are, so it seems, turning a deaf ear to their demands at this time.

I desire to call attention briefly to another phase of this matter. In his message to the Senate the President set at rest most of the "local fears of economic harm to special localities or to special interests" which, as he correctly stated, have been "grossly exaggerated" in the consideration of the Great Lakes-St. Lawrence project. Let me say here that since this project has been under consideration, I believe there have been 5 Presidents of the United States, beginning with Mr. Wilson and ending with Mr. Roosevelt. Every one of those Presidents, 2 of them Democrats and 3 of them Republicans, has done all within his power to further agreement on and the ratification of this treaty. But we are told by some Senators that those Presidents were mistaken, that the Army engineers were mistaken and that only those who argue for the treaty here have sufficient wisdom to advise the American people what ought to be done about this question.

The President in his message called attention to the fact that Canada can complete the seaway on her own side of

the international boundary, if the United States refuses to cooperate in the project by ratification of the pending treaty. This, in my judgment, constitutes a graver danger to American interests than any of the imaginary fears which have been conjured up in this debate in an attempt to defeat the President's policy.

The President has clearly stated the condition that actually exists in respect to the St. Lawrence River, as follows:

> Canada and the United States are possessed of a natural flow of water from near the center of the continent to the ocean—a flow which throughout the greater part of its length is today available for navigation by large-size vessels. A system of locks at the eastern end of Lake Superior, a dredged channel between Lake Huron and Lake Erie and another series of great locks between Lake Erie and Lake Ontario provide free and adequate navigation to a point well down the St. Lawrence River. From there a series of three rapids, all of them within a distance of 120 miles, now impede navigation by ocean-going vessels, but a Canadian canal already provides facilities for smaller ships. This Canadian canal now is used substantially up to its capacity.
>
> Two of the three rapids are wholly in Canadian territory; the other is in the so-called "international" section. A great power development at the Beauharnois Rapids in Canada is already nearing completion and locks for ocean-going ships have been planned for and could readily be built at a low cost as part of the plan. This means that only two additional series of locks are required for a complete and continuous seaway from Duluth to salt water. I call your attention to the simple fact that Canada alone can, if desired, build locks at the Lachine Rapids and at the international sector and thus provide a seaway wholly within Canadian control without treaty participation by the United States. This, however, would be a reversal of the policy of cooperation which the United States and Canada have continuously maintained for generations.
>
> I want to make it very clear that this great international highway for shipping is without any question going to be completed in the near future and that this completion should be carried out by both nations instead of by one.

In the debate on March 12 the Senator from Missouri [Mr. CLARK] indicated that the President was referring to an all-Canadian route from Georgian Bay through the Ottawa River to the St. Lawrence. This is not the fact, as a careful reading of the message will disclose. On the contrary, the President made specific reference to the possibility that Canada might "build locks at the Lachine Rapids and at the international sector" in the St. Lawrence River itself, and "thus provide a seaway wholly within Canadian control."

Senators opposing the treaty overlook the fact that a waterway 2,350 miles long already exists from Duluth-Superior at the western end of the Great Lakes through Lake Ontario to Prescott, Ontario, with a minimum depth of 21 feet. Between Prescott, Ontario, and the city of Montreal, on the St. Lawrence River, there are now 47 miles of 14-foot canals, all of them located on the Canadian side of the international boundary in the St. Lawrence River. These canals have been built at Canadian expense around the series of three rapids above the city of Montreal, which will remain the head of navigation on the St. Lawrence River if this treaty is rejected. From Montreal to the Atlantic Ocean, a distance of 1,000 miles, through the St. Lawrence River and the Gulf of St. Lawrence, Canada has already provided a 30-foot channel, with an expenditure of millions, for which she does not receive a dollar of credit in the terms of this treaty.

The 14-foot Canadian canals above Montreal have an annual tonnage of seven or eight million tons, and even in this time of depression have virtually reached their capacity. By deepening the canals and providing additional locks Canada can unquestionably provide a seaway as completely under her control at the Fourth Welland Canal around Niagara Falls, which the Dominion recently completed at a cost of $128,000,000.

It is therefore evident that the pending treaty offers the United States an opportunity to share in a great cooperative enterprise with a friendly neighboring nation which will be sacrificed if the treaty is rejected. The result would inevitably be that while Canada utilized to the full a great natural resource which should be of equal advantage to Canada and the United States, this country, by a narrow, selfish, and grasping policy, would be forever excluded from the equal benefits the use of the Great Lakes-St. Lawrence system should insure to our people.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Illinois?

Mr. LOGAN. I yield.

Mr. LEWIS. With no desire to interrupt the discussion of the Senator, and conscious, as I am, of his superior learning, both as to law and as to domestic policy, I ask him, assuming that Canada should find it agreeable to cut this waterway as a distinctive Canadian waterway, own and control it as a Canadian waterway, where does my friend find any obstruction in America doing likewise with her waters, cutting a distinctive American waterway right through her country on to the sea? Where is the disadvantage in both waterways existing, may I ask the able Senator?

Mr. LOGAN. I think it would be exceedingly unwise, when we have an opportunity to have some control over this seaway in Canada, for us to throw away that opportunity and say that this canal may be built by Canada and controlled by Canada, and if we want to get to the sea, we will have to build some other seaway. It seems to me it would be uneconomical if we should say, when we can come in and jointly build a great seaway and jointly have some control over it, that we will abandon that opportunity, and attempt to build a seaway through some part of the United States.

Mr. LEWIS. May I ask the able Senator, if he will allow me to interrupt him, why it would not be equally just for us to ask Canada to join with us in building the canal through American territory, and where it connects with Canada or Canadian waters at any point, why not come in with us and join with us? Is there not the same privilege awarded Canada in joining us as is assumed to be awarded America in joining Canada?

Mr. LOGAN. That is not what is provided by the treaty.

Mr. LEWIS. That is correct.

Mr. LOGAN. The treaty has been worked out in the minds of the American statesmen, upon the recommendations of the engineers of the United States and Canada, and they have determined that the route we are discussing is the best route, and that this is the best way possible to utilize the advantages that may come from a seaway from the Great Lakes to the Atlantic Ocean.

Mr. LEWIS. Then does the able Senator feel that there would be an economic disadvantage to have the canal cut through Canada, or does he think a saving in expense could be effected by joining Canada rather than having one cut through America?

Mr. LOGAN. I do not mean to say that. I think the expense is not worthy of consideration when we are considering a matter of the construction of something which will endure throughout the ages. I do not think the matter of expense is of very great importance. I do not know why those who have been working on this project for the past 15 or 20 years, or whatever the time may be, all agree that the St. Lawrence River should be utilized, and that it affords the best route for a waterway of this kind; I do not know why they reached that conclusion; but all the great engineers, all our great statesmen, all except those Senators of the United States who oppose the treaty, have reached the conclusion that this was the best thing to do. And to my mind, after all the study that has been given to the project throughout the years, when a conclusion has been deliberately reached by such men as those who have considered it, their conclusions ought to have some weight with us; at least their conclusions have some weight with me, because they are wiser than I.

It should not be fogotten that the two largest cities of Canada, Montreal and Quebec, already possess the advantage of being located on deep water with harbors giving access to the ocean-going vessels of the world. When the bottle-neck obstruction in the International Rapids section of the St. Lawrence River is removed, Montreal will cease to be the head of navigation on the St. Lawrence River; and great American cities, including Chicago, Milwaukee, Duluth, Toledo, Cleveland, and Detroit, will become seaports

with the same direct access to the ocean which Quebec and Montreal today enjoy.

The ratification of the treaty will insure the right of American cities such as these to ship their products in American bottoms in the coastwise trade to our ports on the Atlantic, Gulf, and Pacific coasts and to the markets of the world without the payment of tolls and with equal rights of navigation guaranteed in perpetuity.

If this treaty is rejected, on the other hand, our American ports on the Great Lakes will either be deprived of access to the ocean for many years to come or, as the President has stated, they will be compelled to ship their products through a waterway controlled by Canada subject to tolls and other regulations prescribed by the Dominion Government.

The President has likewise clearly shown in his message that if the treaty is rejected Canada can develop her rich resources of waterpower on the St. Lawrence River lying wholly within Canadian territory without a treaty with the United States.

In his message the President states:

> This river is a source of incomparably cheap power located in proximity to a great industrial and rural market and within transmission distance of millions of domestic consumers.
>
> The Legislature of the State of New York by unanimous vote set up the necessary State machinery during my term as Governor of New York, and the State stands ready to cooperate with the Federal Government in the distribution of power (from the International Rapids section) in accordance with what I believe is today a definite national policy.
>
> Power in the international sector of the St. Lawrence cannot be developed without a treaty between the United States and Canada. On the other hand, Canada can develop a huge block of new power at the other two rapids which lie wholly within Canadian territory. Here again, as in the case of navigation, it is better in every way that we should maintain the historic principle of accord with Canada in the mutual development of the two nations.

Much confusion has been thrown about the question of the development of water power on the St. Lawrence River during this debate.

It has been stated again and again by Senators opposed to the President's plan that under the treaty Canada will develop 4,000,000 horsepower, or 80 percent of the total, while the United States will receive but 1,000,000 horsepower, or 20 percent. There is no foundation whatever for this statement. A mere glance at the map demonstrates its falsity.

The pending treaty covers only the development of the 2,000,000 horsepower available in the International Rapids section of the St. Lawrence River, and of this Canada receives half and the United States receives half. The treaty does not involve the United States in any expenditure for power developments in those sections of the river located below the International Rapids section in wholly Canadian territory. One of these, the Soulanges Rapids section, is already under development by Canadian private interests. The other, the Lachine Rapids section, can likewise be developed by Canada without the consent of the United States, since it also lies wholly within Canadian territory.

To say that this treaty has anything to do with the development of the 4,000,000 horsepower Canada has available in the Soulanges Rapids and the Lachine Rapids is as ridiculous as to contend that the United States should have entered into a treaty with a foreign government before undertaking the power development at Muscle Shoals.

On the other hand, it is equally evident that neither Canada nor the United States can develop the 2,000,000 horsepower in the International Rapids section of the river without an international agreement. This section of 120 miles of the St. Lawrence River divides the Province of Ontario from the State of New York. This stretch of the river is traversed throughout its length by the international boundary which divides Canada from the United States. Each Nation controls the waters of the river to this boundary line, but neither Nation can build a dam that crosses this line without the consent of the other.

Until some of the opponents of this treaty can devise a method of developing water power from a dam built halfway across a river it will remain impossible for the United States to take advantage of the use of 1,000,000 horsepower of electricity which is now running to waste on the St. Lawrence.

Mr. FRAZIER. Mr. President, I have been very much interested in the development of inland waterways, and the people of the great Middle West and Northwest feel that the Great Lakes-St. Lawrence waterway will be of great benefit to them in the way of reducing their freight rates.

I am also strongly in favor of the development of the Mississippi Waterway. A few years ago I introduced a bill in the Senate which made provision for carrying out a plan that was suggested at that time by a very prominent engineer, the late Carroll L. Riker, for a deep waterway and flood control for the Mississippi River Valley, and I am very strongly convinced that it is the best bill that so far has been proposed for Mississippi flood control and a deep waterway.

The Senator from Missouri a short time ago mentioned a project that had been proposed in North Dakota for diversion of water from the Missouri River. That project is not of the same type as the project by which it is proposed to divert water from Lake Michigan to the Mississippi River. All we in North Dakota propose is to put a retention dam in the Missouri River and take the excess flood waters and divert them into our lakes and streams which are now drying up because of the continued lack of rainfall and dry seasons. By this means we will use the excess flood water to restore the lakes and streams to their former levels, especially in the eastern part of the State. All we ask is to take the excess flood waters, that otherwise go down the river and often do a great deal of damage, all the way from North Dakota down to the Gulf of Mexico. We hope this diversion plan may be adopted as a part of a flood-control and navigation project and for the conservation of water in North Dakota. It will mean a great deal to North Dakota, and we believe that we have good ground for asking for it; we hope that it may ultimately come; and we believe it will come.

Mr. LEWIS. Mr. President, where is that improvement located?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. FRAZIER. Mr. President, I have only a limited time, and I should rather have the Senator wait until I shall have completed my statement before he asks me any questions.

Mr. LEWIS. Mr. President, I merely wished to ask the Senator where is the project he referred to located? In what part of North Dakota?

Mr. FRAZIER. In the northwestern part of the State, on the Missouri River.

Mr. LEWIS. Mr. President, I am seeking information. I do not desire to interrupt the Senator.

Mr. FRAZIER. After the Panama Canal was completed the people of the Pacific coast had quite an advantage over the people of the middle sections of the United States with respect to freight rates, especially on shipments to the Atlantic coast. I remember well when the long-and-short-haul bill was before the Senate a few years ago the statement was repeatedly made that wool could be shipped from the Pacific coast through to Boston, by way of the Panama Canal, at a cheaper rate than wool in carload lots from North Dakota to Boston, which was only about a little over half the distance, showing that the people of the west coast, because of the Panama Canal, have a great advantage in freight rates over those living half-way across the continent. We believe, Mr. President, that if the Great Lakes-St. Lawrence waterway can be constructed we will regain some of the advantage which we lost when the Panama Canal was completed. Not that the people of the Middle West were opposed to the Panama Canal; we were not, because it meant the development of the whole country; and we believe that the Great Lakes-St. Lawrence waterway will mean the de-

velopment of the whole country and be for the welfare of the entire people of the Nation.

Mr. President, on January 10, in a special message to the Senate, the President asked us to ratify the pending treaty for the completion of the Great Lakes-St. Lawrence project. The President urged this action on the broadest national grounds and has since submitted to the Senate the official estimates of cost and economic studies prepared by five separate governmental agencies, covering every aspect of the power and navigation development which this treaty provides.

The treaty itself and the President's message present an issue which is exceedingly simple and wholly nonpartisan. Nevertheless, a determined effort is being made on the floor of the Senate to confuse the issue and, if possible, to prevent the ratification of the treaty. If that effort shall succeed, it will be because sectional and special interests are permitted to outweigh the national interests to which the President appeals, and because the combination of bankers who control both the public utility and railroad corporations of this country are powerful enough to force the betrayal of the pledges made by both political parties in the 1932 campaign.

The Republican platform dealing with this subject was adopted by a unanimous vote on June 14, 1932. That plank was adopted 2 months after President Hoover had received the official report of the Joint Board of Engineers providing for the locks, dams, power houses, and other works which are made an integral part of this treaty.

The treaty itself had been drafted, submitted to the President, and approved by him. Its principal provisions had been published in the press.

Not a single delegate from New England or the North Atlantic coast arose in the convention to oppose this plank or to dissent in any manner whatever from its sweeping pledge to complete this project. Every delegate, every candidate for the House and Senate from the East, and the leading Republicans from that section volutarily proclaimed their support of the Hoover-Curtis ticket and bitterly denounced progressive Republicans of the West and Northwest who would not accept the party nominees and every plank in the platform.

The platform plank on the Great Lakes-St. Lawrence project, adopted by that convention on June 14, reads as follows:

> The Republican Party stands committed to the development of the Great Lakes-St. Lawrence seaway. Under the direction of President Hoover negotiation of a treaty with Canada for this development is now at a favorable point. Recognizing the inestimable benefits which will accrue to the Nation from placing the ports of the Great Lakes on an ocean base, the party reaffirms allegiance to this great project and pledges its best efforts to secure its early completion.

I am 1 of 4 progressive Republican Senators who were read out of the party following the 1924 campaign because we had not supported the Republican nominees and the Republican platform in the campaign of 1924.

In that campaign I gave my support freely and in the most public manner to the late Hon. Robert M. La Follette, whose platform contained a pledge for the completion of the Great Lakes-St. Lawrence seaway. I stated repeatedly during the campaign and before the election that I was supporting the late Senator La Follette on his platform and was not bound by the pledges made in the Republican platform.

After the 1924 campaign early in the next session of the Senate some of the Republican Senators from the East took the leadership in forcing a remarkable resolution through the Republican caucus. They determined to discipline every Republican in this body who had failed to support the Republican candidates on the Republican platform as written.

Pursuant to that resolution, of which I was informed the senior Senator from Pennsylvania and some of his colleagues from the New England States were the authors, four progressive Republican Senators were deprived of their committee assignments.

The late Senator La Follette, in the last months before his death, was ousted from the office quarters he had occupied in the Capitol for 10 years and placed at the foot of the list of the Committee on Manufactures, of which he was chairman. My colleague the late Senator Ladd, of North Dakota, who had presided over the hearings during the Teapot Dome investigation, was ousted as Chairman of the Committee on Public Lands. The former Senator from Iowa, Mr. Brookhart, shared with these two Senators and myself the distinction of being disciplined by the regular Republican Senators, especially those from New England and the Atlantic seaboard, because, they said, we had openly repudiated planks of the Republican platform during the campaign of 1924.

Now, in order to vote against the pending treaty a Republican Senator must repudiate as solemn a pledge as was ever written into the platform of his party. He must repudiate the recommendations made for completion of this great project by President Harding, President Coolidge, and President Hoover, all of whom actively participated in the negotiations which resulted in this treaty. He must repudiate the work of Secretary of State Hughes, of New York, now Chief Justice; Secretary Kellogg, of Minnesota; and Secretary Stimson, of New York, who were in direct charge of the long negotiations which resulted in complete agreement between the two neighboring Nations interested in this project.

I do not know of a single Republican Member of this body who, during the last campaign or before the election, openly repudiated this plank of the Republican platform. If any Republican Senators vote against this treaty, I shall naturally expect to see the senior Senator from Pennsylvania, at the next Republican caucus, offer a resolution to deprive those Senators of their seniority on committees and to brand them as outcasts from the Republican Party.

We all recognize that the Power Trust is opposed to the ratification of this treaty. J. P. Morgan & Co., who control about 80 percent of the power and public-utility companies in New England and on the Atlantic seaboard, do not wish to see a public power development on the St. Lawrence such as we now have at Muscle Shoals and Boulder Dam.

Mr. LONG. To which Power Trust does the Senator refer—the Canadian Power Trust that is getting all the power, or to the domestic Power Trust. I take it that the Senator knows the Canadian Power Trust wants this treaty put through for its benefit?

Mr. FRAZIER. The Canadian Power Trust is in a little different attitude from our Power Trust, because there is so much of municipal or publicly owned power in Canada.

Mr. LONG. We are furnishing two thirds of the water and giving Canada two thirds of the power for the power interests there. I was wondering if the Senator would favor the Canadian power interests as against the American power interests?

Mr. FRAZIER. If they should in the future keep their prices as much lower as they have in the past, I think I would favor them.

Mr. LONG. Does not the Senator understand the same interests practically control them both? I understand that there is quite an intimate association between the Canadian power interests and some of our American interests. I have been given to understand so.

Mr. FRAZIER. That may be; but I am not worrying about the power question. I think it is very well taken care of under the pending treaty.

Mr. President, Morgan and the Aluminum Trust, which has been trying to obtain a license to exploit St. Lawrence power for nearly a generation, are not much concerned in the platform pledges offered by either the Republican or Democratic Parties. So, of course, it may be that Senators who betray this plank in the Republican platform of 1932 will not be called to account for overlooking this particular pledge.

In that case Republican Senators who disregard the pledge and vote against the treaty may be entirely safe, so far as their committee assignments are concerned, but the unfortunate result for the party would be that Republicans throughout the great Middle West would have final proof that promises made before the election by the party and its candidates for projects and policies of benefit to the great

interior sections of the country have no binding effect when such pledges are in conflict with the interests of the Power Trust and the bankers of the East.

Mr. President, I cannot agree with those who argue that no actual transportation saving would be realized by the farmer, because all the estimates failed to take into account the cost of shipping the grain from the point of production on the farm by rail to the head of the Lakes at Duluth or Chicago.

This statement is refuted on the face of the report from the Corps of Engineers submitted to the Senate by the President. An exhaustive study was made of the comparative rates on the shipment of grain by existing North Dakota routes and by the completed seaway. Wheat produced in my State was traced from Esmond, N.Dak., by rail to Duluth, and thence to the markets at Liverpool. The figures in the War Department report show that the rail cost from Esmond to Duluth amounts to approximately $4.60 per ton, and that the present cost from Duluth to Liverpool, via the Lakes, the New York Barge Canal, and ocean vessel from New York, amounts to $5.24, giving a total present cost of $9.84 per ton from Esmond, N.Dak., to Liverpool.

The Senator from Illinois [Mr. LEWIS] yesterday intimated that probably before the period of the building of the canal had been concluded the Government would own the railroads and would reduce freight rates. In that case it would only make our freight rates still lower under the new system than at the present time; but taking it for granted that the freight rate to Duluth would be the same as it is now, namely, $4.60 a ton, then the freight rate from Duluth to Liverpool would be reduced to $2.80 a ton after the completion of the St. Lawrence seaway, giving a total cost from Esmond, N.Dak., to Liverpool of $7.40 a ton. This would give a net saving per ton of wheat shipped from Esmond, N.Dak., to Liverpool via the seaway of $2.44.

On the basis of the wheat production for exports of this region in a single normal year, it is shown that the transportation saving would amount to more than $8,000,000, or within about $1,000,000 of the amount necessary to maintain, operate, and completely amortize the Great Lakes-St. Lawrence project in a period of 50 years.

The development of waterways has invariably meant material savings in freight rates. The estimates submitted by the President also show conclusively that there will be material saving on imports coming to the Middle West.

The truth is that the savings will be so enormous that many products which now do not pay to ship from one section of our country to another, or to import from abroad, will move by this route, thus greatly increasing the total volume of tonnage eventually available in the form of finished products for distribution by the railroads. While the cost of transportation will be greatly reduced for the land-locked interior States which are at a tremendous disadvantage as a result of the Panama Canal, yet the railroads will directly benefit from the general economic development of a great section which cannot now ship its products to market and whose purchasing power has been so reduced that it no longer constitutes a profitable market for consumers' goods.

If it were true that the completion of this seaway would ruin the railroads running parallel to the Great Lakes and the St. Lawrence River, then no railroad would exist today along the Atlantic, Gulf, and Pacific coasts.

It would seem unnecessary to remind Senators that the great trunk lines paralleling these coasts are, in normal times, among the most prosperous roads in the entire country and that they, in fact, complement and do not directly compete with the Atlantic waterway, the Gulf waterway, and the Pacific waterway.

Mr. President, recently before the Interstate Commerce Commission a hearing was held on an application for a general increase in the freight rates on grain. The railroad companies have asked for an increase in some instances of as much as 51 percent over the present rate in my home county in North Dakota. The increase for which the railroad companies asked on grain was 51 percent over the present rate. Under present conditions the farmers are not able to get cost of production for their products. They are not able to pay taxes, in many instances, or interest on their farm indebtedness. Freight rates comprise one of the big items that enter into the cost of shipping our grain. The price of our wheat is based at the present time on the Liverpool market less the freight.

It will require about 7 years to complete the St. Lawrence project. The railroads need increased traffic now, and every ton of the materials and supplies, the heavy equipment and machinery which must be transported for the construction of these works from Lake Superior to the sea must be moved by rail. A vast tonnage for rail movement will thus be created for this emergency by the completion of this project. At the end of 7 years, it is estimated, the total capacity of the seaway will constitute less than 5 percent of the increased tonnage of the railroads which will be available under normal conditions by 1941.

It is a reflection upon the 21 standard railroad brotherhoods for anyone to state that they are opposing the ratification of this treaty. It is well known that they have always supported the development of Muscle Shoals, Boulder Dam, and every other important public power project which has been undertaken in this country. They have been one of the chief obstacles to the raids of the Power Trust upon the public interest, and of the banking combination that controls both the public utilities and the railroad corporations. They have been the friends, in season and out, of the farmers of this Nation, who are demanding today, through their great farm organizations, the ratification of the pending treaty.

Since this treaty has been submitted to the Senate, not a single editorial or article has been published in Labor, the official organ of the 21 standard railroad brotherhoods, condemning this project or urging the rejection of this treaty. The friends of railroad labor in this body, on both sides of the Chamber, are leading the fight for ratification of the treaty.

I am informed that on the day that the senior Senator from Minnesota made his eloquent address in favor of the ratification of the treaty, that the 21 standard railroad brotherhoods, by a unanimous vote, endorsed him for reelection to the Senate.

It will be perfectly evident to any Senator who gives this project serious study that the President speaks a fundamental truth in his message when he declared that—

> This great international waterway for shipping is without any question going to be completed in the near future and that this completion should be carried out by both nations instead of by one.

This project is to complete an existing waterway to a depth of 27 feet and to prevent the sheer waste of a million horsepower in the State of New York, and cannot be blocked at this time except as the President has stated by "local or special interests", which "conjure up imaginary fears" and create a specter of "economic harm" which is "grossly exaggerated."

If sectionalism and special interests are to control the decision of this body on the pending treaty, it will be a catastrophe to the entire country for which neither the farmers nor the labor organizations of the land can be charged with responsibility.

The treaty should be ratified by an overwhelming vote in accordance with the pledges formally made by both political parties and the wage earners and the farm producers in every State and every section of the Nation will reap a great benefit from the completed project.

Mr. President, when the vote comes tomorrow I hope the treaty will be ratified by a large majority.

Mr. BONE. Mr. President, in view of the nearness of the vote on the treaty and because of the presence in the discussion of some aspects of the power question which I regard as being of very great if not paramount importance in the consideration of the question, I desire to take a little time to discuss some of the power aspects of the pending St. Lawrence Treaty.

The last time the Senate voted on an important power project the center of conflict was Muscle Shoals in the Ten-

nessee Valley. This year the fight has shifted to New York. The pending treaty presents a major phase of the struggle to maintain the President's program for assuring homes and farms throughout the land the cheapest possible electricity.

Without our favorable action on this treaty New York's public power project cannot be undertaken and the Power Trust's citadel in that region will have won a new extension of the right to exact tolls from millions of small consumers of electricity. That is one of the real issues upon which we will be voting when the St. Lawrence Treaty comes up for ratification tomorrow. It is the power issue and we are called upon to declare for or against the Power Trust. It is upon this issue at least that some determination and final decision will be made by the Senate.

I know that the private interests which are today exploiting the people's need for electric power contend that there is no power trust—that it is merely the figment of the disordered imagination of some of us who have faith that the day will come when electricity will flow into the homes of the land as freely as water. But, at least in New York State, where St. Lawrence power will be utilized by the State to reduce electric rates, the Power Trust is a reality. Within the last fortnight one man, representing the J. P. Morgan & Co. power interests, stood before a committee of the New York Legislature and boasted that he represented the corporations that control 75 percent of the State's annual supply of electric power.

It was in 1931, under the leadership of Franklin D. Roosevelt, then Governor of the State, that New York decided to carry through the public development of St. Lawrence power. Through three successive sessions he fought the issue out with Power Trust forces in the arena of the State legislature. With the overwhelming support of the people of the State he defeated the combination of private interests which for a generation had sought to get control of the great power resources of the St. Lawrence River.

I do not believe, Mr. President, that there is any Senator who would today wish to join forces with the Power Trust to block the President in the present achievement of an objective to which he has devoted years of consistent effort. It would be hard indeed if, after his final victory over the forces of private power control in New York State, he were to find those same forces entrenched here in Washington ready to make his victory abortive.

As Governor of New York, President Roosevelt found the people of his State paying 7 cents, 8 cents, 9 cents, 10 cents, and even 12 cents per kilowatt hour for the electricity used in their homes and on their farms. He recognized that such outrageous exploitation actually served to deprive the people of the full blessings of electricity, which had become an essential of life. He looked beyond the boundaries of the State, and saw successful public power systems making electricity available to the home at one half or even one quarter of the rates which the people of New York were paying. He proposed a comprehensive plan for remedying the evil, including public development of St. Lawrence power, and legislation enabling municipalities to sell power to their citizens.

I need not go into detail to suggest how important this program must have seemed to President Roosevelt in his years as Governor of New York. I need only refer to the CONGRESSIONAL RECORD of February 1, which contains a synopsis of the speeches, statements, messages, and letters of the President covering his many years of interest in the matter, introduced by the senior Senator from Nevada. In page after page of the RECORD it becomes evident, beyond all peradventure or doubt, that the St. Lawrence project is an important block in the very foundation of his economic policy.

In his first message to the New York Legislature on January 1, 1929, Governor Roosevelt said:

> In the brief time that I have been speaking to you there has run to waste enough power from our rivers to have turned the wheels of a thousand factories, to have lit a million farmers' homes—power which nature has supplied us through a gift of God. It is intolerable that the utilization of this stupendous heritage should be longer delayed by petty squabbles and partisan dispute. Time will not solve the problem; it will be more difficult as time goes on to reach a fair conclusion. It must be solved now.
>
> I should like to state clearly the outstanding features of the problem itself. First, it is agreed, I think, that the water power of the State should belong to all of the people. There was, perhaps, some excuse for careless legislative gifts of power sites in the days when it was of no seemingly great importance. There can be no such excuse now. The title to this power must vest forever in the people of this State. No commission—no; not the legislature itself—has any right to give, for any consideration whatever, a single potential kilowatt in virtual perpetuity to any person or corporation whatsoever. The legislature in this matter is but the trustee of the people, and it is their solemn duty to administer such heritage so as most greatly to benefit the whole people. On this point there can be no dispute.
>
> It is also the duty of our legislative bodies to see that this power, which belongs to all the people, is transformed into usable electrical energy and distributed to them at the lowest possible cost. It is our power; and no inordinate profits must be allowed to those who act as the people's agents in bringing this power to their homes and workshops. If we keep these two fundamental facts before us, half of the problem disappears.

That was the opening gun of a policy which this body will vote upon on Wednesday. Some of the basic opposition to the President's St. Lawrence program comes from those interests which have never given up the determination to exact inordinate profits from the distribution of this power.

Let me turn to a brief consideration of what the President's program for the St. Lawrence would mean to consumers of electricity.

The people of New York State are today paying private power interests over $300,000,000 a year for their electricity. That represents approximately one sixth of all the revenues paid to all the power companies in the United States. More than one third of this enormous toll is paid by homes and farms, while 60 percent of it is paid by small consumers purchasing their power on a retail basis for an average of more than 5 cents per kilowatt-hour. Let me say, parenthetically, that that price is an outrage.

I have statistics at hand which show that if the homes and farms of New York State could secure electricity at the rates prevailing in Jamestown, N.Y., a city of 45,000, served by a well-managed publicly-owned power plant, their savings would amount to at least $50,000,000 a year If we include savings for small commercial customers the combined saving of all retail customers of private companies using electricity in New York State, on the basis of the rates charged by this plant, would be $81,000,000.

For purposes of comparison I might turn to the rates prevailing in my own section of the country, where the potential competition resulting from the existence of such public power systems as those serving Seattle, Tacoma, and Los Angeles has forced the rates charged retail users of electricity far below the average prevailing in other sections of the country.

In 1932 the homes in New York State used 1,820,000,000 kilowatt-hours of electrical energy, for which they paid a total of $115,473,000, or at the average rate of 6.35 cents per kilowatt-hour. According to the Bureau of the Census, United States Department of Commerce, homes in the Pacific Coast States in the same year used 1,634,000,000 kilowatt-hours of electricity, but paid only $61,943,000 for this service, giving an average rate of 3.8 cents per kilowatt-hour, instead of 6.35 cents.

If the homes of New York State could have purchased their current at this average rate of 3.8 cents, they would have saved $46,313,000 in the single year 1932.

I wonder what that means to a few gentlemen who own the private power companies of the State of New York!

Similarly, small commercial light and power customers in New York State purchased 1,476,000,000 kilowatt-hours in 1932 for $77,242,782, or at an average of 5.2 cents per kilowatt-hour. Again referring to the Census data, I find that the average charge for this class of service on the Pacific coast was 2.2 cents per kilowatt-hour. Here, again, is a potential saving of approximately $44,000,000 a year to the people of New York State if retail electric rates can be brought down to a reasonable figure.

Here we have a potential reduction of the electric bills paid by the homes and small businesses of New York State

from $193,000,000 to $103,000,000 a year. This saving of approximately $90,000,000, capitalized at 6 percent, would represent a value of $1,500,000,000 to the people of the State of New York.

It was use of the St. Lawrence power development to create this value for the people of New York State, through reductions in electric rates, that President Roosevelt had in mind when, as Governor, he placed all his influence and authority behind this public power project. It is that great value to the people which he has in mind today, I assume, when he urges ratification of the treaty which is necessary to its consummation.

Today, therefore, I urge the importance of immediate ratification of the St. Lawrence Treaty, because it will help the people of New York State and of eastern States to obtain this immense advantage through striking a blow at the monopoly control of the Power Trust, which is today, as always, determined to block any great public power development. The defeat of this treaty will deprive small consumers of electricity of the enormous value represented by the potential rate reductions which I have already mentioned, and which represent vast fortunes to the private owners of these electric utilities.

It is impossible to conceive of a great hydroelectric project more uniquely qualified to serve the purposes of a public program for reducing electric rates than that which will be made possible by the St. Lawrence Treaty. The Great Lakes, serving as a natural storage reservoir, give this river a regularity of discharge unequaled among the systems harnessed for power on this continent. This means that the power plants on the American side of the international boundary, with an installed capacity of 1,100,000 horsepower, will be capable of furnishing more than three quarters of a million horsepower of hydroelectric energy on demand throughout the entire year.

The maximum recorded flow of the St. Lawrence is approximately 300,000 cubic feet a second as compared with a minimum flow of 170,000 second-feet. This ratio of 1.7 to 1 compares with ratios of 27.7 to 1 for the Columbia River, 46.3 to 1 for the Susquehanna, and 36.4 to 1 for the Colorado. Among the other rivers of which I have a record the most regular discharges are those of certain other rivers in Canada, including the Ottawa River, where the ratio of maximum to minimum is 10 to 1; the Richelieu, with a ratio of 6.1 to 1; and the St. Maurice, with a ratio of 7.5 to 1.

The incomparable regularity of flow of the St. Lawrence River is an economic asset the profit from which will go entirely to consumers of electricity as a result of the public-development program undertaken and to be undertaken by New York State. The New York power houses, with an installation of 1,000,000 horsepower, will provide approximately 770,000 horsepower of primary energy, and an additional 142,000 horsepower of high-grade secondary power. In combination with a certain amount of steam capacity to supply power during the periods of reduced flow in the river and to carry the daily and seasonal peak loads characteristic of the present demand for power in the area, a very large proportion of the nearly 6,000,000,000 kilowatt-hours available from this project will be utilized.

This power will be developed at an investment cost of $90,000,000 if the joint recommendation of the United States Army engineers and the New York Power Authority is confirmed by congressional action. This will mean an investment of approximately $82 per installed horsepower, or $116 per primary horsepower, which brings the development well within the field of economical power developments. Reference to the data prepared for the President by the interdepartmental board on the Great Lakes-St. Lawrence project indicates that the annual cost of generating this power on a public basis may be figured at approximately $6,000,000, thereby assuring this public project power at a cost of not more than $8 per horsepower year.

If every kilowatt-hour of primary power which can be produced by this project, operating night and day, could be marketed, the cost of this power ready for delivery at the site would be only about a mill and a quarter. If 80 percent of the total potential output is absorbed to carry the so-called "base load" of a system in which there is also steam capacity, the generating cost will not exceed 1½ mills.

The report furnished by the interdepartmental board also contains data showing the cost of this power transmitted to various distances from the project. For instance, I find that at the end of a 300-mile transmission line, publically owned, St. Lawrence power could be delivered at an over-all cost of approximately 3.1 mills at 80-percent load factor and 4.2 mills at 60-percent load factor. Even including the high costs involved in bringing current into New York City itself, the total cost of this power would not exceed 3.8 mills at 80-percent load factor and 5.1 mills at 60-percent load factor.

In areas nearer the St. Lawrence River—as, for instance, in that surrounding Utica—the cost of St. Lawrence power would be even lower, amounting to approximately 2¼ mills at 80-percent load factor, and 3 mills at 60-percent load factor.

I need hardly emphasize the fact that this is cheap power. The figures speak for themselves. In no other way at present known to the science of the industry could the people of a wide area be provided with power at so low a cost. This exceptionally low cost renders it of supreme value to the people as a means of securing lower electric rates.

Let me suggest in very simple terms a contrast which will serve to emphasize the value to the people of this public power development when consummated. We may conservatively assume that the difference between the cost of this power to be generated by the publicly owned St. Lawrence power plants and the cost of the same power if produced by steam plants would be $10 per horsepower-year. Capitalized on a 5-percent basis, this would represent a value of $200 per installed horsepower, or somewhat over $200,000,000 for the entire project.

The intangible value represented by the difference in cost between water power and steam power has frequently been capitalized by private industry at much higher figures than that which I have given. For instance I have in mind a 16,000-horsepower development in my part of the country in which the water power alone was capitalized by a private corporation at $10,424,000. If the St. Lawrence power which is to be available on the American side of the boundary were to be capitalized on this basis, its worth would have to be reckoned at something over $700,000,000.

My attention has been called to some interesting testimony bearing on this point, given before the special committee of the Canadian House of Commons, which investigated the Beauharnois project in 1931. Robert Dodd, of the firm of Robert Dodd & Co., investment bankers of Montreal, testified at that time in regard to the potential value of the 1,000,000 shares of common stock for which members of the syndicate financing that development paid $1 per share.

This is one of these high-pressure private outfits that is going to develop on the river below the present St. Lawrence international development. Let me quote from the proceedings:

MEMBER OF THE COMMITTEE. I want to get your viewpoint as to the potential value of these shares at the end of 10 years' time when this thing is completed according to your circular.

ANSWER. The stock would have a fair value of $200 per share, I would say.

In other words, it was the confident expectation of those private promoters and financiers who were promoting a power development on the St. Lawrence, corresponding very closely to that which is provided for in the treaty, that the intangible value of a natural power resource capable of developing approximately 2,000,000 horsepower would net the insiders $200,000,000 on an investment of only $1,000,000; in other words, 200 to 1, which, of course, would come out of the pockets of the consumers, as is customary.

It is this very determination of the private power interests to capitalize the profits which they expect to realize on the intangible value of a great public resource that underlies

the chief opposition to the St. Lawrence Treaty on both sides of the border. It is merely another illustration of what is being done in many places, the capitalizing of the hope of the insider, the translating of his hope into stock, upon which he hopes later to realize vast revenues.

This brings me to a point which has received much attention in this debate. It has been asserted again and again that the major part of the power to be developed under the treaty will belong to Canada. It has been charged that with the United States paying one half of the entire cost, Canada will get 4,000,000 of the 5,000,000 horsepower of hydroelectric horsepower. Let us examine the facts.

The St. Lawrence River, between Lake Ontario and Montreal, offers three hydroelectric power resources, two of which are of exceptional value. Starting down the river from Lake Ontario the first of these is in the International Rapids section, the second is at the Soulanges Rapids, and the third is at the Lachine Rapids. Approximately 2,000,000 horsepower can be developed at each of the first two points. About 1,000,000 horsepower is available at Lachine but under less satisfactory conditions, so that this development is not expected to take place in the near future.

The only one of these hydroelectric-power developments provided for under the St. Lawrence Treaty is that in the International Rapids section. This is the only one to which the United States contributes a dollar of funds and one half the power to be developed will belong to the United States.

The PRESIDING OFFICER (Mr. LONG in the chair). The time of the Senator on the treaty has expired.

Mr. BONE. Then I will occupy a little time on the reservation.

The PRESIDING OFFICER. The Senator has 10 minutes on the reservation.

Mr. BONE. Mr. President, the development of the Soulanges Rapids for power is in no way affected by the treaty. It is a wholly Canadian resource which Canada can develop at any time to any extent without any treaty or consent on the part of the United States. As I have already suggested, its development by private capital is well under way, with the Beauharnois power plant already delivering about 550,000 horsepower.

Those opponents of the treaty who are so concerned about keeping American money at home to promote the development of American industry and the employment of American labor might well investigate the extent to which private capital from the United States is sharing in the present promotion of this privately owned power development lower down the river.

The development of 2,200,000 horsepower of hydroelectric energy from the International Rapids section of the St. Lawrence River will be an all-public project, shared equally by the Power Authority of the State of New York on this side and by the Ontario Hydro-Electric Power Commission on the other. This development will be directly for the benefit of the people who will get lower rates because no profits will be exacted to support the capitalization of intangible rights. Ratification of the St. Lawrence Treaty is necessary to make this power project possible.

The development of 2,200,000 horsepower of hydroelectric energy from the Soulanges Rapids section of the St. Lawrence River will be an all-private project, located in the Province of Quebec, which is committed to the principle of private ownership. This project is today being developed by financiers drawing the capital from international sources. In other words, American money is going over there to develop a private power project in all-Canadian territory. This development will be directed to sustaining a capitalization of intangible water-power rights, as I have already indicated, amounting to upward of $200,000,000, over and above the actual investment in the necessary works.

No treaty is necessary for this private power development. In fact, representatives of the private interests backing the Beauharnois development are the open opponents of the treaty in Canada because they do not want the competition of the great public-power projects in the International Rapids section, especially the development of 1,100,000 cheap horsepower in the United States, for which it provides. I need only refer you to the opposition in the Province of Quebec for confirmation of this statement.

In a speech before the Quebec Legislature, January 13, 1932, Premier Taschereau, in explaining his opposition to the St. Lawrence development, said:

> The pressing need of the United States is for power. Do you think we are ever going to get industrial development in the Province of Quebec and in Canada by permitting the United States what she needs now for development of her own industries? I have seen many captains of industry, so-called, and they all tell me the same thing: Keep your hydro power at home, and you will have American capital going into your Province for the development of industries and your Province will profit and progress. * * *

A vote against the treaty is a vote against the only United States power development which this great river offers. It is a vote against the only great public-power project in the northeastern section of the United States. It is a vote in favor of the all-Canadian developments lower down on the river. It is a vote, in practical effect, to encourage a huge private development at the expense of the proposed public agencies. It is a vote in favor of those interests which would keep for private capital all the values inherent in great public water-power resources. It is a vote against the program which President Roosevelt has pushed through many years of struggle to give to the people of his State reductions in electric rates with a capitalized value of $1,500,000,000.

Mr. METCALF. Mr. President, I send to the desk an amendment, which I ask to have printed and lie on the table.

Mr. VANDENBERG. A parliamentary inquiry. Is the Senator from Rhode Island offering a reservation to the treaty?

Mr. METCALF. I am offering a reservation to the treaty.

Mr. VANDENBERG. Under the rule, has not the time expired for the filing of reservations to the treaty?

Mr. METCALF. The time has not as yet expired. It will not expire until after today.

Mr. CLARK. Mr. President, a parliamentary inquiry. Am I correct in understanding that under the unanimous-consent agreement heretofore entered reservations to the treaty may be filed anytime during the calendar day of March 13?

Mr. McNARY. Mr. President, the unanimous-consent agreement provides, does it not, that Senators have the remainder of the 13th day of March for the filing of proposed reservations?

The PRESIDING OFFICER. The unanimous-consent agreement allows the remainder of the day for the filing of reservations.

Mr. METCALF. Then, I am within my rights in filing the reservation at this time?

The PRESIDING OFFICER. The Senator from Rhode Island has filed his reservation to the treaty within the time limit set by the unanimous-consent agreement.

The reservation proposed by the Senator from Rhode Island [Mr. METCALF] is as follows:

> The United States ratifies this treaty with the understanding that not more than $272,453,000 of the cost of the St. Lawrence waterway shall be paid by the United States and that all costs above that amount shall be borne by the Dominion of Canada.

Mr. METCALF. Mr. President, there are so many arguments against the ratification of the St. Lawrence Treaty that it is impossible to cover them in any reasonable length of time. The tremendous cost to the United States Government, the yielding of sovereignty over Lake Michigan, the inadequate knowledge of economic conditions in connection with the operation of the canal, the small amount of American labor and materials to be used, and many other points have been covered rather thoroughly in the Senate debates. However, there is one tragic effect which our drift toward Federal financing of hydroelectric power is bringing; that is, the damage which is being done to the coal industry. At the present time the Government proposes hydroelectric-power developments which will total 53,000,000,000 kilo-

watt hours, including the completed development of the Tennessee Valley.

These developments are: Hoover Dam, 4,000,000,000 kilowatt-hours; Tennessee Valley partial development, 8,000,000,000 kilowatt-hours; Tennessee Valley complete development, 27,000,000,000 kilowatt-hours; Grand Coulee, 8,000,000,000 kilowatt-hours; Bonneville, 3,000,000,000 kilowatt-hours; Kenneth Dam, 4,000,000,000 kilowatt-hours; Fort Peck, 1,500,000,000 kilowatt-hours; and the St. Lawrence Waterway, waterway, 6,000,000,000 kilowatt-hours.

We must assume that the production of electric energy by water power will displace a similar amount of energy which would ordinarily be produced by coal and steam turbines. It is estimated that an average of 1.4 pounds of coal is consumed in the production of 1 kilowatt-hour in a coal and steam plant. This would mean that the hydroelectric developments of the United States Government will displace the use of something less than 40,000,000 tons of coal annually. A large portion of the coal which would ordinarily be used in the development of power at the site of the St. Lawrence project would originate in Pennsylvania and West Virginia. I have an estimate that one miner is needed for the production of 1,000 tons of coal per year. On this basis the United States Government will be responsible for the unemployment of between thirty-five and forty thousand miners each year. This would mean distress for over 150,000 men, women, and children. Such a tremendous inroad on the consumption of coal not only would have a disastrous effect upon the coal industry itself but would cause an unemployment problem among the mine workers of much importance. While a great portion of this distress unquestionably would take place in Pennsylvania and West Virginia, the whole country would feel the effect of it through decreased income to the railroads and to the mine operators themselves.

At the present time the United States is a heavy exporter of coal to Canada. We have managed to sell our coal to Canadian consumers despite preferential agreements between Canada and Great Britain. The proposal to construct a waterway to carry products from Canada and the United States to foreign ports will cause the ships to return for their cargo in ballast or to accept shipments of heavy products at disastrously low rates. Undoubtedly what will result will be a tremendous flow of coal from England and Russia to Canada, and possibly even to American purchasers. I may say in passing that in Providence, R.I., 10 days ago there was a steamer loaded, I understand, with some 6,000 tons of Russian coal.

In 1930 we sold 12,145,000 tons of bituminous coal to Canada and over 2,250,000 tons of anthracite. But in 1931 British competition had already lowered this to 9,491,000 tons of bituminous coal. Last year we sold Canada 7,600,000 tons. The Canadian industrial regions would long ago have ceased the use of American coal if the cost of transportation from Canadian or British mines had not been prohibitive. Even during the depression years the Canadian consumers have absorbed some 6,000,000 tons of coal from ports on Lake Erie. This has been transported by rail from American mines to points between Buffalo and Toledo and shipped by water to Canadian ports on the Great Lakes. The movement of this coal has largely taken place in ships flying the American flag. Under normal economic conditions it is not unreasonable to presume that the consumption of American coal in the Canadian industrial regions would be between nine and ten million tons. This entire tonnage would come from the mines of Pennsylvania, West Virginia, Ohio, and Kentucky, and represents continuous employment for 10,000 mine workers. Should these men be thrown out of work it would mean distress for some 40,000 persons, without consideration of workers on the railroads, steamships, and allied industries.

The average cost of shipping American coal from the mines to Canadian consumers is $2 per ton. But coal could be carried from the maritime Provinces of Canada to Port Arthur or Port William at a cost of from 40 to 55 cents per ton. Think what will happen to the coal industry of four States if this result is accomplished by the St. Lawrence waterway. A transportation margin of a dollar and a half per ton will be created in favor of Canadian or British coal. Not only will British and Canadian mines furnish the 9,000,000 tons normally produced by Pennsylvania, West Virginia, Ohio, and Kentucky miners, but will also deprive the railroads of the United States of some 200,000 carloads of shipping and cause unemployment of many railroad workers.

The full power capacity of the St. Lawrence project is to be 6,000,000,000 kilowatt-hours. Assuming this energy would otherwise be generated by coal and steam, the consumption of some 4,500,000 tons of coal—all American coal—will have been displaced, for it would require that tonnage to produce the electrical energy proposed for the hydroelectric establishments on the St. Lawrence project.

From these facts it should be easily recognized that the coal industry of the United States will suffer one of the most severe blows it has ever experienced from the construction of the St. Lawrence waterway. There is every reason why the people of Pennsylvania, West Virginia, Ohio, and Kentucky should be particularly disturbed by the proposal to carry out this most unwise project. The coal industry is already a sick industry. We should certainly do nothing at this time to increase the suffering in the mining regions.

Hydroelectric plants must, of course, be constructed at the site where water power is to be utilized. Hydro plants, therefore, often make necessary the construction of expensive transmission lines in order to deliver hydro power to the centers of consumption. This is unnecessary in steam plants. I have a series of charts showing the comparative cost of steam power and St. Lawrence hydro power delivered to Albany, Binghamton, Buffalo, New York City, Rochester, and Syracuse. These charts were prepared by a noted engineer from data carefully assembled. They show that even on a capacity load factor of 100 percent the cost of steam power and St. Lawrence hydro power would be approximately the same. We all know that a 90-percent or 100-percent load factor is impossible. By comparing the cost of a 50-percent or 60-percent factor it is seen that St. Lawrence power will cost 38 percent more at Albany, N.Y., than would steam-generated power. Comparing the cost on a load-factor basis of 50 percent at Binghamton, N.Y., St. Lawrence power would cost 44 percent more than steam power. St. Lawrence hydro power cannot be delivered in Buffalo, N.Y., as cheaply as steam electric power can be produced in that city. Even at the ideal of 100-percent load factor the cost of hydro would be 25 percent greater than steam power. With a load factor of 50 percent the excess cost of St. Lawrence power would be 82 percent at Buffalo. St. Lawrence power cannot be delivered to the great city of New York for a cost reasonably comparative to steam power generated in that city. With a load factor of 50 percent the excess cost of St. Lawrence power in New York City would be 37 percent. The same situation is found at Rochester and Syracuse, where the excess cost of St. Lawrence power, on the basis of a 50-percent load factor, is 48 percent and 30 percent, respectively. These charts, which I wish to have put in the RECORD at the conclusion of my remarks, were furnished me by Representative ALFRED F. BEITER, of New York, and I have his assurance that they are authoritative and accurate.

Mr. President, the resolution of ratification of the pending treaty should be defeated.

The PRESIDING OFFICER. Without objection, the tables referred to by the Senator from Rhode Island will be printed in the RECORD.

The tables are as follows:

Albany, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Cost:									
St. Lawrence	1.72	1.14	0.86	0.69	0.57	0.49	0.43	0.38	0.34
Steam	.93	.70	.58	.50	.44	.40	.38	.37	.36
Difference in—									
Favor steam	.79	.44	.28	.19	.13	.09	.05	.01	------
Favor St. Lawrence	------	------	------	------	------	------	------	------	.02

The above shows that St. Lawrence River hydroelectric power cannot be delivered in Albany, N.Y., as cheaply as steam-electric can be produced in that city except when the former is being used (delivered) at a 90- to 100-percent load factor. As a 100-percent load factor is a consummation forever wished but never secured, a lower factor must be considered.

Comparing the costs at a 50- or 60-percent factor it is seen that St. Lawrence power costs 38 percent more than steam-generated power and at a 60-percent factor this difference is 29½ percent. These are fair commercial-service factors.

Assuming a domestic-use load factor of 30 or 40 it is seen that St. Lawrence power costs 63 percent and 48 percent more respectively.

Binghamton, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Cost:									
St. Lawrence	1.72	1.14	0.86	0.69	0.57	0.49	0.43	0.38	0.34
Steam	.92	.67	.55	.48	.43	.39	.37	.36	.35
Difference in—									
Favor steam	.80	.47	.31	.21	.14	.10	.06	.02	
Favor St. Lawrence									.01

The above shows that St. Lawrence hydroelectric power cannot be delivered in Binghamton, N.Y., as cheaply as steam-electric can be produced in that city except when the former is being used (delivered) at a 100-percent load factor.

Comparing the costs at a 50 or 60 factor it is seen that St. Lawrence costs 44 percent and 33 percent, respectively, more than steam. These are fair commercial-use factors.

Assuming a domestic-use load factor of 30 or 40, it is seen that St. Lawrence power costs 70 percent and 56 percent more, respectively.

Buffalo, costs in cents per kilowatt-hour—Load or capacity factor
Buffalo, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Costs:									
St. Lawrence	1.77	1.18	0.89	0.71	0.59	0.51	0.44	0.40	0.35
Steam	.77	.56	.46	.39	.35	.32	.31	.29	.28
Difference in favor of steam	1.00	.62	.43	.32	.24	.19	.13	.11	.07

The above shows that St. Lawrence hydroelectric power cannot be delivered in Buffalo, N.Y., as cheaply as steam-electric power can be produced in that city. Even at the ideal of 100-percent-load factor the former cost is 25 percent greater than the latter.

With a load factor of 50 or 60 percent the excess cost of St. Lawrence power is 82 and 69 percent, respectively.

Assuming a domestic-use load factor of 30 or 40, it is seen that St. Lawrence power costs 111 and 93 percent more, respectively.

New York City, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Costs:									
St. Lawrence	1.79	1.19	0.90	0.71	0.60	0.51	0.45	0.40	0.36
Steam	1.00	.73	.60	.52	.46	.42	.40	.38	.36
Difference in favor of steam	.79	.46	.30	.19	.14	.09	.05	.02	0

The above shows that St. Lawrence hydroelectric power cannot be delivered to New York City for less than steam-electric power can be generated in that city.

With a load factor of 50 or 60 percent the excess cost of St. Lawrence power is 37 percent and 30 percent, respectively.

Assuming that there is a domestic-use-load factor of 30 or 40 it is seen that St. Lawrence power costs 63 percent to 50 percent more, respectively.

Rochester, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Costs:									
St. Lawrence	1.62	1.08	0.81	0.65	0.54	0.46	0.41	0.36	0.32
Steam	.86	.63	.51	.44	.39	.36	.34	.32	.31
Difference in favor of steam	.76	.45	.30	.21	.15	.10	.07	.04	.01

The above shows that St. Lawrence hydroelectric power cannot be delivered in the city of Rochester, N.Y., as cheaply as it can be produced in that city by steam; although at 100-percent load factor the difference, in favor of steam, is only one one-hundredth of a cent per kilowatt-hour.

With a load factor of 50 or 60 percent, the excess cost of St. Lawrence power is 48 percent and 38 percent, respectively.

Assuming a domestic-use load factor of 30 or 40, it is seen that St. Lawrence power costs 71 percent and 59 percent more, respectively.

Syracuse, costs in cents per kilowatt-hour

LOAD OR CAPACITY FACTOR

	20	30	40	50	60	70	80	90	100
Costs:									
St. Lawrence	1.49	0.99	0.74	0.60	0.50	0.43	0.38	0.33	0.30
Steam	.88	.65	.53	.46	.41	.38	.36	.34	.33
Difference in—									
Favor of steam	.61	.34	.21	.14	.09	.05	.02		
Favor St. Lawrence								.01	.03

The above shows that St. Lawrence hydroelectric power can be delivered to Syracuse, N.Y., at a less cost than steam-electric can be generated there provided a load factor of 90 or 100 can be secured.

With a load factor of 50 or 60 percent, the excess cost of St. Lawrence power is 30 percent or 22 percent respectively.

Assuming a domestic-use load factor of 30 or 40, it is seen that St. Lawrence power costs 52 percent or 40 percent more respectively.

CANCELATION OF AIR-MAIL CONTRACTS

Mr. ROBINSON of Indiana. Mr. President, I do not desire to discuss the pending treaty at this time, but for a few minutes I wish to make some observations about a different matter.

A little more than 30 days ago, Mr. President, we had developed in this country the greatest aviation industry to be found anywhere on earth, an industry that employed thousands of men and women. That was 30 days ago. Today it lies prostrate, practically destroyed, unless something constructive shall be done quickly to revive it. Aviation has had a tremendous setback in America.

Thirty days ago there were 10 young pilots in America trained for flying, the most hazardous of all work, trained to defend their country in the air, glowing with life and health, filled with American patriotism and enthusiasm for the work they were called upon to do. Today they are dead and in their graves. Hundreds of thousands of dollars' worth of property and wealth have also been destroyed.

Mr. President, all of this is due to one thing, namely, a tragic blunder in the White House. It would not be so bad if only the administration had to suffer, but these 10 men are dead, due to the ineptitude of the administration. If they were deliberately sent to their death because of the Executive order of the President, then it would represent legalized murder; if not deliberately done, at least it would be manslaughter.

The homes from which they came are filled with sadness, woe, and despair; a terrific blow has been struck at the aviation industry; the defense of the country has suffered, so that not only the administration but the entire Nation has felt the shock. That is the tragedy of it all.

Now, in the most amazing fashion, the administration seeks to blame the Army. One would think the President would be glad to take the responsibility for this blunder without attempting to shift it on to the shoulders of the brave men who are called upon to obey orders whenever they come from the Commander in Chief.

This is of a piece with the same attitude when one of the Nation's heroes, Colonel Lindbergh, undertook to protest against canceling the air-mail contracts without giving the operators an opportunity for their day in court. When that insulting treatment was administered to Colonel Lindbergh, who is admired in every home in America, and the reaction was bad for the White House, what was the result? Immediately the administration undertook to shift the blame onto the shoulders of someone else. Always, instead of accepting the responsibility for the act, the administrations finds some way to shift the blame, and now in these latter days has gone whimpering to Colonel Lindbergh begging him, after these 10 men have been killed, to come down

to Washington to help get the administration out of the pit into which it has plunged itself.

The President has said that he was given to understand that the Army could handle the mail. Who gave him any such information? Why does he not name names? This morning in the Washington Herald there appears a Universal Service story on the subject. It is very brief, and I am going to read it:

FOULOIS APPROVED PROPOSAL FOR ARMY TO TAKE OVER MAIL

Four Army generals yesterday poured out to a Senate appropriations subcommittee secret hearings their inside story of tragic efforts by the military service to fly the air mail.

Thirty minutes after they had finished, transcripts of their testimony were on their way to the White House.

The four were General MacArthur, Chief of Staff; Major General Drum, his assistant; Major General Foulois, Chief of the Army Air Corps; and Brigadier General Westover, in charge of Army air-mail flying.

Listen, Mr. President:

LEARNED FROM PAPERS

All said their first knowledge that transfer of air-mail service had been made came from newspapermen after President Roosevelt's public statement February 9.

I may say that I had a transcript of the evidence taken yesterday before the Appropriations Committee and have examined it. The evidence confirms all that is said in this Universal Service article. I had it here ready to read this morning, but it has gone to the printer, so it is out of my hands for the moment; but the evidence confirms every word stated here. In other words, those responsible for matters of this kind in the United States Government—that is to say, connected with aviation—all received their first knowledge of the matter from the newspapers.

Whom did the President consult? Is it not perfectly obvious that he consulted Mr. Farley, the chairman of the Democratic National Committee? Is it not perfectly obvious that Mr. Farley advised the President, when he did this spectacular, sensational thing, to place his name in the headlines on the front pages all over the United States—is it not perfectly obvious that the information he received and the counsel he received was political and not technical?

Foulois said he told Second Assistant Postmaster General Harllee Branch a few hours before the cancelation of commercial air-mail contracts that he thought the Army could handle the task successfully.

A committee member quoted Foulois as saying:

"I said what any soldier would say under the circumstances—that of course we would take the job and that I thought we could handle it."

Did anybody ever hear of a soldier refusing to obey orders? Here was the Commander in Chief speaking, and what he said was an order, a command. From whom did the President get any information? Who gave him assurances that the Army could safely carry the mail? What is the source of his information? Why is there profound silence on all sides? Who speaks for the President on that subject?

Mingled with this testimony came a story of terrific handicaps faced by Army pilots. MacArthur told the subcommittee small planes had to be used in many cases. These held so little mail that at times six planes had to be sent into the air to carry mail normally taken by one transport plane.

In other words, to carry the mail that one plane normally took under the old arrangement when the private companies were carrying the mail it required six Army planes. When six Army planes went into the air instead of one commercial plane, it meant that six Army pilots went into the air, one in each of the six planes, and the risk was six times as great. But what cared the administration for this threatened loss of life that was to result? What did the administration care? It looked like a good move politically.

Evidently the advice had come from Mr. Farley, who is chairman of the New York Democratic State committee, chairman of the Democratic National Committee, Postmaster General of the United States in the President's Cabinet, and chief dispenser of patronage for the administration.

Foulois and Westover, adding to MacArthur's testimony, said that on some fields no hangars were available for Army planes. Thus, they said, planes remained out in the ice and snow, getting so cold it sometimes took 3 hours to start a motor.

Imagine those lads out there on those icy mornings and late at night—whenever it was necessary to rise in the air—in a freezing temperature, working for 3 hours to start their motors in the flying coffins in which they were to rise, only to descend to their death! What a tragedy!

Foulois said the call to see Branch came to him about 11:30 a.m., February 9. He said he went to the Post Office Department and talked with Branch and another underexecutive in the Department.

The Air Corps Chief said that after talking to Branch he went to see MacArthur and Drum to inform them of the conference, and while waiting to get in to them a reporter showed him a copy of the President's orders announcing transfer of the Air Mail Service to the Army.

So their first information came from the newspapers. Accordingly it would be interesting to the country to know just whom the President consulted before issuing the ill-fated order that was to result in a period of 20 days in the death of 10 of the best pilots in the land.

Here is the New York Times of yesterday, very friendly to the administration, noted for its conservative tone. "Soon to be mended" is the subject of the leading editorial. I will quote two or three short paragraphs and then ask that it all be inserted in the RECORD as a part of my remarks:

President Roosevelt has taken further action to retrieve his administration from the worst blow to its prestige which has yet befallen it. On February 9 he incontinently canceled all existing mail contracts and directed the Army to perform the service previously done by private companies.

The PRESIDING OFFICER. The Senator from Indiana now has 10 minutes on the committee reservation, having exhausted his time on the treaty.

Mr. ROBINSON of Indiana. I continue reading:

Presently finding that this would not do, he urged Congress to speed a bill to grant new contracts to commercial organizations, thus indicating that he had, with the rest of the country, discovered that mail carrying by Army flyers was both unsatisfactory and perilous. Then on Saturday, after more of the Army pilots had crashed to death, he ordered the Secretary of War to cut down the schedules to the barest limit, in consultation with the Postmaster General, so as to prevent additional fatalities and prepare the way for the private companies who later on will fly the mails. Mr. Roosevelt's anxiety to do his best to get out of a bad business sticks out of almost every line of his letter to Secretary Dern.

The President writes apologetically that he had issued his order to the Army flyers "on the definite assurance given me that the Army Air Corps could carry the mail." If this looks like an effort to shift the blame, it also shows how hasty Mr. Roosevelt was in accepting some officer's assurance. Was he not equally hasty in taking the word of the Postmater General for it that all the mail contracts ought to be canceled because all of them, even those held by companies that had not been investigated at all, were obtained by false representations or collusion?

Now I skip to another paragraph, reading as follows:

If he—

The President—

is sometimes tempted to think, after one successful stroke by him has followed another, that all his decisions are above criticism and that his judgment approaches the infallible, the troubles which have come thick upon him in this affair of the air mail should remind him that like other mortal men he is subject to frailties.

Another paragraph:

Yet his warmest friends will hope that he may take to heart the true lesson of the air-mail fiasco. It is easy to rush into a situation of that kind with a sincere belief that one is doing not only a popular but a righteous thing, but to get out of it gracefully is more difficult.

And the editor might have added that no matter how well the administration gets out of it, these 10 pilots are dead. They cannot be brought back to life. They have gone to their death because of the Executive order the administration issued following the refusal to give every man in America his day in court, as the Constitution and all our traditions insist should be done.

Mr. President, since my time is nearly gone I cannot read this editorial in today's New York Herald Tribune in full, but I ask that it be printed in the RECORD immediately following what I have to say.

There are two or three paragraphs I shall have time to read. The editorial is entitled:

THE SCANDAL OF FARLEY

The political blunders of Postmaster General Farley are primarily the concern of his political chief, President Roosevelt. Insofar as they affect the integrity and efficiency of government, national, State, and city, they touch the life, property, and happiness of everyone. They cannot be passed by as a matter of partisan concern.

Another point:

Thanks to the able campaign of Mr. LaGuardia, the Farley maneuver failed—

This is in New York—

but it was no thanks either to the Postmaster General or to the President that Tammany did not once again defeat reform and remain in charge of the metropolis which Tammany corruption had bankrupted.

Then I skip down to another paragraph. This is listing the blunders of the Postmaster General, Mr. Farley:

Every expert in the country, from Colonel Lindbergh down, understood the risks involved. Mr. Farley could have known for the asking. Yet, because politics called for a sweeping gesture, a great American industry was wrecked, a vital service of business communication was halted, and 10 Army fliers were ordered to their death.

A relatively minor blunder in respect to conspicuous individuals, but extraordinarily vital in respect to business efficiency, is Mr. Farley's latest cut of the Postal Delivery Service. Here is a loyal, intelligent, and underpaid branch of public service. Politics has never controlled its rank and file. Its salaries, never large, have been cut along with the salaries of other public employees. Now it is Mr. Farley's ingenious idea to procure further small post-office economies by cutting the number of deliveries. Only one Saturday delivery is to be made in the future, and the personnel of the Department is to be cut accordingly.

Then, still further, speaking of New York City:

The bald fact is that Mr. Farley, political aide-de-camp and spokesman for Franklin D. Roosevelt, has failed the city of New York in its most critical hour.

Further down:

He would wreck a great industry and a fine Air Mail Service and risk brave lives in order to score a political victory. He cares more for his cheap political associates than for the possibility of retrieving the city of New York from bankruptcy, waste, and graft.

Finally:

His holding of the three offices of Postmaster General, chairman of the Democratic National Committee, and chairman of the Democratic State committee has long been a public scandal. His political craftsmanship remains a matter for his fellow Democrats to estimate. We can see no possible excuse for his retention in a public office serving the whole Nation.

I ask that the editorial in the New York Times of yesterday, the editorial in the New York Herald Tribune of today, and an editorial entitled "Insiders on Air-Mail Cancelation", published yesterday in the Chicago Daily Tribune, may be incorporated with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The editorials are as follows:

[From the New York Times of Monday, Mar. 12, 1934]

SOON TO BE MENDED

President Roosevelt has taken further action to retrieve his administration from the worst blow to its prestige which has yet befallen it. On February 9, he incontinently canceled all the existing air-mail contracts and directed the Army to perform the service previously done by private companies. Presently, finding that this would not do, he urged Congress to speed a bill to grant new contracts to commercial organizations, thus indicating that he had, with the rest of the country, discovered that mail-carrying by Army fliers was both unsatisfactory and perilous. Then on Saturday, after more of the Army pilots had crashed to death, he ordered the Secretary of War to cut down the schedules to the barest limit, in consultation with the Postmaster General, so as to prevent additional fatalities and prepare the way for the private companies who later on will fly the mails. Mr. Roosevelt's anxiety to do his best to get out of a bad business sticks out of almost every line of his letter to Secretary Dern.

The President writes apologetically that he had issued his order to the Army fliers "on the definite assurance given me that the Army Air Corps could carry the mail." If this looks like an effort to shift the blame, it also shows how hasty Mr. Roosevelt was in accepting some officer's assurance. Was he not equally hasty in taking the word of the Postmaster General for it that all the mail contracts ought to be canceled because all of them, even those held by companies that had not been investigated at all, were obtained by false representations or collusion? A little later, it is true, Postmaster General Farley produced an opinion of the Department of Justice that the President's action was legally warranted. But may not that opinion also have been so hastily written that the President should have made a few searching inquiries of his own? It is not necessary now to pursue the painful matter further, since it is evident that the President is resolved to undo as quickly as possible a serious error of judgment.

There is already, as was certain to come, a rush of Republicans to try to make political capital out of this blunder. Probably this will not last long. Insofar as it seeks to gain a party advantage by dragging out the corpses of the killed Army pilots it will be thought of as something pretty ghoulish. But it is the President himself who ought to profit most by the unhappy incident. If he is sometimes tempted to think, after one successful stroke by him has followed another, that all his decisions are above criticism and that his judgment approaches the infallible, the troubles which have come thick upon him in this affair of the air mail should remind him that like other mortal men he is subject to frailties. All men in high office after a great run of good luck are in danger of coming to believe that they can do nothing wrong. Their best resource against this is the kind of grim humor which Bismarck had. He said that, of course, he was forced to make swift and positive decisions, even when he did not know which was the right one. He added that if it turned out to be wrong, all the old women would chase him with their brooms.

Nobody is chasing, or wants to chase, President Roosevelt. Yet his warmest friends will hope that he may take to heart the true lesson of the air-mail fiasco. It is easy to rush into a situation of that kind with a sincere belief that one is doing not only a popular but a righteous thing, but to get out of it gracefully is more difficult.

[From the New York Herald Tribune of Tuesday, Mar. 13, 1934]

THE SCANDAL OF FARLEY

The political blunders of Postmaster General Farley are primarily the concern of his political chief, President Roosevelt. Insofar as they affect the integrity and efficiency of government—national, State, and city—they touch the life, property, and happiness of everyone. They cannot be passed by as a matter of partisan concern.

The list is now a considerable one. It was Mr. Farley who last October, by promise of Federal office, sought to defeat fusion in New York City. The President officially detached himself from the endeavor by a statement announcing his indifference to local political disputes. Yet it was Federal patronage and nothing else—appointments by the President himself—which made possible the strength of the McKee candidacy. Thanks to the able campaign of Mr. LaGuardia, the Farley maneuver failed. But it was no thanks either to the Postmaster General or to the President that Tammany did not once again defeat reform and remain in charge of the metropolis which Tammany corruption had bankrupted.

The appalling air-mail blunder ranks second on the list in point of time. Its end is not yet. A brave and loyal arm of national defense was asked to fly the air mail with inferior equipment and inadequate training. Every expert in the country, from Colonel Lindbergh down, understood the risks involved. Mr. Farley could have known for the asking. Yet, because politics called for a sweeping gesture, a great American industry was wrecked, a vital service of business communication was halted, and 10 Army flyers were ordered to their death.

A relatively minor blunder in respect to conspicuous individuals, but extraordinarily vital in respect to business efficiency, is Mr. Farley's latest cut of the Postal Delivery Service. Here is a loyal, intelligent, and underpaid branch of public service. Politics has never controlled its rank and file. Its salaries, never large, have been cut along with the salaries of other public employees. Now it is Mr. Farley's ingenious idea to procure further small post-office economies by cutting the number of deliveries. Only one Saturday delivery is to be made in the future, and the personnel of the Department is to be cut accordingly.

Already the protests of business men are pouring in. Orders and deliveries are alike delayed. Confusion mounts. At a moment when all hands are straining every energy to revive American business, this vital organ of communication is cut to pieces by cheese-paring economies. The tragedy of the reduction in personnel is the inhuman consequence of this Farley policy. But what shall be said of this new handicap to recovery which the Roosevelt administration thus tosses into the wheels of industry? Only that it is wholly consonant with the general muddle of the new deal, which strikes down confidence as fast as it builds it up.

A third item in the Farley scandal is of even more vital import to New Yorkers. That is the slippery fashion in which the Roosevelt administration has failed to support fusion at Albany. There is no need of recounting the history of the weeks of evasion and pretense. The bald fact is that Mr. Farley, political aide-de-camp and spokesman for Franklin D. Roosevelt, has failed the city of New York in its most critical hour. With all the huge power of Federal patronage at his command, Mr. Farley has permitted the cheap politics of the Flynn stripe to prevail at Albany. An honest and courageous mayor of New York City finds himself in a crucial issue of economy opposed by the political right hand of President Roosevelt. An administration which stands ready

to starve nonpolitical post-office employees, to the grevious handicapping of all business, refuses to lift a finger to permit the reduction of pay rolls so padded by a corrupt organization as to threaten the credit of the greatest city in the Nation.

It is not a pleasant spectacle for any American to contemplate. This politician become Postmaster General would hamstring reform of the appallingly corrupt Tammany administration in New York City. He would wreck a great industry and a fine Air Mail Service and risk brave lives in order to score a political victory. He cares more for his cheap political associates than for the possibility of retrieving the city of New York from bankruptcy, waste, and graft.

Here is a grave national scandal. Before it the services of Mr. Farley as an aid to the nomination and election of President Roosevelt are irrelevant and immaterial. Whether the cause is a blundering incompetenece or a blindness to the higher standards of public service is of small importance. Mr. Farley stands an obstacle to efficient and honest government, alike in Washington and in the State of New York. His holding of the three offices of Postmaster General, chairman of the Democratic National Committee, and chairman of the Democratic State committee has long been a public scandal. His political crafstmanship remains a matter for his fellow Democrats to estimate. We can see no possible excuse for his retention in a public office serving the whole Nation.

[From the Chicago Daily Tribune of Monday, Mar. 12, 1934]

INSIDERS ON AIR-MAIL CANCELATION

Following the cancelation of the air-mail contracts stocks of leading companies fell out of bed. Aviation Corporation, which was selling for $10.75 per share on February 1, dropped to $4.37 following the President's announcement that the Army planes henceforth would carry the mails. North American Aviation stock went to $4.13 the morning after—the price 10 days earlier being $8.75. And on February 13 United Aircraft common sank to $17.62 per share, although the stock sold for $37.38 earlier in the month. Other aircraft securities fell in similar proportion.

The stockholders of these companies who continued their ownership throughout suffered losses of 50 percent and more of the value of their property in about 10 days. But some stockholders who presumably knew what was going to happen sold out before the blow fell. And some who were not stockholders sold the stock short, with knowledge of what happens to a stock when the kind of news comes out which was coming out. Who knew and sold before the price went down? And who sold what he didn't have in anticipation of the devastation of aviation stock prices that was soon to come?

The answers to these questions have become available in part. President Whitney of the New York Stock Exchange has furnished the Senate Banking and Currency Committee, at its request, with the names of persons trading in aviation stocks for the 2 weeks preceding the cancelation of the air-mail contracts. Leading a long list of well-known Wall Street names are J. P. Morgan & Co., selling 4,500 shares of United Aircraft; Jacobson & Co., 60,800 shares of the same stock; Brandenburg & Co., 36,500 shares of Douglas Aircraft; and James Seligman, 12,400 shares of Curtiss-Wright, 5,200 of Douglas, and 800 of United Aircraft. Other readily recognizable names among the sellers were Tom Bragg, Louis Kaiser, E. A. Pierce & Co., Frank Vanderlip, and Harry Content.

But it was not alone these financial middlemen who beat the gun. A number of aviation holding companies disposed of great blocks of their holdings. The North American Aviation Corporation, National Air Transport Corporation, and Sperry Corporation sold a total of 48,900 shares of Curtiss-Wright and Douglas between January 29 and February 9.

During this period when a half million shares of long stock and about 60,000 shares of short stock in the leading aviation companies were being sold prices held rather firm. For each sale there is both a buyer and a seller. Who were the buyers? The reports do not show this. But there is no great mystery about their identity. While insiders with good sources of information were selling stock rumors were being circulated that the Government was about to approve a large military aircraft-building program. The buyers in all probability were the small investors, who were seeking a hedge against inflation or who believed that the recovery program would succeed and that the aviation industry would share in the new prosperity.

The financially wise knew what was coming off and got out. Alone to stand the loss in the greatest shock an entire industry has ever received was the small investor—the forgotten man. The new dealers had forgotten to tell him what was going to happen.

Mr. ROBINSON of Indiana. Mr. President, the action of the administration in canceling the air-mail contracts without giving those concerned a hearing at all, or an opportunity to present their side of the case, was one of the most ruthless in all the history of free government. The Executive order sending these 10 men to their deaths following the cancelation of the air-mail contracts was one of the most tragic blunders committed by any administration of government in all the history of time.

Mr. ROBINSON of Arkansas. Mr. President, there is no issue to be determined relating to the Air Mail Service until after the waterway treaty shall have been disposed of.

The Senator from Indiana [Mr. ROBINSON], with his usual vigor, has bitterly condemned the President, first for canceling the air-mail contracts, and, second, for ordering air mails to be carried by the Army.

Not only today but on previous occasions the Senator from Indiana has charged that the action of the President referred to has made him responsible for the lives of 10 Army flyers who have been killed since the order to carry the mail was issued.

I do not believe that the position taken by the Senator from Indiana is just. In the view of the President, when it became apparent that the contracts for the carriage of the mail were fraudulently entered into, it became his duty to cancel them. He takes full and unqualified responsibility for that action.

For many months the subject matter of those contracts has been under investigation by a special committee of the Senate. So far as my information goes, there can be no controversy as to the conclusion that in the initiation of the contracts there was fraud and collusion. Having reached that conclusion, the Chief Executive was justified in the cancelation of the contracts, and he accepts that responsibility.

The Senator from Indiana speaks as if anyone had intended or designed that undue risks should be taken by Army flyers in the performance of duties in relation to air-mail carriers. It is always possible to involve subjects of this character with impassioned and unsustained charges.

The Senator inquires with whom the President consulted before he issued the order for the Army to carry the mail. It is my information that many days prior to the beginning of the carriage of the mail in Army planes by Army flyers, the head of the Army Air Corps, the officer presumably best informed on the subject, the officer who should have been fully able to supply the information, made the unqualified declaration that the Army was fitted by training and equipment to perform that important task, and that statement was carried in the press of the Nation. It was supported by a declaration published in the newspapers from the Chief of Staff, General MacArthur, that the Army welcomed this new responsibility.

Mr. President, the one thing in addition to the unfortunate loss of lives that has taken place, which everyone regrets and deplores, the one circumstance that impresses me as calling for legislative and administrative reform in relation to military aviation, is that when the Army Air Service is suddenly called upon to discharge somewhat hazardous duties there has resulted a condition which the Senator from Indiana characterizes as tragic.

The Government has expended enormous sums for the development and improvement of aviation. The military department has been liberally supplied, but the several factors which enter into the development of aviation have been dispersed through various departments; that is to say, the Army, the Navy, the Department of Commerce, the Department of Agriculture—that is, the Weather Bureau—the National Advisory Committee for Aeronautics, the Treasury—Coast Guard Service—and the Post Office Department Air Mail Service.

It is regrettable and sad that the Army flyers should have lost their lives. But is it not fair, I ask the Senator from Indiana, to have in mind all the facts and circumstances which reflect light upon the incidents referred to? During the period in which these accidents have occurred there have been very unusual weather conditions, which have resulted in disastrous accidents, not only to Army planes but also to other forms of aviation and other forms of transportation. The President took the precaution to ask the head of the Army Air Corps whether his Department was equipped and trained for the performance of this duty. He was assured that the work could begin within 2 or 3 days. My information is that 11 days were given in which to make necessary, special, and emergency arrangements.

It is quite natural, in view of the developments which have since been manifested, that there should be an effort on the part of some officers to shield themselves from a responsibility which they should be both willing and able to carry. There is not a person within the sound of my voice who does not know that the profession of the soldier is inseparably associated with hazard. He must at all times be ready to encounter the perils incident to the carrying of the sword or to the flying of military airplanes. That is a part of the purpose of maintaining a military air force, and I think, without reflecting on the personnel of the Army air force, as gallant, I believe, as was ever assembled anywhere on this earth, it is a reflection on the efficiency of the Army Air Corps to say that they cannot perform a civilian function in time of peace, a function which admittedly is more hazardous than flying in weather always calm and with winds always fair. The fault goes back to the manner in which the aviation force of the United States has been organized, under separate heads and departments, 8 or 10 different bureaus having relationship to aviation, with different purchasing agencies, with no organized effort to procure the most modern and efficient equipment.

It is a sad thing to say, but one of the results which ought to come, I should rather say, which must come, from this condition is the more efficient organization of the Army Air Service, the assemblying, if you please, under a single head, excepting naval aviation, of the bureaus which have to do with aviation, the placing at the head of the aviation service of one who is not only well trained and familiar with the history of the problems which relate to that service but one who believes that an up-to-date air corps or department is an essential and indispensable part of the military service of this Nation.

If that result shall be achieved, through tears and through wrathful expressions, if you please, there will result some measure of compensation for the tragedies which have happened, tragedies which are due, in large part, to unusual and extraordinary weather conditions, and, in my judgment, in some part to lack of adequate and proper equipment.

Mr. President, it is not just—and Senators will not get away with it—to denounce the President as a murderer or to denounce his order directing the carriage of the mail by the Army as legalized murder. His motive was not political. It was to promote the honest administration of the Government, and if we want to be fair about it, we may well go back to a previous administration, under which many of these contracts were entered into, under conditions which have become a common scandal to the people of this Nation.

I should like to see the movement to concentrate aviation bureaus under one head, under an able and aggressive leadership, carried forward, and I should like also to see coupled with that a provision of law for all aviation purchases, so far as practicable, to be made by a single organization, audited by the Comptroller General. I believe that such an arrangement would not only give the United States what they have paid for and have not received, what they are entitled to have, an efficient and well-equipped air force, but it would also tend to remove the opportunity for dishonesty and for fraudulent arrangements such as those to which reference has already been made.

The Senator from Indiana [Mr. ROBINSON] spoke as if in 1 minute, without consulting anyone in the Army, the President had canceled the air-mail contracts and ordered the Army to perform the duty of carrying the mail.

Mr. COPELAND. Mr. President, will the Senator from Arkansas yield?

Mr. ROBINSON of Arkansas. I yield to the Senator from New York.

Mr. COPELAND. Mr. President, I did not hear the early portion of the debate, but I want the country to know that when the men from the Army went out in planes they went in planes just as well equipped as any privately owned plane in this country. The Army had 11 days in which to make preparation, and they installed in their planes radio equipment, they installed blind-flying devices, and all the other equipment necessary for safety in flying. Our men in the Army were not sent out unprepared in unequipped planes. They had every facility which the privately owned planes possessed.

It is an unfortunate thing that the Army aviators died, but had the men piloting private planes operated their planes under the same conditions of weather, I fear there would have been exactly the same fatalities, because the pilots who flew the Army planes were experienced. No man was permitted to fly across a territory over which he had not previously traveled. But because of the failure of Congress in years past to provide weather stations and weather reports, the Army flyers were subjected to the same dangers to which privately owned planes operated by private pilots were subjected.

I was quite concerned and interested, may I say to my friend from Arkansas, in the testimony which we have just received in the War Department appropriation bill hearings, and I desire to say that if the testimony of the men from the War Department can be depended upon, as we know it can be, we can rely upon the fact that the Army planes were well equipped, thoroughly equipped, and the men who flew them were trained men, so no fault can be placed upon the War Department for what has happened.

Mr. ROBINSON of Arkansas. Mr. President, the Senator from New York speaks with knowledge of the testimony before the committee, a part of which has been referred to by the Senator from Indiana in the address that prompted my remarks.

I had assumed that the statements that have been repeatedly made on the floor of the Senate had some foundation in fact. The statements referred to are that the Army planes were poorly equipped for the performance of the duty of carrying the air mail. The Senator from New York confirms my statement that 11 days were granted in which to make emergency arrangements, and he goes further and enforces that statement with the declaration that the planes were as well equipped as civilian planes have been.

The Senator from Indiana quotes from an editorial attack on Mr. Farley, an editorial which attacks him and the administration for not working out the problems of the fusion mayor of New York.

The PRESIDING OFFICER. The Senator has 10 minutes on the reservation.

Mr. ROBINSON of Arkansas. Have I consumed all my time on the treaty?

The PRESIDING OFFICER. The Senator has consumed 20 minutes. He has 10 minutes left on the reservation.

Mr. ROBINSON of Arkansas. Then I must hasten. I do not understand, Mr. President, that the present administration is responsible for the success or the failure of the LaGuardia administration. I may be in error about that, but I should like to advise so great an authority as the Herald Tribune that I have never been advised that such responsibility was assumed.

Then the editorial takes Mr. Farley to task for the cancelation of the air-mail contracts. I have already said that the President has and accepts full responsibility for the cancelation of these contracts.

While I am talking about the Herald Tribune I should like to bring to the attention of the Senate one of its advertisements in Editor and Publisher for March 10, 1934, in which it declares that it has made more gains from advertising during the recent period than during any other time in its history. It boasts of the suecess which has come to its enterprises and advertises it in the Editor and Publisher already referred to. I ask leave to have printed as a part of my remarks the advertisement referred to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The advertisement referred to is as follows:

[From the Editor and Publisher for Mar. 10, 1934]

IT'S FORWARD FOR THE NEW YORK HERALD TRIBUNE

February 1934 was a good advertising month in New York. While it brought gains to most newspapers, it was a month of splendid achievement for the New York Herald Tribune.

In total advertising the Herald Tribune gained 101,312 lines, the largest gain among all New York newspapers.

In automotive advertising the Herald Tribune was again in first place and had the largest gain in New York.

Also in first place were gravure, book publishers, office equipment, and general heating and plumbing.

The largest gains of any New York newspapers were made by the Herald Tribune in these nine classifications: Automotive, real estate, railroads, book publishers, legal, heating and plumbing, beverages, radio, general. Finally, the Herald Tribune showed gains for the month in 37 of the major retail and general classifications listed by Media Records, including such key classifications as department stores, women's wear, groceries, financial, tobacco, and others.

Although February was a good month for most New York newspapers, morning newspapers were specially favored by advertisers. The first four newspapers in total volume were morning newspapers. Morning newspapers as a group show a larger gain (morning gained 424,459 lines; evening gained 53,722). Morning newspapers carried a larger proportion of all New York advertising. (Morning, 64 percent; evening, 36 percent).

Successful advertising campaigns in 1934 will include the Herald Tribune in New York.

New York Herald Tribune.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate, as in Committee of the Whole, and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed July 18, 1932.

Mr. ROBINSON of Arkansas. Mr. President, I will now take occasion to speak a few words about the treaty now pending before the Senate. I realize that the question has been exhaustively discussed by those who have studied it, from the standpoint of the supporters of the treaty and by others who are familiar with it, from the standpoint of the opposition.

In my judgment, the St. Lawrence-Great Lakes waterway is a natural channel for commerce. It is, therefore, a sound economic proposal to construct the waterway. The waterway will serve a substantial part of the population of both the United States and Canada.

The arrangements in the treaty as to the cost of construction seem fair in view of the benefits anticipated. Comparing the numbers of inhabitants of the respective countries, I do not think there can be any severe criticism as to that.

In relation to railway transportation, ever since I have been in the Congress I have heard opposition from railroads to the construction and improvement of waterways, and I have never known an instance in which a great waterway was developed which did not add to the commerce of that section and, indirectly if not directly, benefit the railways themselves. I have little faith in an argument that is based on the contention that the construction of the waterway referred to will detrimentally affect the railways. In any event, that contention involves an abandonment of the policy of waterway construction.

The Mississippi River affords a valuable means of transportation to a large part of our country. For many years the Government has been expending considerable sums in the development of that waterway. I am fully appreciative of the fact that representatives in Congress from other parts of the Union have willingly contributed to the development of that waterway, and I do not believe that we can justify opposition to the treaty on sectional or local grounds, fully realizing that that is the basis of some of the opposition that has been asserted in the Senate.

Furthermore, I do not think this subject has direct relationship to the labor problem, or the problem of unemployment. The construction of the waterway in the long run will increase employment, it will be beneficial to the laborers of the country rather than detrimental.

Mr. LONG. Mr. President——

Mr. ROBINSON of Arkansas. Mr. President, I cannot yield because I have only 3 minutes left. I should like to do so but I probably will not have time to complete what I had intended to say.

Reference has been made to the future requirements of this country as to commerce and transportation. It seems to me that within the course of a few years there is likelihood that this waterway will be used to its greatest possible capacity.

There has been addressed to me a letter which in the remainder of my time I shall ask the clerk to read. The letter is signed by a large number of mayors giving their support to the waterway project and forcefully answering some of the arguments made against the treaty.

The PRESIDING OFFICER. The letter will be read by the clerk.

The Chief Clerk read as follows:

MARCH 9, 1934.

Hon. JOSEPH T. ROBINSON,
Majority Leader of the United States Senate,
Washington, D.C.

DEAR SIR: On behalf of the mayors of several hundred cities in the Mississippi Valley, the basin of the Great Lakes, the St. Lawrence Valley, and of representatives of great national farm organizations, we pledge our cooperation through you to the Federal administration in completion of the Great Lakes-St. Lawrence seaway project provided by the pending treaty. We take this position on behalf of millions of our population in the city and on the farms who adhere to the American tradition of upholding national interests as against sectionalism.

No other public-works project which has been proposed will employ so many idle men and confer direct benefits upon such a vast population.

This project has been aptly described as the most constructive undertaking in the Western Hemisphere since the building of the Panama Canal. Like the Panama Canal, the completion of the Great Lakes-St. Lawrence seaway will directly benefit American cities located hundreds of miles distant from the point where construction work is to be done to remove existing obstacles to ocean navigation.

Thus, while 80 percent of the American funds required under the treaty will be expended for American labor and American materials in the State of New York and in the deepening of the connecting channels of the Lakes, Milwaukee, Cleveland, Detroit, and scores of other great cities and the farm population of more than 20 States will directly benefit from this useful public work.

We recognize that the treaty involves a wholly nonpartisan and nonpolitical question. In our delegation are mayors of every political party. Our appeal is addressed to you regardless of political faith in the firm belief that the United States Senate will ratify the treaty on broad grounds of national interest.

On March 8, at an interview at the White House, we pledged the full cooperation of local municipal authorities in carrying out this project to insure maximum benefits to American interests. In the 1932 campaign President Roosevelt admirably defined the purpose of the pending treaty as follows:

"This great project involves two objectives of equal importance, and cannot in public justice accomplish one without the other. I am deeply interested in the immediate construction of the deep waterway as well as in the development of abundant and cheap power. * * * This project * * * means cheap transportation by deep waterway for the agricultural and other products of the West; cheap electricity for the State owned and controlled resources to be developed for the primary interest of homes, farms, and industries and, of immediate importance, employment for thousands of workers. * * * It has already been too long delayed."

We likewise fully subscribe to the definition of this project embodied in the Republican platform of 1932 as follows:

"The Republican Party stands committed to the development of the Great Lakes-St. Lawrence seaway. Under the direction of President Hoover negotiation of a treaty with Canada for this development is now at a favorable point. Recognizing the inestimable benefits which will accrue to the Nation from placing the ports of the Great Lakes on an ocean base, the party reaffirms allegiance to this great project and pledges its best efforts to secure its early completion."

The official reports submitted to the Senate by the President conclusively show that the completion of this project will benefit every section of our great country and inflict injury upon none.

It will throw open the rich markets of the Middle West to domestic trade with all our ports on the Atlantic, Gulf, and Pacific coasts. Since 80 percent of all our water-borne commerce is domestic rather than foreign commerce, this will unquestionably increase the shipping of all American ports and greatly promote our coastwise and intercoastal trade which is confined by law to American bottoms.

We rely implicitly upon the performance of the pledges given by the leaders of both political parties in the 1932 campaign. We, in turn, pledge our hearty cooperation in the extension of our domestic trade with the American producers of every city and State in the Union which will be brought into connection by deep water with the Midwest by this great project.

It should be universally understood that the completion of this project carries with it great benefits, not only to industries in cities and to metropolitan people, but to our farm population as well. Those who produce the necessities of life in the vast interior region of the Nation will have a freer access to eastern and foreign markets; those who buy these necessities of life, either for human consumption or for livestock, in the eastern part of the Nation will likewise benefit.

As a committee representing the mayors of American cities and national farm organizations, we express through you the profound faith that ratification of the treaty and prompt completion of this project will promote recovery and benefit the producers and consumers in every section of the United States.

We respectfully request you, as majority leader of the Senate, to have this petition read into the records of the Senate.

Very respectfully yours,

Joint Committee of Mayors and National Farm Organizations; Fred J. Freestone, chairman, executive committee, National Grange; Fred Brenckman, Washington representative National Grange; Chester H. Gray, Washington representative American Farm Bureau Federation; Hon. D. W. Hoan, mayor, Milwaukee, Wis.; Hon. Solon T. Klotz, mayor, Toledo, Ohio; Hon. F. S. Castator, representing Mayor Couzens, Detroit, Mich; Hon. George B. Sowers, representing Mayor Davis, Cleveland, Ohio; Hon. A. H. Gokey, mayor, Alexandria Bay, N.Y.; Hon. T. S. Bushnell, mayor, Massena, N.Y.; Hon. Julius Frank, former mayor, Ogdensburg, N.Y.; Hon. John G. Beukema, representing mayors of Muskegon, St. Joseph, Benton Harbor, South Haven, Manistee, Traverse City, Muskegon Heights, and North Muskegon, Mich.; Hon. A. F. Winter, representing Mayor Sonnenburg, Sheboygan, Wis.; Hon. A. D. S. Gillett, representing Mayor Baxter, Superior, Wis.; Hon. George J. Schade, mayor, Sandusky, Ohio; Hon. A. L. Valade, mayor, River Rouge, Mich.; Hon. A. P. Zirkaloso, mayor, Lincoln Park, Mich.; Hon. H. C. Laughlin, city manager, Kenosha, Wis.; Hon. Max A. Templeton, mayor, Lansing, Mich.; Hon. R. P. Murray, mayor, Marinette, Wis.; Max Raskin, Milwaukee County Municipal League of Seventeen Communities, Milwaukee, Wis.; J. T. Dolan, president Harbor Commission, Superior, Wis.; Geo. E. Hardy, chairman of waterways commission, Toledo, Ohio; David J. Grant, Monroe Industrial Commission, Monroe, Mich.; Hon. S. F. Snively, mayor, Duluth, Minn.; Hon. J. M. Dodd, mayor, Ashland, Wis.; Hon. D. A Knaggs, mayor, Monroe, Mich.; Hon. William R. Tiefer, mayor, Trenton, Mich.; Hon. Ralph J. Cardinal, mayor, Malone, N.Y.

CANCELATION OF AIR-MAIL CONTRACTS

Mr. FESS. Mr. President, we are now operating under a limitation of debate, and, therefore, I will not have the opportunity of replying at any length to what the Senator from Arkansas has said in reference to what he alleges to be fraudulent air-mail contracts. It is amazing that in the defense of the action of the administration the leader of the Democratic Party in the Senate has no justification to offer other than the statement that it was apparent there was fraud in these contracts and then, later on, the statement that he did not think it could be successfully contradicted that there was collusion and fraud.

Mr. President, the time will come as soon as we are not operating under a rule providing for a limitation of debate when it will be shown that there was no fraud and that there was no collusion. The other side of this question has never, as yet, been produced, but it will be produced not only by an examination and analysis of the testimony of those against whom the allegation was made, but also by an examination and analysis of the testimony of those who testified that there was fraud. That testimony, flimsy as it is, will be brought to light, for it will be read here from the transcript. I cannot go into that at this time; I will reserve that for the earliest opportunity when we shall have concluded the consideration of the treaty; and it is not going to be delayed very long.

All that I have to say now is, since we are in this very unfortunate situation and there seems to be an imperative demand that something be done immediately, my own position would be to make an honest confession that there was a mistake; that the contracts should not have been canceled; that they should be reinstated; and if any modifications ought to be made in the terms of the contracts they can be made under the law as it now exists. Full authority is given to do that. That would be the honest, common-sense, square-deal method of undoing the wrong that has been committed, upon misinformation, through the recommendation of an ignorant counselor at law, who seems either not to know what the law is or else does not know how to construe the law. If such an admission were made, as I see it is not going to be made, then, I repeat, the easy way would be to reinstate the contracts upon whatever basis under law it was thought best to reinstate them.

I shall resist the effort to continue the activities of the War Department in carrying the mail. If the War Department must carry the mail, then the amendment offered by the Senator who is now presiding over the Senate [Mr. VANDENBERG in the chair] to the bill sponsored by the Senator from Tennessee [Mr. MCKELLAR], which amendment has already been accepted, will relieve the situation; or if when the measure shall be considered, the amendment offered by the Senator from California [Mr. MCADOO] shall be given consideration, that will open the way to a more satisfactory solution of the problem, but not so good a way or so justifiable a way to undo the wrong that has been committed as the method I have just suggested; for even if we should adopt the other method, it would still make possible the carrying of the mail by the Army until the contracts shall be renewed; and that is what I think we ought not to do.

I am amazed at the suggestion of the Senator from New York [Mr. COPELAND], who repeats the testimony that was brought to me only awhile ago, that men appeared who said that the Army planes were properly equipped for the purpose and that the Army personnel was trained for the work. Mr. President, the real witnesses as to the training of the personnel and as to the equipment of the planes are silent in death; their voices will not be heard in testimony as to whether they had flown the lines or not. It is easy to understand why an organization that has come under this severe indictment would undertake to justify itself and say that the planes were equipped and that the personnel was trained, while the officers of the Army who were brought before the committee testified that they were not even consulted. Whose word is the Senate going to take? The Army has no political interest to subserve; but there are those who do have a political interest in the matter, as will be shown before this debate shall have closed.

What I fear, Mr. President, is that unless we prevent the Army flying the mail there are going to be more fatalities. What a pitiable statement it is that these deaths were due only to inclement weather, as if inclement weather never occurred until now.

Mr. President, there was one company flying the mail from New York to Miami which, in 6 years' flying covering 6,000,000 miles, lost but 2 aviators, 1 in 1929 and 1 in 1933, while the Army flying the same route in 3 days lost 2 aviators. Flying the mail has involved a death rate of one for each 4,500,000 miles flown when the planes have been piloted by trained men. There have been 10 deaths in flying 1,000,000 miles while the mails have been carried by the Army. The fatalities recorded from year to year involve not merely flying in bad weather. The aviators fly in sunshine and storm, in daylight and darkness.

Mr. President, when it was announced that the Army was going to take over this work the most skillful aviators, such as the great ace mentioned here some days ago, announced that there would be fatalities, that they could not be avoided. The fatalities came. Because of the certainty that there would be fatalities private companies tendered to the War Department not only their equipment but also their personnel, to be placed under the control of the War Department, with their promise to the personnel that they would not sacrifice their seniority in service and would not under any circumstances be embarrassed by what had taken place. But these offers were rejected because that did not fit into the picture that had been already painted.

Mr. President, Army aviators, most of them with only 1 year's experience in flying, were put to an entirely different kind of work than that to which they were accustomed. For instance, barometric readings at every minute of the day, essential to air-mail flying, are not essential to the class of work done by the Army aviators. The practice is

for the Weather Bureau to give the barometric readings at the surface of the ground 24 hours a day to the Department of Commerce. These readings are radioed to the aviators in the Air Mail Service. They use the readings to correct their barometers and to adjust their altimeters in their flying.

The Weather Bureau, under the Commerce Department, has these stations along the air-mail routes in every direction. In some of the stations the Department of Commerce, under the supervision of the Weather Bureau, maintains observers to furnish barometric readings, which are then radioed. This enables an aviator at night or in bad weather to know at all times his location, his latitude and longitude, as well as altitude.

The practice in the Navy in handling the lighter-than-air ships has been to correct the altimeter every 20 minutes. For example, on the *Akron*, in the control car, there were upon a table four large aneroid barometers as large as dinner plates, and the altimeter was corrected by use of these barometers every 20 minutes. During the storm they could not correct the altimeter. No one had time, for the conditions were such that the barometer varied very rapidly, so they did not know whether the ship was 1,600 feet in the air or 200 feet in the air.

The Weather Bureau corrects the barometric readings in the various stations by use of aneroid barometers, and in the larger cities by mercury barometers, which are more reliable than the aneroid barometers in showing elevation.

Cross-continental flying involves great hazards. An officer whom I know who flew from Washington to Los Angeles, followed the trail of the transcontinental railroad for safety, but being suddenly confronted with tunnels, he would have to shoot up in the air at an angle of 45° or 50°, sometimes suddenly, in order to save his life. He is one of the most highly trained aviators in the service of the Government. An aviator knows his route like a locomotive engineer knows his roadbed. In blind flying he must resort to dead reckoning just as a ship at sea in cloudy weather when it is impossible to take observation must rely on dead reckoning. A mail flier must rely upon the speed of his plane to know aproximately where he is at all times. He must read the radio beam that is sent out from Washington along the mail routes, and know from an instrument in front of him that he is between the right and left beams at all times.

The average death in all the air-mail lines in this country was put at 1 death in 4,500,000 miles. Here we have 10 deaths, it is safe to say, before a million miles has been flown.

Yet we hear it said upon the floor of the Senate, in an effort to excuse, that if the flying had been done by the regular service the bad weather would have produced a similar number of deaths. Shame on such a conclusion when worse weather has been visited upon us even during the last month before the drastic order was issued with no fatality occurring during the bad weather.

No one can say that any of these Army aviators carrying mail had any experience as a transport flyer. The Commerce Department under the law has scheduled certain rules for flying. No transport solo flyer is permitted to have a license who has not had at least 200 hours of flying to his credit, and yet on this floor we hear it said that 11 days were taken in which to train young men in the service to do this hazardous work. Such training would not have been accepted under the rules and regulations of the Commerce Department. I make no complaint or criticism of the Army flyers. Their business did not require that they should watch barometric readings except for changes in the weather and for storms. Altitude with them is not a matter of importance except in actual combat. There is no combat in times of peace. Flying blind at night, depending upon the radio beam for location and barometric readings for altitude that have to be corrected constantly, was something in which they were not experienced and about which they knew little.

The topography of the ground, the location of the mountain peaks, the valleys, and the approximate location of stations maintained by the Government and by private and municipal airports were things with which they had had no experience. Dead reckoning at sea, when neither the sun, moon, or stars is visible, is done by computing the tides and air currents, and the speed of the ship. Dead reckoning by an aviator when flying blind depends upon his experience in planes, scientifically equipped, and also upon the speed of the plane.

Resistance of wind, side currents, or the help of wind blowing his way have much to do with determining speed, but nothing but experience will tell an aviator how to navigate by dead reckoning so that he may know approximately where he is at all times.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). The Senator's time on the treaty has expired. He is recognized for 10 minutes on the reservation.

Mr. FESS. These young Army flyers were not expected to be trained in this particular field, in which they had no experience. It was just as essential as it is to a locomotive engineer to know from experience the roadbed, the various grades and curves, and the location of the stations upon the route. The locomotive engineer knows this from long experience, and in the blackest night he knows where he is at all times, regardless of signals of lights and without the help of radio.

Any one can be an aviator who, after 50 hours of solo flying, has passed a physical examination and an examination for practical flying, after which he is qualified by the Department of Commerce. He can qualify as a transport solo flyer after 200 hours of flying training. When the aviator is qualified with the maximum hours required before he can become a solo flyer, he then must secure a special license for that purpose. In other words, the most discriminating regulations for the assurance of safety on behalf of humanity in a new and most hazardous service have been made a governmental requirement, with which the Army has nothing to do, because its qualifications for maneuverability do not require that sort of training.

In addition to the fact that all aviators on the mail-flying air lines were told that they might go into the service of the Government during the pending air-mail controversy without losing their seniority and without being in any way under the authority of the air lines, but solely under the authority of the Secretary of War, the Government could have employed any of these experienced civilian aviators, whether under contract or not, whether they were carrying the mail, or whether they were rendering service to the air lines in the transport of passengers to and from every part of the United States. The Government further had the opportunity, pending the controversy, to employ these air lines on a cost basis or a cost-plus percentage basis, and they would have willingly cooperated with the Government pending the settlement and readjustment of the matter and the letting of new contracts. The President now admits that he was wrongly advised as to the qualifications of the Army flyers for carrying the mails; but he had been warned of the coming tragedy, because it is probable that not one was qualified to carry the air mail over these transcontinental routes.

He must rely upon the speed of his plane to know approximately where he is at all times. He must read the radio beam that is sent out from Washington along the mail routes, and know from an instrument in front of him that he is between the right and left beams at all times.

The average of deaths in all the air-mail lines in this country was put at 1 death in 4,500,000 miles. Here we have 10 deaths, it is safe to say, before a million miles had been flown.

No one can say that any one of these Army aviators carrying mail had any experience as a transport solo flyer. Their business did not require that they should watch barometric readings, except for changes in the weather and storms. Altitude with them is not a matter of importance except in

actual combat. There is no combat in times of peace. Flying blind at night, depending upon the radio beam for location and barometric readings for altitude that have to be corrected constantly, is something they knew nothing about.

The topography of the ground, the location of the mountain peaks and valleys, and the approximate location of stations maintained by the Government and by private and municipal airports were matters about which they had had no experience. Dead reckoning at sea when neither sun, moon, nor stars are visible is done by computing the tides and air currents, and the speed of the ship. Dead reckoning by an aviator when flying blind depends upon the flyer's experience in planes scientifically equipped and also upon the speed of the plane.

Resistance of wind, side currents, and the help of wind blowing his way have much to do with determining speed, and nothing but experience will tell an aviator how to do dead reckoning so that he may know approximately where he is at all times.

It may not be relevant, but it is a fact that many men who qualify as to hours of flying never become aviators. Obviously, there are now aviators flying in the Army and in the Navy who will never become skillful aviators. The administration must know that the deaths of these aviators will continue at a high ratio of mortality so long as any of the air-mail lines are run by Army officers in planes not equipped and without proper personnel training.

The discontinuance of important and necessary mail routes, even temporarily, and the use of Army officers only on certain lines may lessen but will not prevent further mortality. Men who are accustomed to use combat planes, bombing planes, scout planes, and other kinds of planes used in the Army are not used to mail-transport planes. The Government cannot say that any one man who lost his life had been in training under any of the expert flyers of the civilian air-mail lines or the civilian transport lines.

The only safe course under the circumstances is to discontinue Army mail service, and proceed at once to restore the service to qualified agencies now existing and awaiting an opportunity to perform a great service.

Mr. President, it is these considerations that impress upon me the necessity of getting out of the Air Mail Service, so far as the Government is concerned. If we must carry the mail by air, if there is no alternative, if it is so important that we cannot do without it and must continue to engage in it, then, I think, if we cannot reinstate the contracts and do what is obviously the right thing to do, we should adopt the amendment offered by the Senator from California [Mr. McADOO].

That amendment provides:

In order to meet the existing emergency with respect to carriage of mail by air, and in order to afford sufficient time for necessary and proper legislation to be enacted by the Congress, the Postmaster General, with the approval of the President, is authorized to enter into air-mail contracts, without advertising, for a period of not to exceed 90 days, with commercial air-transport operators, at such rates and upon such terms and conditions as the Postmaster General, with the approval of the President, determines will best conserve the interests of the United States.

That opens the field. That gives 90 days to look into these contracts. That would be done without bidding; it would be done without limitation. That would give the Postmaster General the authority that it is essential for him to have. It is the same authority which was possessed by the Postmaster General preceding him, under which one of the most magnificent achievements of which America may boast was made possible. Now, in an effort to smear somebody, it is undertaken to destroy what has been accomplished on the allegation that there was fraud and collusion, when there was not an iota of fraud and no form of collusion, as all the facts will demonstrate when we have a chance to present them here.

Then, in addition, there is a proviso to this effect:

Provided, That notwithstanding the provisions of section 3950 of the Revised Statutes (U.S.C., title 39, sec. 432), any person, firm, or corporation who on February 9, 1934, was the holder of a contract or route certificate from the Postmaster General may be permitted to enter into such contracts.

That proviso permits the Postmaster General to make a contract with every company that had a contract and whose rights were jeopardized by a cancelation without its being heard. That is just; that is humane; that is American. If we cannot correct this wrong in any other way, let us do it in this way, and give these companies 90-day temporary contracts on whatever terms the Postmaster General may determine, with the approval of the President, with no discrimination against those who have been wrongly treated. That, at least, would be an effort to correct the wrong, though it might be less face-saving than the other proposal which we will consider later on.

My contention today, Mr. President, is that we should diminish, if we cannot eliminate, the danger to the lives of men under the present regime. Then, as soon as the opportunity shall come—and it will not be long delayed—some of us are going to take the floor to answer the charge that fraud was apparent and that fraud and collusion cannot be contradicted. We will see whether or not that is so.

Mr. President, I ask to have printed at the conclusion of my remarks two chapters of the air commerce regulations of the Department of Commerce; one entitled "Inspection of Aircraft" and the other entitled "Licensing of Pilots."

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From Aeronautics Bulletin No. 7, Air Commerce Regulations, effective, as amended, Jan. 1, 1934, published by the U.S. Department of Commerce]

CHAPTER 2. INSPECTION OF AIRCRAFT

SEC. 26. CONTINUOUS DUTY AS TO FLYING CONDITIONS

After an aircraft is licensed, and between the times that it is inspected for airworthiness by an inspector, the owner is charged with the continuous duty of maintaining the aircraft in a good and proper state of repair and flying condition.

SEC. 27. WEEKLY AND PERIODIC INSPECTIONS

(A) It is the responsibility of the recorded owner that licensed aircraft (other than aircraft engaged in scheduled interstate passenger operation for which inspection requirements are outlined in Aeronautics Bulletin No. 7-E) shall be given a line inspection by a licensed airman at least once within 7 days preceding flight, except, however, that there shall be at least one inspection for each 25 hours of flying time. The result thereof shall be entered in the log under the signature of the person making such inspection. The line inspection must be made to ascertain the working conditions and state of repair of the—

(1) Open control wires, all control wires and pulleys open to inspection through apertures, and all hinges on control surfaces.
(2) Landing gear, wheels, fittings, and shock absorbers.
(3) Fuselage parts open to visual inspection.
(4) Main plane external bracing, including fittings and struts, external wires, cables, turnbuckles, and fabric or covering.
(5) Control-surface fabric or covering.
(6) Engine-exhaust manifolds and exhaust-pipe extensions. The engine shall be given a warming-up test, during which the proper functioning of the engine instruments shall be ascertained.
(7) Carburetors and fuel-feed lines open to visual inspection to insure proper functioning.
(8) Cooling system and connections.
(9) Cowling, to insure that the cowlings are properly secured and safetied.
(10) Propellers, as to condition.

(B) After each 100 hours of flight the aircraft must be given a periodic inspection by a licensed mechanic, and the result thereof must be entered in the log by the person making such inspection. This inspection must be made to ascertain the working condition and state of repair of the—

(1) Engine installation.
(2) Control systems throughout.
(3) Propeller alinement.
(4) Fuselage, including fittings, tail-skid, and tail-skid shock absorbers.
(5) All items specified in (A) above.

SEC. 28. GOVERNMENT INSPECTION

The inspector or other authorized officer of the Secretary of Commerce shall be permitted by the owner, operating agency, or pilot to inspect the licensed aircraft at any time and place for the purpose of determining its flying condition and state of repair. For such purposes the owner, operating agency, or pilot shall give to such inspector or officer free and uninterrupted access to the aircraft and the field or shelter where the craft is located.

CHAPTER 5. LICENSING OF PILOTS

SEC. 43. PILOTS, LAW OF

"The Secretary of Commerce shall by regulation * * * provide for the periodic examination and rating of airmen serving in connection with aircraft of the United States as to their qualifications for such service." (Sec. 3 (c).)

"The term 'airman' means any individual (including the person in command and any pilot, mechanic, or member of the crew) who engages in the navigation of aircraft while under way, and any individual who is in charge of the inspection, overhauling, or repairing of aircraft." (Sec. 9 (k).)

"It shall be unlawful * * * to serve as an airman in connection with any aircraft registered as an aircraft of the United States * * * without an airman certificate or in violation of the terms of any such certificate." (Sec. 11 (a) (4).)

"Any person who violates any provision of subdivision (a) of this section * * * shall be subject to a civil penalty of $500." (Sec. 11 (b).)

SEC. 44. APPLICATION OF THE LAW

For the purpose of this chapter persons in command of or piloting licensed aircraft in flight will be classed as pilots.

SEC. 45. CLASSIFICATION OF PILOTS

Licensed pilots are classed as commercial or noncommercial pilots; commercial pilots are licensed as transport or limited commercial pilots or as commercial glider pilots. Noncommercial pilots are designated as private, amateur, student pilots, or noncommercial or glider pilots.

SEC. 46. PRIVILEGES AND RESTRICTIONS OF LICENSED PILOTS

Except as otherwise provided in these regulations, the privileges conferred and restrictions imposed upon licensed pilots are as follows:

(A) Transport pilots may pilot any type of licensed aircraft, but shall not carry persons for hire in licensed aircraft other than in conventional[1] types of heavier-than-air craft and within the classes specified in their license.

Transport pilots shall demonstrate their ability to navigate landplanes, seaplanes, or both in one or more of the weight classes set forth below. Such demonstration shall be to the satisfaction of the examiner for the Department of Commerce.

Class 1. Gross weight not more than 1,000 pounds.

Class 1A. Gross weight between 1,000 and 3,500 pounds, single engine.

Class 1B. Gross weight between 1,000 and 3,500 pounds multi-engine.

Class 2A. Gross weight between 3,500 and 7,000 pounds, single engine.

Class 2B. Gross weight between 3,500 and 7,000 pounds, multi-engine.

Class 3A. Gross weight over 7,000 pounds, single engine.

Class 3B. Gross weight over 7,000 pounds, multi-engine.

Scheduled air transport rating: Transport pilots flying airplanes engaged in scheduled operation of interstate passenger air-transport service under a certificate of authority must hold a scheduled air-transport rating.

Transport pilots shall not pilot unlicensed aircraft carrying persons or property for hire.

(B) Limited commercial pilots shall have all of the privileges conferred and be subject to all of the restrictions imposed upon transport pilots, except that they shall not, for hire, instruct students in the operation of aircraft in flight and they shall not pilot aircraft carrying persons for hire outside of the areas mentioned in their licenses, except that they may be permitted to function as copilot on dual-controlled aircraft when accompanied by a transport pilot who is in command of and responsible for the operation of such aircraft. Such pilots may, beyond the 10-mile radius of their base, operate licensed aircraft carrying guests, executives, or employees of the companies employing them, provided no payment is made for the transportation. They may also demonstrate aircraft in flight to prospective purchasers.

(C) Commercial glider pilots may pilot any type of motorless aircraft, but shall not transport persons or property nor instruct students except in licensed motorless aircraft.

(D) Noncommercial glider pilot's licenses may be issued for noncommercial flights upon satisfactory accomplishment of the prescribed flight tests.

(E) (1) Private pilots may pilot licensed aircraft, but shall not carry persons or cargo for hire in licensed or unlicensed aircraft. They shall not for hire instruct students in the operation of aircraft in flight. Such pilots may operate aircraft carrying guests, executives, or employees of companies employing them, provided no payment is made for the transportation. They may also demonstrate aircraft in flight to prospective purchasers.

(2) Amateur pilots may pilot licensed aircraft, but shall not carry persons (except licensed transport, limited commercial, or private pilots in dual-controlled aircraft) or cargo in licensed or unlicensed aircraft, nor instruct students in the operation of aircraft in flight.

(3) Student pilots may operate licensed aircraft only while receiving flying instruction. They shall not be in command of aircraft carrying any other person and shall not carry cargo in licensed or unlicensed aircraft. They may make solo cross-country practice flights, but while away from their home airport on such flights shall not make landing on airports where flying meets or air races are in progress or at air-line terminals. They shall not be in command of United States aircraft operating in a foreign country.

(F) Until otherwise provided by regulations the licensing of airship and balloon pilots shall be in accordance with special orders of the Secretary of Commerce.

(G) Special classes of pilot license may be issued for operation of unconventional[1] types of aircraft in accordance with special orders of the Secretary of Commerce.

SECTION 47. APPLICATIONS FOR PILOT'S LICENSE

An application for a pilot's license must be filed, under oath, with the Secretary of Commerce upon blanks furnished for that purpose. An applicant for a pilot's license, including a student pilot's license, must appear for a physical examination before a physician designated by the Secretary of Commerce and pass such examination, unless he is exempt under these regulations.

SECTION 48. CHARACTER, AGE, AND CITIZENSHIP QUALIFICATIONS

An applicant for a pilot's license must be of good moral character. The minimum age requirements are 14 years for noncommercial glider pilots; 16 years for private, amateur, and student pilots; 18 years for commercial glider, limited commercial, and transport pilots. Applicants for any type of pilot's license who are under the age of 21 will be required to submit evidence of the consent of parent, legal guardian, or natural guardian, prior to the issuance of a license. A noncommercial glider, private, amateur, or student pilot may be a citizen of any country. A commercial pilot must be (1) a citizen of the United States, or (2) a citizen of a foreign country which grants reciprocal commercial-pilot privileges to citizens of the United States on equal terms and conditions with the citizens of such foreign country, or (3) an alien who has filed his declaration of intention to become a citizen of the United States and advises the Secretary of Commerce of the serial number of such declaration, the date thereof, and the court in which filed. He must diligently and successfully prosecute the naturalization proceedings under penalty of the revocation of his pilot's license and from time to time must keep the Secretary of Commerce advised of the status of such proceedings. All applicants for commercial pilots' licenses shall be able to read, write, speak, and understand the English language except applicants who are citizens of a country with which the United States has reciprocity with respect to the licensing of pilots.

SECTION 49. FLYING-EXPERIENCE REQUIREMENTS

An applicant must have at least the following flying experience:

(A) Transport pilots: Two hundred hours of solo flying, of which at least 5 hours must have been within the last preceding 60 days prior to the filing of the application.

(B) Limited commercial pilots: Fifty hours' solo flying, of which at least 5 hours must have been within the last preceding 60 days prior to the filing of the application.

(C) Commercial and noncommercial glider pilots: No minimum flying experience.

(D) Private pilots: Fifty hours' solo flying of which at least 5 hours must have been within the last preceding 60 days prior to the filing of the application.

(E) Amateur pilots: Twenty-five hours' solo flying, of which at least 5 hours must have been within the last preceding 60 days prior to the filing of the application.

(F) A graduate of an approved civilian school giving flying instruction may apply for a pilot's license, provided he has obtained the solo-flying experience in such school required by Aeronautics Bulletin No. 7-B (School Supplement), and provided such graduate applies within 10 days of the date of his graduation.

(G) Scheduled air-transport rating: (1) A transport license with proper rating.

(2) Twelve hundred hours of certified solo time within the last 8 years, of which at least 500 hours have been cross-country. (Copilots' time may be credited as outlined in section 58 of these regulations.)

(3) Seventy-five solo hours of night flying, of which at least 50 percent shall have been cross-country over lighted airways. (If solo time was obtained as copilot, the applicant shall demonstrate his proficiency in the accomplishment of night landings and take-offs.)

SEC. 50. PILOT'S PHYSICAL QUALIFICATIONS

The physical examinations provided for herein must be accomplished before the practical and theoretical tests will be given. The qualifications are as follows:

(A) Private, amateur, student, commercial glider: Absence of organic or functional disease and of defects or structural defects or limitations which might interfere with safe handling of an aircraft under the conditions of private flying; visual acuity of at least 20/50 in each eye without correction and depth perception of not more than 30 mm without correction; or visual acuity of at least 20/30 with correcting lenses and depth perception of not more than 30 mm with such correcting lenses; no diplopia within an angle of 45°; normal visual fields; no organic disease of eye, internal ear or mastoid; no abnormalities of equilibrium.

[1] Within the meaning of this chapter conventional types of heavier-than-air craft are those which depend for sustentation upon fixed planes and which are controlled by trailing tail surfaces.

[1] Within the meaning of this chapter conventional types of heavier-than-air craft are those which depend for sustentation upon fixed planes and which are controlled by trailing tail surfaces.

(B) Transport, limited commercial: Good past history; sound pulmonary, cardiovascular, gastrointestinal, central nervous, and genitourinary systems; freedom from material structural defects or limitations; freedom from disease of the ductless glands; normal central, peripheral, and color vision; normal judgment of distance; only slight defects of ocular muscle balance; freedom from ocular disease; absence of obstructive or diseased conditions of the ear, nose, and throat; no abnormalities of equilibrium.

(C) Lighter-than-air: Applicants for licenses as pilots or student pilots of lighter-than-air craft (airships and balloons, all types) will be subjected to the same physical examination and must meet the same physical standard as private aircraft (heavier-than-air) pilots, with the following exceptions:

(1) All visual tests may be taken with correcting glasses if necessary.

(2) No hernia will be considered disqualifying if adequately supported by a truss.

(D) Waivers: In the case of trained, experienced pilots, the Secretary of Commerce may grant waivers for physical defects designated as disqualifying by these regulations when, in his opinion, the experience of the pilot will compensate for the defect. A waiver once granted for any grade of license will hold indefinitely for that grade only so long as the defect for which it was granted has not increased or unless canceled by the Secretary of Commerce.

SEC. 51. EXEMPTION FROM PRESCRIBED PHYSICAL EXAMINATION

An applicant for a pilot's license (or its renewal) may be exempt from the physical examination prescribed in these regulations upon filing with the Secretary of Commerce a certified copy of the examination for flying in the United States Army, Navy, or Marine Corps made within 6 months of the date of filing his application for his pilot's license or its renewal, provided his physical qualifications as shown by such copy of the examination are not less than those required by these regulations for the class of license for which he applies. Pilots licensed in a lower grade applying for a higher grade of license must submit a new satisfactory physical examination for the grade applied for unless the previous examination submitted was for the higher grade and, in the opinion of the Secretary of Commerce, is of recent enough date to warrant exemption. No physical examination will be required of noncommercial glider pilots or glider student pilots.

SEC. 52. PILOTS' EXAMINATIONS AND TESTS

Unless exempt under these regulations, candidates must pass the following examinations and tests:

(A) Transport pilots: (1) Examination on the Air Commerce Regulations, including the air-traffic rules, all of which are set forth in Aeronautics Bulletin No. 7.

(2) Practical and theoretical examination in elementary engine and plane mechanics and rigging and a theoretical examination in the fundamentals of meteorology and air navigation.

(3) Practical flight test, as follows:

(a) In addition to normal take-offs and landings, the following maneuvers will be required: From 1,500 feet, with engine throttled, make a 360° turn and land in normal landing attitude, by wheels touching ground in front of and within 200 feet of a line designated by examiner for the Department of Commerce.

(b) From 1,000 feet, with engine throttled, make 180° turn and land in normal landing attitude, by wheels touching ground in front of and within 200 feet of a line designated by examiner for the Department of Commerce.

(c) A series of 3 gentle and 3 steep figure 8 turns, and 720° steep power turns in both directions. Spiral in one direction from 2,000 feet, with engine throttled, and land in normal landing attitude by wheels touching ground in front and within 200 feet of a line designated by examiner for the Department of Commerce.

(d) Fly in emergency maneuvers, such as spins, spirals, side slips, climbing turns, and recovering from stalls, and such others as the Secretary of Commerce deems necessary.

(e) Fly over a triangular or rectangular course at least 100 miles, landing at place of take-off within 5 hours. This flight shall also include two obligatory landings, not at point of departure, when craft must come to rest. The course will be designated and the candidate will be furnished with route information by the examiner for the Department of Commerce at time of departure, and the examiner for the Department of Commerce will determine whether the course was correctly followed and whether obligatory landings were satisfactory. Upon the presentation of satisfactory proof that the candidate has engaged in solo cross-country flights at a distance of at least 100 miles within 1 year preceding the date of his application the flight specified in this subsection will be omitted.

(f) Cross-wind landings and take-offs.

(B) Limited commercial pilots: The same examinations and tests as are prescribed for transport pilots, except the cross-country flight and the examination on elementary meteorology and navigation.

(C) Private pilots: (1) Examination on the Air Commerce Regulations, including the air traffic rules, all of which are set forth in Aeronautics Bulletin No. 7.

(2) Same flight test as prescribed for transport pilots except the cross-country flight.

(D) Amateur pilots: (1) Examination on the Air Commerce Regulations, including the air traffic rules, all of which are set forth in Aeronautics Bulletin No. 7.

(2) Same flight test as prescribed for private pilots except spins and cross-wind take-offs and landings.

(E) Glider pilots: In addition to normal take-offs and landings, a series of gentle and moderate banks, precision landings, and 360° turns will be required and such other maneuvers as the Secretary of Commerce may deem advisable. For noncommercial pilot's license, the 360° turns will not be required.

(F) Reexamination: Applicants for pilot's licenses who have failed to successfully accomplish the prescribed theoretical or practical tests may apply for reexamination at any time after the expiration of 90 days from the date of such failure, except applicants for private, amateur, and glider pilots' licenses, who may reapply after 45 days from the date of such failure. Applicants for pilots' ratings who have failed to successfully accomplish the prescribed tests for such ratings may reapply after the expiration of 30 days from date of such failure.

If the physical examination has expired for the class of license for which application has been made, a new physical examination must be submitted.

The minimum passing grade for any subject in the foregoing theoretical examinations shall be 70 percent.

Practical tests must be accomplished to the satisfaction of the examiner for the Department of Commerce.

(G) Scheduled air transport rating: (1) Examination on the airline regulations which are set forth in Aeronautics Bulletin No. 7–E, and its interpretations, practical and theoretical test on the use of directional radio, and other available airway aids to navigation, including tests in meteorology with respect to weather analysis and forecasting.

(2) Practical flight tests in a hooded cockpit, under the conditions of instrument flying, performing the following maneuvers with recovery to a predetermined heading.

(a) Straight level flight.

(b) Moderate banks making 180° and 360° turns in both directions.

(c) Minimum glides and maximum climbs and approaches to stalled attitudes of flight.

(d) Climbing turns.

(e) Recovery from stalls, skids, slips, spirals, and banks in excess of 45°.

SEC. 53. PLACE, ETC., OF EXAMINATIONS

Examinations for pilots' licenses will be held at such times and places as the Secretary of Commerce shall designate. Such examinations and tests will be conducted by an examining officer designated by the Secretary of Commerce. Candidates for pilots' licenses must furnish a commercially licensed airplane or one eligible for commercial license and in an airworthy condition, equipped with dual controls, in which the flight tests are to be made, unless the Secretary of Commerce makes other provisions therefor.

SEC. 54. DURATION AND RENEWAL OF PILOTS' LICENSES

(A) Duration: Unless sooner suspended or revoked, transport and limited commercial pilots' licenses shall remain in force for 6 months; glider, private, and amateur licenses for 1 year; student licenses for 2 years, as specified in the respective licenses.

(B) Renewal: Licenses may be renewed within 30 days prior to expiration, for the same duration as original, upon satisfactory showing of the following:

Transport and limited commercial: Ten hours solo flying within the last 6 months in each aircraft classification for which renewal is desired. Satisfactory physical examination made by a Department of Commerce medical examiner.

Private and amateur: For annual renewal, 15 hours of solo flying within the last year, provided, however, that for renewal after each 2-year period of the existence of the license a satisfactory physical examination made by a Department of Commerce medical examiner will be required.

Student: Student licenses are not renewable, but new licenses may be secured at any time upon accomplishment of the prescribed physical examination.

Commercial glider: Ten gliding flights or one soaring flight of at least 1 hour's duration within the last year, and the same physical examination required for private pilots' renewal.

Noncommercial glider: Ten gliding flights or one soaring flight of at least 1 hour's duration within the last year.

Scheduled air transport ratings may be renewed if the holder has had within the 6 months prior to expiration at least 25 hours in scheduled air transport service and has flown by instruments for a period of at least 2 hours. Otherwise, a recheck in the manner and to the extent indicated by the circumstances may be required.

(C) Expired licenses may be renewed upon proof of satisfactory physical condition of the pilot and the passing of the flight test required for the class of license for which renewal is requested.

(D) Upon 10 days' notice to and approval of the Secretary of Commerce, the area for permissible flying of aircraft carrying passengers for hire designated in the license of limited commercial pilots may be changed to other areas.

SEC. 55. PERSONAL POSSESSION OF PILOTS' LICENSES

The pilot's license shall be kept in his personal possession when he is piloting aircraft and must be presented for inspection upon the demand of any passenger or any authorized official or employee of the Department of Commerce or State or municipal officials charged with enforcing local regulations or laws involving Federal compliance.

SEC. 56. PILOTS' CERTIFIED LOG BOOKS

A licensed pilot must keep an accurate record of his solo flying time in a log book in which the entries have been certified to and signed by him and attested by one of the following persons:

(A) An official of an approved type airplane or engine manufacturing company.

(B) An official of an approved flying school.

(C) A contract United States air-mail operator.

(D) A notary public.

(E) A properly authorized operations officer for any military organization.

(F) Department of Commerce aeronautical inspectors.

(G) Any officer of an organization engaged in the operation of aircraft when such officer has direct knowledge of the authenticity of the entries.

This log book shall contain the date of flight, the type of aircraft flown, the license or identification number of such aircraft, the type of engine, the duration of the flight, and the points between which such flight was made, and, in addition, when any flight results in serious damage to the aircraft, a notation to this effect shall be entered. This log book must be presented, upon demand, to any authorized representative of the Department of Commerce or State or municipal officer enforcing local regulations or laws involving Federal compliance.

SEC. 57. PILOTS' NIGHT-FLYING QUALIFICATIONS

A transport or limited commercial pilot who has not had at least 2 hours of night solo flying within the last preceding 90 days shall not pilot aircraft carrying passengers, for hire, between sunset and sunrise, except where he takes off and lands between sunset and sunrise, at least 10 times solo. At least three of such landings must be to a full stop.

SEC. 58. MEANING OF SOLO FLYING

As used in these regulations, a person is engaged in solo flying when he is the sole operator of the controls and is in command of aircraft in flight. Provisions for logging flying time on scheduled interstate passenger air transport services is set forth in the Interpretations of Regulations Governing Scheduled Operation of Interstate Passenger Air Transport Services, Bulletin No. 7–E.

SEC. 59. SUSPENSION OR REVOCATION OF LICENSES

Pilot's licenses may be suspended or revoked for:

(A) Violating any provision of the Air Commerce Act of 1926 or any regulations promulgated thereunder.

(B) Carelessness or inattention to duty.

(C) Unsound physical condition or any demonstration of incompetency in the operation or repair of aircraft.

(D) Being under the influence or using or having personal possession of intoxicating liquor, cocaine, or other habit-forming drugs while on duty.

(E) Refusal to exhibit license upon proper demand.

(F) Violating air-traffic rules.

(G) Making any false statement in application for license or in any reports required to be submitted by these regulations.

(H) Carrying passengers who are obviously under the influence of intoxicating liquor, cocaine, or other habit-forming drugs.

(I) Piloting aircraft carrying passengers in excess of the number authorized in the aircraft license. Children under 12 years of age are excepted, provided the maximum pay load as specified in the aircraft license is not exceeded, and further provided the aircraft is properly equipped with individual safety belts for each occupant 5 years of age or older.

(J) Doing any act in connection with aircraft which is contrary to the public safety or interest or detrimental to the morale of pilots or mechanics.

(K) Using or displaying license for any fraudulent purpose.

(L) Failure of student, amateur, private, or commercial glider pilots to wear correcting lenses where vision does not meet requirements of the Air Commerce Regulations without such correction.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate, as in Committee of the Whole and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed July 18, 1932.

Mr. LONG. Mr. President, I desire to take a few minutes to controvert a few supposed-to-be statistical details offered by the Senator from Nevada [Mr. PITTMAN] yesterday, or the day before, as to the diversion of water from Lake Michigan into the Mississippi River.

The Senator from Nevada occupies a rather embarrassing position. He finds the Chief of Engineers of the United States Army, Gen. Lytle Brown, having given one opinion, which, of course, is so contrary to anything the Senator from Nevada is advocating on this floor that he cannot rely upon that. Then, when the Senator goes back behind the present Chief of Engineers of the Army to the one who preceded him, General Jadwin, he finds another opinion which he cannot bring before the Senate and have it appear at all consistent with what he is having to advocate on the floor of the Senate.

So, since the Senator cannot rely upon what Gen. Lytle Brown says and cannot rely upon what General Jadwin said before him, and probably it gets worse the farther back he goes into the Corps of Engineers of the United States Army, he brings in, as the next best thing he can do, an opinion of somebody of the lower strata—I have forgotten the man's name; I believe he is General Markham, the head of one of the lower series of the Engineer Corps—and gives what he says about it.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Nevada?

Mr. LONG. Yes, sir; I yield to the Senator.

Mr. PITTMAN. I do not want the Senator to appear in the RECORD as not knowing the position of General Markham. He is the Chief of Engineers.

Mr. LONG. Chief of which engineers?

Mr. PITTMAN. Chief of the United States Board of Engineers, United States Army.

Mr. LONG. Oh, yes; but Gen. Lytle Brown is the supreme chief.

Mr. PITTMAN. Not now.

Mr. LONG. Not now? Oh, they moved Brown? Oh, I see! Then I beg the Senator's pardon, Mr. President. It seems that they have a new man. They have moved the last two. The term of one of them ran out; that is, he became over age. Now the St. Lawrence Waterway Treaty comes along, and Gen. Lytle Brown is up here with a lot of reasoning; but he, as I understand, has been removed, and General Markham has been put in his place. I beg the Senator's pardon. I did not know that they had removed Gen. Lytle Brown. Was that because of his age limit having been reached? Was it a retirement?

Mr. PITTMAN. Yes.

Mr. LONG. I beg the Senators' pardon. When was he retired?

Mr. PITTMAN. About 6 or 7 months ago.

Mr. LONG. I did not know about it. I must have been busy. I beg the Senator's pardon. I certainly did not know that he had been retired; and I regret very much that Gen. Lytle Brown is no longer connected with the service.

Mr. President, that is one of those breaks they have. By these queer retirements of one after the other, just about the time the St. Lawrence Treaty had come here, they finally found a man, coincident with the President's position on the St. Lawrence waterway being announced, who finds himself in accord. However, that is what we expected.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CLARK. The Senator, of course, is familiar with the fact that in this report, too, about which there has been so much said during the last 2 or 3 days, the district engineer, and the division engineer, as well as the Board of Army Engineers, arrived at different conclusions as to the demonstration of the feasibility of the commercially successful operation of the waterway, as announced by the Chief of Staff himself.

Mr. LONG. I understand that.

Mr. PITTMAN. Mr. President, if the Senator will yield, I doubt whether the Senator from Missouri understands it, and I doubt whether the Senator from Louisiana understands it. I should like to have cited the source of the information just quoted by the Senator from Missouri.

Mr. CLARK. The Senator knows, if he has read the report, that the division engineer and the district engineer both held that it would be impossible to determine whether 1,500 second-feet diversion at Chicago would be sufficient to insure the commercially successful operation of the Lakes-to-the-Gulf waterway until after the completion of the Chicago sewage reduction plant in 1938.

Mr. PITTMAN. I challenge the Senator to show that.

Mr. CLARK. I have the book right here at hand, and I will be glad to find the information and put it into the RECORD for the edification of the Senator.

Mr. PITTMAN. I call the attention of the Senator to the fact that they did not refer to navigation. They stated that they would have to have some experience to determine whether or not the 1,500 cubic second-feet would be sufficient for sanitation purposes.

Mr. CLARK. Of course, the question has to do with the diversion of the water for the Lakes-to-the-Gulf inland waterway project. If there were sufficient water for navigation purposes, and, at the same time, the stream were so polluted as to make it impossible for either passenger or crew to travel on the waterway, it could not possibly be a successful commercial project. The Senator is begging the question in that particular.

Mr. LONG. That seems axiomatic to my mind, but no doubt the Senator from Nevada has another way of reasoning the matter.

Mr. OVERTON. Mr. President, will my colleague yield?

Mr. LONG. I yield to my colleague.

Mr. OVERTON. For the information of the Senator from Nevada, may I quote from one of the reports submitted? I think he will find the same statement made in the report of the division engineer, of the district engineer, and of the board itself. I quote from the statement of Col. George R. Spalding, wherein he declares:

> No one can predict with certainty the effect in 1939 of the reduction of diversion upon navigation below Lockport at any time prior to the completion of the sewage-treatment program. Sound procedure would be to carry out the full program of treatment-plant construction, reduced diversion as required by the Supreme Court decree, and observe its effect. A period of not more than 2 years of observation and study, after the completion of the treatment plants of the sanitary district of Chicago, and the full reduction of diversion to 1,500 cubic feet per second, should furnish conclusive data which will permit of positive determination whether any increase in diversion is necessary, and if so, by what amount.

Mr. LONG. Mr. President, that was so apparent to everybody's mind until theCanadian Legation became active, that no one was even questioning it. I had not heard it even controverted by anybody, that it could not be determined until these experiments had been made as to how much water had to be taken out of Lake Michigan. Not only that, but with a greater development of the waterway, it is being anticipated that instead of stopping the steamships at Baton Rouge, they might voyage many hundreds of miles farther up the river, so that no one at this early date is able to tell the limit of water we would have to have from Lake Michigan.

Mr. PITTMAN. Mr. President, will the Senator yield further?

Mr. LONG. I yield.

Mr. PITTMAN. I must say that there is nothing in the report of the engineers submitted in December, in response to the action of Congress, which in any way intimates that there is not enough water for navigation. All of them admit that there is enough water for navigation. The division engineer stated that he did not know whether there was enough water for actual sanitary purposes or not. Those are the facts in the record.

Mr. OVERTON. Mr. President, will my colleague yield?

Mr. LONG. I do not think it is going to do a bit of good with the Senator from Nevada. We might read him five more statements saying that it ought not to be done, and the Senator would still say they did not mean anything. There is no reason in trying to convert the Senator from Nevada on this treaty. We have spent many hours of fine logic in the Senate on this question, most of it directed to the Chairman of the Committee on Foreign Relations, but it does no good.

It is just like the case of the rich man who had died and gone to hell, and looked afar off and saw the poor man in the bosom of Abraham, and he cried aloud and said, "Let me go back to earth that I may be able to show my brethern there what a terrible place I found." But Abraham replied, "They have Moses and the prophets. If they hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead."

It is impossible to impress the men who are advocating the treaty since the envoy of His Majesty King George V, took a hand; it is impossible to make them see black when it is black, or white when it is white. They will not see. I do not know what happens to these gentlemen when they get tangled up with the envoys of His Majesty. I have never seen anything to equal it. The Canadian representatives themselves do not understand what happened to them.

Here is the treaty. The Canadian Senators, from whom my distinguished Senator from Illinois quoted, themselves said, "We were opposed to this treaty. We could not conceive of its being possible. We could not imagine any such thing as the possibility of such a treaty being negotiated. But since our Minister has gone down to Washington and gotten more than we ever anticipated the sane and sensible Government we were dealing with would ever be willing to cede to His Britannic Majesty, then we are going to be in favor of it, because it means American money for Canadian labor, it means American money for a Canadian waterway, it means American money for Canadian engineers, it means American money for Canadian materials, and under Canadian control."

Mr. President, that was not all. My good friend, who is a lawyer, has advocated one of the most nefarious principles I have ever seen involved in a treaty. Do Senators know what that is? It is provided in this treaty—and I challenge any man on the floor or off the floor of the Senate to dispute this statement—that if anybody up in Canada feels that he has been damaged, regardless of how, if he has suffered by reason of injury to his person, or if he claims that some of the water supply his farm enjoyed has been reduced, or some riparian right has been taken away from him, under this treaty he has a right to go into the Canadian courts and get a judgment against the international commission, and we will have to pay the Canadian citizen with American money anything that the Canadian court may hold he is entitled to have.

There was never a more ridiculous provision. If we should make a treaty under which Canada would have to do something down in the State of Louisiana, or the State of Arkansas, or the State of Nevada, and that whatever damage was done to any citizen down there would be assessed by one of the courts down there in favor of the American citizen, and Canada would have to pay it, we know that in a matter of that kind the rule would be, "Let your conscience be your guide." [Laughter.]

The idea of allowing ourselves to be drawn into a poker game in which we are not even allowed to count the chips! [Laughter.]

There is a limit in this treaty on the amount of money Canada can spend, that is all. Thank God for Canada! Thank God for England! They have taught us one rule, that it is a good thing to limit the amount of our liability, so far as concerns our own funds. But that was not the only limit put into the treaty. Two limits were established. One limit was the limit on the amount of money Canada could spend, with no particularly heavy, binding contract that they would have to spend even to that limit. That is one thing they limit. The only other limit was on America's right to use its own water, its own money, its own materials, its own engineers, and anything else that would mean advantage to the United States. They limited everything America could have, including its own money, and its own water, and its own expansion. However, they provided no limit whatever as to Canada. Funds were to be furnished as might become necessary for the completion of this project upon which we are to embark.

Mr. President, if I were sent out as a lawyer representing a client to negotiate a contract, and brought in this kind of a document, I do not believe there is a court in the United States that would allow me to practice before it, if a petition were filed to disbar me. If I had gone out representing one riparian owner as against another riparian owner, and had brought in such a one-sided contractual and conventional stipulation as is contained in this supposed-to-be treaty, no living man on earth would ever have been able to understand that I was supposed to be representing the welfare of the client paying me to do the work.

Let us see something else about this treaty, since we are at it. The Senator from New York gave some figures here yesterday. The Senator from Michigan and the Senator from Wisconsin have dilated on the great amount of business that is to be accommodated by the proposed seaway. How much business will there be?

The first thing they decide is that as much wheat as has ever been shipped in any year, the best year they have had, is bound to go through that canal. That is based upon the presumption, Mr. President, that we will export as much wheat as we did in 1929, and that all the railroads in that area put together will not get any of the freight business at all, that they will all be defunct and out of business. It is based upon the very philanthropic assumption that the railroads are not going to get any wheat to haul at all. A man can become popular with some people if he "cusses" out the railroads—and if we can have Montreal for a port, the justification for putting the American railroads out of business will be sufficiently established in the opinion of anyone who wants to vote for the ratification of the Great Lakes-St. Lawrence Deep Waterway Treaty. I am going to give the proponents of the treaty the full benefit of their assumption, but I am going to ask them to have some slight regard for arithmetic, although they can hardly do that and advocate this treaty very long. Their assumption is that there is going to be just as much wheat shipped as there was in a good year of export, and that all of it is going through the canal.

Mr. President, the fact is that in 1934 the export wheat crop fell off about 30 or 40 percent. I have the figures, which were cited in the speech of the Senator from New York on yesterday. He said that—

> Disregarding the recent depression, our total exports of wheat declined from 260,000,000 bushels in 1920 to 168,000,000 bushels in 1927. During the years 1919–21 we captured 41 percent of the world trade in wheat, and from 1923 to 1930 we secured only 21 percent.

So that instead of proceeding on the assumption that we are going to have 260,000,000 bushels of wheat, we would certainly, at the very best, have to assume that we would have 168,000,000 bushels of wheat.

I think the Senator from New York on yesterday gave some more figures. He showed from such figures as he submitted that the estimated cost of this project, on any reasonable calculation, was $573,000,000. That is the cost to the Nation, of which about $89,000,000 is to be paid by the State of New York.

Mr. President, figuring on a cost of $573,000,000, with interest at 4 percent, not to say a thing on the living earth about putting up the $600,000,000 to build the canal, the annual interest would amount to $24,000,000.

If all the wheat we are talking about went through the waterway, it would cost the United States Government 10 cents a bushel to pay the 4-percent interest per year on the whole transaction, to say nothing of the capital outlay of $573,000,000 which we will never get back. Taking into consideration the interest charges alone on $573,000,000, that means that it will cost 10 cents per bushel in interest alone for the United States to build the St. Lawrence waterway canal; and yet people are talking about saving a lot of money to the wheat farmer!

The PRESIDING OFFICER. The time of the Senator on the treaty has expired. The Senator has 10 minutes on the reservation.

Mr. LONG. Mr. President, I thought I had more time. I was under the impression that I did not rise until 35 minutes after the hour; but I see that the Chair is right, as I now understand that it was 32 minutes after the hour. I probably imputed to the Chair an animus which I know is not justified.

Mr. President, I was speaking of the sum of $573,000,000. Where are we going to save that money? Out of what income are we going to save it? The proponents of the treaty come to the Senate and say they are going to save 8 cents a bushel on wheat, whereas the total freight charges on the wheat for the whole distance is not 8 cents a bushel. The talk that has been indulged in around here by the Senator from Wisconsin and the Senator from Nebraska and the Senator from Michigan to the effect that they are going to save 8 cents a bushel on wheat cannot be justified, when as a matter of fact the whole charge is not 8 cents a bushel. All the freight charges put together do not amount to 8 cents a bushel, and they have been telling the wheat farmers that they are going to save them 8 cents, when they are not paying 8 cents in total cost. At the very most they could not possibly pay more than 4 cents or 4½ cents; and that probably would be an exaggeration as to what could be saved.

If the farmer could be saved 4½ cents a bushel, Mr. President, that would still lack 5½ cents of saving him enough to pay the annual interest cost to the United States Government per bushel of his project. An outlay of $573,000,000 at 4 percent would mean that we would be paying an annual interest cost alone of 10 cents a bushel, provided the waterway got it all, and provided the railroads got none of it—that is to say, provided the whole traffic went by that route, which is not going to be the case; no one has any idea that such a situation will arise; and, provided further, that they would be able to get the entire benefit for the farmer, whereas the chances are that it would not mean a thing in the world but a little lower price on the wheat when it got to Liverpool.

My time is short. I have to go through the points I desire to make very rapidly. I had plenty of other data I wanted to submit to the Senate, but I only have 7 minutes left in which to do it.

Mr. President, when we come to the question of Lake Michigan, what were the exact figures of General Brown that were read here this morning?

The PRESIDING OFFICER. The Senator from Nevada might help the Senator as to those figures.

Mr. LONG. I do not suppose the Senator from Nevada has them immediately at hand. I desire to state them exactly. At any rate, Mr. President, the figures were three times, or more than three times, the amount allowed under the stipulation of the treaty. That was the opinion of General Lytle Brown; but General Brown said that at this time we should not allow any legislation to be passed that undertakes to provide the maximum amount that can be drawn from the lake.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Nevada?

Mr. LONG. I yield.

Mr. PITTMAN. I have every regard for the Senator's memory, but I should very much prefer to have the Senator read General Brown's testimony.

Mr. LONG. I shall ask my colleague if he will look up the testimony, and I will read General Brown's testimony when it has been found for me. I will read the testimony, but still it will not convince the Senator from Nevada. I will read the paragraph that was read this morning, in which General Brown estimated that the diversion for navigation would have to be more than three times the amount allowed by the treaty, and then said that regardless of that, at this time no legislation should be passed that undertakes to fix the maximum amount of water or which would limit the United States in the amount of water they should have. I will get the testimony in a minute and read it. Do not worry.

Mr. OVERTON. It is on page 593 of the hearings.

Mr. LONG. Very well. I now read from that testimony. This does not do any good to the contention of the Senator from Michigan [Mr. VANDENBERG], who is asking the questions:

> Senator VANDENBERG. What is your present judgment as to the smallest flow of water that is necessary to develop a commercially useful waterway at this point?
>
> General BROWN. The indications are, with everything in view, that something like 5,000 feet per second should be held available for that purpose.
>
> Well, my idea of about what the Supreme Court took into consideration is based on the testimony that General Jadwin gave them, and General Jadwin's testimony, as I remember, was based on Chicago Harbor only, and that was 1,500 cubic feet per second.

We have got an entirely different proposition now than Chicago Harbor only; we have got the waterway all the way from the Lakes to the Mississippi River.

On page 265 of the same printed record appears a copy of a letter from General Brown to former Senator Deneen, which I will skip. Then I continue to read:

Maj. Gen. Lytle Brown, Chief of Engineers of the United States Army, in a report dated December 15, 1931, to the Secretary of War, transmitting a report on Illinois River, Ill., by Col. W. C. Weeks, dated December 6, 1929, makes the following statement:

"It is now apparent, however, that the improvement recommended and authorized for the Illinois River between Utica and the mouth was based on an incomplete appreciation of the needs of modern barge transportation and that better facilities than are provided in the existing project for this section, as limited by the authorized expenditure, must be afforded if this waterway is to fulfill adequately its intended purpose.

"16. The plans for a fully adequate improvement of the Illinois River from Utica to the mouth are dependent upon the diversion from Lake Michigan. The diversion authorized by law is specifically that authorized by the decree of the Supreme Court, issued April 21, 1930. The diversion thus authorized by law until December 31, 1938, is regarded as sufficient to provide reasonably adequate navigation under the present plan of improvement for the commerce immediately anticipated pending the full development of this commerce and the construction of adequate terminals for its accommodation. The report to be submitted in accordance with the law will set forth the full improvement required to afford satisfactory navigation for the full commerce anticipated on this important waterway, and the minimum amount of flow required for its operation."

General Brown also said:

I am of the opinion that at this time no definite figure on the amount of diversion necessary for navigation should be stated, and that future study of the completed waterway should be made to ascertain the quantity of water necessary for navigation. It is, therefore, recommended that any specified diversion be omitted from any authorizing legislation.

What does that mean to the Senator from Nevada?

Mr. PITTMAN. Mr. President, on what page is that?

Mr. LONG. This was in 1930, and the testimony appears on page 593.

Mr. PITTMAN. Since that time we have had the very survey that he speaks of, and the board of engineers says 1,500 cubic feet is the volume necessary.

Mr. LONG. Since that time they had some kind of a survey, and the men making the survey, as we have shown here, did not think they could limit the diversion to any such amount. On the contrary, they said they would have to wait 2 years after 1939 to find out what it would take. Then Gen. Lytle Brown goes out of the service and in comes General Markham, and he gives the kind of a favorable report that might be expected under the circumstances.

That is the situation in which we are called upon to stand and deliver the rights of the American people to the Canadian Government. That is the condition we have had to face in fighting this treaty in order that the American people may spend $573,000,000 on the pretense that it is going to lower charges on wheat 8 cents when we were not even paying 8 cents total, and when, on the basis of an annual 4-percent interest charge, it would cost this country 10 cents a bushel. On this basis we have been asked to ratify the St. Lawrence Waterway Treaty.

That is not all. The treaty never was endorsed by either the Democratic Party or the Republican Party. It has not the endorsement of the Republican Party nor has it the endorsement of the Democratic Party, because this infamous and monstrous document never was in existence until both parties had adjourned their national conventions. It was not in existence when the Republican National Convention was held in Chicago. It was not in existence when the Democratic National Convention was held in Chicago. It was brought into existence after the candidates of both parties had been nominated. Then there was some kind of romance about the St. Lawrence waterways, and the Canadian envoys came back to Washington and went over the matter with our representatives, and went back to Canada with more than they ever thought they could possibly get. Nobody appreciated what was proposed to be in the treaty, the treaty not having been yet brought into existence.

Mr. President, I have here a number of newspaper editorials on the subject which were handed to me by the Senator from Missouri [Mr. CLARK]. They come from papers from all over the United States. This is one time when there is practically unanimity of judgment except where misguided, selfish, sectional interests are involved.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Missouri?

Mr. LONG. I yield.

Mr. CLARK. The sheaf of editorials which the Senator holds in his hands, and which I handed to him a little while ago, simply represent additions to the more than 200 editorials which I placed in the RECORD about 10 days ago. As the Senator from Louisiana said, they come from newspapers all over the United States.

The PRESIDING OFFICER. With great regret, the Chair must advise the Senator from Louisiana that his time has expired.

Mr. LONG. Mr. President, I conclude in one sentence that it is unfortunate that sectionalism has been brought into this question by those who are trying to ratify the treaty when those in opposition to it are trying to preserve the rights of the 48 States for those States. It is unfortunate that sectionalism should be brought into the question involved in the drive that is on to bring about ratification of the treaty.

Mr. President, I send to the desk the editorials to which I have referred and ask that they may be incorporated in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The editorials are as follows:

[From the Lawrence (Mass.) Tribune, Feb. 10, 1934]

CANADA IS PLEASED

Opinion on the advisability of the St. Lawrence waterway is well divided in this country. New England especially has failed to see much merit in the proposition. States in the central part of the country have been more favorable. In view of this it is rather interesting and pertinent to get an idea of the feeling in Canada. On this point the Portland Press-Herald says:

"Canada wants this treaty ratified. The Toronto Mail and Empire tells why in an able editorial. It points out that the cost of the St. Lawrence waterway will be borne mainly by the United States. By the treaty the United States abandons its ancient contention that Lake Michigan is an American lake. The treaty puts an end to Chicago's ambition to divert some of the water in the Great Lakes for the benefit of the Mississippi Valley. Lake Michigan, says this newspaper, belongs to the watershed of the St. Lawrence instead of to the watershed of the Mississippi. 'No feature of the treaty is more surprising than the low cost to Canada', says the newspaper."

To this it is added that, under the treaty, of the 5,000,000 horsepower developed Canada will secure 4,000,000 and the United States will get 1,000,000. Just why this division is made seems rather a mystery but facts are facts.

Under such conditions it is not altogether surprising that Canada looks with much favor upon the proposed undertaking.

[From the Pocatello (Idaho) State Journal, Feb. 17, 1934]

STATESMANSHIP OR—PORK?

Despite all the ballyhooing that has been done for the St. Lawrence waterway, and despite the repeated statements that the Lake States need, and want Congress to appropriate, more than half a billion dollars for the same, more than 108,000 citizens of Michigan have petitioned the State's Senators as follows:

As a resident of Michigan I hereby petition yourselves and the great honorable Senate of the United States not to ratify the Great Lakes-St. Lawrence Deep Waterway Treaty for these reasons:

The waterway is not needed. We have currently a Lakes-to-the-sea waterway and other wholly efficient transportation facilities. We cannot afford it. The woeful condition of public finances and our already grievous tax burden warrant no such vast expenditure. It will divert traffic from the adequately equipped railroads, thereby increasing their insolvency and otherwise destroying the vested rights of American citizens. It will not benefit the wheat grower or furnish farm relief. American labor will be one of the most serious losers from it. It will not cure the depression. Nor is it desirable as unemployment relief. American ports will suffer. It is not necessary to our foreign trade. Our local markets will be at the mercy of cheaply produced foreign goods. Lastly, we must furnish the bulk of the money for a project (1) benefiting another nation more than our own, and (2) lying more largely in foreign territory than in ours—doubly a source of more unwanted foreign debts and of delicate international situations.

Voluntarily I, the undersigned, therefore, submit this, my protest, and earnestly urge that you vote against such ratification.

Pretty strong for 108,000 signatures from a single State!

But will it have any effect?

Every other "barrel" that has appeared in the past 15 years in our country has been protested; but the country has not as yet been thoroughly awakened to the enormous drag on the taxpayers of the country, perpetuated by our engineers and our politicians.

How unreliable engineers' reports are, was shown to the Senate a week or 10 days ago when the cost of several of the larger projects were compared with the original engineers' estimates. Senator WAGNER, of New York, Democrat and fifth ranking member of the Senate's Foreign Relations Committee, had sometime previously shown how, with each new period of spending, the estimates for the St. Lawrence have grown. In 1921 a joint board of engineers estimated it at $250,000,000. By 1926 the estimates had grown to $536,000,000 and by 1929 to $712,000,000, while only a few days ago the estimate of one of New York's most competent and most highly reputable engineers put the cost at over a billion. Senator WAGNER also pointed out that since the project was first proposed conditions have changed so materially as to arraign every economic principle against the proposal. To quote:

"They are striving to improve our transportation facilities by the infusion of a new competitive element at a time when we know that competition has played havoc with transportation and when we are committed to the commencement of a program to unify and coordinate our transportation facilities. Rarely has any movement persisted so stubbornly in the face of the discrediting of every doctrine which gave it birth.

"At a glance, thus, we see much opposition in public opinion in two widely separated States."

[From the Las Vegas (N.Mex.) Optic, Jan. 23, 1934]

OUR CONCERN

The Senate has laid aside temporarily the proposal for ratification of the St. Lawrence Waterway Treaty with Canada, thus affording a final opportunity for American citizens to make known their opinions on this very important international agreement.

In this section of the United States there may be less interest expressed than should be the desire of citizen if they were informed upon the subject.

The administration is believed to favor the project because it can be included as part of the general scheme for temporary unemployment relief and for its limited benefits in shipping rates to a part of the grain producers of northwestern United States.

If no other argument were to be raised in this section it should be sufficient to consider that the St. Lawrence waterway would have an immediately disastrous effect upon present transportation by rail systems serving this part of the country. New Mexico is vitally interested in having maintained the present movement of tonnage west across the State to Pacific coast points. There is the probability that large tonnage in grain, wool, and other commodities now moving toward the western coast will be diverted to the seaway transports if the project be approved.

That part of the program is directly pertinent to our interests.

In the general picture there is much more to be said in opposition. Under terms of the proposed treaty the United States would spend $243,661,000 and the Dominion of Canada but $38,071,000 of the estimated cost of construction. Furthermore, $54,718,000 of our money would be spent for works in Canada under direction of Canadian engineers and Canadian workmen with Canadian materials.

It also provides to cede to Canada a 4-to-1 privilege of electric-power develop as against the United States developments.

The whole of the proposal seems to be based upon an overzealous idea of some of our Government leaders to promote new avenues of expenditures for American money to the benefit of other nations which are highly competitive.

Casual study of the St. Lawrence Waterway Treaty will induce most American citizens to protest its acceptance by the Senate of the United States Congress. Our citizens owe it to themselves and posterity to enter early and vigorous objection to the proposed acceptance.

[From Review, Boston, Mass., Feb. 10, 1934]

THE WATERWAY SCHEME

It is an interesting fact that the proposed St. Lawrence Waterway, which the President heartily favors, would beyond a doubt take practically all freight traffic, which now comes by rail from the Middle West, away from Boston, and to a lesser degree from other New England ports, and would deposit it for shipment at Montreal. The most important effect of the diversion which would thus take place would be upon the railroads. They would certainly lose a tremendous volume of freight, and by so much their revenues, now hardly large enough to take them "out of the red", would be diminished.

Apparently the railroads, which had few or no friends some years ago, when they were regularly denounced by crafty politicians as robbers, have not many more friends nowadays in official circles. Any transportation or terminal proposition that promises to divert freight and passengers from the railroads to the steamship lines is received with loud applause, and sometimes by those who should be willing to see that the railroads get at least an even break in their quest for enough business to enable them to pay their bills and declare a few scattering dividends now and then.

It is almost amusing to see the Federal Government lending money by the millions to railroads in order that they may make improvements which their own revenues will not permit them to make, and at the same time boosting a measure that is as surely going to reduce the revenues of important eastern railroads as it is going to increase the business of the port of Montreal. That doesn't look like a square deal, and as part of the new deal it is entirely out of place.

[From Erie (Pa.) Times, Feb. 3, 1934]

THE ST. LAWRENCE WATERWAY PACT?

Perhaps the most exaggerated claim made by the advocates of the St. Lawrence seaway development is that the total cost to United States will be in the neighborhood of $182,000,000. The public has been informed that as soon as that expenditure has been made an ocean-going vessel drawing 26 feet of water will be able to load at Hamburg or Liverpool and clear for Chicago or Duluth or Milwaukee. The Chicago Tribune has made editorial mention of the fact that due to the difference in the buoyancy of salt versus fresh water the ocean draft would be limited to 23½ feet to enable the vessel to navigate the 27-foot draft of the proposed St. Lawrence seaway. But after that, what? The ship would not be able to dock in Buffalo Harbor because there are only 21 feet of water available. Erie, with 20 feet of water, couldn't take care of the ship. She must avoid Cleveland, where there are only 19 feet of draft. She could not navigate the Detroit and St. Clair Rivers to Lake Huron, and even if she did she would not be able to dock in the 21 feet of water at Chicago.

Another interesting fact is that natural harbors on the Great Lakes are very scarce, and that the outstanding ones are on the Canadian side, at Toronto and Fort William. On the American side, at Cleveland, Chicago, and Milwaukee, we have merely developed the mouths of rivers, and harbors must be constructed. In fairness to the people of the United States, the proponents of the waterway should admit that the expenditure of $182,000,000 is only the first installment. For that price the waterway can be completed to the point where a vessel drawing not in excess of 23½ feet may clear from Liverpool for Toronto. Further installments running into 10 figures will be necessary to clear Great Lakes channels and construct harbors before nagivation will reach either Chicago or Milwaukee. The operator of an automobile can well appreciate just what this means. There is a down payment of $182,000,000, after which we must produce further regular payments before we have a clear title to inland navigation—and in the meantime operating and repair expenses will accrue.

[From Portland (Maine) Press Herald, Feb. 7, 1934]

THE ST. LAWRENCE TREATY

Sometime this week the Senate will act on the ratification of the treaty with Canada pertaining to the St. Lawrence waterway. It is said that the administration, which favors ratification, lacks 3 votes in the Senate to put this treaty through. It is being opposed by Senators from nearly all the Atlantic coast States and some from the States in the Mississippi Valley. But the President's support of the proposal to ratify the treaty will bring to it many votes which would otherwise be withheld.

Canada wants this treaty ratified. The Toronto Mail and Empire tells why in an able editorial. It points out that the cost of the St. Lawrence waterway will be borne mainly by the United States. By the treaty the United States abandons its ancient contention that Lake Michigan is an American lake. The treaty puts an end to Chicago's ambition to divert some of the water in the Great Lakes for the benefit of the Mississippi Valley. Lake Michigan, says this newspaper, belongs to the watershed of the St. Lawrence instead of to the watershed of the Mississippi. "No feature of the treaty is more surprising than the low cost to Canada", says this newspaper.

Under the provisions of the treaty, 5,000,000 horsepower will be developed. Of this vast amount, Canada will obtain 4,000,000 and the United States 1,000,000. This feature of the treaty alone seems to show that the Americans who drafted this treaty were either dumb or asleep when this distribution of the vast hydroelectric power the St. Lawrence control dams will produce was being made.

[From Portland (Maine) News, Feb. 10, 1934]

ST. LAWRENCE POWER

The States Chamber of Commerce has added its voice to the rising chorus of opposition to United States ratification of the St. Lawrence Waterway Treaty, in a letter addressed recently to Senator HALE and other Maine Congressmen.

"Our business interests in this location are very much opposed to the ratification of the treaty and hope that it will be disposed of by a failure to ratify", President Owen Smith declares in his letter to Senator HALE.

Does this mean that Maine business at last has recognized the inestimable value, to all the State, of the foreign and domestic trade carried on in Maine seaports—trade that would be lost, in large measure, if cargoes now entering the country through the port of Portland, through Bucksport, Searsport and Bangor were diverted up the St. Lawrence to Great Lakes harbors?

Or is Maine business just a little bit frightened by the hydroelectric-power-development aspect of the waterways treaty? Considering the fact that Messrs. Walter S. Wyman and Guy P. Gannett are among the directors of the State Chamber of Commerce, one may be pardoned for wondering. * * *

It would be a splendid thing for Maine if the State Chamber of Commerce could bring its members to take a more active interest

in the preservation and upbuilding of the foreign trade of Maine seaports. Thus far that body has not distinguished itself to any marked degree by its efforts in this direction.

And yet, once upon a time Portland and other seaports of Maine were numbered among the more important shipping centers on the Atlantic seaboard.

Once upon a time, too, Maine had business and civic leaders who believed the prosperity of the entire State was linked closely with the prosperity of the seaport cities and towns.

Once upon a time, if memory serves aright, Maine business placed greater emphasis upon trade and commerce than it places now upon the undeniably lucrative and valuable summer tourist "industry" * * * Maine was a fairly lively State in those half-forgotten years not only during the 2 or 3 brief months of summer but all the year around.

The State's foremost objection to the ratification of the St. Lawrence Waterways Treaty should be based on apprehension for the future of Maine's already sadly depleted and steadily dwindling import and export trade.

But as for the hydroelectric power development aspects of the treaty, Maine need not be unduly alarmed. For Maine, in spite of Messrs. Wyman and Gannett, still retains title to a vast natural power supply of its own—a reservoir of potential energy which the citizens of Maine eventually will convert to their own uses. We need not begrudge to other States the cheap water power that could result from the construction of dams along the St. Lawrence. And if, before public ownership of electric utilities in Maine is achieved, some of that cheap power from the St. Lawrence might be sold into Maine in competition with privately controlled power here it would not be the citizens but the private power interests who would feel the effects of such competition most keenly.

All manner of perfectly sound reasons may be advanced for Maine business to oppose ratification of the St. Lawrence Waterway Treaty. Objection to the hydroelectric power development feature is the weakest and least convincing argument of all.

[From the Canton (Ohio) Repository and News, Feb. 9, 1934]

DEFEAT IS PROBABLE

Ratification of the St. Lawrence Seaway Treaty by the Senate has become a distinct improbability. Little as advocates of the action like to admit the fact, circumstances are forcing them to be honest with themselves.

Straw votes show more than a dozen votes lacking to make up the two thirds favorable vote necessary to ratify the treaty. Although there is a possibility that President Roosevelt might be capable of forcing ratification by exercise of his influence, it is not likely that he will choose to do so.

At this stage of the legislative procedure arguments for and against the seaway's construction under terms stated in the treaty are of little use. It is clear that no considerable number of opponents are to be won over by those in favor of ratification. For the present the matter is as good as settled unless there are unforeseen developments.

The project will be pressed further, undoubtedly. President Roosevelt favors it, and the Democratic Party has been committed to its support. It is logical to expect that the treaty may be thrown open to revision in the hope that it may be made acceptable.

However, it faces opposition of a kind that will not be dispersed easily, however unworthy its grounds may be in the opinion of the seaway's advocates. New York City, Philadelphia, and Baltimore oppose it to protect their port developments. In a list of affected interests these other sources of opposition are included: Buffalo, with a heavy investment in docks and warehouses; the New York State Barge Canal, which would be operated in opposition to the seaway; railroads, particularly in the eastern United States; transportation companies operating on the Great Lakes; coal operators in Ohio, Pennsylvania, West Virginia, and Kentucky, which might be thrown into competition with foreign mines; ports on the Gulf of Mexico; southwestern wheat growers. Though proposed in broad public interest, the seaway would affect vested interests at the outset of its operation for the sake of advancing theoretical interests. In the long run it probably would be a valuable improvement, but the time for its adoption remains an unknown date in the future.

[From the Dubuque (Iowa) Tribune, Feb. 4, 1934]

ST. LAWRENCE SEAWAY TREATY

With the President's gold-revaluation bill off its hands, the Senate will resume discussion of the St. Lawrence Seaway Treaty, which it has had under consideration from time to time as circumstances permitted since the opening of the session. The debate on the subject has already been quite extensive, and it has made certain, what was previously understood, that the opposition to the treaty in the Senate is strong and its defeat would be sure but for the support which the President is giving to it.

The St. Lawrence Treaty is in no sense a recovery measure. Nor is it a Roosevelt measure. The negotiations for the waterways were inaugurated many years ago and the treaty now under consideration was signed by President Hoover. It was planned and agreed upon during our period of greatest prosperity. It would provide a certain amount of employment for its construction, but that obviously was not part of its intent. It therefore cannot be considered either an administration or a recovery measure, and the reasons which have caused Congress to give support to the President's recommendations in other matters do not apply to this.

Moreover, this is a question that is exclusively within the jurisdiction of the Senate, one with which the House has nothing to do. The Senate has always acted with great independence in the exercise of its prerogative in relation to treaties, often excessively and unreasonably so, and the confirmation of a treaty requires a two-thirds majority of the body. In this case, accordingly, the President's support of the treaty is not necessarily conclusive.

The opposition to the treaty in the Senate is not only strong, it is wide-spread. The Atlantic coast Senators are almost, if not quite, unanimously against it, and it is significant that both of the Senators from the President's own State are among them. Nothing has so far developed to indicate the attitude of the southern or western Senators toward the treaty. Only the Senators from the region of the Great Lakes and the Northwest are actively supporting the measure.

The Senators from the Mississippi Valley States are not opposed to the general idea, the main plan, or the purpose of the seaway, but to the provision of the treaty as it stands, which, they believe, imperils the usefulness of the Lakes-to-the-Gulf waterway. The sentiment of this region, says the St. Louis Globe, has been in the past acquiescent, even favorable, to the St. Lawrence project. But when there was incorporated in the treaty a limitation upon the amount of water that could be diverted from Lake Michigan into the Illinois Canal and River so small in amount as to jeopardize the operation of this internal waterway for adequate navigation, that sentiment turned against it in self-defense. While different engineers have made widely differing estimates of the amount of water required, the mere fact of their differences makes it seem essential to the interests of this region that the treaty should leave this question open to the test of actual experience. It does not do this. It places a definite and low limit on the volume of water, and under the terms of the treaty this could never be increased except with the consent of the Canadian Government. This would make the future of this waterway, which is entirely within the United States, subject to the opinion and action of a foreign government, a condition that seems to this section and to us utterly intolerable.

Unless a reservation is made to the treaty and accepted by Canada, leaving the amount of water that may be diverted from the Lake into the Illinois Canal for future determination by the American Government, the treaty may not be ratified.

[From the Miami Herald, Feb. 1, 1934]

IS IT A BAD BARGAIN?

If one makes a trade with another person and then finds that the other party to the transaction is boasting of the splendid bargain he has made, and gives facts and figures to prove that he has, it would be very natural for that person to believe that he had been outtraded, outgeneraled, and pretty well done up in the trade into which he involved himself.

Which brings us to an examination of how the other party to the St. Lawrence Seaway Treaty regards the instrument by which the United States agrees with Canada to undertake the construction of ship canals that will connect the Great Lakes with the Gulf of St. Lawrence.

Such a treaty has been made between this country and Great Britain, but it has not yet been ratified by the Senate of the United States.

Canada seems to be well satisfied with her bargain, and her newspapers do not hesitate to infer that that country got all the best of it when the treaty was signed.

Just a few sentences taken here and there from an extended editorial from the Toronto Mail and Empire will indicate the feeling of the Canadian authorities over what they claim is a great diplomatic victory for their country.

Commenting on the treaty which was signed several months ago, that paper says: "Though executed at the American Capital, it concedes to this country all the conditions long insisted upon by the most jealous guardians of Canadian rights."

Then it tells in sentences that "The cost of the undertaking is to be borne mainly by the United States." "The United States abandons its ancient contention that Lake Michigan is an 'American' lake. That great body has become forever, through this treaty, an international body of water, which belongs to the watershed of the St. Lawrence instead of to the Mississippi watershed." "No feature of the treaty is more surprising than the low cost to Canada, at which the undertaking is to be carried out." "The treaty puts an end to Chicago's ambition to drain the Great Lakes for the benefit of the Mississippi Valley." "Canada is to obtain 4,000,000 horsepower and the United States 1,000,000 horsepower out of the whole St. Lawrence waterway development."

And, finally, in speaking of the work of the Canadian minister to Washington, that paper says: "He has obtained a treaty which places the bulk of the cost on the United States and involves the Dominion treasury in an expense of less than $40,000,000."

Other newspapers of the Dominion express their joy over what they term a great diplomatic victory over the United States.

From what can be learned from our own side as well as the Canadian side, it would look very much as though this treaty,

now before the Senate, were a bad bargain for your Uncle Samuel; and if it is that, the people of this country should protest to the Senate against its ratification.

[From the Newport News (Va.) Press, Feb. 8, 1934]

GROSSLY UNFAIR

The Federal Government has issued another blast in support of the St. Lawrence Waterway Treaty, soon to come before the Senate. Now, as in the past, the proponents of the treaty say that the cost and the benefits will be equally divided between the United States and Canada, although admitting later on that Canada can develop much more water power than can this country. And now, as in the past, the Government experts maintain that the cost of the undertaking will be only a fourth of the billion dollars estimated by the Brookings institution.

The Merchants Association charges that the Government's data are inaccurate, in that the figures used are based upon 1929, an abnormal year in all respects.

The association cited the estimate of 13,000,000 tons of export and import trade which the committee gave as the potential commerce of the waterway, including 7,741,500 tons of potential exports of wheat and grain products, meats and animal fats, manufactured iron, chemicals, automobiles, agricultural implements, and copper. The total of these products in 1931 was less than 6,000,000 tons, the association said.

Part of the committee's report on possible savings by transportation on the St. Lawrence, also based on 1929 figures, assumes return cargoes and full vessel loading. The association declares this combination of the best possible transportation costs and most favorable conditions is something that all shipping men know to be impossible.

The data gathered by Mr. McNinch's committee is not up-to-date and was obtained from prejudiced or political witnesses the association contends. The estimate of $272,000,000 as the Government's expenditure on the project should be $500,000,000, and the annual cost, now given as $9,300,000, should be $30,000,000, it also asserts. The entire structure of estimated savings on freight charges should be adjusted before the Government enters a compact with Canada for the waterway development, it adds.

Regardless of all this, aside from everything which may be said in support of the St. Lawrence waterway, the Federal Government has no right—certainly no moral right—to spend millions of dollars to the detriment of existing ports and the ruination of industries in which the American people have invested billions of dollars.

It is to be regretted that President Roosevelt is supporting the measure. And in the face of his support it should be rejected, and with the least possible delay.

[From the Johnstown (Pa.) Evening Democrat, Feb. 10, 1934]

WATERWAY PROBLEMS

It is possible to build a waterway by way of the St. Lawrence River and the Great Lakes which will permit ocean-going ships to land at Chicago docks. It is possible, we repeat, to build such a waterway, but no one has as yet been able to show such an undertaking would prove practical or financially profitable.

Ocean-going vessels and lake-going craft are two entirely different transportation vehicles. The ocean-going vessel is built for speed. Lake-going craft are designed to carry maximum loads. Lake vessels sometimes encountered heavy seas, but typical lake craft—the ones designed to carry capacity loads—would be pounded to pieces in midocean by the average Atlantic storm.

Ocean-going vessels must be kept moving. Carrying charges run against them 24 hours in every day. No transportation company can afford to have a five to ten million dollar vessel plowing through the Great Lakes on a roundabout course to Chicago or spending time being carried through canal locks. There is no instance where ocean-going craft have ever been profitably used on inland waters.

The St. Lawrence waterway was conceived as a power project, has been nursed as a power project, and remains a power project, notwithstanding the efforts made to present it as a feasible transportation plan.

[From the Troy (N.Y.) Times, Feb. 10, 1934]

THAT ST. LAWRENCE GOLD BRICK

As the Senate moves toward a vote on the ratification of the St. Lawrence Seaway Treaty between this country and Canada it is interesting to note what the Canadian newspapers have to say on the subject. It is interesting chiefly, as well as instructive, because the Canadian press gives as the reasons why it would be a good thing for Canada to have the treaty ratified, the very reasons why opponents of the treaty in this country feel it should be defeated.

Canada wants the treaty ratified. And in a very able editorial, the Toronto Mail and Empire tells why. It points out that the cost of the St. Lawrence seaway will be borne mainly by the United States. It also points out that under the treaty the United States abandons its ancient contention that Lake Michigan lies wholly within the American boundaries. It emphasizes also that the treaty will put an end to Chicago's ambition to divert some of the waters in the Great Lakes for the benefit of the Mississippi Valley. Lake Michigan, this newspaper points out, becomes a part of the watershed of the St. Lawrence instead of belonging to the watershed of the Mississippi, and, adds the newspaper naively, "no feature of the treaty is more surprising than the low cost to Canada."

Canadians very naturally view all these things with triumph. And why shouldn't they? If the treaty is ratified it will be a major diplomatic and economic victory for the Dominion, while in placing its signature to the instrument the United States will prove itself the prize dummy of all time and its representatives demonstrated as fit only to stay at home and sip quietly on bottles with soft nipples.

Under the provisions of the treaty, the Canadian press goes on to explain, 5,000,000 horsepower of electrical energy will be developed of which Canada will obtain 4,000,000 and the United States 1,000,000. It is to be wondered that Canada does not laugh itself into hysterics when it considers this portion of the bargain. When added to all these are the considerations of the incalculable harm ratification of the treaty will work on American cities, seaports, and industries, the St. Lawrence Seaway Treaty becomes one of the most collossal gold bricks that any country has ever been asked to buy. It is opposed by every important trade, economic, and civic organization in the country. If it is ratified when it comes before the Senate for consideration, it will be an everlasting blot and shame upon the statesmanship of America.

[From the Dubois (Pa.) Courier, Feb. 7, 1934]

SHOULD NEVER PASS

Arthur Brisbane, noted writer for the Kings Feature Syndicate, has an interesting article on the St. Lawrence Waterway Treaty, in which he points out that someone must have been asleep in the United States when the treaty was made. The treaty seems to be so manifestly in favor of Canada that one can hardly credit the United States with having a say in its framing. Mr. Brisbane brings the treaty to the fore by quoting from a Canadian newspaper, the Toronto Mail and Express, which has the following to say:

"The cost of the undertaking will be borne mainly by the United States.

"The United States abandons its ancient contention that Lake Michigan is an American lake.

"The treaty puts an end to Chicago's ambition to drain the Great Lakes for the benefit of the Mississippi Valley.

"Lake Michigan belongs to the watershed of the St. Lawrence instead of to the Mississippi Watershed.

"No feature of the treaty is more surprising than the low cost to Canada at which the undertaking is to be carried out."

Mr. Brisbane then says that Americans will be specially interested in the following quotation:

"Canada is to obtain 4,000,000 horsepower and the United States 1,000,000 horsepower out of the whole St. Lawrence waterway development."

The Minister representing Canada in the United States is congratulated on the fact that he has obtained a treaty which places the bulk of the cost on the United States.

Fortunately the United States Senate still has a say on the treaty, and it is extremely doubtful if the agreement will be ratified.

Mr. Brisbane ends his article by declaring that it would be a good idea to say to Canada: "Many thanks; we shall not trouble you. We shall build a canal from the Great Lakes to the ocean all the way through American territory, bear all the expense, and keep all of the power developed."

[From the Gate City, Keokuk, Iowa, Feb. 7, 1934]

ST. LAWRENCE WATERWAY NOT WANTED

The St. Lawrence waterway project at one time had many proponents in the Northwest and in this more southerly section who thought it would hurry our wheat and other grains on to the world markets; these proponents seem to have taken a turn-about attitude. They may have come to the conclusion that our hopes of ever again having a world market are in the nature of a dream.

Just now friendly expressions about the St. Lawrence waterway are few and far between. This section is in a fair way to have river transportation to the Gulf. So we shall not need one to the Atlantic.

The Mississippi Valley Association is strongly against the St. Lawrence project. In its latest bulletin it summarizes the reasons for its expressed opposition, as follows:

"Article 8 surrenders American sovereignty over Lake Michigan, an American lake lying wholly within the borders of this country and within the American watershed.

"The same article limits for all time the diversion from this lake to 1,500 cubic second-feet, a volume wholly insufficient to maintain a navigable channel in the Illinois waterway, but grants to Canada the right of unlimited diversion from boundary waters.

"The estimated cost of the St. Lawrence seaway to the United States is $243,661,000, while Canada will pay an estimated total of but $38,071,000. No consideration is given the United States for millions of dollars already expended to improve channels and harbors in the Great Lakes, which will be used by the seaway.

"The treaty provides that $54,718,000 of the American taxpayers' money shall be expended for works to be constructed in Canada by Canadian engineers, Canadian labor, and Canadian materials.

"The treaty will give the Canadian grain producer, now enjoying lower rail rates to Lakes and ocean ports, an added advantage over his American competitor in the world markets.

"The treaty will give Canada 4,000,000 of the 5,000,000 electric horsepower developed, an advantage of 4 to 1.

"The treaty gives Canada exclusive ownership and control over all the structures built with American money on the Canadian side of the international boundary. This might result in the closing of the waterway to American ships in the event of war."

Right now it seems that the St. Lawrence compact, advocated by the President, is slated for defeat. The promises he had made virtually compelled him to submit it for ratification. A defeat on this subject would do the President no political harm and would not lower his prestige with the American people.

Following is an extract from an editorial in the St. Louis Globe-Democrat stating the position of the people of the Mississippi Valley as regards the pending treaty. It outlines the opposition case so clearly and so accurately as to leave little ground for the proponents of the measure to fall back upon:

"With the President's gold revaluation bill off its hands, the Senate this week will resume discussion of the St. Lawrence Seaway Treaty, which it has had under consideration from time to time as circumstances permitted since the opening of the session. The debate on the subject has already been quite extensive, and it has made certain what was previously understood, that the opposition to the treaty in the Senate is strong and its defeat would be sure but for the support which the President is giving to it. Whether that support will be sufficient to overcome the opposition remains to be seen. All that can be said now is that it makes the issue doubtful.

"The disposition of the present Congress to act in accord with the President's wishes has been frequently manifested in all the measures he has submitted for congressional action, but such measures have dealt exclusively with recovery programs, and Congress realizes that for them the President has very strong public support. The St. Lawrence Treaty is a matter of different complexion. It is in no sense a recovery measure, nor is it a Roosevelt measure. The negotiations for the waterways were inaugurated many years ago and the treaty now under consideration was signed by President Hoover. It was planned, that is to say, and the preliminary terms agreed upon during our period of greatest prosperity. It would, to be sure, provide a certain amount of employment for its construction, but that obviously was no part of its intent. It therefore cannot be considered either an administration or a recovery measure, and the reasons which have caused Congress to give support to the President's recommendations in other matters do not apply to this. Moreover, this is a question that is exclusively within the jurisdiction of the Senate, one with which the House has nothing to do. The Senate has always acted with great independence in the exercise of its prerogative in relation to treaties, often excessively and unreasonably so, and the confirmation of a treaty requires a two thirds majority of the body. In this case, accordingly, the President's support of the treaty is not necessarily conclusive.

"The opposition to the treaty in the Senate is not only strong, it is widespread. The Atlantic coast Senators are almost, if not quite, unanimously against it, and it is significant that both of the Senators from the President's own State are among them. The Mississippi Valley Senators are generally opposed to it. Nothing has so far developed to indicate the attitude of the Southern or Western Senators toward the treaty. And there are many and varying reasons for the opposition. Only the Senators from the region of the Great Lakes and the Northwest are actively supporting the measure."

[From the Springfield (Mass.) Evening Union, Feb. 2, 1934]

A JUG-HANDLE TREATY

The Mississippi Valley Association sums up the principal objections to the St. Lawrence power and waterway project and reproduces an editorial of the Toronto Mail and Empire, printed directly after the signing of the treaty, as a representative Canadian opinion as to which nation stands to reap major benefits from the scheme.

Special objections from the Mississippi Valley standpoint are well known. They concern the diversion of lake water that might otherwise be employed for the improved navigability of the Illinois and Mississippi Rivers and the diversion of traffic away from the valley and other American routes to the Canadian route. There are other objections of a general nature.

These relate to the proposed surrender of American sovereignty over Lake Michigan, a body of water wholly within United States territory; the sevenfold share of the cost the United States would pay, over Canada's share, not to speak of millions already invested by this country for Great Lakes channels and harbors; the superior advantage accorded Canadian grain producers; the granting to Canada of 4,000,000 out of the 5,000,000 horsepower proposed to be developed, and exclusive ownership and control of structures built with American money on the Canadian side of the boundary, which might result in closing the waterway to United States ships in the event of war.

The Toronto editorial was marked by a tone of elation, suggestive of unexpected and almost unbelievable concessions granted to the Dominion by the treaty. Special mention was made of the abandonment by the United States of the contention that Lake Michigan is an American lake and it was remarked that "no feature of the treaty is more surprising or more satisfactory than the low cost to Canada at which the undertaking is to be carried out." Attention was called to the point that, though the United States was to stand the bulk of the costs, most of the construction would be in Canada with Canadian labor and materials.

This and other expository matter in the Toronto editorial brings out the essential point in Canadian as in many American minds that the St. Lawrence Treaty plan is in truth a jug-handled arrangement. There is no ground for wonder that, as the Mail and Empire remarks, "the Ottawa government regards this treaty as of great importance to Great Britain and the Empire." All British shipping in all parts of the Empire is to have the right of navigation on the Great Lakes and St. Lawrence waterway for all time.

The Great Lakes are thus to become the Mediterranean Sea of North America. The international differences that might arise from such a state of affairs in future have received scant attention in this country, apparently. Though United States ships might be barred from the St. Lawrence waterway in certain contingencies, it has been suggested that the arrangements might establish a precedent by which Canada would claim joint rights to the use of the deeper Mississippi waterway, the other main outlet of Lake Michigan. No rights of this nature, express or implied, appear to be inherent in the treaty itself. Assuming this apprehension to be groundless, there are plenty of other objections for looking askance at the proposal.

[From the Newport News (Va.) Press, Jan. 31, 1934]

BEING 100 PERCENT BOOBY

The St. Lawrence Waterway Treaty with Canada is now before the United States Senate for ratification. An examination of the treaty and an analysis of its provisions gives rise to incredulity that it ever could have gotten to a point where its ratification should be proposed. It is as one-sided a bargain as the United States has ever essayed. It evidences to us again our proclivity for losing all the conferences. Reviewing all of those in which we have participated since 1918—including the Peace Conference—we seem to have come out uniformly second best. We have developed a national characteristic of big-heartedness in dealing with our fellow nations. Perhaps it is naïveté or guilenessness. We always do the big-hearted thing—then come home and make the most of it as best we can.

Here is what an examination indicates that the United States proposes to do for our good neighbor Canada under the auspices of the latest example of our benevolence:

1. Surrender sovereignty over Lake Michigan, which lies wholly within our boundaries.
2. Limit our diversion from this lake but grant Canada the right of unlimited diversion from boundary waters.
3. Bear an estimated $243,661,000 of the cost of the seaway while Canada will pay an estimated total of only $38,071,000.
4. Agree that an estimated $54,718,000 of American taxpayers' money shall be expended for works to be constructed in Canada by Canadian engineers with Canadian labor and materials.
5. Provide Canadian grain producers with an added advantage over their American competitors in world markets.
6. Give Canada 4,000,000 of the 5,000,000 electric horsepower developed by the plants to be constructed, an advantage of 4 to 1 (in spite of 3, above).
7. Accord to Canada exclusive ownership and control over all the structures built on the Canadian side of the international boundary, even though built with money put up by America (see 3, above).
8. Hamper American trunk-line railroads serving the Great Lakes region to the Atlantic seaboard, in behalf of Canadian and other foreign shipping.
9. Divert business from American Atlantic coast ports in behalf of Canadian ports.
10. Subsidize a competitive waterway that will divert existing business from American railroads and tend to depreciate the value of American railroad securities.

In our proposal to do these magnanimous things for Canada is an evidence of superlative neighborly friendliness. It is generosity personified. Doubtless Canada would be the first to recognize it—behind its palm.

There is only one thing to be gained in ratification of the St. Lawrence Treaty, namely, an unbroken record of conference and treaty defeats. If we ratify it we will still stand the 100-percent big-hearted treaty booby.

[From the Houston (Tex.) Chronicle, Jan. 21, 1934]

OPPOSING THE TREATY

As Senate lines shape for a battle on the St. Lawrence Waterway Treaty, opponents are making themselves felt. BENNETT CHAMP CLARK, of Missouri, insists they have votes enough to defeat it or kill it with reservations. Of these, Missouri's junior Senator has introduced one of a nature calculated to rally those who feel that Lake Michigan is as much an American lake as Georgian Bay is a Canadian.

Senator CLARK, representing a State which is inland, wants to insure a large and constant flow of water from Lake Michigan into the canal which connects the Illinois River and the Mississippi. There are sound arguments buttressing the Clark position. One is the sewage situation. The refuse and pollution of our second largest city is carried into the Illinois Canal and hence into the Mississippi. Senator CLARK and others argue that we need more than 1,500 cubic feet per second which the St. Law-

rence Treaty would permit us to divert into that waterway. Otherwise it would be completely saturated with refuse.

President Roosevelt has ignored these fears because of a report submitted by United States Army Engineers. Even these experts have been known, however, to make mistakes. And it would seem that the rights we are about to give up in the water control of Lake Michigan are rights which we may one day badly need. Lake Michigan is completely in American territory, even as Georgian Bay, almost completely encircled by Ontario, is in Canadian territory. If American diversion of water from Lake Michigan is limited to 1,500 cubic feet per second by the terms of the treaty, similar Canadian diversion from Georgian Bay should be insisted upon. The present treaty does not provide for it and would doubtless be rejected by Canada if it did.

There is, furthermore, a grave doubt as to whether America receives enough benefit to justify the expenditure of $243,661,000 when Canada contributes only $38,071,000 and when the pact expressly provides that the work on most of the channel shall be executed by Canadian engineers and Canadian labor and with Canadian material.

The waterway to Europe is, theoretically, a great boon for our northwestern farmers, yet this huge expenditure of money is to provide a passageway which is frozen up 6 months out of the year. If we were Canadians, we would agree with the Toronto Globe, that it is a treaty which fairly bristles with satisfactory points. But we are Americans and there is a good reason why we should view the matter in a different light.

[From the Clarksburg (W.Va.) Telegram, Jan. 29, 1934]

OPERATORS' PROTEST

Adding its voice to that of other protestants, the Kanawha Coal Operators' Association has called upon West Virginia's two Senators to fight ratification of the St. Lawrence Waterway Treaty.

"The mines in West Virginia", says the resolution adopted, "have for years shipped to the Canadian and Lakes ports millions of tons of coal which would be displaced" by foreign coal if the treaty were ratified, "and thereby seriously reduce labor opportunities at the coal mines and on the railroads of the country."

British and other foreign coal, it was pointed out, would be carried as ballast by ships bound for Canadian ports for grain supplies. This coal would be delivered at rates which would not permit American coal to compete with it.

"Not only do the coal operators of southern West Virginia have a vital interest in defeat of the proposed treaty," says the Charleston Daily Mail, "but the welfare of perhaps thousands of miners as well as of workers in numerous other industries is involved. To close the Lakes and central West Virginia markets to West Virginia coal would be a serious blow to this State."

The argument of the Kanawha operators is so obviously sound that the State's representatives in the upper branch of Congress should have no hesitancy in opposing the treaty. The issue is an important one to West Virginia.

[From the Washington Post, Feb. 2, 1934]

LOGS ON THE SEAWAY

Advocates of the St. Lawrence seaway are making a drive for votes in the Senate, with liberal use of log-rolling methods. The opposition has dwindled, it is said, because Senators who are not in favor of the treaty fear that appropriations for projects within their home States will be withheld if they vote against it. Every one who has observed the working of politics in Washington knows how vital river and harbor projects are to the welfare of those in Congress.

Interests seeking $99,000,000 from the P.W.A. to deepen the Mississippi River are said to be trying to allay any opposition to the St. Lawrence Treaty from Senators representing the Mississippi Valley. By favoring the St. Lawrence advocates they hope to be favored in turn. Senator LA FOLLETTE told his colleagues on Thursday that the Government is spending more money on the Mississippi and its tributaries than the St. Lawrence project will cost. Of course, the Lakes States are not complaining about this vast outlay in the river States, the Senator said, but in return they do ask for just consideration of the seaway.

The practice of trading votes on regional projects is thoroughly obnoxious. When an undertaking of such vital importance as the St. Lawrence seaway is involved, this sort of a vote-rousing drive is also fraught with grave dangers.

Numerous issues of far-reaching importance ought to be decided before the Senate places a stamp of approval on the St. Lawrence Treaty. Since American wheat exports have dwindled to a small volume, most of which is shipped from Pacific ports with the aid of a Federal subsidy, the need for development of a ship canal between the Great Lakes and the Atlantic is today less apparent than ever before. Some interests in the Middle West claim that the proposed seaway would give Canadian farmers still greater advantages over our wheat growers than they now possess.

Those opposing the measure assert further that thereby the United States would lose its exclusive sovereignty over Lake Michigan under the treaty. At no point is this lake nearer than 50 miles to the Canadian border. Shall it now be designated an international body of water? The treaty would forbid the United States to divert more than an annual daily average of 1,500 cubic-second feet of water from Lake Michigan, which might be a matter of real concern to the Chicago drainage area.

These and many other aspects of the treaty demand careful scrutiny and deliberation. Unfortunately, the interests of administration leaders in the Senate appear to be concentrated upon the mobilization of votes rather than careful analysis of the treaty to determine whether it is economically and otherwise desirable.

[From the Charles City (Iowa) Press, Feb. 3, 1934]

THE MISSISSIPPI WATERWAY

Below we publish another article on the subject of canals, which we respectfully submit for the consideration of Congressman BIERMANN, bearing upon the Mississippi waterway. It is an extract from a speech by Senator BENNETT CHAMP CLARK, of Missouri, upon the St. Lawrence Canal and its relation to the Midwest and the Mississippi route to the Gulf. It is a clean-cut review of the situation, and while we are naturally in favor of all national improvements and have no desire to be sectional, yet we can see no way in which the St. Lawrence waterway will benefit the Iowa region, but it is quite evident that the Mississippi improvement will be of great benefit to all of the territory along the river, and especially all of that section lying in the West. We must have this improvement made, for besides the cheaper transportation, factories can ship their products without the necessity of crating, which is required on ocean traffic, that means a greater convenience and less expense in favor of the river route. In fact, the Mississippi River improvement is really the only hope for the Iowa shippers which will give them the only relief at their disposal. The Panama Canal injured our farmer and our industrial interests, the St. Lawrence waterway will not bring trade accommodations any closer to our doors, but the Mississippi River, the greatest in the world, offers its service to our people in its course to the sea. Will we accept her generous services?

Let Senator CLARK tell his story:

"The construction of the Panama Canal, romantic and staggering engineering project that it was, has been a tremendous economic hardship to the Mississippi Valley. It has given so great a transportation advantage to the States of the Atlantic and Pacific coasts as against the inland States as to almost place an absolute bar in the path of our industrial development. For example, my father-in-law in his lifetime manufactured cream separators and gasoline engines at Waterloo, Iowa. Well located in the Central West, with the highest type of intelligent labor constantly coming in from the farm, this town had been built from a village to a city by a few plants employing local labor. But with the construction of the Panama Canal, my father-in-law discovered that when he sold a bill of goods upon the Pacific coast, he could ship by rail to Baltimore, there place them upon a ship for transportation through the Panama Canal and thereby save nearly a third of the freight. The mere statement of this fact is sufficient to disclose the terrific burden and handicap which has thus been imposed upon the Mississippi Valley States in their competition with the States of the seaboard. And figures and events have proved the truth of this conclusion. The new Congressional Reapportionment Act graphically shows the situation with all its tragic importance for the great valley. Through the decision of the Congress to maintain the House of Representatives at its present membership, a larger ratio was necessarily adopted, making necessary a redistribution of Congressmen to take care of the increase of population since the last previous reapportionment. The valley States lost 17 Members of the House through this process while a similar increase went to the Coast, Lakes, and Gulf States with access to adequate water transportation. Industry after industry has left the Central West to move to locations affording better opportunities for water transportation. Industrial population has followed the movement of industry. Factories can move and factory employees can follow the factories. But farms remain where God has placed them. And our farms must still compete in the markets of the world with the agricultural products of other sections. Whatever may be the movement of industry, our great inland empire must still have desperate need for adequate transportation facilities in our competition with the world. It is obvious and inescapable that unless the inland waterway system of the Mississippi Valley is adequately developed, the construction of the Panama Canal will prove to have been to the Mississippi Valley the greatest calamity that ever befell any large section of the habitable globe. It is now seriously proposed in the highest quarters to add to the catastrophe in two most important particulars: (1) By affording to other sections of the United States and to Canada, in active competition with our industries and agricultural interests, immediate and cheap access to the sea, and (2) by forever closing the door on the development of our inland waterway system to lock us in permanently by preventing either our use of the new proposed seaway or the completion of the great national project for affording the Middle West access to the Gulf. Both these results inevitably flow from the limitation of 1,500 second-feet on diversion of water from Lake Michigan contained in article 8 of the pending treaty. This treaty strikes at the very vitals of the economic existence and well-being of the greater ports of the Mississippi Valley."

[From the Arkansas City (Kans.) Tribune, Feb. 8, 1934]

THE GREAT LAKES CANAL

President Roosevelt is backing the St. Lawrence Waterway Treaty providing for this country to join with Canada in the con-

struction of the proposed canal from the Great Lakes to the ocean.

The people know but little of this proposed alleged improvement. They do not understand it, consequently they say but little about it.

If what a Toronto paper tells about it is true, the indications are that Canada gets the greatest benefits while America foots the greatest portion of the bill.

According to published reports of the Toronto paper:

"The cost will be borne mainly by Uncle Sam.

"Our country abandons its contention that Lake Michigan is an American lake.

"The treaty puts an end to Chicago's ambition to drain the Great Lakes, for the benefit of the Mississippi Valley.

"Lake Michigan belongs to the watershed of the St. Lawrence, instead of to the Mississippi Watershed.

"No feature of the treaty is more surprising than the low cost to Canada at which the undertaking is to be carried out.

"Canada is to obtain 4,000,000 horsepower and the United States 1,000,000 horsepower out of the whole St. Lawrence waterway development."

It really looks like Uncle Sam is going to get a good gypping in this deal unless the Senate steps in and gives this country needed protection.

[From the Springfield (Mass.) Evening Union, Feb. 9, 1934]

THE SEAWAY TREATY

Despite the President's success in lining up Congress for his measures he is finding trouble in obtaining the required votes in the Senate for the ratification of the St. Lawrence Seaway Treaty. One reason is that by no stretch of the imagination may it be classed as an emergency measure. Another is that there are forceful arguments against such a project, particularly at this time. There are rumors of an attempt to adopt the old administration device of forcing Senators into line, but opinion obtains that the President would make a serious mistake in the circumstances in so doing.

What is clearly apparent is that objection to this unwise project is not confined to the "wicked" interests, a term that is being worn rather threadbare by fortuitous repetition at the hands of demagogs. The railroads and power companies are not alone in objecting to it. The economic feasibility of it has not been established, and it is doubtful that a majority of the people of the President's own State are in favor of it. The seaboard cities and the Mississippi Valley are dead set against it.

One reason why there is some doubt that the required two-thirds vote may be obtained in the Senate for the project is that the Senators have had ample time to acquaint themselves with its implications. Doubt was thrown upon its economic feasibility by the report of Mr. Roosevelt's own investigation commission, appointed while he was Governor. Its other objections have been made familiar to the Senate, upon which rests a peculiar responsibility in negotiating international treaties.

In the present instance there should be no coercion from the White House, as has too often been the practice in respect to measures described as meeting an emergency. It is a question that should be determined entirely on its own merits, and there is not sufficient merit in the project from the viewpoint of the United States to warrant the vast and inequitable expenditures involved.

[From the Hazleton (Pa.) Standard-Sentinel, Feb. 13, 1934]

TREATIES

It is eminently right and proper that the President, through his advisers, should negotiate bargains with representatives of other countries. In any such bargaining there must be give and take. There is always a risk, however, that in their ardor for bringing about an agreement negotiators may give too much or take too little. Therefore the Constitution provides for a careful and detached review by the Senate. This arrangement has saved the Nation from grave mistakes in the past. It will be a safeguard against others in the future unless the mischievous suggestion is adopted that in addition to negotiating treaties the Executive should put pressure on Senators to insure ratification.

President Roosevelt is an ardent supporter of the St. Lawrence river seaway and is most anxious that the Senate ratify the treaty with Canada making the project possible. If he is convinced that the project is feasible, necessary, and worth its cost he cannot be condemned for stressing it as an administration policy and working for its consummation. But some question the propriety of the President's rumored decision to force the treaty upon the unwilling Senate. He would be setting no precedent, to be sure, but neither would he be living up to the letter of the fundamental law.

Should Mr. Roosevelt use weapons at his command to obtain the ratification he so devoutly desires, he will commit a political blunder. For his own sake, for the sake of the Senate, it is hoped he will refrain from the attempt. As an able strategist he himself should see the unwisdom of exercising coercion to put across a measure which is strongly opposed by some who have thus far supported every policy he has advocated.

[From the Miami Herald, Feb. 7, 1934]

A MAYOR'S GUESS

Mayor Daniel Hoan, of Milwaukee, writes to Arthur Brisbane, the gifted editor and columnist, attempting to correct Mr. Brisbane in a quotation made by him in his widely read column "Today."

Mr. Brisbane took his authority, indirectly, from a Canadian newspaper which rather gloated over the bargain Canada had made with reference to the St. Lawrence Seaway Treaty with the United States. That paper said that the treaty required the United States to expend much more money in the enterprise than Canada would be called upon to pay; that Canada would receive much more horsepower from the development and so on.

The mayor says it isn't so. He says "we do not bear the major part of the expense, or abandon sovereignty on Lake Michigan. We get one half the horsepower developed."

Let us see. A very able and ardent advocate of the seaway treaty has just prepared and published a volume intended largely for the information of the Members of the United States Senate. He goes into the subject exhaustingly.

He shows that Canada has spent $128,000,000 in improving its own internal waterways for its own use, but that to complete its portion of the great waterway project it will have to expend no more than $142,000,000 in addition.

On the other hand, the United States in improving its own projects in connection with the Great Lakes, has expended some $14,000,000, but in order to complete the seaway proposition it will be required to pay over $257,000,000.

It is estimated that there will be approximately 5,000,000 horsepower developed as a part of the seaway project. Of this, 2,200,000 within the International Rapids section of the St. Lawrence will be divided equally, which will give the United States 1,100,000 horsepower, while the remaining 2,800,000 horsepower developed in Canada will belong exclusively to that country.

All of which leads to the belief that Milwaukee's mayor has been doing some bad guessing.

[From the Saturday Evening Post, Philadelphia, Mar. 3, 1934]

DUBIOUS ECONOMICS

No one denies that in the course of time some such development as the St. Lawrence seaway and power project may become desirable. But whatever merit it may have in the distant future, there is the utmost haziness regarding any present necessity for undertaking an expenditure the exact total of which is in dispute, but which is certain to prove impressively large, for a purpose that is so indefinite.

Unfortunately, this project has been urged and opposed with equal vehemence by those whose interests are local and sectional. The ability of politicians to keep on making promises, which they cannot possibly deliver, to wheat farmers, the ambition of certain lake ports to welcome ocean-going steamers, and the fear of certain Atlantic ports that they might lose freight—all these considerations seem less important to us than sound principles of planning and expenditures.

To a large extent the St. Lawrence project has been "sold" on the theory that it would mean a great saving to the wheat farmer. It is by no means certain that such a large proportion of the wheat would be shipped this way, and there are authorities who hold that the saving on the portion so shipped would be exceedingly small indeed. But aside from this, the whole effort of the present administration is to reduce the production of wheat and other staples to the limits of domestic use. But even beyond the effect of depression and the resulting reduction in acreage program, the whole long-term tendency in this country is toward a reduction in wheat exports. We fail to see the point of making a huge expenditure to effect a questionable saving on a type of commerce which is dwindling away.

Of course, there is much other tonnage whose movement might conceivably be affected by such a development.

But when the origin, destination, and seasonal character of every commodity are analyzed, it is a very complicated question how substantial a portion of the total commerce within the possible sphere of influence will actually be affected and with what results in economies realized.

Since the St. Lawrence project was first suggested there has been a steady increase in efficiency and decline in cost of steam-generated power. How the huge new block of power could be absorbed at all, except by local St. Lawrence Valley metallurgical and other industrial developments on an extremely extensive scale, has not been explained. All this may come in time, but it will take time. No reason for a forced and artificially costly project of the sort has been shown.

It may engage the imagination to look at a map of North America and indulge in large, rosy visions of vague and uncertain improvements. But it might be well to remember also that all pocketbooks have a limit, and that this country is going to have plenty of trouble to pay its pressing, its absolutely necessary, bills for a great many years to come.

[From the Troy (N.Y.) Times, Feb. 23, 1934]

EXPOSING ANOTHER FALSITY

Chicago is interested perhaps in a more intimate way than are a great many cities in the defeat of the proposed St. Lawrence Seaway Treaty. By a curious provision of the treaty the wholly American Lake Michigan would be internationalized, and in so being Chicago is so limited under the treaty in the amount of water it may divert from that lake as to threaten the entire water supply of the Chicago Sanitary District, rendering it unfit for use and subject to pollution.

For that reason, perhaps, Chicago has been a bit more assiduous than most cities in discovering reasons why the treaty should be

defeated. Her facts, however, are by no means invalidated because of this, for they have the merit of being both true and exact. Perhaps the most exaggerated claim made by the advocates of the St. Lawrence seaway development, Chicago points out, is that the total cost to the United States will be in the neighborhood of $182,000,000.

The country is told that as soon as that expenditure has been made an ocean-going vessel drawing 26 feet of water will be able to load at Hamburg or Liverpool and clear for Chicago or Milwaukee. The falsity of this claim on its face is evident from the fact that due alone to the differing buoyancy between ocean and fresh water the ocean draft would be limited to 23½ feet to enable the vessel to navigate in the 27-foot fresh-water draft of the proposed St. Lawrence seaway.

But after that, what? The ship would not be able to dock in Buffalo Harbor because there are only 21 feet of water available. She must avoid Cleveland, where there is only 19 feet draft. She could not navigate the Detroit and St. Clair Rivers to Lake Huron, and even if she did, she would not be able to dock in the 21 feet of water at Chicago or Milwaukee.

Another interesting fact is that natural harbors in the Great Lakes are very scarce, and the outstanding ones are on the Canadian side, at Toronto and Fort William. On the American side at Cleveland, Chicago, and Milwaukee the mouths of the rivers merely have been developed and harbors must be constructed.

In fairness to the people of the United States, the proponents of the waterway should admit that the expenditure of $182,000,000 is only the first installment. For this price the waterway can be completed to the point where a vessel drawing not in excess of 23½ feet may clear from Liverpool for Toronto. Further installments running into 10 figures will be necessary to clear Great Lakes channels and construct harbors before navigation will reach either Chicago or Milwaukee. The operator of an automobile can well appreciate what this means. There is a down payment of $182,000,000, after which we must produce further regular payments before we have a clear title to inland navigation—and in the meantime operating and repair expenses will accrue.

These facts are also pointed out by Harrison H. Wheaton, president of the Institute of American Business, in an analysis of the contractual and financial liabilities assumed by the United States under the proposed treaty. The St. Lawrence seaway as it now stands might well be termed the great American swindle.

[From the Luverne (Minn.) Star, Jan. 26, 1934]

If our representatives at Washington would spend as much time and effort on correcting the prices of hogs and cattle as they are on putting through the St. Lawrence waterway, we might be able to put a crimp in the packers who have increased their profits at the expense of the farmer. Millions have already been spent by the Government on the St. Lawrence project. Where did it go to? And who is boosting so hard for the project? It is those persons who have been living off those millions the last few years, and the cities along the route who expect millions to be spent with their merchants and real-estate agents. To cover up the real purpose, these schemers publish propaganda that the opening will be a Godsend to the farmers by reducing their freight rates. Did you ever see a saving the farmer actually got? The farmer has just been soaked by a processing tax intended to raise hog prices. The packer benefited. You can bet the owners of the grain terminals will get any freight saving that may be made.

[From the Executive's Magazine, St. Louis, Mo., February 1934]

MUST WE LOVE OUR NEIGHBORS BETTER THAN OURSELVES?

The St. Lawrence Waterway Treaty, which hangs in the balance as this is written would, if successful, be the second of the major mistakes made by the United States in taking liberties with the geography of the American continent. The first of these mistakes was the building of the Panama Canal. This diverted vast tonnages which normally moved by rail across the breadth of the American continent to a coastwise movement along its shores. At the time when the Panama Canal went into use, 1914, hundreds of millions of dollars invested in transcontinental railroads and in major industries in interior cities, which had been located and built up because of the normal flow of traffic through these centers, were greatly reduced in earning power—a change made by a canal built with public money, for the construction of which not only the beneficiaries, but also the victims, were taxed. (It is true that the shock of this elaborate and artificial introduction of a new geographic factor into American transportation through governmental action, would have been mercifully cushioned if the transcontinental roads had been permitted by the Government to make competitive rates without disorganization of their entire rate structure; but they were not so permitted. The Panama Canal up to the present time has been a colossal misfortune for every interior business center that is not within easy striking distance of the seaboard.)

The second major interference with the normal geographic factors which affects the distribution of industry and the movement of traffic is the (proposed) St. Lawrence seaway. It would develop a considerable amount of electric power—which we do not need. It would internationalize Lake Michigan; under it vessels of a foreign power would be conducted into the heart of the United States within about 250 miles of St. Louis. It would cut down the diversion of water from Lake Michigan to a minimum, although about two thirds of the watershed of the Great Lakes is within the American boundary. It would disrupt the present transportation structure by bringing deep-water commerce, without breaking of bulk, nearly a thousand miles inland. It would, for the larger part of the year, drain enormous tonnages of freight away from the North Atlantic ports of the United States to those of Canada. It would saddle the larger part of a heavy debt on the country of which the St. Lawrence seaway would be a heavy liability, to the very considerable benefit of the one—Canada—of which it would be a priceless asset.

This is a good time to remember the limitations of the Golden Rule. It requires that we love our neighbors as ourselves; it emphatically does not require that we love them better than ourselves. The Canadians are good people—thrifty, clean, and enterprising. They have, in fact, so much of the latter quality that they have practically ruined our export trade in wheat, which has every promise of staying ruined as we go to press. Now, why, in the name of common sense and international good neighborliness, should we spend $272,000,000 in order to enable Canada to make profits at the expense of American business which she never could make with the continent as the Creator made it?

Engineering works big enough to disturb the economic relation of producing areas measuring millions of square miles and sustaining tens of millions of people can never be constructed with private capital. Only the long purse of the Nation is adequate to them. One major interference with normal geographic relations has already been made by our Government—and every major city in the United States between the Appalachians and the Rockies which is not on the Gulf of Mexico is paying the price. This is no time to commit a second folly as egregious as the first.

[From the New Orleans (La.) Item, Feb. 14, 1934]

A CRITIC FOOZLES

We neglected to comment on a deliverance by Mr. Walter Lippmann last week concerning the St. Lawrence Seaway Treaty. He says the treaty is a fine thing all around, and that the opposition to it is based on false premises and fallacious reasoning. He quotes the case against it in three counts:

"Those who object to it have given up the notion that foreign markets are of any account.

"Cheaper rates on ships will play havoc with railroads.

"The cost to the United States won't be $277,000,000 but $573,000,000."

Those are all the objections to the St. Lawrence Treaty that Mr. Lippmann seems to have heard. He calls them "lame" and "feeble" and other things. He proceeds to prove them so by knocking them all into cocked hats.

The fact is, however, that Mr. Lippmann has not presented the vital and conclusive objections to this seaway treaty at all. Nor does he remotely refer to them, or even intimate that they exist. It is not necessary to state these objections. Every schoolboy in the Mississippi Valley knows them by this time, and all informed Americans know them. Everybody may not accept them, but every informed person knows them.

Mr. Lippmann borrows his objections from Senator WAGNER, of New York. He finds them so "lame" that he does Mr. WAGNER the honor of saying, "I am almost inclined to suspect that the Senator is opposing the treaty because he thinks it is his conventional duty to protect the harbor of New York from the competition of the seaway."

In view of Mr. Lippmann's own capacity as an observer and critic, we are almost inclined to suspect that he pontificates on this subject as he did last week, because he thinks it is his duty to protect some hidden interest that may be the more sinister because it is not apparent.

[From Cedar Rapids (Iowa) Gazette, Sunday, Feb. 18, 1934]

KINDRED QUESTIONS

According to the Messrs. Pearson and Allen, who relay the backstage Washington gossip to readers of the Gazette, President Roosevelt is delaying his long-awaited recommendations on tariff legislation until Congress acts on the St. Lawrence Waterway Treaty. He is reported as wishing to avoid bringing those two important matters to a vote at the same time.

If that is an accurate representation of the President's attitude, the attitude is puzzling, to say the least. From where we sit, it would seem that in order to cast an intelligent vote on the seaway proposition a Congressman ought to know pretty definitely what the future tariff policy of the United States is going to be.

The country's tariff policy can be hooked up with one of three national economic policies: (1) National self-containment—a policy under which we will produce only what we need and let the rest of the world go hang; (2) international cooperation—a policy under which sustained efforts will be made to encourage international trade with few restrictions; (3) a middle course between those two policies. The potential value of the Great Lakes-St. Lawrence waterway to the country hinges to no small degree on which of those three courses the country is to pursue.

If we are to strive for national self-containment, we shall thereby disavow an interest in expanding our foreign trade. And if we are not interested in expanding our foreign trade, it would be the height of folly to spend half a billion dollars or more digging a waterway to permit ocean-going vessels to penetrate to the heart of the country. The foundation of the seaway proposition is the contention that it would enable us to ship commodities from the Middle West to foreign markets less expensively than we can do it now. If we don't care whether we ship any-

thing to foreign markets or not, why waste money improving shipping facilities?

If we are to strive to expand our foreign commerce and build up foreign markets for our commodities, then it is at least conceivable that the St. Lawrence waterway might help us to attain those objectives. The seaway might also be a national asset if we chose an economic policy midway between self-containment and free trade. The problem then would resolve itself into a weighing of the possible benefits of the St. Lawrence waterway as compared to its cost.

As we see it, therefore, the future trade policy of the United States is a factor highly pertinent to the St. Lawrence seaway question. And not until the tariff question has been threshed out will the country's future trade policy be clearly defined. It is possible that the seaway project can be disposed of without entering into a discussion of tariffs and trade policies. Anything is possible in the present Congress. By no stretch of the imagination, however, could such a disposal of the seaway project be looked upon as intelligent, heads-up statesmanship.

[From the Portsmouth (Ohio) Times, Feb. 17, 1934]

THE ST. LAWRENCE WATERWAY

Ratification of the St. Lawrence Waterway Treaty by the Senate has become a distinct improbability. Little as advocates of the action like to admit the fact, circumstances are forcing them to be honest with themselves.

Straw votes show more than a dozen votes lacking to make up the two-thirds favorable vote necessary to ratify the treaty. Although there is a possibility that President Roosevelt might be capable of forcing ratification by exercise of his influence, it is not likely that he will choose to do so.

At this stage of the legislative procedure, arguments for and against the seaway's construction under terms stated in the treaty are of little use. It is clear that no considerable number of opponents are to be won over by those in favor of ratification. For the present the matter is as good as settled, unless there are unforeseen developments.

The project will be pressed further, undoubtedly. President Roosevelt favors it and the Democratic Party has been committed to its support. It is logical to expect that the treaty may be thrown open to revision in the hope that it may be made acceptable.

However, it faces opposition of a kind that will not be dispersed easily, no matter how unworthy its grounds may be in the opinion of the seaway's advocates. New York City, Philadelphia, and Baltimore oppose it to protect their port developments.

In a list of affected interests, these other sources of opposition are included: Buffalo, with a heavy investment in docks and warehouses; the New York State Barge Canal, which would be operated in opposition to the seaway; railroads, particularly in the eastern United States; transportation companies operating on the Great Lakes; coal operators in Ohio, Pennsylvania, West Virginia, and Kentucky, which might be thrown into competition with foreign mines; ports on the Gulf of Mexico; southwestern wheat growers.

Though proposed in broad public interest, the seaway would affect vested interests at the outset of its operation for the sake of advancing theoretical interests. In the long run it probably would be a valuable improvement, but the time for its adoption remains an unknown date in the future.

[From the Syracuse (N.Y.) Herald, Feb. 3, 1934]

SENATORIAL FEARS

President Roosevelt has assured Democratic leaders of Congress that opposition to the St. Lawrence seaway will vanish and that the treaty with Canada will be ratified within 3 weeks, according to a Washington dispatch to the New York Times.

After relating that the President has informed leaders that the number of protreaty Senators now comes within five of the necessary two-thirds vote, the Times' Washington writer adds:

"The opposition has dwindled gradually, those in charge of the treaty assert, due to the efforts of the President and the fear on the part of proponents of river-and-harbor projects that their continued depression would cause retaliation and defeat of pending appropriations for local projects.

"According to the supporters of the St. Lawrence project, officials of the Mississippi River Association have suggested to the Senators along the river that their opposition might endanger the $99,000,000 sought from the Public Works Administration for deepening the Mississippi. The request has been pending several weeks and, according to reports, will not be acted upon by Administrator Ickes for some time."

Assuming the Times writer has his facts straight, a curious situation is revealed.

Apparently our reported impending decision to go into the St. Lawrence project, with all the vast expenditures such a step involves, will be based on two propositions:

1. Fear on the part of antitreaty Senators that if they stood their ground such a course would mean death for their own river-and-harbor projects.

2. Fear of Senators representing States along the Mississippi that should they continue their opposition the Government would reject the proposal to spend $99,000,000 in their neighborhoods.

Perhaps what some of our Senators ought to do is to forget the fear complex and devote their whole consideration to the question whether this proposed St. Lawrence project is or is not economically sound.

One notes that former Gov. Alfred E. Smith says that it would be a waste of public funds.

At the same time one must also remember that 90 percent of the St. Lawrence lies wholly in Canada.

[From Frederick (Md.) Post, Feb. 19, 1934]

INTERNATIONAL TREATIES

It is eminently right and proper that the President, through his advisors, should negotiate bargains with representatives of other countries. In any such bargaining there must be give and take. There is always a risk, however, that in their ardor for bringing an agreement negotiators may give too much or take too little. Therefore, the Constitution provides for a careful and detached review by the Senate. This arrangement has saved the Nation from grave mistakes in the past. It will be a safeguard against others in the future unless the mischievous suggestion is adopted that in addition to negotiating treaties the Executive should put pressure on Senators to insure ratification.

President Roosevelt is an ardent supporter of the St. Lawrence River seaway and is most anxious that the Senate ratify the treaty with Canada making the project possible. If he is convinced that the project is feasible, necessary, and worth its cost he cannot be condemned for stressing it as an administration policy and working for its consummation. But some question the propriety of the President's rumored decision to force the treaty upon an unwilling Senate. He would be setting no precedent, to be sure, but neither would he be living up to the letter of the fundamental law.

[From the Buffalo (N.Y.) News, Feb. 22, 1934]

MISREPRESENTING STATE

Chairman Frank P. Walsh, of the New York Power Authority, injects himself into the debate on the St. Lawrence Seaway Treaty upon every occasion, always as a proponent of ratification. He now is criticizing Senator WILLIAM H. DIETERICH, of Illinois, for saying that ratification would "promote private interests concerned with the development of the St. Lawrence River."

"On the contrary", says Mr. Walsh, "the public development of St. Lawrence power advocated by President Roosevelt has been consistently opposed by private power interests."

This is hardly an accurate statement of the case, for Floyd L. Carlisle, board chairman of the Niagara-Hudson Corporation, did not oppose the idea of public development of St. Lawrence power when Franklin D. Roosevelt was Governor. He thought that idea was well enough, but he held that the transmission of power should be left to the companies that have provided facilities for that service. Certainly it would be an economic offense for the State to undertake the construction of duplicate transmission lines.

The activity of Mr. Walsh in behalf of the St. Lawrence Treaty is further evidence that he regards service to the Roosevelt administration as of the first consideration. For the State never has gone on record as in favor of the treaty. The record is all the other way. United States Senators ROBERT F. WAGNER and ROYAL S. COPELAND have correctly presented the case for New York State. They have battled consistently against ratification on the ground that the proposed seaway, the cost of which would fall heavily on this State, could not justify itself economically. The logic of the minority report on the seaway project which Senator WAGNER submitted as a member of the Foreign Relations Committee is irrefutable. It has withstood the assaults of all proponents of the treaty.

The situation that finds Mr. Walsh, of the power authority, working for ratification—in opposition to Senators WAGNER and COPELAND—is discreditable to the State administration. Mr. Walsh's commission does not call upon him for this service. Governor Lehman ought not to permit the power authority chairman to go up and down the country misrepresenting the sentiment of New York.

[From the Grand Island (Nebr.) Independent, Jan. 26, 1934]

WILL WE SHIP IT BOTH WAYS?

Before the Nation expends such an enormous sum as $500,000,000, it would seem that there ought to be an array of reasons which, in public opinion, would justify the same.

The exact opposite appears to be the case in the matter of the proposed St. Lawrence waterway.

It is obvious that during the 5½ or 6 months of the year during which, if invested, this capital works, it will take traffic away from the railroads, do injury to the present Lakes shipping interests, decimate shipping out of the present Atlantic ports of our own country and deprive Chicago and the Lakes-to-Gulf waterway of water of which both the city and this already-constructed canal need.

For the investment it is argued that a portion of the Middle West will be benefited because its grain can be shipped more directly to European ports. At the same time we read that we are going to spend other millions to benefit the Midwest by creating barge lines down the Mississippi and the Missouri, in order that the same grains and agricultural products generally can be shipped to Europe and other foreign markets from New Orleans. In other words, we are going to ship the same grain by two different routes—if it be true that the Midwest is thus to be benefited. As a matter of fact both are bound to reduce the increased tonnage for rail transportation, in which lies the inland farmer's only hope of lower freight rates.

But not only in this section of the country is there opposition to the expenditure of the half a billion dollars largely within another country when there are so many needed public improvements in our own—for instance, highway construction, wider bridges and overpasses or subways for railway crossings, all tending to reduce the enormous loss of life now resulting from the absence of these improvements.

After commenting on the struggle in the Senate over the treaty, the Magazine of Wall Street comments:

"This double-barreled project is of interest to Canada chiefly as an improved seaway, with the United States footing the larger share of the bill. Canada is not greatly interested in additional hydroelectric power. It is of interest to the Middle West on the assumption that it will provide cheaper transportation for export goods to the Atlantic seaboard. It is of interest to the East as a source of electric power, to be publicly developed in competition with existing adequate private facilities.

"Since this costly undertaking was conceived, our economic position and our economic philosophies have been radically changed. Originally it was argued that the seaway would improve the competitive position of our wheat in the European market. Now we are striving to reduce wheat production to the level of domestic demand and the price of our wheat is so far above the world price that foreign demand is but a trifle in our export trade. The amount that can be saved on inland waterway transportation of our dwindling exports is out of all proportion to the cost involved. Moreover, to the extent that such savings would be real, rather than fancied, they would inevitably constitute another blow to our hard-pressed railroads which the administration, peculiarly enough, is also trying to save. The final absurdity is that winter closes the St. Lawrence for 5 to 6 months of the year.

"As for the power side of this project, would it not be common sense to await a practical demonstration of the alleged benefits of Government power development at Muscle Shoals and Boulder Dam before experimenting with another half billion dollars of the taxpayers' money? However sectional the motives of the opposing Senators may be, we believe that for once they check with the national interest."

[From the Newton (Kans.) Republican, Feb. 1, 1934]

ST. LAWRENCE TREATY

The pending treaty with Canada over the St. Lawrence seaway, favored by some of the leaders of both major parties in Washington, and of apparently especial interest to New York, judging by the fight that city is putting up against it, also has its pros and cons in the Middle West. It is recalled that Henry J. Allen was chairman of the commission and a strong supporter of the project. On the other hand there is an organization known as the Mississippi Valley Association, with headquarters in St. Louis, that probably has axes of its own to grind and is bitterly opposing the St. Lawrence deal.

Perhaps the rank and file of the American people do not devote much interest in or time to study some of these immense money-spending projects. Perhaps they should do so. The object, of course, is to afford an outlet for deep-sea shipping from all points in the Great Lakes region to the Atlantic through the St. Lawrence River.

The Mississippi Valley argument against going ahead with the treaty may be summed up as follows:

"Article VIII surrenders American sovereignty over Lake Michigan, an American lake lying wholly within the borders of this country and within the American watershed.

"The same article limits for all time the diversion from this lake to 1,500 cubic second-feet, a volume wholly insufficient to maintain a navigable channel in the Illinois waterway, but grants to Canada the right of unlimited diversion from boundary waters.

"The estimated cost of the St. Lawrence seaway to the United States is $234,661,000, while Canada will pay an estimated total of but $38,071,000. No consideration is given the United States for millions of dollars already expended to improve channels and harbors in the Great Lakes, which will be used by the seaway.

"The treaty provides that $54,718,000 of the American taxpayers' money shall be expended for works to be constructed in Canada by Canadian engineers, Canadian labor, and Canadian materials.

"The treaty will give the Canadian grain producer, now enjoying lower rail rates to Lakes and ocean ports, an added advantage over his American competitor in the world markets.

"The treaty will give Canada 4,000,000 of the 5,000,000 electric horsepower developed, an advantage of 4 to 1.

"The treaty gives Canada exclusive ownership and control over all the structures built with American money on the Canadian side of the international boundary. This might result in the closing of the waterway to American ships in the event of war."

[From the Kansas City (Mo.) Journal, Feb. 4, 1934]

WOULD HARM EAST

"There are many reasons for rejection of the St. Lawrence Canal Treaty, as expected will be done by the Senate. One is that it will fail to do what is claimed for it. That would be reason enough, but there are plenty of others. In the present state of public finance the cost would be prohibitive.

"To the East the plan would be ruinous and that, of course, explains the determined opposition to the project in this section of the country. A Boston authority has stated that the moss would grow on the Boston ocean terminal facilities if the St. Lawrence waterway became a reality. What they fear for it in New York is shown by the fact that Senator COPELAND of that State is the leader of the opposition. Senator LONG of Louisiana is opposed, realizing what the proposed construction would mean to the port of New Orleans and the Mississippi Valley in general.

"With Portland it would be much the same as with Boston. The project would be ruinous to this port.

"The statement that there are votes enough in the Senate to defeat ratification is, therefore, good news to this port, as it is to the rest of the Atlanic coast."—Portland Express.

[From the Rome (N.Y.) Sentinel, Feb. 1, 1934]

THE DOLLAR VERSUS THE CANAL

The question was propounded in Rome this morning: "What effect will the President's devaluation of the dollar have on the estimates for the construction of the proposed St. Lawrence waterway and, in particular, upon that part of the cost the United States is expected to pay out for Canadian labor?" As the President's monetary policy has been freely conceded by himself as experimental, it may be said at the outset an answer to the foregoing question can be no more than speculative, yet it calls up some interesting thoughts.

The pending treaty, negotiated by the Hoover administration, applies to the whole water course from the head of Lake Superior to Montreal, Canada, is required to do so much work and this country the remainder. A large part has already been completed or begun and each Government is credited with its share. Thus, Canada's recent completion of the new Welland Canal affords her a comfortable allowance. Obviously what each Government has already expended stands in the original amounts, however the relative value of the currencies chance to be at the moment.

Since most of the nations, including our own, went off the gold standard, it has been most difficult for the man in the street to retain in mind the worth of the dollar in the respective currencies of other lands. Tuesday of this week, before Mr. Roosevelt issued his proclamation, the worth of the paper dollar, based on quotations of the French franc, ranged from 61.80 to 62.38. The Federal Reserve bank's price of $34.45 for gold was held to indicate a valuation of 60 cents for the dollar. Yet on the same day Canadian exchange was quoted at from 99.25 to 99.62. In other words, in placing the official value of the paper dollar at 59.06 cents in gold, the President is seeking to hold the monetary situation virtually as it was at the beginning of the week rather than to effect a change in the near future.

As for engineers' estimates, they have always been subject to modification after the lapse of any appreciable lapse of time. The dollar in the past has never been stable for long respecting purchasing power. Estimates made today might prove to be too high or too low after the expiration of a year or so. If the administration really should succeed in pegging the dollar through the application of its $2,000,000,000 fund to foreign exchange and its various experiments within the United States, a revision of the estimates today would doubtless apply to the cost of construction throughout the whole period of the work after it is once begun. Otherwise today's figures would be wholly speculative.

[From Troy (N.Y.) Record, Feb. 3, 1934]

AGAINST SEAWAY TREATY

The proponents of the St. Lawrence ship canal from the Great Lakes to the Atlantic Ocean have tried to create the impression that the opponents of the project are confined to railroad interests and a few ports on the Atlantic seaboard. The fact is that the expert opinion of the operators of the ships on the Great Lakes, the St. Lawrence River, and the ocean is against the canal. These men should know what they are talking about and among the organizations representing them are the Lake Carriers' Association and the Ocean Traffic Bureau, pronounced opponents of the project.

A list of the commercial and shipping organizations opposed to the ratification of the treaty is extended and includes scores of powerful civic bodies located in all sections of the country east of the Rocky Mountains. The more thoroughly the proposition is understood the stronger becomes the opposition to the treaty. Even its advocates cannot present a tenable argument for its ratification. The project is impractical and un-American in every respect, with not the remotest prospects of benefiting either this country or Canada in a transportation way. While in the course of construction the vast sums of money that this country will have to provide to pay for Canadian labor and material might help the Dominion temporarily, but the canal itself will be of practically no value to either country.

[From the New York Review of Reviews, February 1934]

THE ST. LAWRENCE WATERWAY

It became evident before the middle of January that there was likely to be a continuance of the good relations between the White House and Congress that had prevailed last year in the short session. Appropriation bills on Budget lines of economy were moving with gratifying speed. The President was following up his opening address by short messages dealing with one topic at a time. Liquor taxes had been put into effect at once by concurring action of the Senate on January 10. Farm credit bonds, on White House advice, to the extent of $2,000,000,000 were guaranteed as to principal, thus making them as marketable as any direct Government obligations. Everyone knew that there would be differences of opinion about the extent to which the Government

ought to go in its monetary policies, but it was also well understood that the President's experiments would not be seriously disturbed.

The proposed St. Lawrence waterway, with its plans for navigation improvement and power development, forms no part of the emergency program for business recovery. It has been a subject of controversy for many years. As Governor of New York, Mr. Roosevelt became one of the foremost supporters of this scheme, chiefly through his interest in having the State develop and control the St. Lawrence water power. In Minnesota and the Dakotas the entire interest has related itself to the shipment of wheat to Europe by continuous water passage. The mistake of the Northwest lies in the fact that there will be no American wheat moving to Europe when our agriculture becomes suitably adjusted. As for hydroelectric power, we have more development already than we can use.

President Roosevelt sent a persuasive message to the Senate on January 10 advocating the ratification of the treaty recently negotiated with Canada, providing for joint completion of this St. Lawrence enterprise. Many Senators, led by Mr. WAGNER, of New York, are strongly opposed to any present commitment of this kind. In taking the view that the project is ill-considered, we are merely maintaining a position that we have held ever since the organized movement in its favor was urging its support with remarkable persistence, and with arguments that seemed to us, in large part, fallacious.

There is no doubt in our minds as to the desirability of cultivating closer trade relations with Canada. But the proposed waterway is designed not to assist trade between the two halves of North America, but to make America still more subject to the commercial dominance of Europe. Canada's present prosperity and future advancement are chiefly due to the fact that this federated democracy is situated on our side of the Atlantic, and stretches for 3,000 miles along an unfortified line that brings it into as close proximity to the United States as Scotland of the lowland counties is to the northern part of England. If Scotland were entering into preferential trade relations with the United States, and were sharply discriminating against England, there would be some loud speaking in Parliament and in the newspapers of Lord Beaverbrook and Lord Rothermere.

Until proper trade relations are established by deliberate and far-seeing statesmanship between Washington and Ottawa, we should do well to postpone projects like the St. Lawrence waterway, that can perhaps serve the purposes of the British Empire, but can bring only scant return to the people of the United States. Doubtless it is more the fault of narrow and short-sighted statesmanship at Washington than of imperialistic propaganda at Ottawa that the Canadians now turn their eyes toward Europe, seeming to forget that they live in North America like the rest of us.

[From the Huntington (W.Va.) Advertiser, Feb. 5, 1934]

A FRANKENSTEIN

"Economically unsound, politically unwise, and commercially inexpedient" is the description Elon H. Hooker, president of the Hooker Electrochemical Co., gives to the projected Great Lakes-St. Lawrence shipway, now dependent upon the United States Senate's disposition of the American-Canadian Treaty.

Mr. Hooker's attack upon the project featured his recent address before the New York Secretaries Conference. He considered the Midwest grain growers' anticipation of great economic gain through decreased transportation costs more an illusion than anything else.

"The advantage to the American wheat grower", declared Mr. Hooker, "is questioned in many responsible quarters. Whatever savings are made would be divided with European consumers. There is a fair possibility that, with the expansion of acreage in Canada, farm prices of wheat in the United States might tend to be lowered by the opening of the St. Lawrence seaway. During the prosperous years of 1922 to 1926 all the grain exports from northern Atlantic ports averaged 60,000,000 bushels.

"Even a saving of 5 cents a bushel on this would amount to only $3,000,000. Even if all the export grain in the United States were sent through the canal such a saving would be only a fraction of the interest and amortization. Canada's wheat production is 60 bushels per capita, while ours is less than 7. Canada's willingness, therefore, to undertake the project is not necessarily a reason for our reaching the same conclusion."

The northwestern grain growers have been the most persistent and clamorous of all the groups demanding the canalization of the St. Lawrence River at the expense of the American taxpayer. Mr. Hooker's discount of the gain they hope for seems a most logical one. If the project is finally approved, they stand to suffer hardly less than millions of their fellow citizens who are dependent upon industry and existing transportation services in the Eastern States for a livelihood. Verily, a Frankenstein monster is being nurtured for all. Every citizen can play a part in averting this catastrophe by direct appeal to the Senators from his State to vote against the ratification of the pending treaty in its present form.

[From the St. Louis (Mo.) Globe-Democrat, Jan. 30, 1934]

ST. LAWRENCE SEAWAY TREATY

With the President's gold revaluation bill off its hands, the Senate this week will resume discussion of the St. Lawrence Seaway Treaty, which it has had under consideration from time to time as circumstances permitted since the opening of the session. The debate on the subject has already been quite extensive, and it has made certain, what was previously understood, that the opposition to the treaty in the Senate is strong, and its defeat would be sure but for the support which the President is giving to it. Whether that support will be sufficient to overcome the opposition remains to be seen. All that can be said now is that it makes the issue doubtful.

The disposition of the present Congress to act in accord with the President's wishes has been frequently manifested in all the measures he has submitted for congressional action, but such measures have dealt exclusively with recovery programs, and Congress realizes that for them the President has very strong public support. The St. Lawrence Treaty is a matter of different complexion. It is in no sense a recovery measure. Nor is it a Roosevelt measure. The negotiations for the waterways were inaugurated many years ago, and the treaty now under consideration was signed by President Hoover. It was planned, that is to say, and the preliminary terms agreed upon during our period of greatest prosperity. It would, to be sure, provide a certain amount of employment for its construction, but that obviously was no part of its intent. It, therefore, cannot be considered either an administration or a recovery measure, and the reasons which have caused Congress to give support to the President's recommendations in other matters do not apply to this. Moreover, this is a question that is exclusively within the jurisdiction of the Senate, one with which the House has nothing to do. The Senate has always acted with great independence in the exercise of its prerogative in relation to treaties, often excessively and unreasonably so, and the confirmation of a treaty requires a two-thirds majority of the body. In this case, accordingly, the President's support of the treaty is not necessarily conclusive.

The opposition to the treaty in the Senate is not only strong, it is widespread. The Atlantic coast Senators are almost, if not quite, unanimously against it, and it is significant that both of the Senators from the President's own State are among them. The Mississippi Valley Senators are generally opposed to it. Nothing has so far developed to indicate the attitude of the southern or western Senators toward the treaty. And there are many and varying reasons for the opposition. Only the Senators from the region of the Great Lakes and the Northwest are actively supporting the measure.

We have said the Senators from the Mississippi Valley States are opposed to it. This statement, however, requires qualification. They are not, if we understand their position, opposed to the general idea, the main plan, or the purpose of the seaway, but to the provision of the treaty as it stands which they believe imperils the usefulness of the Lakes-to-the-Gulf waterway. The sentiment of this region has been in the past acquiescent, even favorable, to the St. Lawrence project. But when there was incorporated in the treaty a limitation upon the amount of water that could be diverted from Lake Michigan into the Illinois Canal and River so small in amount as to jeopardize the operation of this internal waterway for adequate navigation, that sentiment turned against it in self-defense. While different engineers have made widely differing estimates of the amount of water required, the mere fact of their differences makes it seem essential to the interests of this region that the treaty should leave this question open to the test of actual experience. It does not do this. It places a definite and low limit on the volume of water, and under the terms of the treaty this could never be increased except with the consent of the Canadian Government. This would make the future of this waterway, which is entirely within the United States, subject to the opinion and action of a foreign government, a condition that seems to this section and to us utterly intolerable. Unless a reservation is made to the treaty and accepted by Canada, leaving the amount of water that may be diverted from the lake into the Illinois Canal for future determination by the American Government, the treaty should not be ratified. There are other objections to the treaty, but this one is paramount.

[From the Oneonta (N.Y.) Star, Feb. 6, 1934]

UNSUBSTANTIATED CLAIMS

Not long since Secretary of War Dern journeyed to Superior and Duluth to attend a gathering to promote the St. Lawrence seaway. Among his assertions was one to the effect that the canalizing of the St. Lawrence would help in restoring manufacturing activity in the central valleys. He described the seaway as an important element in the Nation's program of public works. Other speakers stressed the value of the seaway in increasing the prices of farm products.

Not one of these claims will stand the test of careful examination and scrutiny. It is probably true that the industries of the central valleys have suffered by the cheap Panama Canal route from the industrial East to the Pacific ports, but the remedy will never be found in the St. Lawrence project. Were it possible for the proposed seaway to move the Central States bodily to the Gulf of St. Lawrence, the manufacturing cities on the east coast, to say nothing of the Gulf of Mexico coast, would still have a decided advantage in distance and freight rates to the Pacific coast. No relief can or will come from any development along the St. Lawrence.

The assertion that the Midwest farmers will benefit from the seaway is equally unfounded on facts. Scarcely a bushel of wheat from the Western States has found its way to European countries

for several years and the campaign of the Department of Agriculture to reduce our wheat output offers little or no hope that we shall ever again become an important wheat-exporting nation. Under these circumstances what justification is there for holding out the hope that the St. Lawrence seaway will to any appreciable extent benefit the wheat growers or any other producers of the Middle and North West? The chief benefits will be secured by our Canadian neighbors, who seem to have driven a very advantageous bargain in the treaty it is now proposed the United States ratify.

[From the Maysville (Ky.) Independent, Feb. 7, 1934]

ST. LAWRENCE SEAWAY TREATY

Strong opposition to Senate ratification of the St. Lawrence Waterway Treaty is being voiced in Kentucky, just as objections are being raised along the Atlantic Coast States and in the Mississippi Valley.

To the people of southeastern Kentucky, whose livelihood comes from the coal fields of the region, ratification of the treaty would mean the loss of a market for 15,000,000 to 25,000,000 tons of their coal annually. The seriousness of this condition has led the Kentucky Senate to adopt a resolution memorializing Congress to reject the treaty.

Thus far only the Senators from the region of the Great Lakes are actively supporting the measure, while nothing has developed to indicate the attitude of the southern and western Senators. The Mississippi Valley Senators object to a clause in the treaty limiting the amount of water that could be diverted from Lake Michigan into the Illinois Canal and River, believing that it would imperil the usefulness of the Lakes-to-the-Gulf waterway.

Defeat of the measure would be assured save for the support which the President is giving to it. The disposition of the present Congress to act in accord with his wishes has been frequently manifested in all measures he has submitted for congressional action, but such measures have dealt exclusively with recovery programs, and Congress realizes that for them the President has very strong public support.

The St. Lawrence Treaty is a matter of different complexion. It is in no sense a recovery measure. Nor is it a Roosevelt measure. The negotiations for the waterway were inaugurated many years ago, and the treaty now under consideration was signed by President Hoover. It was planned, that is to say, and the preliminary terms agreed upon, during our period of greatest prosperity. It would, to be sure, provide a certain amount of employment for its construction, but that obviously was no part of its intent. It therefore cannot be considered either an administration or a recovery measure, and the reasons which have caused Congress to give support to the President's recommendations in other matters do not apply to this. Moreover, this is a question that is exclusively within the jurisdiction of the Senate, one with which the House has nothing to do. The Senate has always acted with great independence in the exercise of its prerogative in relation to treaties, often excessively and unreasonably so, and the confirmation of a treaty requires a two-thirds majority of the body. In this case, accordingly, the President's support of the treaty is not necessarily conclusive.

[From the Black Diamond, Chicago, Ill., Feb. 3, 1934]

WATCH THE BACK DOOR

Coal and rail interests had a new angle to the St. Lawrence waterway to ponder recently with the appearance in several of the Canadian newspapers of long and detailed accounts of the large Russian coal deposits that have been uncovered near the Sea of Azov. These carried with them the lure of cheaper fuel for our northern neighbor and the possibilities that would be afforded with an all-water route to the head of the Lakes.

Rail interests already have taken notice and have been unifying the effort to balk the passage of the enabling acts before the Government in Washington that would create the basis of a treaty with Canada whereby the power and waterway project could be proceeded with.

Now the carriers have tied in coal production and distribution with their own cause. They have pointed out that beside the elimination of millions of tons of coal that the power generated would displace other millions of tons used for heating and domestic purposes all can be expected to go by the board.

Canada, naturally, is more interested in Welsh coal than that which might come from the land of the Soviets. In fact, the solving of one of Canada's fuel problems has been one of the motivating rams of interest attached to the project.

With low labor costs and low-water haulage costs, no imagination is needed to see the wings by which this Canadian trade will take flight. Railways, naturally, are concerned over the loss of tonnage through channels long established, but how more vital is this matter to the coal industry!

Welsh coals, and it is understood those from the Azov region, cannot be fought on the ground of quality. Thus it would appear that once there is a straight path for ships from the Gulf of St. Lawrence to the head of the Lakes not alone the Canadian coastal towns along the long line of the Lakes but inland cities will be due for consideration of coal from other than the accustomed American sources.

It is not a nice picture, but one that well might be weighed by the coal-producing States before their representatives commit themselves to the expenditure of hundreds of millions of dollars to make the St. Lawrence dream come true.

[From the Albany (N.Y.) News, Feb. 5, 1934]

INVESTIGATE FIRST

Debate in the United States Senate on the St. Lawrence Treaty, so far as the proponents are concerned, discloses a constant repetition of the generalities that have been invoked to gloss over the lack of factual evidence. An attempt is being made to set up the tonnage estimates by the Army engineers and the report of the Federal Power Commission as proving the case.

The fallacy of these contentions lies in the fact, admitted by the Chief of Army Engineers, Major General Markham, that no actual economic survey has been made; no practical investigation to determine the effects or use of the projected seaway has been undertaken.

And as to power, the whole truth is that no contracts have been made with utilities for distributing the power, and it is not actually known at what price the energy can be furnished to the householder and farmer. The significant statement of the Power Commission suggesting the use of public transmission lines has seemingly been overlooked. Estimates of the transmission-line cost have run as high as $75,000,000, as compared with the $89,000,000 New York State is to pay for the power dams and generating equipment.

Yet it is proposed to ratify the treaty first and find out afterward how it will work. The difficulty with it all is that there is no limit to the amount of funds that the United States may be called upon to supply, both for navigation and for power development, and there is no withdrawal possible, once ratification is voted. The danger of loss to the power structures in construction is large because of the winter ice and strong river currents.

The greatest gap in the whole argument for the treaty is that there has been no consideration of economic conditions, and the main prospect of ratification is the further impoverishment of the country through the diversion of trade to a foreign channel.

[From the Salina (Kans.) Sun, Jan. 25, 1934]

THE ST. LAWRENCE SEAWAY

Whether or not the St. Lawrence Seaway Treaty is ratified by the United States Senate, a great many facts have been brought out regarding it which should be of great interest to everyone. One of these is the popular delusion regarding the extent of territory which the seaway would benefit and the reduction in freight rates which might reasonably be expected to follow its completion. The State of Kansas has been included in the list of those which would receive benefits, but how this claim can be supported—when very little of our grain is carried as far north as the Lakes, which are only available for traffic about 7 months in the year, and when our present or prospective export trade in grain has been reduced to practically nothing—is more than we can comprehend.

Furthermore, if any grain was to move through the Lake ports rather than Galveston, New Orleans, Baltimore, or Newport News, short-haul rates to the Lake ports would be applied rather than the lower, long-haul rates which now apply on the through shipments to the Atlantic and Gulf ports. The saving in this respect would be so small as to be practically negligible.

The power service proposed is so far away as to offer this State no benefit whatever, and this feature was not brought into the question until it was foreseen that some other argument besides navigation must be introduced. The section of country adjacent to this development is already supplied with adequate power lines, in which enormous amounts have been invested by their promoters, and it would seem that as we have one costly experiment in this line in operation, another to be available in a few years, and still another under construction which will supply current to a large part of the Middle West, it would be unwise, to say the least, to press the building of this greater experiment at this time.

Another serious objection to this treaty is the proposal to surrender our right to the waters of Lake Michigan to joint control of this country and Canada, thereby limiting the use of these waters by the waterway to the Gulf, which is already in operation entirely within our borders, in favor of one whose outlet and main development is wholly in Canadian territory.

[From the Buffalo (N.Y.) News, Feb. 5, 1934]

A MORGAN BOGIE

All the stock arguments in favor of the St. Lawrence Seaway Treaty having been knocked into a cocked hat, Senator ROBERT M. LA FOLLETTE now seeks to drum up support for it by representing that the firm of J. P. Morgan & Co. is the inspiration of those who are opposed to ratification.

Senator LA FOLLETTE declares that the "Power Trust never fights in the open" and that "the principal competitor of the St. Lawrence power development is the Niagara Hudson Corporation", which is "absolutely controlled by J. P. Morgan & Co."

But the Senator is in error in saying that the Niagara Hudson is opposed to the development of power on the St. Lawrence. When Franklin D. Roosevelt was Governor, the corporation agreed to cooperate with the State in the distribution of St. Lawrence power over its transmission lines. The power authority of the State now has an understanding with the Niagara-Hudson regarding this matter.

If officials of the power organization once entertained the idea of gaining control of the St. Lawrence development, they do not now—nor have they for some time. They are well aware that it is far out of their reach; that the people of New York State never would consent to such a delivery. However, the people are

not opposed to the use of the transmission facilities of the organization to get St. Lawrence power to market, if the terms proposed are reasonable. They are not disposed to expend needlessly many millions for duplicate transmission lines on top of the $90,000,000 which they are expected to pay to the Federal Government for the St. Lawrence power development. They are perfectly willing to enter into partnership with the Power Trust, and the Power Trust is of the same mind as Barkis.

Thus the new argument in which Senator LA FOLLETTE offends reason and the record. There is no substance to it; it is pure fiction.

[From the Poughkeepsie (N.Y.) Eagle-News, Feb. 6, 1934]

DIRTY TACTICS

The extreme uncertainty of the fate of the St. Lawrence Waterway Treaty with Canada has been the jockeying which has been going on in Washington over the date on which the vote on ratification is to be taken. Last week, the forces opposing the treaty figured that they were sure of more than the one-third vote that they needed to block ratification, whereupon the administration forces refused to permit the test and began to exert new forms of pressure to coerce opponents to shift sides.

One of those forms of pressure, according to very candid statements in our "Behind the News" column this morning, is the use of what amount to threats that Senators who vote against ratification may find that the States which they represent will lose allotments of Public Works Administration funds already approved but not yet given out.

Politics, to be sure, is politics. But to our mind there can be nothing much more reprehensible than the attempt to use the Public Works Administration, organized for the relief of unemployment, as a means of blackjacking Members of Congress. It may be well enough for an administration to use patronage to whip Congressmen into line to support the measures it wants. But to use relief funds for that purpose—funds set aside to combat destitution—is something very different. We cannot believe that President Roosevelt, much as he desires ratification, would stoop to such tactics, and we think that if subordinates are using them he ought, in General Johnson's phrase, to crack down on them with every ounce of vigor he can muster. The Senators who are opposing the treaty are doing their country a patriotic service. That their constituents should be made to suffer from blows hit below the belt is outrageous.

[From the Sioux City (Iowa) Tribune, Jan. 24, 1934]

ST. LAWRENCE TREATY

Within a few days the Senate will settle down to work in earnest on the St. Lawrence Seaway Treaty, to determine whether this country shall spend $500,000,000 for the benefit of Canada and the doubtful benefit of midwestern American enterprise. In the opinion of the Tribune this treaty should be rejected.

The treaty should be rejected because it is inequitable and to the disadvantage of the United States from the standpoint of costs.

It should be rejected because it internationalizes Lake Michigan, which now is an all-American lake, and gives Canada a voice in the matter of disposing of the waters of that lake.

It should be rejected because the Lakes-to-Gulf waterway will serve middle-western enterprise adequately and to better advantage than the St. Lawrence seaway, being open to navigation for a longer period each year.

It should be rejected because the necessity for a power-cost "yardstick", if such necessity exists, will be adequately supplied by Muscle Shoals, Boulder Dam, and Fort Peck Dam.

It should be rejected because production of the products the proposed seaway would serve best is being curtailed to comply with domestic requirements. Particular reference is made to wheat. Export wheat can move over the Mississippi as well as the St. Lawrence, so why give our Canadian competitor the same advantage of cheap transportation for which we would pay most of the cost?

The Tribune believes the $500,000,000 the St. Lawrence project would cost this Nation can be spent to better advantage on strictly domestic undertaking. The St. Lawrence project does not analyze from any standpoint, and the Tribune hopes and trusts that every middle-western Senator will vote against it.

[From the Norfolk (Va.) Ledger-Dispatch, Feb. 5, 1934]

THE ST. LAWRENCE TREATY

Most commentators seem to take it for granted that the question of ratifying or rejecting the St. Lawrence Waterway or Seaway Treaty between the United States and Canada will lead to something very like a tug-of-war between the President and the Senate.

At this time of all times we should like to see anything even resembling a conflict between the President and the Senate averted—certainly a conflict growing out of such a question as the St. Lawrence Treaty.

For this treaty and the purposes behind it have no bearing on the President's general recovery plan. It is not going too far to say that the average American citizen, no matter how puzzling and uncertain, even unsound, any given feature of the President's general program may seem to him, is unwilling to oppose it. To the contrary, he is disposed to say, either openly or tacitly: "Well, nobody has proposed anything else. We'd better try what he proposes." This in nowise applies to the St. Lawrence Treaty. This treaty and its involvements constitute a wholly independent project.

Indeed, the plan was Mr. Hoover's before it was Mr. Roosevelt's. Briefly, it looks to the development of a great outlet from the Great Lakes to the Atlantic—even though that outlet will be ice-bound for a considerable part of the year—and to the development of cheap hydroelectric power for New York and New England. Obviously, one of the chief purposes of the development is to provide cheap transportation for the Middle West to the sea. Canada's chief purposes are similar, of course, but we are not concerned with those.

Still briefly, if the proposed development were to attain the scope planned, the result, or one result, would be the creation and maintenance of still another dangerous competitor for American railroads, which already are being heavily financed by the Federal Government, and for American Atlantic ports—including, of course, the port of Hampton Roads. This competition would be established, too, by the expenditure of a huge sum by the United States, not to speak of sums to be expended by Canada. Thus the taxpayers of the United States would be called upon to pay still more heavily for inland-waterway development, which has never been financially successful in general and which in this instance would impose another burden upon already existing agencies.

The Ledger-Dispatch earnestly hopes the Senate will either pass by or reject the St. Lawrence Treaty.

[From the Grand Island (Nebr.) Independent, Jan. 27, 1934]

It has been pointed out in these columns that never before has a St. Lawrence project given as much to Canada as has the treaty which is known as "Hoover's gift to Canada"—the latest drafted document embodying provisions for the construction of that waterway. Very recently the following illumining point was made by Senator CLARK, of Missouri, as shown by the CONGRESSIONAL RECORD:

"Mr. CLARK. If I may at this point interrupt for a moment, the Senator [SHIPSTEAD], of course, will recall that in the treaty of 1909 no settlement was made of the diversion, because the United States, under the leadership of Mr. Secretary of State Elihu Root, refused to consider in the negotiations the question of the diversion at Chicago, on the ground that Lake Michigan neither came within the definition of boundary waters nor within the definition of tributary waters. In other words, the United States Government maintained the proposition that the subject was not open to discussion, because we had a right to take what we pleased and refused to consider the question (of the diversion of waters of our own lake) in the negotiation of that treaty."

[From the Wilmington (N.C.) Star, Feb. 7, 1934]

ANOTHER SHOT AT THE ST. LAWRENCE

Another voice is now raised in opposition to the St. Lawrence Canal Treaty as the St. Louis Globe-Democrat turns its guns on the proposal. Mayor Blair, of Wilmington, was among the first in this section to render opposition to this proposal, and his reasons are not greatly different from those of the Globe-Democrat, which says:

"With the President's gold revaluation bill off its hands, the Senate this week will resume discussion of the St. Lawrence Seaway Treaty, which it has had under consideration from time to time as circumstances permitted since the opening of the session. The debate on the subject has already been quite extensive, and it has made certain, what was previously understood, that the opposition to the treaty in the Senate is strong and its defeat would be sure but for the support which the President is giving to it. Whether that support will be sufficient to overcome the opposition remains to be seen. All that can be said now is that it makes the issue doubtful.

"The disposition of the present Congress to act in accord with the President's wishes has been frequently manifested in all the measures he has submitted for congressional action, but such measures have dealt exclusively with recovery programs, and Congress realizes that for them the President has very strong public support. The St. Lawrence Treaty is a matter of different complexion. It is in no sense a recovery measure. Nor is it a Roosevelt measure. The negotiations for the waterways were inaugurated many years ago, and the treaty now under consideration was signed by President Hoover. It was planned, that is to say, and the preliminary terms agreed upon during our period of greatest prosperity. It would, to be sure, provide a certain amount of employment for its construction, but that obviously was no part of its intent. It therefore cannot be considered either an administration or a recovery measure, and the reasons which have caused Congress to give support to the President's recommendations in other matters do not apply to this. Moreover, this is a question that is exclusively within the jurisdiction of the Senate, one with which the House has nothing to do. The Senate has always acted with great independence in the exercise of its prerogative in relation to treaties, often excessively and unreasonably so, and the confirmation of a treaty requires a two-thirds majority of the body. In this case, accordingly, the President's support of the treaty is not necessarily conclusive.

"The opposition to the treaty in the Senate is not only strong; it is wide-spread. The Atlantic coast Senators are almost, if not quite, unanimously against it, and it is significant that both of the Senators from the President's own State are among them.

The Mississippi Valley Senators are generally opposed to it. Nothing has so far developed to indicate the attitude of the southern or western Senators toward the treaty. And there are many and varying reasons for the opposition. Only the Senators from the region of the Great Lakes and the Northwest are actively supporting the measure.

"We have said the Senators from the Mississippi Valley States are opposed to it. This statement, however, requires qualification. They are not, if we understand the position, opposed to the general idea, the main plan, or the purpose of the seaway, but to the provision of the treaty as it stands which they believe imperils the usefulness of the Lakes-to-the-Gulf waterway. The sentiment of this region has been in the past acquiescent, even favorable, to the St. Lawrence project. But when there was incorporated in the treaty a limitation upon the amount of water that could be diverted from Lake Michigan into the Illinois Canal and River so small in amount as to jeopardize the operation of this internal waterway for adequate navigation, that sentiment turned against it in self-defense. While different engineers have made widely differing estimates of the amount of water required, the mere fact of their differences makes it seem essential to the interests of this region that the treaty should leave this question open to the test of actual experience. It does not do this. It places a definite and low limit on the volume of water, and under the terms of the treaty this could never be increased, except with the consent of the Canadian Government. This would make the future of this waterway, which is entirely within the United States, subject to the opinion and action of a foreign government, a condition that seems to this section and to us utterly intolerable. Unless a reservation is made to the treaty and accepted by Canada, leaving the amount of water that may be diverted from the lake into the Illinois Canal for future determination by the American Government, the treaty should not be ratified. There are other objections to the treaty, but this one is paramount."

[From the Middletown (Conn.) Press, Feb. 6, 1934]

MORE FOR RELIEF

Yesterday the House in Washington voted $1,185,000,000 more for relief purposes. Only one Member shouted "no", claiming the proposal was unconstitutional. And he came from Texas, too.

Of this sum, $950,000,000 goes to the Civil Works Administration. It is needed, too, for there is not enough left of the original billion appropriated to make full payments on Saturday.

Of the balance, $200,000,000 is assigned to aid two more agricultural products by processing—beef and dairy—and $35,000,000 is to make seed loans. With the Government asking that cotton, wheat, and some other products be reduced or destroyed, yet it is to continue to loan seed to raise more of these and other things. Well, that is the way they are doing things, and few in Congress or elsewhere are disposed to protest. Everybody hopes the experiment will hasten recovery.

The House passed this proposal after 40 minutes of discussion. Such trouble as the leaders experienced was in heading off amendments to make the various sums much larger. They do say it may be harder to halt the Senate in that direction. Perhaps so, for the present, but Congress seems to revel in voting out cash without thought of revenue.

In the brief talks on the matter it was pointed out that the Government had over $4,000,000,000 in the Treasury, whereas on February 1 it could show only $490,000,000. That gold-profit business and $1,000,000,000 borrowed made the gratifying change. No one in authority is worried at present over the debt changes. The future must take care of them.

As the program now is, this latest appropriation must last up to May 1, when the Civil Works Administration service is scheduled to end. That ending, however, is believed to depend upon general productive increase and the extent that it reduces unemployment.

Few acquainted with the temper of Congress believe that the employment the Government is providing through this instrument will end on the day named. At the same time, this situation, known to President Roosevelt, explains why he is trying to get the leaders to adjourn before May 1.

It will be fairly possible for the House leaders to direct the majority to so vote, but there is marked doubt as to what can be done in the Senate. The latter body has a vast calendar of measures now before it. Not one of the regular appropriation bills has been passed. The St. Lawrence Treaty is still under discussion. No agreement has yet been reached fixing a day for voting. Meanwhile great petitions are being filed against it, including one with 100,000 signatures from Connecticut.

Observers in Washington believe, however, that much of the obstruction now secretly carried on can be removed by the use of appointments or other influence.

An example of the consequences of opposition is disclosed in the case of Senator COPELAND, of New York. He is not to be supported for reelection because he has opposed some administration measures. No administration aid, it is announced, will go to any Senator who does not obey.

[From the Washington (Iowa) Journal, Jan. 24, 1934]

THE ST. LAWRENCE WATERWAY TREATY

There is considerable opposition to the ratification of the St. Lawrence Waterway Treaty even on the part of some who favor the waterway. They feel that Canada is taking our shirt away from us. For instance, by this treaty we assume a $200,000,000 probable cost, while Canada will pay less than $40,000,000.

That the treaty is a very pleasing one to Canada is indicated by the following quotations from the Toronto Mail and Empire.

"The United States abandons its ancient contention that Lake Michigan is an American lake. That great body of water has become forever, through this new treaty, an international body of water, which belongs to the St. Lawrence watershed instead of to the Mississippi watershed.

"Canada retains the specific right to construct at any time in the future, wholly within its own territory, alternative channel and canal facilities along the Great Lakes or in the St. Lawrence River, including the international section of the St. Lawrence. It has a right to use for such purely Canadian canal purposes whatever water there may be necessary for the operation thereof. As we indicated before, this clause places Canada in position to build an all-Canadian waterway, if at any time in the future it is deemed wise to enter upon the expenditure involved in such an undertaking. This is one of the most important and one of the most satisfactory points in a treaty which fairly bristles with satisfactory points."

Evidently the Mail and Empire is better satisfied with the treaty than are a lot of our people. Our folks recognize the fact that the treaty fairly "bristles with points" satisfactory to Canada. We should like a little of the bristling in our favor.

For instance, why make Lake Michigan an international body of water, when it's all in our yard, every bit of it, and its drainage zone is entirely in the United States. The withdrawal of water by the United States from Lake Michigan is limited by this proposed treaty, while Canada can pump all the water out of the Great Lakes she wants to, and that means that she can have more out of Lake Michigan than we, if she wants it.

Maybe, we may decide after all to fix the Erie Canal up so it will fill our requirements and get along with it for a while longer. It's a long, long trek for an artificial stream, and it would take a tremendous amount of work to make it a seaway, but it probably could be done. Anyway, why give away our shirt to Canada on a proposition that is of greater proportional value to her than to us?

[From the New York (N.Y.) Sun, Feb. 7, 1934]

THE SEAWAY TREATY

A count of noses over the week-end indicated that the administration is shy several votes of the necessary two thirds to insure the Senate's ratification of the St. Lawrence Seaway Treaty. Supporters of the proposal confidently expect the President to exert sufficient pressure to swing three or four Senators into line. If he does, he will commit a political blunder. For his own sake, for the sake of the Senate, for the sake of the country at large, it is to be hoped that he will refrain from the attempt. As an able strategist he himself should see the unwisdom of exercising coercion to put across a measure which is so strongly opposed by many who have thus far supported every policy he has advocated.

It is one thing for demagogues to assert that opposition to this treaty comes from wicked railroads and wickeder power companies, but it is quite another for the President of the United States to cover an argument so contemptible with the mantle of his great influence. Mr. Roosevelt knows that the opposition is widespread and sincere. He knows that great doubts of the economic feasibility of this scheme have been expressed by some of the Nation's foremost authorities on economics. He knows that the treaty would probably fail to command a majority in a plebiscite of his own State. He knows that the uneasiness it has caused in seaboard cities is genuine. He knows that the objection of the Mississippi Valley is firm and well reasoned.

If this were a policy of his own administration, his willingness to go the limit in procuring ratification could be understood. But it is not a policy of his own administration except insofar as it includes a policy of his former administration as Governor of New York. Negotiators for the Hoover administration tacked that gubernatorial policy to the tail of their own kite. They did so because they felt that there was no chance for the seaway without taking over the Governor's plan for public development of the power resources of the international section of the St. Lawrence. In doing so they effectively insisted that there should be no such development without the seaway. Either project standing alone was of questionable economic value; patched together they resemble a crazy-quilt.

The power scheme has been before the public ever since Mr. Roosevelt's own hand-picked commission presented a report which cast doubt upon certain aspects of its economic feasibility. Ratification of the treaty has been pending in the Senate long enough for Senators to examine it from all sides and make up their own minds. For the Executive at this late day to seek to impose his own predilections upon them would be to come perilously close to defeating that wise provision of the Constitution which makes conclusion of treaties with foreign powers a matter of divided responsibility.

It is eminently right and proper that the President, through his competent advisers, should negotiate bargains with the duly qualified representatives of other countries. In any such bargaining there must be give and take. There is always a risk, however, that in their ardor for bringing about an agreement, negotiators may give too much or take too little. Therefore the Constitution provides for a careful and detached review by the Senate. This ar-

rangement has saved us from grave mistakes in the past. It will save us from others in the future, unless we adopt the mischievous suggestion that in addition to negotiating treaties the Executive should put pressure on Senators to insure ratification.

[From the New Orleans (La.) Tribune, Feb. 1, 1934]

CANADIAN CANDOR

On July 19, 1932, the Toronto Mail and Empire bade all good Canadians rejoice. The St. Lawrence Waterway Treaty, now before Congress for ratification, had been signed at Washington the preceding day. And that treaty, declared the Mail and Empire, was a triumph for Canadian statesmen over the politicians of this country. So it was. This is an old story. That Canadian editorial has often been quoted. Parts of it are worth recalling at this juncture. Said the Canadian editor:

"On its face the treaty is more favorable to Canada than any previous arrangement ever made with the United States. * * * Though executed at the American Capital, it concedes to this country practically all the conditions long insisted upon by the most jealous guardians of Canadian rights. * * *

"The cost of the undertaking is to be borne largely by the United States. * * * We retain the right to build an all-Canadian waterway at any time in the future. * * * The judgment of the United States Supreme Court, requiring Chicago to reduce the extraction of water from Lake Michigan to a mere fraction of what it has been and is today is embodied in the treaty. * * *

"Not only this! The United States abandons its ancient contention that Lake Michigan is an American lake. That great body of water has become forever, through this treaty, an international body of water, which belongs to the St. Lawrence watershed instead of to the Mississippi watershed. * * *

"No feature of the treaty is more surprising or more satisfactory than the low cost to Canada at which the undertaking is to be carried out. * * * The cost to Canada will be only about $38,000,000 * * * the cost to the United States about $243,661,000. * * * Most of the construction work will be done in Canada. * * * Though the United States is to provide the $54,718,000 for works situated on the Canadian side in the International Rapids section, Canadian engineers, Canadian labor, and Canadian materials are to be used. * * *

"Most of the development occurs in Canadian waters. * * * The treaty has its power side as well as its navigation side. The work in the international section and in the national section will develop about 5,000,000 horsepower. * * * Canada is to obtain 1,000,000 of the 2,000,000 horsepower to be produced in the international section, but all of the 3,000,000 horsepower to be developed in the national section, which is wholly in Quebec, will belong to this country.

"This means that Canada is to obtain 4,000,000 horsepower and the United States 1,000,000 horsepower out of the whole St. Lawrence waterway development. We thus come in on the basis of 4 to 1. * * * To Mr. Herridge (Minister to Washington) goes the main credit for negotiating the treaty. He has obtained a treaty which places the bulk of the cost on the United States, which concedes to Canada practically all its demands, and involves the Dominion Treasury in an expenditure of less than $40,000,000. * * *"

[From the Scottsbluff (Nebr.) Star-Herald, Feb. 11, 1934]

STATESMANSHIP OR PORK?

Despite all the ballyhooing that has been done for the St. Lawrence waterway, and despite the repeated statements that the Lake States need, and want Congress to appropriate, more than half a billion dollars for the same, more than 108,000 citizens of Michigan have petitioned the State's Senators as follows:

"As a resident of Michigan I hereby petition yourselves and the great honorable Senate of the United States not to ratify the Great Lakes-St. Lawrence Deep Waterway Treaty for these reasons:

"The waterway is not needed. We have currently a Lakes-to-the-sea waterway and other wholly efficient transportation facilities. We cannot afford it. The woeful condition of public finances and our already grievous tax burden warrant no such vast expenditure. It will divert traffic from the adequately equipped railroads, thereby increasing their insolvency and otherwise destroying the vested rights of American citizens. It will not benefit the wheat grower or furnish farm relief. American labor will be one of the most serious losers from it. It will not "cure the depression." Nor is it desirable as unemployment relief. American ports will suffer. It is not necessary to our foreign trade. Our local markets will be at the mercy of cheaply produced foreign goods. Lastly, we must furnish the bulk of the money for a project (1) benefiting another nation more than our own and (2) lying more largely in foreign territory than in our own—doubly a source of more unwanted foreign debts and of delicate international situations.

"Voluntarily I, the undersigned, therefore, submit this my protest, and earnestly urge that you vote against such ratification."

Pretty strong for 108,000 signatures from a single State!

But will it have any effect?

Every other "barrel" that has appeared in the past 15 years in our country has been protested; but the country has not as yet been thoroughly awakened to the enormous drag on the taxpayers of the country, perpetrated by our engineers and our politicians.

How unreliable engineers' reports are was shown to the Senate a week or 10 days ago when the costs of several of the larger projects were compared with the original engineers' estimates. Senator GAGNER, of New York, Democrat and fifth ranking member of the Senate's Foreign Relations Committee, had sometime previously shown how, with each new period of spending, the estimates for the St. Lawrence have grown. In 1921 a Joint Board of Engineers estimated it at $250,000,000. By 1926 the estimates had grown to $536,000,000 and by 1929 to $712,000,000, while only a few days ago the estimate of one of New York's most competent and most highly reputable engineers put the cost at over a billion. Senator WAGNER also pointed out that since the project was first proposed conditions have changed so materially as to arraign every economic principle against the proposal. To quote:

"They are striving to improve our transportation facilities by the infusion of a new competitive element at a time when we know that competition has played havoc with transportation and when we are committed to the commencement of a program to unify and coordinate our transportation facilities. Rarely has any movement persisted so stubbornly in the face of the discrediting of every doctrine which gave it birth."

At a glance, thus, we see much opposition, in public opinion, in two widely separated States.

And, as has been pointed out previously, anyone pretending that the St. Lawrence can be of benefit to Nebraska's agricultural industry should be able to explain what the farmer can gain when—

He is being taxed to pay for the St. Lawrence to haul his grain more cheaply for export via the Canadian river; and when

He is being taxed for the Missouri development in order that his grain may be hauled more cheaply for export via the Mississippi to the Gulf; and when

He is being taxed, along with all the rest of us, for necessarily higher railroad hauls to ships or barges on either; and when

He is also being taxed, in common with everybody else, to reduce his acreage of grains so that there shall, in the first place, be no surplus to export, on either the St. Lawrence or the Mississippi.

Can one be censured for regarding that as "pork" instead of statesmanship?

[From the Albany (N.Y.) Knickerbocker Press, Feb. 4, 1934]

ST. LAWRENCE TREATY CLIMAX

The approaching climax of the St. Lawrence Treaty, when a vote will be taken, should arouse the country to the dangers it represents. Never in American history has there been so huge a Government project, and never has a large public work been approached with less actual determination of facts before the plunge was taken.

Deaf ears have been turned at Washington to the basic statement made by Maj. Gen. Edward Markham, Chief of Engineers, that no economic survey has been made to determine whether the seaway is necessary or justified from the national viewpoint.

To cite from page 349 of the hearing testimony taken in 1933 by the Senate Foreign Relations Committee:

"Senator WALSH. What is your idea, Colonel, as to whether ocean-going ships would avail themselves of this waterway if it is constructed?

"Colonel MARKHAM (now general). I have stated before coming to this hearing that I thought it would be unwise for the Engineer Corps to express curbstone opinions unless the committee prefers that. The Engineer Corps has not been called upon for anything related to the St. Lawrence River, except to answer an agenda of engineering questions. That it has done. It has not been called upon for an economic survey. Now, I have impressions, if that is what you prefer.

"Senator WALSH. I should be glad to hear from you."

"Impressions" were thereupon entered into the record of the hearings to the extent of hundreds of pages, but the fundamental questions involved were not then and have not since then been answered.

There has been no time for the Government to consult with the American shippers and manufacturers, or to make an actual survey of the trade that would move via the St. Lawrence, or to determine to what extent the existing water and rail routes through New York and the Mississippi Valley would and could do to solve the problem of the Midwest.

Such reports as have been presented to Congress as to computed tonnage are only generalizations, with the St. Lawrence "share" of business prorated on a geographic basis.

Against a mass of testimony that the opening of the Great Lakes coastline to world shipping will inevitably damage American trade, no off-setting proof has been gathered officially.

There has been no official computation and balancing of advantages and disadvantages of the project to learn whether or not the damage to American shipping and railroads will be overbalanced by advantages.

On the power phase there is quite as much reason to doubt the claimed benefits, as no goal of cheap power for the householder can result until an enormous industrial absorption of the firm power has been secured. The new developments in the field of electrical generation have been given no consideration in the official study of this project.

Long since the original causes that led to the St. Lawrence seaway agitation have disappeared in the world-trade barriers erected against this country, the decline of American wheat export, and the President's own policy of reducing production.

The President's statement that 13,000,000 tons of commerce will move by the St. Lawrence during the 7 months of open navigation clearly invites examination as to how railroads and other American transportation agencies are to be compensated for the

loss of this tonnage. Many millions of dollars of Government loans are being made to the railroads to keep them alive.

As to shipping, it is self-evident that American fleets will not be able to compete for foreign commerce with foreign ships on the Great Lakes, because the latter are built and operated so much more cheaply.

The main argument in behalf of the treaty has been that the Middle West wants it. Sound judgment has been relegated, and political outcry has taken its place. And therein the supreme danger lies. Now there are a few Midwest States still for it, but others have changed their minds. The St. Lawrence is not like the Panama Canal, controlled by the United States. Its international navigation is always technical, and in actual practice British trade regulations can adversely affect the American commerce moving upon it.

Even the treaty proponents admit that Montreal will, under the treaty, become a greater transfer point on business diverted from the American seaboard. And for such an outcome American money is to be invested and a good part of it thrown into Canada.

[From the Davenport (Iowa) Democrat, Feb. 2, 1934]

SEVEN REASONS WHY WE DO NOT WANT THE ST. LAWRENCE OUTLET

While the St. Lawrence waterway used to have some friends up here in the Northwest who thought it would help our wheat get onto the world markets, those friends now seem to have disappeared. Perhaps they went with our hopes of ever again having a world market.

At any rate, one doesn't hear many friendly expressions about the St. Lawrence waterway any more. We are in a fair way to have a waterway to the Gulf, in spite of some of our Congressmen who tried to beat Iowa out of her place in the sun, and therefore we shall not need the one to the Atlantic.

Our Mississippi Valley Association is definitely against the St. Lawrence project. In one of its latest bulletins it summarizes the reasons we don't want it in seven major points, as follows:

"1. Article 8 surrenders American sovereignty over Lake Michigan, an American lake lying wholly within the borders of this country and within the American watershed.

"2. The same article limits for all time the diversion from this lake to 1,500 cubic second-feet, a volume wholly insufficient to maintain a navigable channel in the Illinois waterway, but grants to Canada the right of unlimited diversion from boundary waters.

"3. The estimated cost of the St. Lawrence seaway to the United States is $243,661,000, while Canada will pay an estimated total of but $38,071,000. No consideration is given the United States for millions of dollars already expended to improve channels and harbors in the Great Lakes which will be used by the seaway.

"4. The treaty provides that $54,718,000 of the American taxpayers' money shall be expended for works to be constructed in Canada by Canadian engineers, Canadian labor, and Canadian materials.

"5. The treaty will give the Canadian grain producer, now enjoying lower rail rates to lake and ocean ports, an added advantage over his American competitor in the world markets.

"6. The treaty will give Canada 4,000,000 of the 5,000,000 electric horsepower developed, an advantage of 4 to 1.

"7. The treaty gives Canada exclusive ownership and control over all the structures built with American money on the Canadian side of the international boundary. This might result in the closing of the waterway to American ships in the event of war."

Those ought to be reasons enough. If we don't want it, we shall look for some of our Iowa Congressmen, who have been so expert in misinterpreting the desires of our people, to try to force it on us.

[From the Chicago (Ill.) Tribune, Feb. 2, 1934]

ANOTHER FALSEHOOD DISCLOSED

Perhaps the most exaggerated claim made by the advocates of the St. Lawrence seaway development is that the total cost to the United States will be in the neighborhood of $182,000,000. We are told that as soon as that expenditure has been made an ocean-going vessel drawing 26 feet of water will be able to load at Hamburg or Liverpool and clear for Chicago or Milwaukee. We have already made editorial mention of the fact that due to the difference in the buoyancy of salt versus fresh water the ocean draft would be limited to 23½ feet to enable the vessel to navigate in the 27-foot draft of the proposed St. Lawrence seaway. But after that, what? The ship would not be able to dock in Buffalo Harbor because there are only 21 feet of water available. She must avoid Cleveland, where there are only 19 feet of draft. She could not navigate the Detroit and St. Clair Rivers to Lake Huron, and even if she did she would not be able to dock in the 21 feet of water at Chicago or Milwaukee.

Another interesting fact is that natural harbors on the Great Lakes are very scarce, and that the outstanding ones are on the Canadian side, at Toronto and Fort William. On the American side, at Cleveland, Chicago, and Milwaukee, we have merely developed the mouths of rivers, and harbors must be constructed. In fairness to the people of the United States the proponents of the waterway should admit that the expenditure of $182,000,000 is only the first installment. For that price the waterway can be completed to the point where a vessel drawing not in excess of 23½ feet may clear from Liverpool for Toronto. Further installments running into 10 figures will be necessary to clear Great Lakes channels and construct harbors before navigation will reach either Chicago or Milwaukee. The operator of an automobile can well appreciate just what this means. There is a down payment of $182,000,000, after which we must produce further regular payments before we have a clear title to inland navigation—and in the meantime operating and repair expenses will accrue.

[From the Rutland (Vt.) Herald, Feb. 3, 1934]

AGAINST WATERWAY—LEADING MONTREAL NEWSPAPER TELLS WHY ST. LAWRENCE TREATY WOULD NOT BENEFIT CANADA OR UNITED STATES

The Montreal Gazette, commenting on the waterway project, summarizes the main objections thus:

"That the waterway would be unproductive for half the year; that if the money were spent on the railroads they could haul free of charge all the grain that would otherwise move through the waterway; that if the railroads were relieved of taxation, as the waterway would be, they could carry all the grain they now haul and all the estimated waterway grain without charge and still make money; that the estimated saving of 6 to 12 cents a bushel of wheat is impossible since this estimated saving is largely in excess of the actual cost of moving grain from the head of the Lakes."

Objection has also been raised on the score that the waterway would divert traffic from Buffalo, Albany, New York, and Boston, where enormous traffic and terminal facilities would be adversely affected. "It is held that the possible gains to the rest of the country are not only conjectural but, in any event, would not compensate these losses, and furthermore, that the power project would only add to developments already redundant, making for uneconomic competition with existing private producers."

Commenting on the leading argument that the proposed waterway would be a great advantage to the western wheat grower, the Gazette said further:

"The chief reason for this seaway, as far as the United States is concerned, is held to have disappeared, and for a reason which was publicly stressed by Mr. John Cornwell in New York last week at a great gathering of shippers and others interested in railway and water transportation.

"The reason is that when the St. Lawrence seaway was proposed the thought was to move the Atlantic Ocean 2,000 miles westward, via the Great Lakes, principally for the purpose of giving a cheaper export haul to the farmers of the great wheat areas of the Northwest. However, since that time the United States farmers have virtually ceased to export wheat. The American wheat growers are being paid to leave their wheat fields idle and the Department of Agriculture is striving to bring United States wheat production within the range of domestic consumption. Mr. Cornwell affirmed that he was second to no man in loyalty to the President and in readiness to support Mr. Roosevelt's gigantic efforts to bring about economic recovery. But he insisted that this loyalty and this support in no way bound him or anybody else to endorse a policy as mistaken as the prosecution of the St. Lawrence waterway project would be."

[From the Cincinnati (Ohio) Enquirer, Feb. 8, 1934]

THE DISPUTED SEAWAY

Mr. Walter Lippmann, in the Enquirer yesterday, presented a plausible case for the ratification of the St. Lawrence Waterway Treaty with Canada. Probably it is the most plausible case which has been made in nontechnical language. It contains some very inspiring ideas and most attractive appeal to the far-sightedness of our people. It is to be doubted, however, whether Mr. Lippmann is as realistic as he pretends to be.

According to this sponsor of the seaway, the American and Canadian peoples have been trying for 200 years to obtain access to the high seas. But that interval of time corresponds to the tremendous movement of population away from the sea. The American people particularly have sought their destiny in their own market, and it has led them westward, away from the ocean. The urge to obtain access deep-sea routes has been largely a thing of recent decades, and of restricted economic groups with a special interest in such commerce.

Again Mr. Lippmann contends that a waterway from the Lakes to the Atlantic will open up the interior of North America to the sea and augment the total volume of commerce. Perhaps it would be more accurate to say it will open up selected parts of a half dozen States to ocean shipping, and will increase the total of commerce only as we subsidize this restricted region by providing, through taxation, transportation at lower-than-cost rates.

The case for the seaway stands or falls on the accuracy of just one phrase, used by Mr. Lippmann. It will increase commerce, he says, because it provides more efficient transportation. But will it? Is transportation more efficient when its rates are made artificially low by the expenditure of colossal sums of the taxpayers' money? This is the question that expert testimony, Mr. Lippmann's reliance, does not answer.

If it can be proved that the proposed St. Lawrence seaway can be operated with low freight rates and still amortize its tremendous cost out of tolls, it is a sound project. Thus far, that has not been proved. On the contrary, the evidence leads us to believe that the seaway will provide cheaper transportation only at the expense of taxpayers. This is not the "more efficient transportation" to which Mr. Lippmann refers.

[From the Norwich (Conn.) Bulletin, Feb. 14, 1934]

DETERMINED OPPOSITION

While there is evidence of sparring for time in connection with the bringing of the St. Lawrence Treaty to a vote, there continues to pile up more opposition and a growing realization of the fact that new conditions are calling for a different consideration of the merits of the development.

Though administration pressure is being brought to bear on those known to be opposed to the treaty, and while certain of the objectors to the pact are being threatened with political opposition in that subtle way which the public is not supposed to recognize, there continues to be outspoken public sentiment against the seaway, and especially conspicuous in this respect is the renewed expression of the New York Merchants' Association, to which 4,500 concerns belong.

Attention is directed to the detrimental effects which the development would have upon the ports along the Atlantic seaboard as far south as Norfolk, the ports in the Mexican Gulf, the lake port at Buffalo, the Barge Canal, the iron-ore and coal industries, the grain elevators, and upon the railroads of the East.

In this connection it is not to be overlooked that with rail facilities to handle all the grain that can be offered the plan is now for the curtailment of the production of grain, thus decreasing the demand for Lakes-to-sea facilities. The Mississippi Valley States are raising a howl over the threat to the usefulness of the Lakes-to-the-Gulf waterway because of the limitation placed on the amount of water that could be diverted from Lake Michigan under the provisions of the treaty.

Thus, the objections come from several sections, each mindful of the harmful effects upon their particular interests, but recognizing, it would appear, that such legitimate causes for opposition exist in other regions as to make it unwise as a national proposition.

The idea of providing such a large amount of money for the purpose of buying Canadian materials and employing Canadian workmen doesn't appeal at this particular time, while the plan of putting the Government into additional competition with private enterprise on such a huge scale as is proposed for power development also has a large volume of opposition. Much significance is attached to the manner in which the New York Senators and the people of that State are registered as active opponents of the development, and, in the light of existing conditions and a careful consideration of what is involved, it is evident much difficulty is going to be experienced in breaking down the strong position which is held by the opponents.

[From the Boston Transcript, Feb. 13, 1934]

STATISTICS AS WEAPONS IN THE SEAWAY FIGHT

With the full force of the administration exerted in its favor, the St. Lawrence Treaty is apparently far from commanding the necessary two-thirds vote in the Senate. For several weeks Senators have been discussing both the seaway project and the provision of the treaty. The debate has strengthened the case against ratification. It has developed among other considerations the following:

The advocates of the seaway instead of placing the emphasis on claims that it would benefit the American farmer by reducing the cost of transporting grain to Europe have been stressing the estimate that 80 percent of the American traffic through the St. Lawrence would be in the coastwise and intercoastal trade. But figures relied upon to show savings in the cost of transportation in American commerce have been challenged, and apparently demonstrated to be erroneous.

One set of figures used in behalf of the seaway purported to show the saving it would effect in the cost of carrying lumber from the Pacific coast to the Great Lakes. In rejoinder there were presented rates for the haul by water to New York and by rail to the Lakes. The cost by this route was actually less than the purported saving by the other. It reduced the claim of the advocates of the seaway to the ridiculous. There were other such instances. They served to cast doubt on the entire case concerning the savings that might be effected in transportation charges were the seaway constructed.

The case before the Senate is twofold. There is the question of the value of the seaway itself. There is the question of the rights of Canada and the United States under the treaty. During the debate, opposition to the treaty has included the following specific objections: It gives Canada what is in effect a veto power on the withdrawal of water from Lake Michigan, and transforms it, in effect, into an international body of water. Under another provision, should Canada divert water from the Hudson Bay Watershed to rivers whose waters reach the Great Lakes, the quantity so diverted would be a Canadian monopoly at all points along the route to the lower St. Lawrence and the sea. But it was pointed out that, with nearly two thirds of the watershed of the Great Lakes in the United States, the treaty does not correspondingly limit Canada's share of the seaway waters. And objection was offered to the provision of the treaty which calls for the employment of Canadian engineers and workers, and the use of Canadian materials in structures paid for by the United States on Canadian soil. The amount of money involved is estimated at $53,000,000.

In short, the treaty was pictured as being the sum total of concessions by the United States. There was a suggestion that every time Miss Canada said she would not play unless she was given the thing she was demanding at the moment, Uncle Sam good-naturedly told her: "Oh, well, if you feel that way about it, take it." The Senate scrutiny of the treaty has undoubtedly made it more difficult to muster votes for it.

And the administration could hardly maintain that here was something essential to the recovery program, for it is estimated that it would take 8 years to construct the seaway. It would scarcely be started before the end of the depression, if the expectations on which the President and his advisers have staked so much are fulfilled. The Senate was thus free to act on the question as it might have acted had there been no depression. Senators were not under compulsion to yield their own judgment to that of the White House because of an emergency. The result is that, if it refuses to give the treaty the requisite majority for ratification, the Senate will have asserted its independence, and declined to play the part of the rubber stamp.

[From the Knoxville (Tenn.) Journal, Feb. 11, 1934]

ST. LAWRENCE TREATY

Congressional support of any measure proposed or approved by President Roosevelt is given with but scant discussion or opposition for the very good reason that the Members of Congress believe the people are overwhelmingly in sympathy with anything the President wishes. Undoubtedly a vast majority of the people are in favor of the President's recovery program in all of its ramifications, because they have confidence in his sincerity of purpose even though some phases of the recovery program are experimental. But this Nation-wide popular support of the President's recovery program does not necessarily extend to other measures approved by him and which have no direct relation to recovery. Such a measure is the St. Lawrence Power and Waterway Treaty now pending before the Senate.

Wide-spread opposition to the St. Lawrence Treaty has developed throughout the country in both political parties. Sections that cannot be benefited by the transportation facilities of the proposed waterway do not feel that they should be taxed to provide cheap transportation for Canada and the northwestern part of the United States, even if that can be accomplished. As a power project it has more merit than it offers for transportation, but without the transportation element of the proposal it would be an exorbitantly costly power development.

If the St. Lawrence waterway should develop as much freight tonnage as its proponents estimate, which is exceedingly doubtful, it would have the effect of building up a Canadian port at the expense of Gulf and North Atlantic ports of the United States, a circumstance that hardly could be relished by the areas adversely affected.

Another sound reason for opposition to the treaty is that it is in distinct conflict with another and wiser policy of President Roosevelt, that of rehabilitation of the railroads through elimination of destructive, wasteful competition. If the St. Lawrence waterway were to be as successful as a transportation line as its proponents claim, it would be grievously harmful to the railroads as a competitor which would deprive them of tonnage.

In addition to these reasons for opposition to the treaty, there are two other impressive facts: First, it would invite discord with a friendly neighbor, as disputes over water rights, power rights, rates, and other points inevitably would arise. Second, the proposal places the burden of cost largely upon the United States, while most of the money would be spent in Canada.

Unless the wishes of the President are to be regarded as equivalent to edicts, the St. Lawrence Treaty will be defeated by Senators who are thoughtful of the welfare of their respective constituencies.

[From the Buffalo (N.Y.) Courier-Express, Feb. 9, 1934]

INVESTMENTS AT STAKE

If Senator COPELAND'S count of noses is correct, the St. Lawrence seaway advocates are not likely to press the treaty to a vote in the Senate today or tomorrow. Last week-end it was said that the protreaty side was only a handful of votes short of the two thirds necessary for ratification, and that Presidential pressure was expected to supply those in time for a vote today or tomorrow. But the senior New York Senator, a Democrat, says the maximum vote in sight for the treaty is 47, which is 17 below the required two thirds of the Senate's Membership of 96. The administration, needless to say, will not risk defeat, if defeat is as certain as those figures indicate.

Senator COPELAND, of course, may have counted with too unrestrained optimism. That happens sometimes when legislative fights are on. But whether the vote comes today, tomorrow, or later facts for the Senate to consider soberly are contained in the brief of opposition submitted by the Merchants Association of New York. Some of these facts are:

The estimated cost of constructing the proposed seaway comes from such prejudiced sources as to warrant skepticism; the interests adversely affected, if the seaway should prove successful, would be the $250,000,000 port of New York, the $100,000,000 port of Baltimore, the $40,000,000 port of Philadelphia, and the $60,000,000 port of Buffalo, New York State's $176,000,000 Barge Canal, the $10,000,000,000 railroad properties in the East, the $150,000,000 shipping and elevator facilities on the Great Lakes for the handling of grain, Michigan and Wisconsin iron ore, Pennsylvania and Central States' coal, which would be forced to compete with foreign ore and coal, and the Gulf ports, which would lose trade through the shifting of traffic from the Mississippi to the federally constructed St. Lawrence route.

All of these listed adverse effects would be contingent, of course, upon the success of the proposed seaway as an aid to navigation. Many believe that as a shipping route it would never pay its way, thus leaving the cost really chargeable against the water power for whose production it would provide. However that may be, it is necessary, as the Merchants Association has done, to reckon with the possibility of success as a shipping route in order to determine the potential adverse effects. The investments which would be hurt bulk large. Whether a nation can survive with one half economically hurting the other half is a question which the Senate may not ignore. New York's opposition to this treaty deserves consideration commensurate with the size of New York's investments to be endangered and the fact that she pays a quarter of the Nation's taxes. With taxes as sorely needed as they are now, it would seem the very essence of wisdom to conserve all revenue resources carefully, particularly the biggest resource of them all.

[From the Harrisburg (Pa.) Telegraph, Feb. 9, 1934]

ST. LAWRENCE SEAWAY

Harrisburg is not without concern over the proposed St. Lawrence seaway. Should this expansive scheme for using the St. Lawrence River to provide easy passage of cargoes from the West through the Great Lakes to the eastern seaboard be completed all the cities north and west of Harrisburg to the Canadian border would contribute to the financial betterment of cities on the Great Lakes, especially those at the eastern end. These would get profit at expense of the eastern seaboard communities and every ton of freight which would move over the proposed route would be taken away from some large railroad system, which would inevitably injure Harrisburg and all places in this area.

It should be noted that the large steel plant at Steelton is practically dependent upon railroad buying to keep in operation and a large share of the output of the Central Iron & Steel Co. is also used for railroad purposes. In all the rural districts within 100 miles of Harrisburg—especially to the north and west—Pennsylvania railroad purchases are the main stimulus for the sale of forest products, especially ties.

It is significant that the counsel of the Eastern Railroad offered to carry all grain from lake shores to the Atlantic seaboard free of charge, if the Government would donate money required for this waterway. It is amazing how little the public seems to understand this project which involves such heavy expenditures by the American Government in the building of the waterway. One student of the situation says it will cost at least 11 cents in taxes to save 4 cents for the shipper and as Pennsylvania pays so large a share of all national taxes the cost to the Commonwealth as a whole would amount to millions of dollars a year.

Senator DAVID A. REED is believed to be working for the best interests of the State in his opposition to the ratification of treaties covering the proposed waterway. One acute observer "cannot believe that Pennsylvania will receive any benefit so far as relief of unemployment is concerned in any way comparable with taxes that the residents of the State would have to pay toward the cost of the costly project, and in addition from the date of its completion Pennsylvania would suffer by reason of water competition." One writer says the American taxpayer would be required to pay about $4.50 a ton for the benefit of such shippers as would use the proposed St. Lawrence waterway route. Eminent consulting engineers conclude that "we can confidently expect the St. Lawrence project in all its ramifications to cost greatly more than published estimates." These published estimates of cost, as issued by the Department of State, total $543,429,000. Of this amount the United States is to spend $272,453,000 and Canada $270,976,000. However, these costs do not include interest during construction nor do they take into account the fact that few, if any, of the ports of the Great Lakes can accommodate ocean-going craft of the size and draft contemplated in a 27-foot waterway. Some estimates place the total cost as high as $1,450,000,000.

Briefly, the object of this waterway is to bring the Midwest nearer to the markets of the world. Its advocates especially stress benefits it will confer on the farmer with emphasis on cheaper transportation afforded for export wheat; but to achieve such savings it is pointed out the plan would necessitate free transportation from Duluth to Montreal. Somewhat similar benefits for the farmer were claimed for the New York State Barge Canal, but they failed to materialize. It is further held that the railroads of the eastern seaboard are not burdened to anywhere near their traffic capacity, and, furthermore, even if railroads were taxed to capacity the St. Lawrence waterway would not be of material assistance because it would be ice-closed during the very season of the year when the American railroads carry their heaviest burden of traffic. The conclusion is regarded as inevitable that present facilities for moving bulk freight eastward are ample and will be ample for many years to come.

What occasions pause in this formidable undertaking, which is being urged by certain interests, is the great burden which will be placed upon the American taxpayer—approximately $26,000,000 a year—to cover fixed charges, operation, and maintenance.

These charges are not to be paid by rates charged to shippers or tolls levied on shippers, for shippers and shipowners are to receive the waterway as a free gift from Uncle Sam, but the American taxpayer will be called upon to pay to the extent of $4.50 per ton of the estimated 5,500,000 tons of American traffic.

Alfred E. Smith was quoted recently as stating that it is "noteworthy that the Government has done little to contribute to a century of progress, while, on the other hand, much has been prevented, much has been thwarted, much has been hindered by the heavy, cold, clammy hand of bureaucracy."

He says, further, "it may be and will be urged that private industry often labors for private gain. It may be that its ends sometimes are selfish, it may be that there are times when it needs the curb and bit of Government regulation, but it is still vastly superior to Government planning and Government control of business."

[From the Elkader (Iowa) Register, Jan. 18, 1934]

SHOULD BE DEFEATED

We hope that the Senate will defeat the ratification of the St. Lawrence Waterway Treaty. It is our opinion that the project as proposed in that treaty will be of far more advantage to Canada than to the United States, and we would pay by far the larger part of the bill. Like the 9-foot channel on the upper Mississippi, it would be frozen up a considerable portion of the year. As a measure to employ labor it would help Canada more than our own country. Apparently the Canadian diplomats who negotiated the treaty were more clever than our own representatives.

[Clipping from the North Tonawanda (N.Y.) News, Feb. 9, 1934]

ST. LAWRENCE SEAWAY

Supporters of a St. Lawrence seaway try to discredit opposition by claiming that New York State critics of the project are actuated by selfish motives and that western New York, for example, is afraid of lost prestige to its Great Lakes ports, such as Buffalo, the Tonawandas, and, by next summer, Niagara Falls.

On the contrary, there is ample proof that the country as a whole would get much the worse of a bargain with Canada, and New York State in particular would pay out $89,000,000 without compensating advantages to its citizens, as pointed out by a joint committee on economies that recently completed a survey of the St. Lawrence River Ship Canal for important business and trade organizations of New York State.

Following are seven sound reasons why the United States should not thus join with Canada. It is remarkable that not one of them hints at loss of water transportation advantages to any part of New York State. They are the basis of opposition now fighting desperately against personal requests by both President Roosevelt and Governor Lehman.

1. Article 8 surrenders American sovereignty over Lake Michigan, an American lake lying wholly within the borders of this country, and within the American watershed.

2. The same article limits for all time the diversion from this lake to 1,500 cubic second-feet, a volume wholly insufficient to maintain a navigable channel in the Illinois waterway, but grants to Canada the right of unlimited diversion from boundary waters.

3. The estimated cost of the St. Lawrence seaway to the United States is $243,661,000, while Canada will pay an estimated total of but $38,071,000. No consideration is given the United States for millions of dollars already expended to improve channels and harbors in the Great Lakes which will be used by the seaway.

4. The treaty provides that $54,718,000 of the American taxpayers' money shall be expended for works to be constructed in Canada by Canadian engineers, Canadian labor, and Canadian materials.

5. The treaty will give the Canadian grain producer, now enjoying lower rail rates to lake and ocean ports, an added advantage over his American competitor in the world markets.

6. The treaty will give Canada 4,000,000 of the 5,000,000 electric horsepower developed, an advantage of 4 to 1.

7. The treaty gives Canada exclusive ownership and control over all the structures built with American money on the Canadian side of the international boundary. This might result in the closing of the waterway to American ships in the event of war.

[From the Brooklyn Citizen, Feb. 10, 1934]

SEAWAY TREATY DOOMED

The St. Lawrence Treaty is pending in the Senate, with no time set for a vote. Predictions are that it will never be ratified. Senator COPELAND, of New York, points out that a recent canvass shows that the treaty would not obtain more than 47 votes, which is 17 less than the two thirds necessary for its ratification.

Senator COPELAND is working on this matter, together with his colleague Senator WAGNER and many others, in the interests of the cities of the eastern seaboard, of Gulf ports, and of many business interests throughout the country, some of which have not begun to realize the menace to their prosperity involved.

There are many reasons why this treaty, which has so much opposition in New York and other States, should be defeated. Some of them are summed up in a brief presented to the Senate by the Merchants Association of New York, representing 4,500 corporations doing business in New York City.

Among the interests adversely affected the following are named: The port of New York with its investment of $250,000,000 in docks, piers, and other facilities; the port of Baltimore, with a total investment in port facilities exceeding $100,000,000; the port of Philadelphia, where, in addition to a previous huge investment, the city has expended something like $40,000,000 in the improvement of piers and bulkheads; the ports of Boston and Norfolk and others on the eastern seaboard; the lake port of Buffalo, with an investment of $60,000,000 in docks, warehouses, elevators, and mills.

Then there is the New York State Barge Canal, built by citizens of this State, who, having spent $176,655,250 in the construction of a waterway to serve the lake districts, are now called upon to pay nearly 28 percent of the cost of constructing a competing waterway. The railroads, particularly in the eastern section of the United States, where there is an investment of $10,000,000,000, would be hard hit if the treaty were to be adopted.

In the lake transportation service, which would also suffer greatly, there is an investment of over $150,000,000 in steamships, canal barges, and grain elevators. The coal mines of Ohio, Pennsylvania, West Virginia, and Kentucky would be drawn into competition with foreign-mined and foreign-transported coal. Coal exports of 16,000,000 or 17,000,000 tons to Canada would be subjected to competition with British coal. Foreign ores would come into competition with the iron-ore industry of Michigan and Wisconsin. The Gulf ports would lose trade which would be diverted to the St. Lawrence waterway. Other sufferers would be the grain-elevator industry of the United States, the wheat growers of Oklahoma, Kansas, Texas, and other points in the Southwest, labor on American railroads, and every taxpayer in the United States.

Truly there is much at stake in this matter, and it behooves every lover of the United States and its business activities to oppose the St. Lawrence Waterway Treaty.

[From the Bridgeport (Conn.) Telegram, Feb. 7, 1934]

GIFTS TO CANADA

Opponents of the St. Lawrence Canal are making the most of an editorial which appeared in the Toronto Mail and Empire, an influential Canadian newspaper, on July 18, 1932. This has been resurrected for the reason that every argument therein is a good argument for Uncle Sam's nonparticipation in the project.

The Canadian paper gloats over the fact that if the treaty is ratified, Uncle Sam will bear the major cost of the enterprise while Canada will reap the lion's share of the benefits. The agreement, says the Toronto paper, is more favorable to Canada "than anyone outside of a limited government circle could have hoped for."

"The cost of the undertaking is to be borne mainly by the United States. The Canadian 2-stage plan in the international section is adopted in place of the United States single-stage plan. Canadian sovereignty over the works in Canadian waters is absolutely established. Without altering in the slightest degree Canada's age-long policy of joint development of the St. Lawrence waterway we obtain a 27-foot navigation channel from the Atlantic to the head of Lake Superior."

And so on for two solid columns. Uncle Sam is to pay the bills, but all works on the Canadian side are to belong to Canada and to be built with Canadian labor and materials. Chicago is to be enjoined from diverting water from Lake Michigan except in very limited quantities. Of the water power developed, Canada is to get 4,000,000 horsepower as against 1,000,000 for the United States. Lake Michigan, which is now American territorial water, will be internationalized * * *. The negotiation of so favorable a treaty was a triumph for the Canadian negotiators, Bennett and Herridge.

The worst of it is that every boast of the Canadian paper is borne out by facts. It is all true. And the Senate of the United States seems bent upon making this great gift to Canada.

[From the Portland (Maine) Express, Feb. 9, 1934]

ST. LAWRENCE CANAL DEAD

A check-up of the Senate shows that the St. Lawrence Canal Treaty has only 43 votes in its favor, which is short of a majority, whereas a treaty requires a two-thirds vote for ratification. The Senate has been so prone to do as the President dictates, that there are those who say that if he should get out and make a fight for this measure, he might win over the 10 Senators who are now needed to ratify. This statement is coupled with an expression of opinion that the President will not do this.

The expected procedure is that the pact will be allowed to come to a vote, meet rejection, and that thereafter an attempt will be made to negotiate a new treaty that can be ratified. If this is to be the order of business, a great many years will elapse before the diggers will start work excavating for the waterway.

The defeat of the treaty will be a victory for Portland, the whole Atlantic coast, and the Mississippi Valley as well. The President favors the building of the canal, as Mr. Hoover did. On the general proposition that any improvement in transportation is progress, they are right. But there is serious question whether this construction would prove a real improvement. There is no doubt but the interests that would have to be sacrificed for it would be vast, sufficiently so at the present time to make it impracticable. In the first place the railroads would suffer. In saying this we encounter the argument that the greater the facilities for transportation, the more business there will be for everybody. But it is certainly true that at present there are plenty of facilities for bringing the Middle West grain crops to the seaboard.

It cannot be controverted that the North Atlantic ports would suffer greatly. A Boston mayor has said that if the canal were built the ocean terminal facilities in Boston would become obsolete.

It has been claimed for the project that it could be made profitable by the electric power that could be developed. That could hardly be true now for there is not sufficient work for the electric power already available to do. As to the cost, there is a wide difference of opinion. The engineers say approximately $275,000,000, other authorities name double that amount. The cost would not be a bar if the canal would be worth while. For the present at least it would not be. It is a project that can very well wait.

[From the Point Pleasant (W.Va.) Register, Feb. 14, 1934]

THE ST. LAWRENCE TREATY

St. Louis Chamber of Commerce, among many others, is taking an active part in steps to prevent final ratification of the St. Lawrence Power and Waterway Treaty now pending before the United States Senate.

(Let it be said, at the outset, that the Register is in accord with most of the innovations President Roosevelt has and is sponsoring. But this paper looks with disfavor upon his interest in developing the St. Lawrence waterway.

Mason County and most of the contiguous section of West Virginia are interested in farming. But this part of the Ohio Valley is served by two great waterways, Ohio and Kanawha, and two large railroads. So when we say that Mason County is directly interested in seeing that the treaty is not consummated, we mean that the interest is here because this section soon would feel its disastrous results were the treaty ratified.

Some of the reasons for opposition to the treaty are:

It would work a detriment to the ports of Baltimore, New York, and other leading Eastern cities.

It would hamper the shipment of Kanawha Valley coal to the Middle West, because foreign coal would come directly through the waterway to points now served in part by coal from this area.

It would add considerably to the National Budget, and this is no time to spend money unwisely.

The St. Lawrence waterway is ice-bound nearly half the year.

It would give Canada a say-so in Lake Michigan shipping.

The direct benefits, if any, seem to be of an intangible nature.

Canada, from all appearances, will get the better of the bargain.

It is a distinct departure from the principles of that now famous bluebird, the eagle.

[From the Erie (Pa.) Times, Feb. 7, 1934]

LOGROLLING ON THE SEAWAY

Advocates of the St. Lawrence seaway are making a drive for votes in the Senate with liberal use of logrolling methods. The opposition has dwindled, it is said, because Senators who are not in favor of the treaty fear that appropriations for projects within their home States will be withheld if they vote against it. Everyone who has observed the working of politics in Washington knows how vital river-and-harbor projects are to the welfare of those in Congress.

Interests seeking $99,000,000 from the P.W.A. to deepen the Mississippi River are said to be trying to allay any opposition to the St. Lawrence Treaty from Senators representing the Mississippi Valley. By favoring the St. Lawrence advocates they hope to be favored in turn. Senator LA FOLLETTE told his colleagues on Thursday that the Government is spending more money on the Mississippi and its tributaries than the St. Lawrence project will cost. Of course, the lake States are not complaining about this vast outlay in the river States, the Senator said, but in return they do ask for "just consideration" of the seaway.

The practice of trading votes on regional projects is thoroughly obnoxious. When an undertaking of such vital importance as the St. Lawrence seaway is involved this sort of a vote-rousing drive is also fraught with grave dangers.

Numerous issues of far-reaching importance ought to be decided before the Senate places a stamp of approval on the St. Lawrence Treaty. Since American wheat exports have dwindled to a small volume, most of which is shipped from Pacific ports with the aid of a Federal subsidy, the need for development of a ship canal between the Great Lakes and the Atlantic is today less apparent than ever before. Some interests in the Middle West claim that the proposed seaway would give Canadian farmers still greater advantage over our wheat growers than they now possess.

Those opposing the measure assert further that thereby the United States would lose its exclusive sovereignty over Lake Michigan under the treaty. At no point is this lake nearer than 50 miles to the Canadian border. Shall it now be designated an international body of water? The treaty would forbid the United States to divert more than an annual daily average of 1,500 cubic second-feet of water from Lake Michigan, which might be a matter of real concern to the Chicago drainage area.

[From the Bridgeport (Conn.) Telegram, Feb. 8, 1934]

OH, MR. LIPPMANN!

How our great minds do nod at times. Thus we find Walter Lippmann arguing in the Hartford Courant in favor of the St. Lawrence Canal, as follows:

"The project now before the Senate has been investigated for more than 12 years. It has been approved by the engineers on both sides of the boundary. It has been advocated by President Hoover. It is advocated by President Roosevelt. The general public does not need to investigate any further. A project which, after 12 years of debate, has the support of the two Governments, of the experts of both Governments, of the leaders of both parties, ought to be acceptable to the layman who has

no time to study the technical aspects of the question. For how are we ever to make up our minds about anything if we reject endorsements based on prolonged expert, nonpartisan, and international inquiry?"

The complete vacuity of this argument will be demonstrated in a flash, if anyone thinks back for so long a period as 12 months. Mr. Lippmann says that we, as people, should cease to have opinions when we are opposed by a Congress or two, an expert or two, and a President or two.

That was precisely the argument which was trotted out to bolster up the prohibition fallacy in its worst moments. A succession of Congresses had voted in favor of prohibition. Three successive Presidents had favored it. Therefore those persons who insisted upon examining the facts and making up their own minds should have acquiesced in all meekness.

That is just what Mr. Lippmann tells the critics of the St. Lawrence Canal to do.

Now we know that successive Congresses were either wrong, or venal; that the intimidation of vote-getting organizations had more to do with their so-called "judgment" on prohibition than their honest convictions. And the intimidation of vote-getting organizations, particularly in the north-central West, has more to do with the convictions of the President and Senate on the St. Lawrence Canal than anything else.

The most-quoted experts in the case of prohibition were those experts who were paid to give a verdict in favor of prohibition, and the experts favored by Mr. Lippmann in the case of the canal are in much the same category.

For our own part we are ready to thank God that there are still persons in this country who are able to form their own judgments without reading the statistics as to the number of Congressmen for or against the proposition which they are weighing.

[From the Lowell (Mass.) Courier-Citizen, Feb. 13, 1934]

THE WATERWAY TREATY

There is not entire agreement in the reports from Washington regarding the prospects of the St. Lawrence Waterway Treaty. It has been said that the majority in favor of it has already reached within 3 votes of the necessary two thirds, but it is asserted on the other hand that the opposition can muster 43 votes, a margin of 10 beyond the 33 that would be sufficient to defeat it. It may be remarked in this connection that the two-thirds requirement for the ratification of treaties, whether or not it was wisely stipulated by the framers of the Constitution for matters of foreign policy, is probably undesirable in principle where the issue is so largely domestic as it is in this case.

If there are really only 3 votes lacking for ratification, it is thought that a little pressure from the White House would be sufficient to carry the treaty through, but there is doubt whether that pressure will be forthcoming. The President has shown little disposition to use his prestige to carry out closely contested measures. He has, wisely no doubt, thought it best not to turn the sharp edge of his ascendancy by using it on refractory material. When possible he has aimed at nonpartisan support of his most important measures, and it is even more desirable that he should not attempt to exercise domination where his own party is divided. There seems to be no doubt that Mr. Roosevelt favors the treaty, but "it isn't his baby", after all, and he may not see fit to do much on its behalf in conflict with the Democratic Senators from his own State. At present the matter lies dormant and it may not be revived this session.

It has been said that the formidable opposition to the treaty is from selfish interests. Undoubtedly this is true to a certain extent. It is perhaps selfish in the people of the States having important seaports to object to a measure that would unfavorably affect the commerce of these ports. Doubtless the opposition of power companies which fear that the power expected from this project will enter into competition with them and force a reduction of their rates is even more selfish. Nevertheless, it has not been satisfactorily shown that the benefits to the country as a whole will outweigh the loss to be suffered by these selfish interests.

A powerful argument against accepting at their face value all the estimates originally made of the revenue to be gained from this enterprise is that they were made at a period of great, and it may prove abnormal, activity in American industry. If these calculations are to be taken as the extreme maximum, it might be better to wait until it may be determined what a fair yearly average over a long period might be expected to be. Admittedly it will take a good deal of business to make the waterway a paying investment and there is little assurance that the business will be forthcoming.

Since the treaty was signed, Empire agreements giving preference to the Dominions have somewhat altered the prospects of agricultural exports by way of the waterway, and this consideration would still be valid even if general industrial activity should get back to the 1929 level. Even if the farmers would benefit by the saving in freight rates, it must be remembered that the railroads also are in a serious condition. They must get their revenues somewhere, not merely for the sake of the stock and bond holders, but because they are a public utility that should be supported, rather than handicapped by immense public expenditures to establish a rival means of transportation. Taking everything into account, therefore, it will be no misfortune if the treaty is allowed to lie dormant for a while, until a clearer idea can be obtained of what it will actually accomplish for the country in return for the large amount of money it will cost.

[From the Morgantown (W.Va.) Dominion-News, Feb. 8, 1934]

CLARIFICATION NEEDED

The Northern West Virginia Subdivisional Coal Association has added its voice to the impressive body of opposition to ratification of the St. Lawrence Treaty and development of the waterway for transportation and the production of power.

The objections to the administration's plans with respect to the St. Lawrence River have reached a volume that must command attention. The coal industry, the railroads, the power interests, and many related and separate interests have joined in urging that the proposed treaty be turned down. Practical reasons for that action have been given.

In this situation, it would be helpful were the President to restate and amplify his reasons for lending such strong support to the program. It is not sufficient to charge that sectional interests are alined against the proposals. Sectional interests are not always selfish ones. The very economic life of the sections concerned may be at stake. They cannot be blamed for seeking to protect themselves.

No one believes that Mr. Roosevelt is consciously favoring one section or one interest over another. He must have reasons which, if generally known, would reassure those who fear the proposed development. It is to be hoped that he will decide to make them known with the force and clarity which usually characterize his utterances.

[From the Chillicothe (Ohio) Gazette, Feb. 3, 1934]

SEAWAY GUESSES

Debate in the Senate on the St. Lawrence Treaty emphasizes the remarkable transformation which has come to pass in the arguments offered in support of the project. The change leads to the impression that were the treaty to be rejected and revived some years hence, the seaway would be demanded for reasons which are not now given prominence when its construction is urged. The Middle West has in more than one important particular been called upon to revise its estimate of the uses to which the seaway would be put. It might be called upon to do that again.

Time was when people of the Middle West and beyond were entranced with the idea that the mightiest of vessels would soon be arriving at the lake cities. So Hon. Charles E. Townsend, speaking at a Great Lakes-St. Lawrence Tidewater Congress in 1920, exclaimed: "I want to live to see Detroit and the other great cities of these lakes in both countries become ocean ports into and from which will enter and clear the greatest ships of the world." But it soon became evident to the leaders of the enterprise that it was bringing it into ridicule to picture ships drawing channels 27 feet deep. The soft pedal was put upon oratory on the subject of the greatest ships in the world. There was a shift in the emphasis to the fact that the majority of the vessels that ply the ocean could float in the seaway.

On this new basis, the idea that the St. Lawrence route would be of vast value in international commerce persisted. It was still the day when the chief argument in its favor was found in the estimates of the lowered cost it would bring about in getting a bushel of wheat to the Liverpool market. It was thought of overseas business that occupied the middle-western mind. That mental state continued almost to the present day, although it was somewhat altered by diminishing the relative importance of wheat.

When the treaty was signed in 1932 a writer in the Milwaukee Journal went into rhapsodies over the prospect and pictured ships from all the world helping beer to make Milwaukee famous. The Cleveland Plain Dealer hailed the treaty with the declaration that "lake cities which have dreamed for years of the day when they should become ports of call for the shipping of the world now see their visions taking substantial form." Foreign trade was still the magic formula.

That was less than 3 years ago, but now there is another change in the emphasis. Senator PITTMAN, opening the debate, told the Senate that it was estimated 80 percent of the traffic of the seaway would be domestic traffic, although he thought the lakes would get their share of the overseas commerce. What that would be is, of course, a matter of opinion. The fact remains that the emphasis has shifted. It now is placed upon the possibilities of coastwise trade rather than upon the saving in the cost of transporting wheat. If that has not entirely faded from the seaway picture, as have the *Majestic* and the *Berengaria*, it is becoming dimmer and dimmer as the high lights are thrown upon domestic commerce.

Even when it comes to coastwise trade, opinions are subject to modification. Senator PITTMAN made the statement that the seaway would never carry goods that called for speed in transportation, or high insurance rates. That bars out of consideration a vast variety of products that move in coastwise trade. The seaway is to carry the bulk goods of low cost. Its spokesmen say, in effect, that it will not be of value in getting New England's high-grade products to middle-western markets. It suggests modification of claims concerning what would be brought here by the St. Lawrence route.

Today emphasis is thrown upon this 80 percent of domestic commerce. Tomorrow the case for the seaway may rest in chief upon some other estimate. Or, to use the shorter and uglier word, some other guess. Under the circumstances, the Senate would seem to be quite justified if it decided to wait and see how the colors arranged themselves at the next turn of the kaleidoscope.—Boston Transcript.

[From the Utica (N.Y.) Observer-Dispatch, Feb. 14, 1934]

READY FOR HARVEST

The city of Montreal believes in locking the stable door before the steed is stolen. It does not propose to wait until something happens and then get into perspiration in the effort to save itself.

In other words, Montreal is wise. It has decided to give official notice to the Governments of the United States and Canada that if the proposed St. Lawrence River seaway is constructed, the city will hold those Governments responsible for damage to trunk sewers, waterworks, hydroelectric works, streets, bridges, buildings, or any property whatever. Suitable reimbursement will be required for any additional costs to taxpayers if the ship channel is cut in such a manner as to derange works and plans for the future.

The idea is that the two Governments interested would have to include in their estimates sums to provide for the damage which Montreal would claim.

The Montreal Gazette points out that the idea of making the seaway a great water-carrying route for grain from western Canada and American States has not been abandoned and "we now hear of a newly inspired idea to make the seaway treaty 'a power treaty only'." The Gazette says that this would divest the scheme of a good deal of false pretense. The old notion that some day great ocean ships would carry produce of midwestern farmers from the Lakes right across the Atlantic was a gilded dream, the paper says. To present the project in its true significance as a power project, says the Gazette, is now the "inspired idea."

Being on the ground, and knowing St. Lawrence River transportation from constant association and observation, the Montreal paper is well qualified to judge as to the situation.

[From the Tyler (Tex.) Journal, Feb. 2, 1934]

THE ST. LAWRENCE WATERWAY

The President favors ratification of the proposed treaty with Canada whereby the two Governments will spend more than a half billion dollars, the United States spending by all odds the most of it, to make the St. Lawrence River into an ocean-going canal—a canal, let it be said, that will be ice-locked for half the year, and will be able, through Government subsidies, to destroy the billions of dollars invested in railways and power industries in those great States lying south of the river.

We are opposed to the treaty for the reasons too numerous to mention here. And the chief objection is that we just don't like to see the Government in competition with the business and investments of private citizens. If many of the present tendencies and practices of our Government are not driving us along the paths of socialism faster than Russia ever traveled them, then all the lessons of past history are erroneous. The Government is already engaging in more than 600 different lines of activities hitherto followed by individuals. You can't compete with Government, however honest your business methods, however great your efficiency, or however satisfactory your products or services. The Government in business can make up its losses in business ventures by taxing the whole people—and the Government can tax you out of your business—and out of your savings.

We just can't go with Franklin D. on this proposition—not a foot—and we hope our Texas Senators join in refusing ratification of the treaty.

[From the Morgantown (W.Va.) Dominion-News, Feb. 12, 1934]

THE SPIRIT OF ENTERPRISE

If there were not so many other things to excite interest, the country would find "plenty of excitement" in the proposed St. Lawrence Waterway Treaty with Canada, now before the Senate for ratification, Walter Lippmann, distinguished commentator, believes.

Mr. Lippmann is supporting the treaty. The easiest way to assure one's self that it should be ratified, he writes, "is to look at the arguments against it." Those, presented by Senator WAGNER, of New York, make up a "lame performance" by that able and public-spirited Senator. It is so lame that Mr. Lippmann suspects that "the Senator is opposing the treaty because he thinks it is his conventional duty to 'protect' the port of New York from the supposed competition of the seaway."

Of Senator WAGNER's objection that the treaty will play havoc with the railroads, Mr. Lippmann writes:

"There are two things to be said about that. One is that the railroads have been playing havoc with themselves throughout the depression by holding up rates at an uneconomic level * * *. But the more important argument is that cheaper transportation in the long run increases the volume of commerce; the fear that it will ruin the railroads is based on the fallacy that the volume of commerce is a fixed quantity which has to be divided up. It is not fixed. Commerce increases when costs are reduced. The effect of this seaway should be to increase the total of all goods that have to be transported and, therefore, the amount of goods which railroads can transport more efficiently than ships."

Mr. Lippmann disposes of other arguments against the project and says that, apart from the intrinsic merits of the project, "there is compelling reason why this would be an appropriate and dramatic moment to decide to carry it out. For nearly 4 years this country and the rest of the world have been overwhelmed with the sense that there were no great enterprises left, that the period of construction was over, that we were sunk under the weight of useless wealth, and that all that was left to do was to accept economic defeat and make the best of it. This is the psychosis of every great depression, and a nation does not emerge from depression until it breaks away from it and begins to believe again that there is more to be done in the future than was ever done in the past."

"To ratify this treaty now is to affirm our faith in the future, to act in the spirit of enterprise, to do the same sort of thing which men did when they spanned the continent with railways, when they opened Suez and Panama, when they believed, as all vital peoples must, that the breaking-down of the barriers to the movement of commerce is in the long view a benefit to everyone."

Probably Mr. Lippmann has caught something of the vision which is in the President's mind in his support of the treaty. But, engaging as the prospect is, the fear of industrial enterprises accustomed to the existing transportation system and the distribution of market opportunities which it has worked out, a fear that Mr. Lippmann ignores, persists. It would be helpful were Mr. Roosevelt to enlarge upon his reasons for believing that the proposed St. Lawrence development promises much of good to all sections affected.

[From the New Bedford (Mass.) Mercury, Feb. 13, 1934]

United States opponents of the St. Lawrence waterway have been using as one of their weapons the enthusiastic endorsement of the seaway from a Canadian standpoint, published in the Toronto Mail and Empire. Not all the Canadian press is so enthusiastic, as is evidenced by the following from the Montreal Gazette:

"In virtually all shipments except wheat, traffic on the Great Lakes increased last year, but in wheat it decreased. And since outside the circles of seaway boosters, students of wheat and shipping declare that it will tend to decrease rather than increase, the case for this stupendous St. Lawrence project as a necessity to meet the exigencies of water transportation is held to signally fail.

"Hence, we now hear of a newly inspired idea to make the seaway treaty 'a power treaty only.' This would at once divest the scheme of a good deal of false pretense, frankly acknowledge that the generation-old notion that some day great ocean ships would carry the produce of midwestern farmers from the Lakes right across the Atlantic was a gilded dream, and it would present the project in its true significance."

[From the Oklahoma (Okla.) Oklahoman, Feb. 18, 1934]

NOT AN EMERGENCY

Senators who see fit to oppose the ratification of the St. Lawrence Waterway Treaty cannot be accused justly of opposing the recovery program of the President. It will take at least 8 years to construct the sea-going canal, even if the treaty shall be ratified, and the depression will end long before the 8-year period is ended, if the recovery program succeeds, as the President so fervently hopes. Instead of being an emergency measure designed to help cure the depression, the waterway project is merely a great construction project that is presented in the midst of emergencies.

Since the project is in no sense a part of the national recovery program, it can be considered on its merits without regard to other measures designed to bring depression to an end. And since it is no part of the recovery program, Senators who dislike the treaty can oppose it without being guilty of trying to obstruct relief policies and without being guilty of trying to embarrass the administration. There are measures so essential to economic recovery that a Senator is justified in supporting them even though his conscience may disapprove them, but the St. Lawrence Waterway Treaty is not one of those measures.

The crisis through which the country is passing does not call for the authorization of an improvement project that cannot be completed for at least 8 years. On the contrary the existent crisis presents a rather forcible argument in favor of the treaty's rejection. For the country has sore need and immediate need of the tens of millions of dollars that the Treasury would have to pay for this waterway completion. When the country lacks sufficient funds to supply work for American laborers, just why should it spend immense sums to provide employment for Canadian laborers? As is well known, the pending treaty provides that the major portion of the construction work shall be done by Canadian labor and that the major portion of the material used shall be Canadian material.

While it is true that the President in fighting for the inauguration of this great project is merely carrying on a fight he began as Governor of New York, there is a great difference between New York and the United States and a difference equally great between the duties of a New York Governor and the duties of an American President. Nearly the whole of New York would benefit from the completion of the canal, but the greater portion of the United States would not be benefitted, and certain sections would be materially injured. While the President has the right to urge the ratification of the pending treaty, Senators from sections that might be injured by the project's completion have the right to oppose the treaty and are duty-bound to oppose it.

In a way, the treaty involves an abbreviation of American sovereignty. No longer will the United States enjoy unlimited authority over the wide expanse of Lake Michigan; and that inland sea, which is now the possession of the United States, will become

in some part the possession of Canada. For the treaty gives the Canadian Government authority to say how much water shall be diverted from the lake. If the lake were a stretch of land instead of a stretch of water, it is doubtful if a single Senator would vote for such an abbreviation of American sovereignty.

[From the Providence (R.I.) Journal, Feb. 13, 1934]

THE ST. LAWRENCE DELAY

Satisfaction is to be found in realizing that the Senate is not hurrying consideration of the St. Lawrence Waterway Treaty for which President Roosevelt has asked approval. Senator PITTMAN explains that the delay in voting on the matter is caused by the absence of about half a dozen Senators who are temporarily engaged elsewhere. Spokesmen for the substantial group opposed to ratification of the treaty say, however, that the real reason for the delay of the proadministration St. Lawrence bloc is that they have not yet been able to round up sufficient votes to assure adoption of the resolution.

However that may be, the fact stands out that in the last few weeks since the President's recommendation was sent to the Senate there has been conducted a more intensive examination of the whole project than has been made at any time since the data essential for writing the international pact were gathered. This serious study of the past few weeks has revealed that the fundamental situation, so far as the United States is concerned, has markedly changed.

When the original study was made, for example, it was assumed that the agricultural Northwest and Middle West would make substantial use of the improved waterway to transport grain to Europe and elsewhere. But the agricultural emphasis today is on restriction of grain production in this country. Then we were in the new era of industrial and commercial prosperity which suggested, so the apostles of that era insisted, that New England and other eastern seaports and the railroads would be surfeited with business regardless of how much the St. Lawrence improvement might divert from both ports and rail carriers. Four years' experience with depression has altered that attitude.

Furthermore, in spite of the increasing tendency of the Federal Government to plunge heavily into the power field, there are those who still firmly believe that restrictions should be placed upon Government participation in this industry. Such believers are not yet convinced that Government ownership and control of basic industries is sound economic procedure. Especially do they feel that, with two mammoth Federal power projects already in process of building in Boulder Dam and Muscle Shoals, it might be advisable to see how they actually operate before constructing any more Government laboratories of this character.

[From the Lewiston (Idaho) Tribune, Feb. 9, 1934]

THE PRESIDENT FACES HIS FIRST CONGRESSIONAL DEFEAT

Mr. Paul Mallon, whose judgment is not infallible albeit he has a remarkable record for accurate political and economic prognostication, ventures the forecast that the St. Lawrence Waterway Treaty between the United States and Canada is doomed to defeat when it comes before the Senate for ratification, which would also mean President Roosevelt's first major legislative set-back. The President might save the treaty if he came out with a strong demand for favorable action, but Mr. Mallon sees no indication that he will resort to such whip-cracking tactics.

The reasons for this prospective situation are not as ominous as they might appear at first glance, nor are they difficult to find.

The prime purpose of the seaway is to permit ocean-going vessels to ascend the St. Lawrence River into the Great Lakes, opening a 2,437-mile-long channel for marine commerce into midcontinental America. All but 120 miles of this course already has been improved with a 21-foot channel, permitting light-draft traffic which has been growing in volume each year. The principal work remaining to be done is building 2 giant dams and 3 locks in the international rapids section of the river, which incidentally would generate 2,200,000 horsepower of hydroelectric energy, to be divided equally between the 2 countries. The entire channel from the mouth of the river to Duluth is to be dredged to a minimum depth of 27 feet.

The waterway would permit ocean ships to pass without transfer of cargo to the head of the Lakes, thus avoiding the present cost of unloading from lake vessels and reloading on ocean vessels. Proponents of the project declare the economy through reduction of railway mileage on export trade would give cheaper transportation through a broad stretch of territory extending southwest from westen New York through western Pennsylvania, the South Atlantic States, westward through Tennessee, Arkansas, Oklahoma, and Colorado, northward through Utah and Idaho to the Canadian boundary. They deny this loss in traffic would prove disastrous to the eastern railroads, asserting the project would be an impetus to industry on the Great Lakes, which would create new high-class traffic to compensate for the low-class traffic the railways might lose.

There is no unanimous enthusiasm in Congress for this project, however. The opposition is wide-spread and divided in political and sectional groups. Some of it is purely selfish and obstructive in nature; some of it is sincere and reasonable.

The railroads are against the seaway as a matter of principle. The Atlantic seaboard States oppose it because they fear the diversion of their maritime commerce. New York State opposes it because it prefers the so-called "all-American canal route" through that State and down the Hudson to New York.

The Mississippi Valley and the Chicago region of the Great Lakes are opposed to the treaty on several grounds. There is an objection to the surrender of complete jurisdiction over the waters of Lake Michigan, as would result with its "internationalization" by the seaway treaty. The most reasonable protest is over the disputed point as to whether the project would endanger the mid-West inland-waterway system, connecting the Great Lakes with the Gulf of Mexico. This group maintains that the treaty as it now stands will place such restrictions on the diversion of water from Lake Michigan into the Illinois waterway that there would not be sufficient depth to permit operation of barges over the mid-West system throughout the year. It is declared that inland commerce should not be jeopardized for the benefit of foreign trade, especially at a time when we are embarking on a policy of national economy.

The President, in laying the treaty before the Senate, argued that local interests should yield their opposition to the waterway in deference to the general welfare of the vast regions it is intended to promote, and expressed his belief that the benefits will be general and no permanent sectional injuries will be done. In view of the wide-spread nature of the opposition, however, and the fact that it requires a two-thirds vote of the Senate to ratify the treaty, its passage is doubtful. While Congress is in complete accord with the President on his recovery program, this treaty is only in a small sense a part of that policy, and the decision will be based upon different motives. The negotiations for the waterway were inaugurated in 1919, and the treaty itself was signed by President Hoover and first presented by him for Senate ratification. President Roosevelt also is a long-time advocate of the project since the days of his New York governorship, and he would like to see it started at once as a contribution to the national employment program.

If the Senate rejects the treaty, as seems probable, it will mean another delay, but not necessarily the end of the project. The most formidable objection is to the limitations it provides on diversion of water from Lake Michigan into our own inland waterways system, and perhaps a defeat for the treaty now will place the President in a better position to ask Canada to negotiate another and more acceptable pact in regard to these provisions.

[From the Shreveport (La.) Journal, Jan. 24, 1934]

THE ST. LAWRENCE WATERWAY

The United States Senate is again giving consideration to the St. Lawrence Waterway Treaty, submitted by President Hoover shortly before his retirement, attention to which was called by President Roosevelt since the regular session of the Seventy-third Congress was convened. Vigorous protests continue, with opponents of the waterway project offering numerous and, to our mind, valid objections.

Under the terms of the treaty agreement reached between representatives of the United States and Canada, the St. Lawrence is to be made navigable from the ocean to Duluth, with an enormous power plant to be constructed at the Beauharnois Rapids. The whole investment (these figures were made within the past 2 years) would be in the neighborhood of $550,000,000. Engineers say, however, the present cost would be almost twice that sum.

There are many reasons why the treaty should be rejected by the Senate, the first being that there is no actual necessity for the waterway. The second argument against the plan is the cost, of which this country is expected to bear by far the greater part. In the third place, such a waterway would further cripple the railroads, which the Government is trying its level best to protect. And finally, it would take business away from the Lakes-to-the-Gulf route, in which the entire Mississippi Valley has a direct interest.

No difficulty need be experienced in finding ways to spend our money just now, and with the annual deficit increasing at a terrific rate, as the national debt climbs to hitherto unknown heights, it would be extremely unwise for the United States Government to engage in any enterprise about which there is such wide difference of opinion. The St. Lawrence waterway project can wait until times are flush again and we have money to "throw at the birds."

The PRESIDING OFFICER. The Chair recognizes the Senator from Missouri [Mr. CLARK] to make an announcement.

Mr. CLARK. Mr. President, in view of the fact that today is the deadline on the presentation of reservations, I ask unanimous consent to address the Senate for not to exceed 2 minutes on the subject of the reservations which I have heretofore submitted.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Missouri is recognized for 2 minutes.

Mr. CLARK. Mr. President, I have heretofore presented and have on the table four reservations which I thought were designed to clarify the treaty and in a constructive way possibly afford a basis for an agreement on which the treaty might be ratified. These reservations have not met with favor at the hands of the proponents of the treaty or at the hands of the administration. Therefore, I believe

that presentation and consideration of the reservations simply tend to muddle the situation, rather than clarify it.

Consequently, I give notice now that I do not intend to call up and offer the reservations. I make the announcement at this time simply in order that some other Senators may not be lulled into security on the theory that I intend to present the reservations, and because they may desire to present reservations on their own part.

The PRESIDING OFFICER. The Senator from Missouri announces the withdrawal of his four reservations.

Mr. LEWIS. Mr. President, one of the reservations presented by the able Senator from Missouri [Mr. CLARK] has to do with the status of Lake Michigan. I had tendered a reservation which recited that this body of water is an American lake and in nowise international water, and desired the Senate to vote upon it.

I agree with the Senator from Missouri that consideration of the reservations would consume considerable time. All the questions which they involve are included in the treaty itself. The eminent Senator from Michigan [Mr. VANDENBERG], who now presides over this body, and myself have from time to time discussed the varying phases. I, too, wish to announce that, as the subject matter has been discussed and fully dealt with in general debate on the treaty, I wish to withdraw my proposed reservation also in order that it may not burden the Senate.

The PRESIDING OFFICER. The Senator from Illinois withdraws his tendered reservation. The question is on the pending reservation proposed by the committee.

Mr. PITTMAN. Mr. President, I thought we had disposed of all uncertainties with regard to the report of the Board of Engineers which was authorized by Congress under act of July 3, 1930, to determine this question. As I said the other day, General Brown made a very good guess at it when he guessed 4,000 or 5,000 cubic feet. At the same time he testified before the committee that which the Senator from Louisiana [Mr. LONG] just read; General Brown made this statement:

> It is estimated that by 1938 the domestic pumpage will be approximately 1,900 cubic feet per second, in addition to the amount of 1,500 feet provided by the decree, giving a total permissible flow through the drainage canal and waterway of 3,400 cubic feet per second.

That, by the way, is also the testimony of General Markham in the letter which I have just read, dated January of this year, based upon the report of the board that was based on the congressional act of 1930.

Just another point. That only lacks 1,600 feet of being the 5,000 feet he talks about, but that is not all. At that same hearing General Brown had this to say:

> It has been contended that the flow at Lakeport as limited by the treaty will destroy the usefulness of Illinois waterways. This contention is without basis of fact, as will be seen by a study of the table set forth below.

Mr. President, on last Friday and Saturday I read the letter of General Markham addressed to me in January on this subject. I have placed in the RECORD the report of the board of engineers, which was submitted in December 1933 in response to the act of Congress of 1930 requiring a survey. General Markham has stated emphatically that the Department never looked upon the Great Lakes or Lake Michigan as a water supply in connection with the Mississippi River project. The language is plain and distinct that provision is made not only for the 9-foot channel that is now proposed for the Missouri River, but, he said, for any future practical development.

I know there is a doubt in the minds of some Senators as to whether that is a fact. I heard the distinguished Senator from Missouri [Mr. CLARK] state this morning that it was not known how great a canalization of the Mississippi River might be necessary in the future. Nevertheless, this great board of engineers have found as a fact that there is ample water within the Mississippi River system and watershed without taking water out of another watershed.

I thought that proposition was quite clear, Mr. President. I thought it was absolutely settled. I do not think there is any evidence today that there is any danger whatever to the Mississippi River project or to any of the tributaries of the Mississippi. The evidence is conclusive that there is not such danger, and no evidence to the contrary has been brought to us, so we take that as clear.

The opponents of the treaty talk about taking unlimited quantities of water out of Lake Michigan. Whether Canada were in existence or not, that act would be questioned by the States of Wisconsin, Ohio, Indiana, and New York, which are on the Great Lakes. The right of diversion through the Chicago artificial canal into the Illinois River was questioned by those States, and not by Canada. Those States said they had a right of navigation in the Great Lakes; that this water was within their natural watershed; that this water could not be taken out of its natural watershed into the Mississippi watershed to their damage; and the Supreme Court of the United States, while not deciding the amount of water necessary for navigation, did decide the question as to whether or not the States of Wisconsin, Ohio, Indiana, and New York had vested rights in the waters of the Great Lakes.

Mr. CLARK. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. LONERGAN in the chair). Does the Senator from Nevada yield to the Senator from Missouri?

Mr. PITTMAN. I do.

Mr. CLARK. I do not want to take the Senator's time, because I know it is limited, but I am certain the Senator will agree with me that, while the Supreme Court decision to which he refers held that the States of Wisconsin and Michigan and the other lake States had vested rights as against the State of Illinois and the Chicago Sanitary District, it did not hold that those rights were any infringement of the power of the United States Government in its Federal capacity to take water from Lake Michigan for a great national waterway project.

Mr. PITTMAN. I do not think we are far apart; but I do say unquestionably that the decision was for the protection of the riparian and navigation rights and rights of sovereignty of those States in the waters of the Great Lakes.

Mr. CLARK. If the Senator will yield just a moment further——

Mr. PITTMAN. I yield.

Mr. CLARK. I am certain the Senator will also agree with me that the testimony before his committee of the Army engineers, and of every other engineer who appeared before the committee, shows conclusively that so far as the riparian rights or the navigation rights of the lake States are concerned they may be fully taken care of by compensatory works which the United States now has in progress at an expense of many millions of dollars.

Mr. PITTMAN. Compensatory works, of course, are being required. Nevertheless, when the flow of water through that canal was limited to 1,500 second-feet, it was done in obedience to the injunction of Congress, which by its act told the Board of Engineers to determine the minimum amount of flow that would be necessary for the navigation project in the Illinois River. That was what Congress commanded them to do; and they found that 1,500 second-feet would be the minimum flow necessary for the navigation of the Illinois River under the project they provided.

That is plain; but when the Senator from Louisiana speaks of bringing sectionalism into this matter, I desire to remind him that in the very first speech I made here I stated that that was one of the unfortunate things brought to light in the discussion of this treaty. Different sections of the United States, through selfishness, are fighting this treaty.

The Mississippi Valley Senators are fighting the treaty because, in spite of the evidence, they are afraid there may possibly be some development somewhere else that will take a little freight away from their section of the country or will possibly prevent them from having a maximum development. The basis of their opposition is fear; it is selfishness; it is greed. The great ports on the Atlantic are undoubtedly actuated by greed and selfishness that has blinded them to the necessary development of the country. Because possibly 4 percent of the freight in 8 or 9 years from now

will be diverted by way of this seaway, instead of going by the railroads at the high cost that would involve, they are against it. The fight is a sectional one straight through; and, as I warned those in the different sections of this country, if they cannot look upon the development of inland waterways and the development of harbors in this country from a national standpoint, they will be constantly engaged in fighting each other, because there is no doubt whatever that the misguided ownership of the railroads of this country today is against any internal waterway development.

Mr. President, I do not desire to proceed with my main speech on the treaty tonight. I desire to make that tomorrow. I ask, however, that the reservation reported by the committee be submitted for a vote.

The PRESIDING OFFICER. The question is on agreeing to the reservation reported by the committee. [Putting the question.] The ayes have it, and the reservation is agreed to.

The reservation was, at the end of the resolution of ratification, following "July 18, 1932", to insert:

this advice and consent being subject to and conditioned on the agreements, provisions, and interpretations set forth in an exchange of notes between the United States and Canada, dated January 13, 1933, respecting private diversions of water on the St. Lawrence River.

So as to make the resolution of ratification read:

Resolved (two thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Great Lakes-St. Lawrence Deep Waterway Treaty between the United States and Canada, signed at Washington, July 18, 1932, this advice and consent being subject to and conditioned on the agreements, provisions, and interpretations set forth in an exchange of notes between the United States and Canada, dated January 13, 1933, respecting private diversions of water on the St. Lawrence River.

Mr. McNARY. Mr. President, is it the intention of the chairman of the committee to offer any further reservations this evening?

Mr. PITTMAN. It is not the intention of the chairman of the committee to do so.

COMPENSATION OF WAR VETERANS

Mr. SCHALL. Mr. President, I ask leave to insert in the RECORD, and have referred to the appropriate committee, a letter just sent me by William H. Gaston, commander of a post of the Spanish War veterans in St. Paul, Minn.

There being no objection, the letter was referred to the Committee on Appropriations and ordered to be printed in the RECORD, as follows:

ST. PAUL, MINN., *March 8, 1934.*

The EDITOR PIONEER PRESS,
St. Paul, Minn.

DEAR SIR: The Senate Plays with Fire.

This editorial appeared in the Pioneer Press on the 1st instant. I quote from this editorial: "As a protection to the national credit, the Economy Act was designated to insure a balanced Budget of current expenses, which is one of the foundation elements of the whole recovery plan. With credit impaired in connection with the regular Budget, there would be less solid footing for the emergency measures to promote economic rehabilitation."

On this subject we beg to differ. Is it really possible that the editor thinks that in order to promote a program of rehabilitation it is necessary to reduce the purchasing power of the scantily paid Government employees and the small pittances that were paid to the widows and orphans of the Nation's defenders? Can he really feel that pensions and hospitalization should be taken from the veterans, from the war-service men of this country?

Pass 45 and the great industries refuse to employ. Seventeen years past this age limit, and this law to save the credit of the Government allows the sum of $6 per month; that is, for a veteran of 62 years of age. That is, the veteran has 17 years to starve, from the time he is out of employment at 45 until he is 62 years, when he can draw a pension of $6 per month. This is saving the credit of the Government with a vengeance!

No; these Senators are not playing with fire. But rather they are endeavoring to stamp out the flames of distrust and faltering patriotism, ignited by the most cruel cut of ingratitude that can be accorded to the defenders of a nation. These Senators are trying to preserve the respect for our Nation's flag. They are trying to put out a great conflagration that threatens to sweep our dear country with starvation, death, and civil war.

Every war has its heroes and hoarders. The heroes are those who undergo all the hardships of war. They are the ones who suffer, bleed, and die. They are the ones whose flesh are torn with shot and shells, whose maimed bodies endure a living death. The hoarders are those who build great fortunes on the sufferings of humanity, accumulate wealth from the slaughter of men, and the starving of women and babes. The more dreadful and lasting the conflict the more bountiful the reward of the hoarders. At the insistence and instigation of these money-mad vultures, our country now stands on the verge of chaos and ruin. Through their subtle mechanisms they have sucked the Nation's blood and now we stand trembling on the verge of complete collapse.

These men who robbed the country of billions in both peace and war now cry economy. What can this heartless taking away the small pittances from these defenseless defenders of our country mean to the unemployed millions? The pensions of the veterans were used to purchase the necessaries of life for themselves and their dependents. But these men who advocate this kind of economy are the men who fail to pay their income taxes on their vast incomes and build yachts costing $3,500,000; these men who use every device to grasp and hold the Nation's wealth now weep crocodile tears offer the Nation's credit. This smoke screen of economy is used to blind the public. This masterpiece of heartless hypocrisy was put over even by falsifying the CONGRESSIONAL RECORD. How many editorials have condemned this bold piece of criminality? Representative MCFADDEN, of Pennsylvania, offered legislation that would have raised for the Nation more than $2,000,000,000. This would not have constituted depriving veterans and Government employees. Senator LONG, of Louisiana, offers legislation that would raise more than $15,000,000,000 for the United States Treasury, but this is not advocated by the ultra-rich; that is, big business. And why? If adopted, this would force some of the billions from their hiding. On the bodies of our dead heroes these fortunes were built. The toiling millions who had wheatless days, and meatless days, who went without sugar, the purchasers of Victory bonds, and Liberty bonds that made it possible for this country to win the war that made the world safe for democracy, on these men the builders of these great fortunes were resting. But the men who toiled, the men, women, and children who suffered, they hold the sack.

Will our Senators and Representatives allow themselves to be made the vassals of the ultra-rich? Will they not hear the cries of the suffering millions? Will they be blinded by the crocodile tears of those who compose the Economy League?

The veterans and the Government employees have not the columns of the big daily papers, the big broadcasting stations, the films, and the stage at their command. But they will proclaim their wrongs from the house tops; they will make them sound to high heaven.

The preservers of this country are the men who endured the lice, the rats, and stink, the disease and poisonous foods and the gases in the trenches. Upon the lives of these men the security of the Nation rests. Upon the lifeless forms of those who died on foreign fields these fortunes were built. These owners of mansions, these hoarders of the Nation's wealth know full well that the benefits received by the veterans will not impair the Nation's credit. But fraudulent contracts and big subsidies given to big business and false tax returns are the means of depleting the Nation's Treasury. We ask the question, Should the Nation protect its protectors and defend its defenders? Should the burden of caring for the veterans that are old, decrepit, and disabled be placed on the community? Should the veterans be driven to seek aid from charitable institutions? The Senators are endeavoring to answer these questions. The veterans expect at least a fraction of the consideration extended by the Government to banks, railroads, and insurance companies. Hundreds of millions of dollars can be poured out by our Nation to relieve the distress of these big institutions.

The veterans cannot pour out millions to conduct a campaign to tell the Nation their plight. Think of the ocean of gold that has been poured out to rob the veterans of the small pensions! Think of the exaggerated promises to veterans going to war. The sufferings and suicides of veterans, and the sufferings of their widows and orphans are a disgrace to the Nation. A disgrace to civilization. Imagine the income of one man amounting to more than $6,000,000 a year. Imagine a veteran 62 years of age receiving $6 per month! One man receiving more in 1 minute than the Government allows a veteran of 62 years of age in 1 month to live on! We tell you such conditions are ridiculous! It is outrageous! These Senators are endeavoring to silence the distant rumblings of discontent through this act of justice and mercy. They are trying to extinguish the flames that threaten to consume the Nation.

I am yours truly,

WM. H. GASTON.

Mr. SCHALL. Mr. President, the American veteran went to war to fight to make the world safe for democracy after the country had voted in 1916 against going into the World War. He won the war, and came home to find he was not going to be treated as he was promised. While he was away fighting for his country he found ordinary help had received as high as $15 and $20 a day, while he got only a dollar a day or so.

The munition makers, the railroads, the contractors, and the profiteers stayed home, waved the flag, and built an army of war profiteers—25,000 of them. They came in and were paid promptly. The veteran had lost his job. He asked for some compensation to reimburse him in a small

way for his losses while at the front. He got a promise to pay in 1945.

The Republicans paid him compensation for his injuries, and were paying at the rate of $800,000,000 a year when the country decided to return to office in 1932 the same wrecking crew that got us into the war in 1917. They promptly set up a plea that the country had to balance its Budget and had to economize at the expense of the veteran.

After balancing the Budget at his expense they set about to appropriate money by the billions. First, $400,000,000, and then $950,000,000 for relief, to pay men for brushing leaves from one side of the road to the other; but, of course, the Budget is balanced. The country takes in $3 for every $10 it spends; but the Budget is balanced, and the Economy League says we cannot afford to increase allowances for the veterans, for that would unbalance the Budget, so they say!

President Hoover had the good sense to pay one half of the so-called "bonus" in 1931, and if he had paid the other half the country would have had just that much more purchasing power distributed, and the country would have had just that much more of its debts paid, instead of incurring money for all sorts of unproductive and useless work since to provide relief while the veteran remains unpaid.

For good measure the Democrats included Civil War veterans, their widows, the Spanish War and their widows, and every veteran to make sure no one would escape. Their age and their service mean nothing. Even the Spanish War veterans have to show service connection—now 35 years after the service—when most of their evidence is lost, and the Government has none of it in their files.

In this way the Democrats felt certain there was no way these veterans could get back on the rolls. They had to balance the Budget, you know, and it might unbalance it if some disabled veteran got his pension back. So now, when we are trying to rectify an injustice done to them, we hear the same cry again: "Don't do that. You will unbalance the Budget."

But it could not be worse. They are now only taking in $3 for every $10 they spend. So the veteran should wait again until 1945, or some other time, until he is dead, so that that magic Budget can be balanced.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate, as in Committee of the Whole and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed July 18, 1932.

RECESS

Mr. ROBINSON of Arkansas. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. The question is on the motion of the Senator from Arkansas.

The motion was agreed to; and (at 5 o'clock and 17 minutes p.m.) the Senate, in executive session, took a recess until tomorrow, Wednesday, March 14, 1934, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 13 (legislative day of Feb. 28), 1934

APPOINTMENTS IN THE REGULAR ARMY

TO BE MAJOR GENERALS

Brig. Gen. Lucius Roy Holbrook, United States Army, from December 28, 1933, vice Maj. Gen. Edward L. King, died December 27, 1933.

Brig. Gen. Frank Sherwood Cocheu, United States Army, from March 1, 1934, vice Maj. Gen. Ewing E. Booth, retired February 28, 1934.

TO BE BRIGADIER GENERALS

Maj. Gen. Guy Vernor Henry, Chief of Cavalry (colonel, Cavalry), vice Brig. Gen. Lucius R. Holbrook, nominated for appointment as major general.

Col. John Lesesne DeWitt, Infantry, vice Brig. Gen. Frank S. Cocheu, nominated for appointment as major general.

Maj. Gen. John Wiley Gulick, Chief of Coast Artillery (colonel, Coast Artillery Corps), from April 1, 1934, vice Brig. Gen. John F. Madden, to be retired from active service March 31, 1934.

Col. Harry Edward Knight, Infantry, from May 1, 1934, vice Brig. Gen. Walter C. Short, to be retired from active service April 30, 1934.

Col. Charles Michael Bundel, Field Artillery, from September 1, 1934, vice Brig. Gen. Howard L. Laubach, to be retired from active service August 31, 1934.

Col. Charles Douglas Herron, Field Artillery, from October 1, 1934, vice Brig. Gen. James H. Reeves, to be retired from active service September 30, 1934.

Col. Percy Poe Bishop, Coast Artillery Corps, from December 1, 1934, vice Brig. Gen. William M. Cruikshank, to be retired from active service November 30, 1934.

TO BE QUARTERMASTER GENERAL, WITH THE RANK OF MAJOR GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM FEBRUARY 3, 1934

Col. Louis Hermann Bash, Quartermaster Corps, vice Maj. Gen. John L. DeWitt, Quartermaster General, whose term of office expired February 2, 1934.

TO BE ASSISTANT TO THE QUARTERMASTER GENERAL, WITH THE RANK OF BRIGADIER GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM MARCH 1, 1934

Col. William Richie Gibson, Quartermaster Corps, from March 1, 1934, vice Brig. Gen. Henry C. Whitehead, Assistant to the Quartermaster General, retired from active service February 28, 1934.

TO BE CHIEF OF FIELD ARTILLERY, WITH THE RANK OF MAJOR GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM MARCH 10, 1934

Col. Upton Birnie, Jr., Field Artillery, vice Maj. Gen. Harry G. Bishop, Chief of Field Artillery, whose term of office expired March 9, 1934.

TO BE CHIEF OF COAST ARTILLERY, WITH THE RANK OF MAJOR GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM MARCH 22, 1934

Col. William Frederick Hase, Coast Artillery Corps, vice Maj. Gen. John W. Gulick, Chief of Coast Artillery, whose term of office expires March 21, 1934.

TO BE CHIEF OF CAVALRY, WITH THE RANK OF MAJOR GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM MARCH 22, 1934

Col. Leon Benjamin Kromer, Cavalry, vice Maj. Gen. Guy V. Henry, Chief of Cavalry, whose term of office expires March 21, 1934.

TO BE CHIEF OF ORDNANCE, WITH THE RANK OF MAJOR GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM JUNE 3, 1934

Brig. Gen. William Harvey Tschappat, Assistant to the Chief of Ordnance, vice Maj. Gen. Samuel Hof, Chief of Ordnance, whose term of office expires June 2, 1934.

TO BE ASSISTANTS TO THE CHIEF OF ORDNANCE, WITH THE RANK OF BRIGADIER GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE

Col. Herman Walter Schull, Ordnance Department, vice Brig. Gen. William H. Tschappat, Assistant to the Chief of Ordnance, nominated for appointment as Chief of Ordnance.

Col. Edward Marsh Shinkle, Ordnance Department, from September 1, 1934, vice Brig. Gen. Edwin D. Bricker, Assistant to the Chief of Ordnance, whose term of office expires August 31, 1934.

TO BE ASSISTANTS TO THE CHIEF OF THE AIR CORPS, WITH THE RANK OF BRIGADIER GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE

Lt. Col. Jacob Earl Fickel, Air Corps, from July 1, 1934, vice Brig. Gen. Charles H. Danforth, Assistant to the Chief of the Air Corps, whose term of office expires June 30, 1934.

Lt. Col. James Eugene Chaney, Air Corps, from July 17, 1934, vice Brig. Gen. Henry C. Pratt, Assistant to the Chief of the Air Corps, whose term of office expires July 16, 1934.

TO BE REAPPOINTED ASSISTANT TO THE CHIEF OF ENGINEERS, WITH THE RANK OF BRIGADIER GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM JUNE 27, 1930

Brig. Gen. George Bigelow Pillsbury, Assistant to the Chief of Engineers, whose term of office expires June 26, 1934.

PROMOTIONS IN THE NAVY

Rear Admiral Claude C. Bloch to be Judge Advocate General of the Navy, with the rank of rear admiral, from the 1st day of June 1934, for a term of 4 years.

The following-named lieutenant commanders to be commanders in the Navy from the 1st day of March 1934:

Elroy L. Vanderkloot.

Wilbur J. Ruble.

John R. Palmer.

Lt. Stephen K. Hall to be a lieutenant commander in the Navy from the 30th day of June 1933.

Lt. (Jr. Gr.) William V. Deutermann to be a lieutenant in the Navy from the 1st day of November 1933.

Lt. (Jr. Gr.) George M. Brydon, Jr., to be a lieutenant in the Navy from the 1st day of January 1934.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 5th day of June 1933:

Francis E. Bardwell.

Raymond N. Sharp.

HOUSE OF REPRESENTATIVES

TUESDAY, MARCH 13, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

O Lord, our Lord, as destinies hang on our labors, bless us with the spirit that leads us to the shadow of the Most High. With Thy guidance we would put on a cheerful courage. Herein is the victory that overcomes the world, the grace that resists every evil influence and turns to advantage every vicissitude of life. Look into all hearts and bring peace and give succor to everyone according to his need. O Spirit of God, create an illuminating inspiration upon all minds and keep us turned toward the invisible realm of our Heavenly Father's kingdom. Do Thou fill all minds with glowing conceptions of Thy truth and wisdom. Be unto us always a God of patience, of abundance, of forbearance, of forgiveness, and a God of love. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3025. An act to amend section 12B of the Federal Reserve Act so as to extend for 1 year the temporary plan for deposit insurance, and for other purposes.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on the following date the President approved and signed a bill and joint resolution of the House of the following titles:

On March 10, 1934:

H.R. 93. An act to authorize the Secretary of War to sell to the Plattsburgh National Bank & Trust Co. a tract of land comprising part of the Plattsburgh Barracks Military Reservation, N.Y.; and

H.J.Res. 290. Joint resolution to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934.

LEGISLATIVE APPROPRIATION BILL, 1935

Mr. LUDLOW, from the Committee on Appropriations, reported the bill (H.R. 8617) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1935, and for other purposes (Rept. No. 962), which was read a first and second time and, with the accompanying papers, referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. SINCLAIR reserved all points of order.

INDEPENDENT OFFICES APPROPRIATION BILL, 1935

Mr. WOODRUM, from the Committee on Appropriations, reported the bill H.R. 6663, making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1935, and for other purposes, with Senate amendments, which, together with the accompanying papers, was referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. WOODRUM. Mr. Speaker, this report is very short, and I ask unanimous consent that the report may be read for the information of the House.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The Clerk read as follows:

Report No. 963

The committee to whom was referred the bill H.R. 6663, making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1935, and for other purposes, together with the amendments of the Senate thereto, reports the bill and the Senate amendments to the House with the recommendation that all of such Senate amendments be disagreed to and that the conference requested by the Senate be granted.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes preparatory to submitting a unanimous-consent request in reference to this bill.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. WOODRUM. Mr. Speaker, the independent offices appropriation bill, as we all know, is having some considerable difficulties at the present moment. These difficulties, legislatively speaking, have arisen because of a number of amendments inserted in this bill in the other legislative branch, amendments not only adding something over $300,000,000 to the amount already appropriated, but carrying with them sweeping fundamental changes in a number of respects.

The bill has come back to the House and has been sent to the Appropriations Committee. The Appropriations Committee has brought it back to the House asking that it go to conference. Most highly controversial legislative proposals are finally adjusted, not by what I think ought to be done, or what you think ought to be done, or what the other legislative body thinks ought to be done, or even what the Chief Executive thinks ought to be done, but by what all of us think after we have gotten together around the table in a spirit of conciliation and tried to adjust our differences.

The Appropriations Committee very earnestly hope that the House will permit its report to be adopted and that this highly controversial bill will go to conference in order that your representatives may have an honest, fair opportunity to compose the differences between the two bodies and the Chief Executive. There were 23 amendments added to the bill in the Senate. Only two of them I believe are of such controversial nature that we need to mention them for the purpose of what I am saying to you. One is amendment no. 14 dealing with restoration of pay of Federal employees, and the other is amendment no. 22, which comprises some 13 separate sections, dealing with increases for Spanish-American War veterans, World War veterans, and other matters with reference to veterans.

Referring to amendment no. 14, dealing with restoration of salaries, I think there will be no serious difficulty either

in the House or in committee or in conference in arriving at some solution of this part of the problem; but when we come to amendment no. 22, carrying increases for Spanish War veterans and World War veterans, of course, we get into most serious difficulties. May I say that I believe it to be the wish of an overwhelming majority of this House that there should be some proper, equitable, and just readjustment of the benefits for Spanish War veterans. I share in that opinion. I believe it to be the wish of a vast majority of this House that there should be some further liberalization with reference to World War veterans, especially the presumptive cases and more especially the tubercular and the neuropsychiatric or mental cases. I also share in that desire.

If we are sincerely and honestly desirous of obtaining some concessions in these respects, then in my deliberate judgment there is only one earthly way this can be accomplished, and that is to give us an opportunity to compose these differences in conference. If we will be content to go back to our constituents, those of us who have promised to try to do something for the Spanish-American War veterans and the World War veterans and the employees, and present them with a copy of a very eloquent speech which we have made, all well and good; but if we want to carry back more tangible results, even if they are not as complete and as sweeping as we should like to have them, then we must approach the matter in a spirit of conciliation and with a willingness to make reasonable concessions. I think there is every reason to believe that the President of the United States is willing to meet the legislative branch of the Government in a spirit of conciliation and that he is willing to compose the differences, provided he is not called upon to sacrifice fundamental principles or throw overboard his economy program.

I direct your attention to the fact that since the passage of the Economy Act somewhat over $150,000,000 of benefits taken from veterans of both the Spanish-American War and the World War have been reinstated and given back to them by a revision and liberalization of Executive orders.

[Here the gavel fell.]

Mr. SNELL and Mr. RICH asked unanimous consent that Mr. WOODRUM's time be extended 5 additional minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. WOODRUM. I am not so optimistic as to hope that the conferees of this House can bring back a bill that will suit everybody or, perhaps, that in all respects will suit anybody, but I am optimistic enough to hope that if this House is willing to allow its conferees to go to the representatives of the other body in a fair spirit and sit down and try to work out these problems, we may be able to bring you back a bill that will meet the occasion and get the legislation passed.

So, Mr. Speaker, with this hope and for this purpose, and in order that you may give us a chance to work out these problems, remembering, of course, that whatever the conferees may do, you will have, finally, an opportunity to pass upon it by turning it down or accepting it, I want to prefer, sir, a unanimous-consent request.

Mr. SNELL. Will the gentleman yield for a question before submitting his unanimous-consent request?

Mr. WOODRUM. Yes; certainly.

Mr. SNELL. I want to see if I am correct in my understanding of the situation. As I understand the situation that is before us at the present time, there is no real difference in principle between the amendments offered by the Senator from South Carolina [Mr. BYRNES] and the position taken by the House. The only difference that remains at the present time is the difference in amount between what Senator BYRNES agreed to accept and what was carried in the Steiwer and McCarran amendments.

Mr. WOODRUM. No; I do not think that is exactly correct. The so-called "Byrnes amendment", affecting World War veterans, as offered in the Senate, restored all of the presumptive cases on a 75-percent basis pending a final determination of their appeal, and in debate, it seems the Senator from South Carolina committed the Veterans' Administration to a re-review of all the cases that have already been passed upon, and I may say to the gentleman that I believe there would be some hope that in conference, certainly, something approximating that with respect to presumptive cases might be obtained for World War veterans.

Mr. SNELL. How much is actually at stake between the 75 percent that Senator BYRNES is willing to stand for and the 90 percent called for in the Steiwer amendment? Is not that about $4,000,000?

Mr. WOODRUM. Is the gentleman referring to World War or Spanish War veterans?

Mr. SNELL. I had in mind World War veterans.

Mr. WOODRUM. The World War veteran amendment, as presented by Senator BYRNES, restoring the presumptive cases to a 75-percent basis, would cost about $10,000,000 a year. The Steiwer amendment, which restored them to their former rating, would cost about $14,000,000 a year; but the Steiwer amendment restores them permanently, while the Byrnes amendment restores them pending a final review.

Mr. SNELL. But the difference is only $4,000,000?

Mr. WOODRUM. The Spanish War amendment, as presented by Senator STEIWER, restored all the Spanish War cases on the rolls March 19, 1933, the date of the Economy Act, to 90 percent of their then rate, and for the Spanish War veterans and their dependents, this would cost about $69,000,000, as I recall, while the Byrnes amendment, restoring them to 75 percent would cost about $50,700,000, as I recall the figures.

Mr. SNELL. There is no very great difference in the disagreement as to these two items.

Mr. WOODRUM. There is no very great amount in disagreement between the two items, but complete frankness, which is what I want——

Mr. SNELL. That is what I think the House ought to have.

Mr. WOODRUM. I do not want the House to grant my unanimous-consent request under any misapprehension. It appears by inspecting the record that the administration has never consented to the Byrnes Spanish-American War amendment. So, while it was presented by the Senator in charge of the bill in the Senate, it has not, so far, according to the records, been accepted in principle by the administration.

Mr. SNELL. Of course, I was taking it for granted that the amendments presented by Senator BYRNES were acceptable to the administration.

Mr. WOODRUM. I think most of us did that; but if the gentleman will examine the RECORD, he will see that the Senator especially disclaimed any purpose to bind anybody.

Mr. SNELL. But acting under the presumption that these amendments are acceptable to the administration, as I understand the situation, there is not to exceed around $115,000,000 in dispute.

Mr. WOODRUM. There is not that much—not over $60,000,000.

[Here the gavel fell.]

Mr. SNELL. Mr. Speaker, I ask unanimous consent that the gentleman from Virginia may proceed for 3 additional minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. SNELL. The gentleman says not to exceed $60,000,000?

Mr. WOODRUM. May I ask the gentleman from New York [Mr. TABER] as to that amount?

Mr. TABER. It is about $60,000,000 on the veterans' amendments.

Mr. SNELL. I meant the veterans' amendments and the pay-cut amendment would bring the amount to $115,000,000.

Mr. TABER. I think you might say $125,000,000, because I think the amount is $65,000,000 for the pay-cut amendment.

Mr. SNELL. Would the gentleman from Virginia be willing to allow the House to express itself on the pay cut if

the whole proposition of veterans' legislation were sent to conference? The pay proposition is separate and not mixed up with any legislation. Would the gentleman be willing to allow us to express ourselves on the pay cut?

Mr. WOODRUM. I will say to the gentleman that the gentleman from Virginia is willing to have the House do anything it wants to do, but it seems, unfortunately, in this appropriation bill we have a lot of legislative provisions.

Mr. SNELL. Some of the various legislative provisions I agree should go to conference and be acted upon in conference.

Mr. WOODRUM. My hope is that the House will give the conferees a chance to work out something that is acceptable to the House. If we do not, the House may turn down the conference report.

Mr. SNELL. We know that when you bring in a conference report, there will be no chance for the House to express itself on any particular item. The only thing a Member can do is to vote against the conference report or in favor of it. The Members of the House will not have an opportunity to express themselves on any item if we let the unanimous consent go through. If the gentleman will modify it and give us a vote on some of these separate propositions, it may be more satisfactory to some of us.

Mr. BRITTEN. Will the gentleman yield?

Mr. WOODRUM. I yield to the gentleman from Illinois.

Mr. BRITTEN. The gentleman is always very frank with the House. There are Members of the House who would like to express themselves, not only on the amendments to the veterans' legislation, but on the restoration of the 15-percent salary cut without political and demagogic attachments. I am prepared to vote for an immedate restoration of the entire 15 percent [applause], and I should like my people to know that.

I do not know what unanimous-consent request the gentleman is about to prefer, but I hope that he will find it consistent to make his request so that the House at least may express itself on the 15-percent salary restoration, and on such other items in the bill as are distinctly controversial. Can the gentleman consistently do that?

Mr. WOODRUM. I will say that I do not think that that will get us anywhere. The gentleman from Illinois has put himself fairly and squarely and vehemently in favor of the restoration of the pay cut.

Mr. BRITTEN. I have not yet expressed myself, but in the words of Gen. Hugh Johnson, who said the other day, "You ain't heard nothin' yet." [Laughter.]

Mr. TABER. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. TABER. I want to suggest that it is of extreme importance that we get some agreement on this independent offices appropriation bill. I call attention to the fact that the legislative situation is this: If this bill is not carried through, if it does not become a law, automatically the economy provisions with relation to employees and with reference to Members of Congress die as of July 1, but the economy provisions with reference to veterans go on, unless this bill goes through with some modification. To my mind, it is very important that we reach an agreement on this subject.

Mr. WOODRUM. Am I at liberty to assume that the gentleman is agreeable to the unanimous-consent request which I will make?

Mr. TABER. I think the House ought to be assured before any unanimous consent goes through that the conferees will not bring back a report that does not do something for the Spanish War veterans and does not do something for the presumptive cases.

The SPEAKER. The time of the gentleman from Virginia has again expired.

Mr. BRITTEN. Mr. Speaker, I ask unanimous consent that the gentleman be given 5 minutes more.

There was no objection.

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. COOPER of Ohio. There is not a man in the House that I have more respect for than I do for the gentleman from Virginia [Mr. WOODRUM]. I realize the tremendous job he has on hand in handling this bill. But I have not forgotten that when this question came before the House during the consideration of the independent offices appropriation bill, we did not have an opportunity to express ourselves on veterans' compensation and the restoration of the 15-percent salary cut for Government employees. The rigid gag rule prohibited us from considering these two important questions. I believe we should have an opportunity now to express ourselves, and I for one do not feel as if I can agree to unanimous consent to send the bill to conference unless we have the assurance that the House will have an opportunity to vote on compensation and pensions for World War and Spanish-American War veterans.

Mr. KVALE. Mr. Speaker, will the gentleman yield?

Mr. WOODRUM. Yes.

Mr. KVALE. Am I correct in the assumption that if an objection is interposed at this time, the only consequence will be a delay of 1 day, until tomorrow, at which time a special rule will be brought in to seek to achieve practically the same purpose?

Mr. WOODRUM. The gentleman is correct.

Mr. KVALE. And would not a vote upon that rule then indicate the general desire of the House as to these things that are being submitted?

Mr. WOODRUM. I can only say to the gentleman that it is the purpose of the Appropriations Committee to ask for a rule to send the bill to conference. Whether the Rules Committee will grant that rule, and whether the House will pass the rule, I cannot say. The gentleman is familiar with the situation, and he knows as much about it as I do.

Mr. KVALE. In view of the fact that we know that the members of the committee of conference as appointed by the Speaker, which will reenter negotiations with the conference committee from another body, will be substantially the same, and in view of the fact that an objection will mean a delay of only 1 day, and for reasons I have previously stated, I am constrained to take the responsibility of objecting. I regret to do it, but I feel that I should do so.

Mr. WOODRUM. I have not yet preferred the unanimous-consent request. I shall do so now. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from further consideration of the bill H.R. 6663 and the Senate amendments thereto; that the House disagree to the Senate amendments and agree to the conference asked by the Senate; that the Speaker shall immediately appoint conferees without intervening motion; and that the conferees on the part of the House be authorized to agree to any Senate amendment, notwithstanding the provisions of clause 2, rule XX.

The SPEAKER. The gentleman from Virginia asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill H.R. 6663 and the Senate amendments thereto; that the House disagree to the Senate amendments and agree to the conference asked by the Senate; that the Speaker shall immediately appoint conferees without intervening motion; and that the conferees on the part of the House be authorized to agree to any Senate amendment, notwithstanding the provisions of clause 2, rule XX. Is there objection?

Mr. CONNERY. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. CONNERY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection?

Mr. TAYLOR of South Carolina. Mr. Speaker, I object.

EVENING SESSION FOR CONSIDERATION OF PRIVATE CALENDAR

Mr. BYRNS. Mr. Speaker, I ask unanimous consent to address the House for 2 minutes on a noncontroversial subject.

The SPEAKER. Is there objection?

Mr. MOTT. Mr. Speaker, I reserve the right to object; and in connection with this I call the attention of the distinguished majority leader to the fact that, in reply to my protest on the 2d of March to sending the Independent Offices bill to the Appropriations Committee, he assured us that the Appropriations Committee——

Mr. O'CONNOR. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is, Is there objection?

Mr. MOTT. Reserving the right to object, and I shall object unless I be allowed to finish my statement——

Mr. O'CONNOR. Mr. Speaker, I demand the regular order.

Mr. BYRNS. The matter I want to talk about is purely noncontroversial, of interest to the gentleman as well as to every other Member of the House.

Mr. MOTT. I just want to call the attention of the majority leader to the assurance that he gave us at that time.

Mr. O'CONNOR. Mr. Speaker, I demand the regular order.

The SPEAKER. Is there objection to the gentleman from Tennessee?

Mrs. ROGERS of Massachusetts. Mr. Speaker, I reserve the right to object.

Mr. O'CONNOR. I demand the regular order.

The SPEAKER. Is there objection?

Mrs. ROGERS of Massachusetts. Mr. Speaker, reserving the right to object, I ask——

Mr. O'CONNOR. Mr. Speaker, I demand the regular order.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. BYRNS. Mr. Speaker, I have asked this time simply to explain to the House that a number of Members on both sides of the Chamber have talked to me with reference to the Private Calendar. They are very anxious that some time shall be given to its consideration. I have told them that I would ask the House, and, of course, it is up to the House, for unanimous consent to take up the Private Calendar next Thursday evening, beginning at 7:30 o'clock, to consider bills on the Private Calendar unobjected to, and I make that request.

Mr. SNELL. Mr. Speaker, will the gentleman yield for a question?

Mr. BYRNS. Yes.

Mr. SNELL. Can the gentleman explain what the program will be for the balance of the week? Perhaps we can get in some day and avoid the evening session, though I shall not object to it.

Mr. BYRNS. I do not see any chance of that this week. We have the cotton production bill now under consideration, and the legislative appropriation bill has just been presented to the House. The gentleman understands that it is important that those bills be disposed of, and it was simply in the interest of disposing of some of the bills on the Private Calendar that I have submitted this request.

Mr. TRUAX. Mr. Speaker, reserving the right to object, I agree with the gentleman from Tennessee [Mr. BYRNS] that there are many pieces of legislation pending that are much more important than anyone's private bill. Hence I am constrained to object to a night session this week for the consideration of private bills.

Mr. KELLER. May I ask the gentleman why?

The SPEAKER. The gentleman from Tennessee asks unanimous consent that on Thursday next it shall be in order to move to recess until 7:30 o'clock p.m., and that at 7:30 o'clock p.m. it shall be in order to consider bills on the Private Calendar, unobjected to, beginning with the star bill. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

COTTON CONTROL ACT

Mr. JONES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 8402) to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H.R. 8402, the Cotton Control Act, with Mr. HILL of Alabama in the chair.

The Clerk read the title of the bill.

Mr. JONES. Mr. Chairman, I yield myself 20 minutes.

Mr. Chairman, this is a far-reaching bill. I can think of many objections to its passage. One can always think of numerous objections to any new step that may be undertaken. But after all of those objections are made and considered, after you place the light of your reason and the logic of your analysis upon them and consider all of them, the cold, pulseless fact remains that the bill is necessary, or some such step is necessary. That much, in the light of circumstances, stands out in the clear.

Some method must be found to handle the tremendous carry-over of American cotton that is overhanging the market. A little study of the history of the carry-over shows its vital relation to price.

In 1925 the carry-over was 1,439,400 bales; the price was 22 cents per pound.

In 1926 the carry-over was 1,503,800 bales; the price was 19 cents per pound.

In 1927 the carry-over was 3,400,000 bales; the price was 12½ cents per pound.

In 1929 the carry-over was 2,400,000 bales; the price was 18 cents per pound.

In 1931 the carry-over was 4,300,000 bales; the price was 9½ cents per pound.

In 1932 the carry-over was 6,200,000 bales; the price was 5⅞ cents per pound.

In 1933 the carry-over was 9,500,000 bales; the price was 6½ cents per pound.

In the above instances the carry-over is listed as at the beginning of the season. The carry-over at the beginning of the present season is very large. If, through the medium of this bill, the carry-over at the start of the new season can be reduced to a normal one of about 4,000,000 or 5,000,000 bales, it will be of very great help, regardless of whether the operation of the law is then continued.

We are face to face with a state of facts. It is not sufficient for a man to make a general speech in objection. General statements must always yield to a specific state of facts. It is essential that the one who objects should offer a remedy, otherwise his objections are captious. Has anyone something better than the measure that is offered? I tried to think of something. This character of step runs contrary to the whole stream of my political philosophy. But in looking down the long years of the past and viewing its failures and then laying these alongside the cheer that has come from the new program, I realize that its benefits must be preserved.

Anyone who has lived in the South and who will look back over the long trail of those who have engaged in the production of cotton, must realize that it is necessary for them to have a program. This is not a matter that is being saddled onto them. The question was submitted to them, and 95 percent of them, wanting to go along with the program, wanting to make the voluntary program a success, were met with the fact that there were 5 percent of chiselers—of racketeers in the business—who were unwilling to play the game. That has been the result for years. You Members from the South have known of cotton meetings for years, when the farmers would gather in their local communities and say, "Let us get a method of voluntary reduction in cotton production so that we may have a proper price." There are always a few fellows who go back home and say, "Now is the time for me to plant to the limit." With blanched faces and despair in their hearts the farmers

have faced the proposition of picking cotton in the blazing sun, even the women going out and picking cotton, in order to barely eke out an existence.

Does anyone want this condition perpetuated?

I listened with interest to the keynote speech of the self-starting candidate for President, the distinguished gentleman from New York [Mr. WADSWORTH]. And, by the way, if the country is ever foolish enough to go back to the control of his party, I do not know of a better man they could have for the position. The gentleman made some statements in the way of a discussion of general principles that were very interesting, most of them sound, and if the time ever comes when those principles are applicable to the subject before you for discussion, I commend them to your favorable consideration; but whenever those principles touched the question we have before us today, he showed that, while he may know a lot about a great many things, and he does, he knew very little about the subject he was undertaking to discuss.

I just want to read one or two statements. He said:

I saw the contracts in my part of the country. Many of my neighbors brought them to me. They asked me what I was going to do, as a wheat producer. I told them I could not do anything, because there is a law upon the statute books which prohibits a Member of Congress entering into a contract with the Government, so that let me out.

And with a satisfied smile on his face he gave utterance to that expression. He did not want to go along with the program; and it is just such men as that we are trying to reach in this program, the men who will not go along, the men who will not deal fairly with their neighbors, the men who will not join with those who are producing and go along with them and say, "Let us have a program in the benefit of all, instead of a dog-eat-dog match."

I may add that the law has been amended so that the gentleman has full liberty to join with the voluntary wheat-reduction program. It would be interesting to know whether he is doing so.

Mr. KOPPLEMANN. Will the gentleman yield?

Mr. JONES. I prefer to make a connected statement; but, if the gentleman really wants to ask me a question on this subject, I will yield.

The gentleman from New York had much to say about liberty. I always listen to him with interest, because I do recognize his ability and his polish; and when he makes a statement, whether it is in the form of a polished essay or a well-prepared speech, it is always interesting. He discussed liberty, the finest word in the language of man, a word that means more, perhaps, to Americans than any other word, a word we all love, and, therefore, a word that should be used carefully and accurately. He talked as though the proposed measure would take away all the liberties of men who are engaged in the cotton business. Exactly the contrary is true. We are undertaking to adjust it to the welfare of all. That is the very essence of organized government. The direct question was submitted to the farmers in an open letter by the Department of Agriculture, and I want that letter printed in my speech at this point.

LETTER OF TRANSMITTAL

DEAR SIR: Many cotton producers and others in the Cotton Belt have proposed that amendments to the Agricultural Adjustment Act be enacted to compel the cooperation in cotton-reduction programs of every producer who is eligible to participate. These proposals have been caused in large part by the tendency of some non-cooperators to maintain or even expand their cotton production at the same time that reductions are being made by cooperators who act for the best interests of the majority.

The Cotton Section of the Agricultural Adjustment Administration has complete confidence in the willingness of a majority of cotton producers to cooperate with the Administration and with each other in adjusting the production of cotton to a profitable market demand. The Cotton Section desires to know, however, how representative cotton producers feel as to the desirability of enacting additional legislation to compel every eligible cotton producer to cooperate in reduction plans sponsored by the Administration and approval by a majority of cotton producers. In order to obtain the opinion of cotton producers regarding such proposed legislation, you are being asked to supply us with the information requested on the reverse side of this sheet.

Please keep in mind that this questionnaire has no bearing whatever on the present cotton-reduction campaign now being conducted by the Agricultural Adjustment Administration. Rental and parity payments and the other benefits provided under the terms of the 1934 and 1935 cotton acreage-reduction contracts will be paid to cooperators regardless of whether such additional legislation is enacted or not.

We should appreciate is very much if you will answer the questions asked and return this questionnaire at your earliest possible convenience. If by mistake you receive two questionnaires, kindly turn one over to a neighboring cotton producer and ask him to send us his answers to the questions. The enclosed envelop, which requires no postage, may be used.

Remember that the Government itself is not proposing compulsion. If the Department of Agriculture is to advocate legislation providing for compulsion, it will be because the answers to this questionnaire disclose the unmistakable sentiment of the South.

Thanking you for your cooperation, I am,

Very truly yours,

H. A. WALLACE,
Secretary of Agriculture.

QUESTIONNAIRE

1. Do you favor a plan of compulsory control of cotton production to compel all producers to cooperate in cotton-adjustment programs? (Answer "yes" or "no.") ———.

2. Approximately what percentage of the cotton farmers in your community are in favor of compulsory control and would cooperate in its enforcement? ——— percent.

3. If your answer to question 1 is "yes", which one of the following plans or control do you consider preferable? (Answer by marking "X" after the plan you prefer.)

(a) Impose a tax that would apply to all cotton to be ginned or sold but which in practice would operate to exempt the average production on the acreage permitted to be planted by those who cooperate voluntarily in adjustment programs. (———.)

(b) Assign to each cotton producer a definite number of bales that he may gin or sell during any given season, and prohibit the ginning or selling of more than that amount. (———.)

(c) Require that when a majority of cotton producers have approved an acreage-reduction program, all cotton producers would be compelled to accept the program and make the necessary reduction in cotton acreage, even to the extent of licensing each farm. (———.)

The answers to the above letter show that 95 percent of those engaged in cotton production favor some method of inducing those on the outside to work in harmony with the movement.

Mr. SNELL. Will the gentleman yield right there?

Mr. JONES. I ask you if it is liberty, and what kind of liberty it is if the 5 percent are able to dictate to the other 95 percent?

Was not that just the kind of liberty that Al Capone wanted? Was not that the kind of liberty that for a time he exercised? Why, liberty is not worth much unless it is ordered liberty. I have a right to swing my hands around as I please in any direction, but when I swing my hand in such a way that I hit this man's nose, my liberties end where his rights begin. Order was Heaven's first law. In other words, a liberty that is not organized is a savage liberty. Do you want the liberty of the racketeer? Do you want to destroy all organization and order that some international bankers may have the liberty of imposing on the faith and trust of a people? Do you want a concern that has a natural monopoly to have the liberty of charging any price it wants, because you would be destroying liberty if you undertook to regulate the subject of the monopoly?

It seems to me that the proposition is absurd when you undertake to apply it to a practical proposition.

The gentleman tries to draw an analogy between the eighteenth amendment and the principle of this bill. For years I have listened to speeches on that subject, but I have never made one in the House. The burden, the tenor, and the hue of their cry, however, has been that the main reason that act was not as successful as some had hoped it might be was because the majority in certain communities were not for it and that a law the people were not for could not be enforced in a satisfactory manner. When, however, 95 percent of a people—at least a great majority—want some form of compulsory control, and so state through their representatives, it seems to me that is not taking anything away from them; that is giving them local control, the very essence of American government.

I notice the distinguished gentleman from New York discussed the slaughter of pigs. He shed tears over the slaughter of these pigs, these innocent pigs. He cried until his

boots were filled, emptied them and filled them again, almost boo-hooed over the slaughter of the innocent pigs.

Mr. DOXEY. May I interrupt the gentleman to ask who was the gentleman to whom he refers?

Mr. JONES. The gentleman from New York who spoke on the subject on Saturday [Mr. WADSWORTH].

The gentleman had forgotten the fact that in the dairies of New York—I have visited some of the best dairies up there, and they have some wonderful ones—every dairyman slaughters the male calf when he is 2 or 3 days old because he is not worth his feed unless the dairyman wants to keep him for reproduction purposes. It is a matter of having a proper handling of the property, that is all. I do not justify the particular pig program. It probably would not have been my choice on that particular phase. It is a very difficult program to handle. I think it would have been amazing had it been handled without any mistakes; but on the basis on which it is criticized, the criticism is full of flaws.

Just to show you how far from the truth a man may get when he is not familiar with the facts, I want to read you some facts and figures. He said the program was wholly worthless, that prices went down after they started that program. I am discussing his statements as I go along for the reason that it seems to fit into the program as it develops, and he seems to be the big gun who has been put up to demolish the hopes of the South. On last December a year ago when this program was first started, hogs were at the lowest price they had been in 54 years. They were $3.04 per hundred. At the time the program was put into effect, due to the fact that it was apparent that it was going to be put into effect, hogs had increased somewhat in price.

The Secretary of Agriculture said at that time that the pigs that were being slaughtered would not normally go on the market until about March of this year, and that the sows which were slaughtered would not produce litters that would go onto the market until this fall and that, therefore, it would take a long period for the program to show its effects At the time the pigs would have gone on the market in March, the price of hogs had gone up $1 per hundred over what they were a little more than a year ago. If you look at the price of cattle in December, a year ago, it was higher than it reached again until just a day or two ago when the prospect of a measure on cattle caused the price to go up, apparently. Until that time the price of cattle had gone down; and the price of hogs had gone up. So, the basis of his argument is altogether wrong on that feature of the proposition.

He speaks of this as the slaughter of innocent pigs. Well, if you are going to start in on a basis of sympathy for animals I wonder how he feels toward the baby beef, a piece of which he may have eaten the day before, the poor little innocent bawling calf which was killed in order that his hunger might be satisfied.

According to his philosophy it is all right for a boy or girl in the South with patched clothes to go hungry and to work in the blazing sun, picking cotton, because some chiseler is not willing to do his part, if only we can save the innocent pigs. What a strange and cruel philosophy!

I do not know whether this proposition will work or not; nobody knows. We have safeguarded it in every possible way. The President may call it off any minute. It is only a 2-year program. If it fails it will affect only the South which has asked for it. Somebody must bear the burden of every progressive step that is taken. Why should you gentlemen object to the South trying this and seeing whether it will work? If it does not work it will be discarded without hurting you. If it works, then you can try it if you want to.

The corn-hog program is just getting started. This program cannot work out in a moment.

I hear the criticism every once in a while about the slowness of recovery. It is pretty hard to expect the present occupant of the White House, notwithstanding his ability, to sweep all the trash out of the White House that has accumulated there in 12 long years. It takes a little time to work out these programs.

Mr. KVALE. Will the gentleman yield?

Mr. JONES. I yield to the gentleman from Minnesota.

Mr. KVALE. I noticed an article in the St. Louis Post-Dispatch to the effect that the reduction program in the cotton States was bearing down most heavily on the share croppers, who found their condition worse than in recent years. I wonder if the gentleman will give us some information on this matter.

Mr. JONES. I do not know whether I read the particular article to which the gentleman refers, but I did read a similar article in a magazine shown me by my friend from Iowa [Mr. GILCHRIST]. The article is so filled with misstatements, misconceptions, and misinterpretations that I do not think it deserves an answer. Of course, in many instances the tenant in the South has been in hard shape and has had a hard time. This is largely because of the fact that the South has been a cotton country. Cotton is an export commodity, and on account of its nature is essentially so. After the Civil War the South was destitute. It had to bend its back and grow cotton. The country had a tariff system—and I will not go into the merits of that system—in which by the very nature of things it could have no part. It has had to bear the burden of this tariff system without any corresponding advantages.

Whatever sorrows attending the tenant situation in the South have grown up under the system for which the opponents of this measure are pleading.

Mr. McFADDEN. Will the gentleman yield for a question?

Mr. JONES. I yield to the gentleman from Pennsylvania.

Mr. McFADDEN. Will the gentleman tell the House something of the authorship of this bill? I should like to know where it originated.

Mr. JONES. I will endeavor to do that, but I do not think it makes very much difference. The real question is not its authorship, but its merits. I hope the gentleman will not divert me from the substance to the shadow.

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield myself 10 additional minutes.

May I say to the gentleman that, notwithstanding those articles, more than half of the plow-up money of last summer went to the tenants, according to the records of the Department of Agriculture, and it went to them in just the same division that their contracts called for. The tenant got an advantage because he did not have to pick the cotton. He did not have to do anything beyond the plow-up stage. If you had gone through the South, as I have in many parts of the South, and had seen the traces of despair and evidences of hunger and want that existed throughout the years, especially during the depression, and then had gone down there after this program went through and had seen their lighted faces and their fine expressions and the trade going on, tenants coming in there that had not bought anything for 2 or 3 years, buying the children dresses, something to eat, and maybe a little candy, you would say that those gentlemen who criticize the program went down there for propaganda purposes.

Mr. KVALE. Will the gentleman advise us as to the truth of the statement that the families who have that employment and who are in these more fortunate circumstances are sharply reduced in number? In other words, there is an increased number of families who cannot find a plot of ground upon which to operate.

Mr. JONES. I will say to the gentleman that that is an error. There are a few chiselers who will not play the game. Most of the landlords have been fair. Both they and their tenants are making more money with less cotton and making more with less work following the program. I realize the tenant problem is a serious one in many parts of the South. I wish it were not so. But that condition has grown up under the old system. Why not change it a little?

Mr. KOPPLEMANN. Will the gentleman yield?

Mr. JONES. I yield to the gentleman from Connecticut.

Mr. KOPPLEMANN. I am in sympathy with the argument and the measure the gentleman is discussing. My

question definitely is this: In my district we have similar conditions to those existing in the South, except that our commodity is tobacco, whereas in the South the commodity is cotton.

Mr. JONES. If the gentleman has a question to ask about this bill, I wish he would ask it. I do not want to go into another phase of the matter.

Mr. KOPPLEMANN. Would the same provisions that are found in this bill apply in connection with the tobacco question, with which I think the gentleman is familiar?

Mr. JONES. Maybe so, but I do not think we ought to take up more than one subject at a time, and each ought to be considered on its merits.

Mr. McFADDEN. Will not the gentleman answer my question?

Mr. JONES. I am coming to that directly.

Mr. McFADDEN. I hope the gentleman will answer my question.

Mr. JONES. I decline to yield further. May I say to the gentleman from Minnesota on the question of tenants that they have been taken care of in this year's contracts. The contracts make provision for them, and this does not interfere with them. This protects the tenant insofar as a law can, and we have everywhere in the bill written in a protection for the tenant on the share-crop basis. These things must be tied to the land, because that is where the legal rights are.

May I further say, for the information of the gentleman who is anxious to find out something about the authorship of this bill, that the Bankhead brothers first introduced it. My attention was first called to it last year by Senator BANKHEAD, who made an effort to get consideration at that time. The administration did not seem to favor it last year. He introduced it again this year, and it has been thoroughly gone over. The committee has added a great many amendments.

Mr. MILLARD. The gentleman from Pennsylvania wants to know who prepared the bill, not who presented it to the Senate and House.

Mr. JONES. I am stating that, if the gentleman will listen. Senator BANKHEAD introduced the bill again this year.

It came before the House Committee, and the House Committee practically rewrote the bill in many respects. We put in about 50 or 60 amendments and changed the bill from a permanent to a temporary bill. If the gentleman is interested, he may go back and get a copy of the original bill and compare it with the one we have before us today. He will find the bill has been worked on in collaboration with the BANKHEAD brothers and with various Members of the committee who are interested.

Mr. McFADDEN. Will the gentleman yield?

Mr. JONES. I am sorry, I cannot yield further.

Mr. McFADDEN. I am trying to get some information.

Mr. JONES. Is the gentleman for the bill?

Mr. McFADDEN. I do not know. I want some information that will decide the matter. I want to know the origin of the first bill, and my reason, if the gentleman will let me state——

Mr. JONES. I do not care about the reason. Sitting back there is the man who introduced the first bill, and I know he has been working on it a long time.

Mr. McFADDEN. It is not a question of the introduction of the bill. It is the principle involved in the original legislation. I should like to know whether it came from Mr. Tugwell and Mr. Ezekiel.

Mr. JONES. I have never discussed the terms of this measure with either of those gentlemen. So far as I know it is Mr. BANKHEAD's idea. Of course the question of taxing excess production as a means of control has been long discussed. I have heard it for years. There are not many new ideas in the world. I think that this has been discussed for years, but usually there is an enterprising man who has industry enough to take an idea that has been floating around, capture it, and reduce it to terms. So far as I know, Senator BANKHEAD has the honor of having done just that very thing.

He introduced a very similar measure at the last session. He did not press it at that time and introduced a much more elaborate bill at the present session. I would rather he would furnish the information, if the gentleman is interested. He is sitting in the Chamber, and I know he will be happy to tell the gentleman. Personally I do not care whose brain child it is, I only want to know whether it is worthy.

Mr. MARSHALL. Will the gentleman yield?

Mr. JONES. I must decline to yield further at this time.

The plan, generally, I wish to state very briefly, is this. We have an allotment plan whereby practically all the farmers growing cotton have been allotted their pro rata production on an acreage basis. Of course, by the use of fertilizer, the purchase of which has been doubled this year, they can practically destroy that program from within the program. Men have a perfect right, perhaps, to do this, and the fact remains they will do it if they are left with that privilege.

Mr. TAYLOR of South Carolina. Will the gentleman yield?

Mr. JONES. I would rather not yield; but if the gentleman has a question, I yield.

Mr. TAYLOR of South Carolina. I want to ask the gentleman if he does not think that the people who are contracting to receive the benefits from the Government and then increase their use of fertilizer and intensify their cultivation in order to stimulate production, are as much chiselers as those who decline to take advantage of the plan.

Mr. JONES. I do not regard them as much so, but I do not think they ought to do it. I think, in a sense, they might come under a mild form of that term, but the fact remains that the contracts do not forbid their doing it, and they have not signed an agreement not to do it. I think practically all of them are perfectly willing to have the law written so they will be required to refrain from that form of increase if the other fellow will do the same thing. This has been the trouble all along. The men were willing to do the proper thing if they could get the other fellow to do it, but there has always been somebody who would not go along. Naturally, if I am going to use additional fertilizer and you are my neighbor, you are also going to want to use additional fertilizer. That is the law of life.

Mr. TAYLOR of South Carolina. I may say to the gentleman that I am in thorough sympathy with his remarks——

Mr. JONES. If the gentleman will permit, I would rather not yield further. The gentleman can get some time under the 5-minute rule. I am sure the gentleman is in thorough sympathy with the thought expressed here.

This allots to the various people producing cotton their part. In order to see that they live up, not only to the letter of it, but the spirit of it, they have asked almost unanimously that we try a method that certainly will produce the results, if it is upheld by the courts; in other words, that a man be allotted not only on an acreage basis, but a baleage basis of cotton; and after he has produced his allotment, which he may produce without any tax at all, then he shall be taxed as much as 50 percent of the excess production.

This is fair. Everybody who is willing to go along with the program gets his part free; and if he exceeds the program, he pays a tax. Now, what could be fairer than this?

[Here the gavel fell.]

Mr. JONES. I yield myself 5 additional minutes.

He pays the tax if he produces extra cotton. We safeguard this in many ways. We provide that if nature blesses him and he produces more, he may hold it over for a year without paying the tax, but subject to the lien, and may use his bale tags which have been allotted to him the next year and not pay the tax on the bales so used.

Mr. JOHNSON of Texas. If the gentleman will permit, a great many small farmers in my district have been some-

what apprehensive about whether the bill would penalize the farmers who heretofore have reduced their acreage.

Mr. JONES. I may state for the benefit of the gentleman that there is a provision in the bill which authorizes that to be taken into consideration and that part is covered in one of the amendments put on the bill.

Mr. JOHNSON of Texas. Then the chairman of the committee assures the House that this feature of it will be taken care of?

Mr. JONES. Yes; that feature is taken care of in the bill, and, I think, very properly so.

Mr. McFADDEN. Will the gentleman yield?

Mr. JONES. I am sorry I cannot yield. I am taking time that I have promised to other people, and I must go on now without yielding further.

Mr. BUSBY. The gentleman does not care to yield at this time?

Mr. JONES. I would rather not. We expect to have some discussion under the 5-minute rule, and I will ask my friends to wait until that time, because there are some features of the bill that a number are interested in that I should like to explain. We will discuss the other features as we come to them.

I wanted to have time to discuss the legal phases of the bill, but I shall not have time to do anything more than refer to them.

Mr. McFADDEN. Mr. Chairman, I make the point of no quorum. The gentleman is refusing to answer pertinent questions in regard to this bill, and I think we should have a quorum present.

The CHAIRMAN (Mr. BUSBY in the chair). The gentleman from Pennsylvania makes the point of no quorum. The Chair will count. [After counting.] One hundred and three Members present, a quorum.

Mr. JONES. I happened to be a member of the committee when the first Grain Futures Act was passed. This was held unconstitutional because it was using the taxing power in a prohibitive sense and for purposes of regulation. The *Hill* v. *Wallace case* (259 U.S. 44) and the second child-labor case (259 U.S. 20) are the cases most frequently cited by those who question the legality of the pending bill.

These two cases are distinguished from the oleomargarine case, the *McCrea case* (in 195 U.S.), in which a 10-cent tax on oleomargarine is sustained. The law involved in that case levied a 10-cent tax on certain types of oleomargarine. This was a higher percentage of the value of oleomargarine at the time of the enactment of that law than this is of cotton. It was more prohibitive, from the standpoint of violation of the taxing power, than is the present case, and yet it was sustained on the ground that they would not inquire into the motives of the Congress, so long as the purposes were lawful.

Mr. COX. Will the gentleman yield?

Mr. JONES. I yield.

Mr. COX. The gentleman weakens his position if he says that the two cases are analogous.

Mr. JONES. The principles are not analogous, but it will take too long now to explain it. I think they are clearly distinguishable, but I did want to say that even taking these particular cases aside and accepting the statement of the gentleman that the case will apply, still there is not a thing in those cases that the bill does not meet the terms of. In the light of the recent trend of decisions, there is every reason to hope that the terms of this bill will be sustained.

My friends, I am sorry that I have been in such shape physically that I could not prepare the data as I want them and that I have not been able to present it in a fashion that I should like.

I want to say that every argument leveled against the bill so far has been on the basis of property rights. I believe in property rights. I think one of the chief glories of our Constitution is the fact that you cannot take the shirt from the back of a ragged street urchin without either securing the lad's consent or paying him for the rags.

But there is a more important principle than property. Property was created for people and not people for property. Between property rights and human rights there is little choice. We ought to keep on the side of the human rights.

Property is not progress. Automobiles and radios and airplanes are not progress, they are the outward manifestation of progress; all true progress is mental and spiritual.

Back of every lawyer, every doctor, every farmer, every merchant is the man. If you are not a man before you enter the professions, you will not be a man afterwards. The man makes the profession. The profession does not make the man.

Back of every form of government is the people. There can be no great government without a great people. This is not the Government we are undertaking to help administer here. It is the form, it is the machinery of government. The real government is made up of the people in the various communities that make up our country. Let us go back to them as our guiding star.

These people who are growing cotton are interested in the passage of this bill which affects their property rights, and which they think rises far above the level of their property rights and promotes the welfare of their community. Are you people who do not grow cotton going to deny these people the right to try this experiment in which they are so much interested?

I am willing as one of the committee to meet the proposition. I should be willing for you to try an experiment on some other commodity if you want to do it and let us wait a year, if any of you want to try the experiment.

Mr. COX. Let me ask the gentleman a friendly question. While, of course, the principle laid down by the courts applies as to taxation, still does not heavy excessive taxation imply force——

Mr. JONES. It is not the principle of force. Man does not make law, he discovers it. Laws properly grow out of the habits of the people. If you undertake to make a law which does not grow out of the habits or the customs of the people, you cannot enforce it. When a custom is adopted by a vast majority of the people, then it should be crystallized into a law which is easy of enforcement. That is what we are undertaking to do.

It will not touch the man who wants to go along, and he will not be protected in any other way. Let us give him this opportunity.

Mr. MARSHALL. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. MARSHALL. I do not rise to defend——

Mr. JONES. Oh, please ask the question. I have promised all my time, and I have already used too much myself.

Mr. MARSHALL. If the gentleman does not want to yield, very well.

Mr. JONES. Oh, I yield to a question. The gentleman is a member of the committee.

Mr. MARSHALL. I wanted to ask a question, but I could not do it without one brief statement as to the reason.

Mr. JONES. Very well, go ahead.

Mr. MARSHALL. I said I do not rise to defend the speech of the gentleman from New York [Mr. WADSWORTH], but I do want to ask this question. Does not the gentleman from Texas feel that in the discussion of this bill, which has to do with the liberty of the people, the question of liberty is one of the outstanding principles that ought to be discussed?

Mr. JONES. I certainly do thing so; but when a man assumes that liberty means a license to do as he pleases, without regard to his neighbors' rights, he abuses the term. A civilized nation defines the rights of its citizens in order to promote real liberty. The very organization of government means that if it means anything. Those who would construe it otherwise would adopt a policy that would permit the financial wizard liberty to enslave his fellowman, in-

dulge in all kinds of abuses, and produce ultimate chaos. "O Liberty, how many crimes have been committed in thy name!"

Let us have an ordered liberty that protects the rights of all and assures equal rights to all. Equality and liberty should go hand in hand. That is liberty in its finest form.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HOPE. Mr. Chairman, I yield myself 20 minutes. I sincerely hope that my friends from the cotton States will not feel that in opposing this bill I am doing so because of any ill feeling for the cotton industry or because I lack any interest in the welfare and prosperity of that great part of our Nation known as the "cotton States." I do not believe that this is a bill which concerns the cotton-producing section of this Nation alone. This bill is a part of the President's program. The chairman of the Committee received a letter directly from the President urging that the Committee make a favorable report upon this bill, and the theory upon which the bill is predicated, or rather the theory upon which we are being urged to enact the bill, is that the voluntary system of crop-production control has broken down. If, in the opinion of the President, it has broken down as far as cotton is concerned, then I take it that it is the idea of the administration it is going to break down as to every other commodity upon which it is being tried, because I believe it is the general consensus of opinion on the part of all those who have studied this matter that the voluntary plan will operate on cotton better than on any other major agricultural commodity. Therefore this is not a question that concerns the cotton-producing section alone, because if the principle of this bill is right, then there is every reason to think that it will be and should be extended to cover every major agricultural commodity and we are going to be asked to enact legislation for the compulsory control of all agricultural commodities. For that reason I think every Member of this House is vitally interested in whether or not the bill is going to become a law.

We passed a measure at the special session last spring which gave the Secretary of Agriculture rather extensive powers; and, proceeding under the authority that was given the Secretary by that act, we have had an agricultural program developed during the past few months which has embraced most of the major agricultural commodities, and I think that on the whole that program has been a success. Representing the greatest wheat-producing district in the country, I feel that it has been successful as far as wheat is concerned, and I think that most of you gentlemen who represent the cotton section will concede that it has been a success so far as cotton is concerned. But the difference between the plan under which we are operating now—the voluntary plan—and this compulsory plan which we are asked to substitute in its place is as great as the difference between day and night. There is nothing in the plan that has been offered so far to the American farmer which compelled him in any way to go into the program. An effort has been made in outlining the program to offer an inducement to him which would make it worth his while to go into the program, and in every major agricultural commodity a majority of the producers have found it advisable to enter into that program. But if we enact this measure then, as to cotton, every producer is forced into a program whether he likes it or not. This bill is being offered upon the theory that an emergency exists, an emergency in the production of cotton in this country; and I submit that going as far as this bill does, we certainly are not justified in even considering it unless a most extreme emergency exists. But you have not heard in the course of debate on this bill, and the Committee on Agriculture did not hear in the course of rather extensive hearings which we conducted on the bill, any evidence to show that an emergency exists in the production of cotton. If this bill had come up a year ago or 2 years ago, it might have been possible to produce some evidence to show the existence of an emergency in the cotton industry, but such is not the case at this time.

Mr. BLANCHARD. Mr. Chairman, will the gentleman yield?

Mr. HOPE. Briefly.

Mr. BLANCHARD. Did the Secretary of Agriculture actually sponsor this bill at any stage of the hearings?

Mr. HOPE. The Secretary of Agriculture appeared before the committee, but I did not reach any conclusion in my own mind, at least, that he was very favorable to the bill. Certainly he did not come out and endorse the bill. His explanation of his interest in the bill, as I got it, simply went to the extent that he thought it would be an interesting experiment to try; and if the South was willing to submit itself for the experiment, it might be a good idea to let them try it.

Mr. CHRISTIANSON. Will the gentleman yield?

Mr. HOPE. I would rather not yield right now. I would rather make a connected statement for the time being.

As I just said, a year ago it might have been possible to say there was an emergency in the cotton industry. Cotton was selling at that time for about 6 cents a pound. There was a cotton carry-over of 13,000,000 bales in this country, and cotton consumption was declining. There was no plan in effect which it seemed would be effective in bringing about a reduction in cotton production. But that situation has changed today. Instead of cotton being 6 cents a pound, it is 12 cents a pound. And let me say in passing that the price of cotton today more nearly approaches the parity price than the price of any other agricultural commodity.

Instead of there being a carry-over of 13,000,000 bales, that carry-over has been reduced until next July 1 it will only be 10,000,000 bales. That is a large carry-over, but, with consumption increasing and with the voluntary plan of production control in effect, that carry-over is going to be reduced.

In other words, while a year ago there was a very serious situation existing in the cotton industry, the tide has turned. Conditions are getting better. Prices are higher. The carry-over is less. Consumption has increased, and we have in effect the voluntary plan for the reduction of cotton production, which has been agreed to by the farmers who farm 85 percent of the cotton acreage of this country. I submit there is no other branch of agriculture today which is in as enviable a position as cotton, from any of the standpoints I have mentioned. But the contention is made that although there has been a sign-up of 85 percent of the cotton land in the South, still we are in danger of overproduction because the farmers who have signed those contracts do not intend to keep the spirit of them, but intend, by very thorough cultivation and the extensive use of fertilizer, to produce a larger crop upon a smaller acreage. I have not seen anyone who had any evidence to bear out that contention. Before the committee there were vague statements that there were increased sales of fertilizer this year, and that farmers were cultivating their land more intensively than ever before, and that there was land which had not been in cotton production, which was being put into production this year; but there was absolutely nothing before the committee, and the hearings will bear me out if you care to examine them, setting out any facts in that connection. Likewise in the discussion of this bill before the House nothing has been brought out in that regard.

Let us look into this question of fertilizer. That is the "big bad wolf" which it is said is going to cause the breakdown of the voluntary plan. I have secured from the National Fertilizer Association their figures as to the sale of fertilizer in the 11 cotton States from 1928 down to the present time, and also have the figures which are set out in the Department of Agriculture Year Book for 1933. I have also a letter from the National Fertilizer Association showing comparative fertilizer sales for February from 1928 to 1934, inclusive. I want to call your attention, first, to the February fertilizer sales, because those are the latest figures to which we have access. Going back to 1928, we find the fertilizer sales during February were 1,112,546 tons; in 1929 they were 816,419 tons; in 1930, 1,067,935 tons; or a total

of 2,996,900 tons, or an average for that 3-year period of 998,987 tons. That is the period from 1928 to 1930, inclusive. Approximately 1,000,000 tons a year.

Now, for the last 3 years, 1931, 1932, and 1933, I will not take the time to give the figures for each year, but the total was 1,259,402 tons, and the average was 419,809 tons for the 3-year period.

The February 1934 tag sales, which are the best index we have as to the sales of fertilizer, amounted to 501,000 tons, or approximately half what they were on the average during the period 1928 to 1930 and only about 19 percent more than they they have been during the past 3 depression years.

I also want to call attention to the total sales of fertilizer for the preceding 6 years. In 1928 they were 5,523,000 tons; in 1929, 5,458,000 tons; in 1930, 5,556,000 tons; or an average of about 5,500,000 tons during that period. For 1931 they were 4,051,000 tons.

Mr. BANKHEAD. Will the gentleman yield? The gentleman surely must be mistaken. Five and a half million tons a year?

Mr. HOPE. In the 11 cotton States.

Mr. BANKHEAD. Where did the gentleman get his figures?

Mr. HOPE. The figures I am giving now are from the Department of Agriculture Year Book. The first figures I gave as to February were from the National Fertilizer Association, and the figures I am about to give for 1932 and 1933 are from the National Fertilizer Association, as the last year book does not contain those figures.

In 1932 the sales were 2,617,344 tons; for 1933 they were 3,155,172 tons; so that the sales of fertilizer in those 11 States during the last 3 years were approximately three fifths of the amount during the preceding 3 years.

Now, I want to call your attention to the fact that in 1928 when we used 5,523,000 tons of fertilizer, the average yield per acre of cotton was 152.9 pounds. In 1929, when we consumed 5,458,000 tons of fertilizer, it was 155 pounds per acre. In 1930 the consumption was 5,556,000 tons of fertilizer, and the production was 147.9 pounds per acre. In 1931, when we consumed 4,050,000 tons of fertilizer, it was 201 pounds per acre. In 1932, with a consumption of 2,617,000 tons of fertilizer, it was 162 pounds per acre, and in 1933, with a consumption of 3,155,000 tons, it reached 209.4 pounds per acre.

No one can contemplate those figures without realizing that the use of fertilizer is only a minor factor in the yield of cotton. There are a great many other factors which have just as important influence upon production as fertilizer. So even assuming there were greatly increased sales of fertilizer this year, which there are not up to the present time, that would be no reason for assuming there will be an increased production of cotton per acre this year or that the voluntary plan will break down on that account.

Mr. FULMER. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. FULMER. I should like to call the gentleman's attention to the fact that we have a very good increase in fertilizer this year that is to be put on acreage in that region where 15,000,000 acres were taken out of production. This increased fertilization will tremendously increase the production per acre.

Mr. HOPE. That is subject to this limitation. Of course, 15,000,000 acres are not being taken entirely out of cultivation—they are taken out of cotton; but they will be planted with something else, and I assume fertilizer will be used on it, too; yet there is only a 19-percent increase in fertilizer sales this February over the average for the last 3 years; and the sales are 50 percent less than they were for the 3 preceding normal years. Likewise, we must expect that with only three fifths of the normal amount of fertilizer being used during the past 3 years, that it will be necessary to use an increased amount for several years in order to restore the land to its usual productive capacity.

Mr. WEARIN. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. WEARIN. May I inquire of the gentleman whether or not the fertilizer sales he mentioned for these 11 States is with reference to one particular company?

Mr. HOPE. The National Fertilizer Association is an association of all the manufacturers of fertilizer, and these figures are for sales by all companies selling fertilizer; they are sales for the entire industry.

Mr. SWICK. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. SWICK. Has the gentleman there the figures prepared by the Federal Government on the limitation of the cotton crop in these 11 cotton-producing States?

Mr. HOPE. I have not those figures before me, but they are available.

Mr. SWICK. Will not the gentleman be good enough to insert them in the RECORD?

Mr. MILLARD. Mr. Chairman, will the gentleman yield?

Mr. HOPE. Certainly.

Mr. MILLARD. Did not the Secretary of Agriculture twice say while he was before the committee that he preferred the voluntary plan rather than the compulsory plan contained in this bill?

Mr. HOPE. A little later on I will read what the Secretary said when he appeared before the committee.

Mr. CHRISTIANSON. I was very much interested in the gentleman's observation that the voluntary allotment plan has succeeded. In that connection I should like to ask the gentleman whether he considers that the voluntary allotment plan has succeeded in reducing the acreage of wheat in his own State of Kansas? The information has come to me that the net reduction is going to be very small for the reason that those who have not produced wheat before are going into wheat-raising and that those who raised wheat in former years but who did not sign the allotment agreement are increasing their acreage. Can the gentleman give us some enlightenment on this point?

Mr. HOPE. I may say to the gentleman from Minnesota that the best information I have available at this time is that the reduction in the acreage of winter wheat in Kansas has been about 11 percent. In my own district it has been about 20 percent. There has been a large decrease there over what the Government has asked for; and 97 percent of the producers in my own district have signed up under the voluntary allotment plan.

Now, getting back to this bugaboo of the great increase in cotton production under the voluntary plan, the suggestion is made that we are going to have a lot of new land brought into cotton production.

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield myself 10 additional minutes.

In this connection let us remember that there is no virgin soil, except possibly in some parts of west Texas, that can be brought into new cotton production at this time. Any land which comes into cotton production this year, which has not been in cotton production recently, is going to be land that has been farmed and been found unsuitable for cotton production. It may be true now, as it has been true on past occasions, that some marginal land will be brought into cultivation when there is a prospect of higher prices, but that land is not going to greatly increase the amount of the cotton production; and it seems perfectly ridiculous even to think that when 85 percent of the producers have signed up to make a reduction of 37 percent in the cotton acreage, that a mere 15 percent of the producers could set out and bring in cultivation enough other land, poor land, unsuitable for cotton production, to seriously increase production.

So it seems to me that, as far as this emergency is concerned, it is purely an imaginary emergency existing in someone's mind and not based upon any facts or a study of existing conditions.

Mr. McFADDEN. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. McFADDEN. I tried to elucidate from the chairman of the committee, of which the gentleman is the ranking member, the origin of this idea. He was reluctant to answer definitely, although I am of the opinion that he knows. Since asking the gentleman for this information I have learned the authorship. The authors of the plan are Mordecai Ezekiel, Mr. Tugwell, and others of those gentlemen who have been preparing the socialistic plan.

This is part of the whole plan of setting up a corporate state in the United States.

Mr. HOPE. I thank the gentleman for his contribution.

Mr. FOCHT. It is molded after the Soviet Government.

Mr. HOPE. Now, as to whether the voluntary plan is successful: Nearly everyone who has spoken for the bill has praised the voluntary plan. There was not a witness who appeared before the committee from Secretary Wallace down who did not say generally that the voluntary plan had been a success; and in this connection I wish to call attention to the statement made by Secretary Wallace on this very point. The Secretary was asked:

Do you consider that your whole reduction program is going to fail unless we adopt some legislation of this type which will bring about compulsory control?

The Secretary said:

I have much more faith in the voluntary approach than many people have.

You feel, then, that the voluntary plan has been a success?

Secretary Wallace answered:

I think it has been a remarkable success.

Let me also call attention to the statement of Oscar Johnson, who is connected with the A.A.A., formerly as its director of finance, I believe, and now as the man who is in charge of the cotton loans, Mr. Johnson being a large producer of cotton, and a man who demonstrated to the committee that he was very well-informed upon the subject of cotton production.

What does Mr. Johnson say?—

The voluntary plan, in my judgment as a producer, is so attractive that no producer can afford to stay out. It is so attractive, in my judgment as a business man and a farmer, that no man can afford to deprive himself of the certainty of rental payment and of the certainty of parity prices for so much of his 1934 crop as he has contracted to raise; that no man can afford to take the chance or hazard of the uncertainty and risk that must be taken by the man who stays out.

Continuing, he says:

If you ask my opinion, I would say that I do not think that compulsory control is necessary. If you ask my opinion whether I would favor a general policy of compulsory control, I would say yes, if it were the last resort in saving the industry and that it is necessary to resort to such a program; but I say no such emergency confronts us at this time with cotton selling at 12½ cents spot, with the next October quotation running around 13 cents, with the pre-war parity price at 14.9, I do not think that any such emergency or any such demand exists for such radical legislation.

May I also call attention to the fact, while we are on this question of the possibility of an enormous crop this year breaking down the cotton-control program, that last year we had an extraordinary yield of 209.4 pounds of cotton per acre. There has never been a time in all the history of cotton production when a 200-pounds-per-acre crop has followed another such crop. If you will look up the figures of the Department of Agriculture, you will find that a crop of this kind has always been succeeded by a smaller crop. In the last 3 years we have had two 200-pounds-per-acre crops of cotton, so in all probability, if the law of averages is worth anything, we will have a crop this year with a yield per acre much lower than we had last year. With an average yield of one third of a bale per acre, the acreage reduction which has taken place this year will mean a cotton crop of somewhere between eight and nine million bales.

Now, in the brief time remaining I want to discuss some of the details of this bill. I wish I had more time for that purpose. In the first place, I wonder how many Members of this House have examined the penalty provisions of the bill. I wonder how many of you know what your constituents are going up against if they happen to violate some of the rules and regulations promulgated under this act.

May I call attention to subsection (d), reading as follows:

Any person who violates any provision of this act or any regulation—

Of the Department of Agriculture—

promulgated under this act shall on conviction be punished by a fine of not to exceed $5,000 or imprisonment for not to exceed 2 years, or both.

Then going on down the paragraph there is the following:

Anyone who has in his possession any forged or counterfeited bale tags is subject to the fine of $5,000 or imprisonment.

He might be the innocent possessor of this tag. There is no requirement that he shall have guilty knowledge, but nevertheless he is subject to this fine and imprisonment. If he has in his possession any paper in imitation of the paper used in the manufacture of bale tags, he is subject to this fine and imprisonment. If he refuses to destroy bale tags, which some inspector for the Department of Agriculture thinks ought to be destroyed, then he is subject to a fine of $5,000 or imprisonment for 2 years. I am not going to enumerate all the offenses that a man may commit in connection with this measure, because no one knows how many there will be. There might be a hundred regulations issued by the Secretary of Agriculture which a man might violate and subject himself to a fine of $5,000 or imprisonment for not exceeding 2 years.

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield myself 5 additional minutes.

Mr. CHRISTIANSON and Mr. BANKHEAD rose.

Mr. HOPE. I yield to the gentleman from Minnesota first.

Mr. CHRISTIANSON. For the purpose of informing myself, and perhaps other Members of the House, as to the provisions of this bill, will the gentleman state how the allotments of individual farmers are determined under the machinery set up in this bill?

Mr. HOPE. I am very glad the gentleman asked that question. Under the machinery which is set up, it is left to the Secretary of Agriculture to determine the allotment to each State, to each county, and to each individual producer.

These State allotments are based on the average production of cotton in that State during the preceding 5-year period. Then, with the exception of 10 percent of the State allotment, an allotment is made to the counties upon the same basis. I will not go into detail to point out how the 10 percent is allotted, but in the main it goes to producers in counties who would not be entitled to come in under the regular allotment plan. Then the county allotment is allotted to the producers in each county upon any one of three different bases determined by the Secretary of Agriculture.

First, it can be based upon a percentage of the average annual cotton production of the farm for a fair, representative period, but it is provided in the bill that that method cannot be used after this year. Second, it is provided that the Secretary may make the allotment upon the basis of taking the entire acreage of the farm and having someone figure out how much cotton that farm would have produced if it had all been in cotton during a fair representative period, then giving that farm the same proportion of the cotton that is assigned to the county. In other words, each farmer would get the same proportion of cotton for his farm that his farm bore to the cultivated land of the county.

There is another method. The Secretary of Agriculture may make an allotment upon any basis he deems fair and just. If he adopts this method, it is up to him to determine how he is going to make the allotment. Does that answer the gentleman's question?

Mr. CHRISTIANSON. If I were to buy 240 acres of land that had not been devoted to the raising of cotton and I wanted to plant this land in cotton, I would have no assurance that I could plant a single acre of that land in cotton?

Mr. HOPE. That is true this year if the first plan should be adopted. Next year the gentleman might get an allot-

ment, even though no cotton had ever been grown on the land, and even though he did not desire to grow any cotton he might get an allotment for 25 or 30 bales of cotton. What the gentleman would do in that case, if he did not want to grow cotton, would be to go to some of his neighbors who might want to grow cotton and say, "I have an allotment here for some cotton exemptions. What will you give me for them?" He could go ahead and grow corn or anything he wished to raise and thus collect tribute from his neighbors who are so unfortunately situated that they were compelled to grow cotton but did not have a sufficient allotment for their farms. In my opinion this is one of the indefensible parts of this bill.

Mr. TAYLOR of Tennessee. Will the gentleman yield?

Mr. HOPE. I believe I promised to yield first to the gentleman from Alabama.

Mr. BANKHEAD. The gentleman was talking about the possible penalties that might be imposed under these regulations. The gentleman has been familiar with many regulatory measures affecting agricultural products and livestock and stockyard operations; and does not the gentleman know that in order to effectuate a program of this sort it is necessary to provide some penalties to prevent violations, and penalties are provided under regulations put out by a Secretary of the Cabinet.

Mr. HOPE. I think that is absolutely necessary, and I do not think, even with these penalties, you are going to be able to prevent bootlegging and law violations that are necessarily going to take place when you put as oppressive a measure as this upon a great branch of American agriculture. [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from South Carolina [Mr. FULMER].

Mr. FULMER. Mr. Chairman, the gentleman from Kansas [Mr. HOPE], who has just spoken, apparently is very fearful that perhaps the cotton program put into operation last year under my bill known as the "Agricultural Adjustment Act" has broken down in the South. I may say to the gentleman that the program is going strong and has worked wonders for the South which has meant much to the country at large. The purpose of this bill is twofold: First, to preserve and continue what we have done and are doing for the cotton farmers of the South, and, in the next place, we hope within the next 2 years to be on a normal basis in the production of cotton and the price of cotton and do away with the processing tax that we placed on cotton some time ago.

The gentleman from Massachusetts [Mr. MARTIN] Saturday was very fearful that this bill would increase the price of cotton and thereby interfere with the prosperity of the cotton mills of New England. The same interests, representing the New England mills as well as the mills of the South, when we had the Agricultural Adjustment bill up for consideration, came before the Committee on Agriculture, both House and Senate, and lobbied around here with one of the strongest lobbies we have ever seen against this bill, especially the processing tax. They feared that if we put a processing tax on cotton it would ruin the cotton mills of New England and the South; in fact, as in this instance, as stated by Mr. MARTIN that it would. The gentleman well knows that today the cotton mills of New England and the South are running more spindles, have engaged more employees, and are doing a better business than they have done for years under the processing-tax program which we now have.

I want to congratulate the gentleman from Ohio [Mr. TRUAX] for the statement he made Saturday wherein he said that when the South had a fair and normal price for cotton it meant everything to the people of his State of Ohio.

Mr. Chairman, it is amazing to me to see my good friend from Kansas [Mr. HOPE], as well as men from various other Western States that do not grow cotton, opposing this legislation, apparently not realizing that, today, if we were able to secure 20 cents for cotton, the gentleman's State could not produce mules and horses, and various products grown in that country, fast enough to take care of the needs and the actual demand of the South, which we would now be buying from you if we had 20-cent cotton. Between the years 1905 and 1920, as a large supply merchant in South Carolina, I used to buy carload after carload of western mules, flour, and various other products. I have bought many a carload of hay from Terre Haute, Ind., the freight on which cost me more than the actual price of the hay. My people want to produce cotton if they are able to secure a fair price. We will engage in growing other crops and engage in the dairy business on a large scale in competition with you only if we are unable to get a fair price for cotton. The colored people of the South are happy and satisfied when they are able to produce cotton at a price that will enable them to pay their obligations and buy other products that can be abundantly produced in the South which, in a great many instances would be in direct competition to many of the agricultural States of the Union.

My good friend, Mr. KVALE, of Minnesota, a few minutes ago, in questioning my colleague, Mr. JONES, the chairman of this committee, apparently was deeply concerned about just what this bill would do to tenants and share-croppers.

Why, Mr. Chairman, during the period of my business in South Carolina, these share-croppers and these tenants were renting land and running their own independent farming, and, in fact, a great number who are now operating in the capacity of tenants and share-croppers owned their own lands.

This applies to colored as well as thousands of white people. These people have been driven from their independent farming operation because of the ruinous price which they have been receiving for their cotton.

Now, what is the purpose of this bill? We propose under this bill to do for farmers what they should do for themselves but are unable to do because they are not organized.

I may say to you, Mr. Chairman, I do not know anything about any other section of this country when it comes to organizing farmers, but, so far as the South is concerned, the cotton farmer has never been organized and never will be. In the words of Abraham Lincoln, it is the purpose of this bill to do for cotton farmers that which it is impossible for them to do for themselves.

My friends, we are simply proposing under this bill largely to do just what the Government is doing under the N.R.A. to and for every other line of business, except we have taken into consideration more seriously in providing for the small farmer and the small tenant and the share-cropper. In words, if a large landowner in South Carolina or any other cotton State should want to drive from his farm his tenants or share-croppers because of this program, the Secretary of Agriculture would be in a position to cut his allotment, which would force him to do the thing which is perfectly right and which he should do under the program.

In the passage of this bill we are going to strengthen and help carry out the 1934–35 voluntary plan so as to be more nearly fair to small farmers and farmers who have been properly cutting acreage and production during the last few years, the thing which all farmers should have done. The farmer who has been planting his regular acreage or perhaps increasing his production, and who has been really responsible to a large extent for the surplus which we now have, under this bill will be cut down so as to be put on a fair basis with the small, independent farmer, the share-cropper, and everybody else.

Mr. Chairman, unless we pass this bill, we are going to have a crop of cotton around 15,000,000 bales. This will mean 5- or 6-cent cotton, and the $150,000,000 or more which you have already put in this program and the millions that you expect to put into the program this year at the expense of the taxpayers of the country will be just like putting that much money in a rat hole. And the prosperity that has begun in the South and, as stated, will surely extend to Kansas and other agricultural States, as well as the various industrial centers of the country, including every line of business, if we had a fair price, will have to be but an idle dream.

I want to state frankly, I have never known of any period during my life when we had a prosperous agriculture in the South but what every line of business in every section of this country was prosperous. It is my candid opinion, speaking from this experience, that if you wanted to start normal prosperity in every section of the country, if you want to put the unemployed back to work, if you want to start up various industries that are now idle and put the railroads to work, the passage of this bill will bring about these much-desired results.

For the last few years I, as a cotton farmer, have been cutting production, while some of my neighbors have actually been increasing production. Naturally, under the voluntary plan, my neighbors would have an advantage over me. The only way that I might overcome this disadvantage would be to increase the amount of fertilizer per acre, thereby increasing my production. Right or wrong, the average farmer, being human, would do this.

In that overproduction will be taxed when sold, regardless of whether or not the bill is being operated, there will be no incentive on the part of any farmer to overproduce. In the meantime, if a farmer had a short crop and failed to produce his allotment, the next year he could increase his production so as to take care of both years.

In allocating cotton to the various States we have tried to be fair to every cotton State. We have given the Secretary of Agriculture the right to set aside 10 percent of the amount of cotton, say allocated to South Carolina, for the purpose of where a county has had some disaster or infestation, and the production has been cut short for any 1 or more years during the period under which the allocation is to be made, so as to increase the allotment of that county on a fair basis with other counties where they have had a normal production. This applies also to the individual farmer.

Mr. TARVER. Will the gentleman yield?

Mr. FULMER. I will yield to the gentleman.

Mr. TARVER. Why should not the same principle be applied to the allocation of tax-exempt cotton as between the States? The gentleman has pointed out where the bill provides for taking into consideration the action of the individual in reducing production, and he has pointed out where the conditions of a county or a community within a State may be taken into consideration. Why should not the Secretary of Agriculture as between the States take into consideration, for example, the State of Texas, that from 1932 to 1933 increased its acreage almost 3,000,000 acres, whereas other States remained at the same level?

Mr. FULMER. Will state to my friend from Georgia that we considered this very seriously. We gave consideration in working out a base period, a 10-year period, a 5-year period up to and including 1932, also up to and including 1933. It was the general opinion of the members of the committee representing cotton States that a period representing 5 years up to and including 1933 would give the best average to the majority of the cotton States.

I want to say that the Representatives of South Carolina and Georgia, as well as the people of these States, ought to be tickled to death today in that Texas and Oklahoma are willing to go along with us in controlling cotton production. Texas at this time is producing about one third of the total cotton produced in the United States. They usually produce from three and one half to five million bales. They can easily increase this to six or seven million bales, and they do not have to buy fertilizer. Therefore, they can produce cotton from 2 or 3 cents a pound cheaper than we can grow cotton in South Carolina and the other cotton States. It is my candid opinion that if we do not restrict cotton production in Texas, it will go a long way in forcing South Carolina and Georgia out of the cotton business.

This bill differs very materially to the original bill as introduced by Senator BANKHEAD in the Senate, as well as the bill introduced by Congressman BANKHEAD in the House. In other words, for days and days the Members from the cotton States on the Agricultural Committee worked in season and out of season to so perfect the bill as to meet the constitutional requirements and to be fair to each cotton producer regardless of his position financially or as to the size of the farm operated by a producer.

We received many helpful suggestions from our constituents from time to time. We changed the ginning and taxing features of the bill very materially. In fact, the bill, as it is now written, is absolutely in line with the suggestion made by my good friend and constituent, Mr. Tom McMichael, of Orangeburg County, wherein farmers who do, for any reason, overproduce, will be permitted to gin this overproduction rather than be forced to keep same stored on their farms as seed cotton. Also, the tax was reduced from 12 cents per pound, which was confiscatory, to a rate of 50 percent of the actual price of cotton at the time of the sale of this overproduction.

It has been stated by some of the opponents of this bill that we are placing with the Secretary of Agriculture the power to dictate to farmers in such a manner that eventually the Government will be able to control the production of cotton in this country to the actual needs of the United States, as well as be able to eliminate from the farm small farmers and, what some people term, inefficient farmers.

This bill, as written, will terminate within 2 years, with a proviso that if we are still burdened with a surplus the President, by proclamation, may extend the provisions of same for an additional year. However, the operations of the bill will not be put into force and effect unless and until the Secretary of Agriculture finds that the persons who own, rent, share crop, or control two thirds of the land on which cotton is produced in the United States favor a levy of a tax on cotton produced in excess of the allotment made to meet the probable market requirements and determines that such a tax is necessary to carry out the policy declared in section 1 of the bill. In other words, it is up to the actual producers of cotton to determine whether or not the production of cotton shall be controlled, and not the Secretary of Agriculture or the Government of the United States.

While the bill states that the tax shall be paid at the time of ginning, farmers who are desirous of ginning their overproduction for the purpose of carrying it over to be used in their next year's allotment, or to be sold at a later date, will not have to pay any tax at the time of ginning in case the cotton is used, as previously stated, in their next year's allotment, or until the cotton is actually sold. In the meantime this bill does not apply to any cotton now in the hands of cotton farmers, cotton merchants, or cotton mills. In other words, this cotton now on hand can be placed on the market at will, free of any tax, as usual.

Out of all of the witnesses appearing before our committee there was only one to oppose the bill. This was a Mr. Oscar Johnston, from the State of Mississippi. I want to call your attention to the following taken from the hearings on this bill:

Mr. Johnston on the witness stand.

Mr. BANKHEAD. I believe you say that you have about 48,000 acres in cotton?

Mr. JOHNSTON. No; I said that we have about 48,000 acres in the plantation, and about 25,000 acres in cotton cultivation.

Mr. BANKHEAD. Now, is that not all tenanted by share croppers?

Mr. JOHNSTON. Practically all of it; yes.

Mr. BANKHEAD. They are all colored tenants, are they not?

Mr JOHNSTON. Yes; practically all.

Mr. BANKHEAD. You have no white tenants on the farm?

Mr. JOHNSTON. Probably two or three.

Mr. BANKHEAD. How many families are on that farm?

Mr. JOHNSTON. On the 3 farms, about 1,600 families; fifteen or sixteen hundred families.

Mr. BANKHEAD. Who owns that property, Mr. Johnston?

Mr. JOHNSTON. The property is owned by a corporation; a part of the stock is owned in this country, but about 60 percent of it is held in England, a majority of it. About 40 percent of the stock is held by various persons in America, including myself.

My friends, if I had my way about it, I would be delighted to pass a bill in Congress which would permit no one man or corporation, and especially where the majority of the stock is owned in some foreign country, to plant any such acreage as contained in the farm operated by Mr. Johnston, which, as a matter of fact, is largely responsible for the surplus cotton we now have on hand and which has cost the average producers of cotton millions of dollars

because of this overproduction which has reduced the price even below 5 cents per pound in a great many instances. If the production is not controlled, Mr. Johnston can very easily comply with the voluntary program cutting the acreage, and, on account of his very large acreage, receive thousands of dollars from the Government in the way of rents and other benefits. In the meantime, he will be able to purchase additional quantities of fertilizer, bringing about a serious overproduction and feed into the market, at advanced prices, all of which, as stated, is absolutely at the expense of the average cotton farmer. This is the very thing which we are proposing to control under the bill.

Out of all of the letters which I have received from my district and my State I have not received a single letter opposing this bill. In the meantime I have received numerous letters and telegrams along the lines as indicated in a telegram received from Mr. J. F. Bland, one of the largest cotton farmers and cotton ginners in my district, which is as follows:

I plant 3,700 acres of cotton and have signed contracts to reduce 40 percent. Think very essential to back up reduction contracts by tax on excess cotton ginned. This could be accomplished by issuing permits to producer to gin number of bales entitled to. Under present reduction contract, ginners would be required to punch or stamp each bale ginned. Any excess ginned should be heavily taxed at gin.

And another telegram which I received from Mr. Burrows, a large cotton planter, in my district, as follows:

We, the cotton committee of Sumter County, believe that the Bankhead bill is the only practical means by which the production of cotton can be controlled, and we urge your support of it to the end that the splendid work to date of the Recovery Administration affecting cotton may not be brought to naught.

I understand that Mr. B. F. Taylor, of Columbia, secretary to the State Cotton Seed Crushers' Association, states that this legislation will be very destructive, and will operate against the producers of cotton, especially the small producers. In other words, it would appear that Mr. Taylor is perfectly willing to permit the overproduction of cotton, which would mean cheap cottonseed for the cottonseed-oil industry of the country, which certainly would be a selfish motive at the expense of the cotton producers of the South. Perhaps Mr. Taylor has forgotten the Cotton Seed Oil Crushers' Association trade-practice conference, held in Memphis, Tenn., in 1928, where they formulated trade-practice rules whereby this association was able to control the cottonseed-oil mills of the country to the extent that they were able to fix monopolistic prices not only in buying cottonseed from farmers but in selling their products to farmers and to the consumers of cottonseed-oil mill products. Perhaps Mr. Taylor has also forgotten when, in trying to defend the interest of cotton farmers, I made charges on the floor of the House in Congress that not only were these mills fixing cottonseed prices at the expense of farmers but they were also controlling the price of cottonseed by making loans to ginners and by buying up cotton gins and independent cottonseed-oil mills for the purpose of controlling same.

Of course, at that time Mr. Taylor made the statement that I did not know what I was talking about and that the Congressman should inform himself on these matters. However, the investigation was made shortly thereafter; and although it took the Federal Trade Commission, the same Department of Government which had endorsed the trade-practice rules for this association at Memphis, Tenn., about 2 years to finish this investigation, they found that every charge made against the cottonseed-oil industry by me was absolutely true and the trade-practice rules were canceled, and, I understand, a number of these operators were turned over to the Department of Justice for prosecution.

Pass this bill, gentlemen, and then help me pass my "net-weight bill", so as to get rid of excess "tare" (bagging), thereby saving cotton producers from $6,000,000 to $15,000,000 annually, and which would also enable us to use cotton bagging, then a bill placing a proper tax on the importation of jute which comes from India, the largest cotton-producing competitor to the United States of any country growing cotton in the world.

With this bill to get rid of the surplus, and with the passage of these other bills, which should have been passed by the Congress years ago, I can assure you that never again will the cotton producers of the South be called upon to plow under 4,000,000 bales of perfectly good American cotton at the expense of the taxpayers of this country.

Mr. JONES. Mr. Chairman, I now yield to the gentleman from Ohio [Mr. POLK].

Mr. POLK. Mr. Chairman, as a farmer and a Representative from a fine agricultural district in southern Ohio, I am glad to add my support to this proposed legislation.

As a member of the Committee on Agriculture of the House of Representatives, I listened to practically all of the testimony presented to our committee with reference to this cotton control bill.

On last Saturday I listened to the debate heard on the floor of the House, and, while I did not originally plan to take up the time of the House by speaking on this bill, since hearing the previous debate, I have decided to take a few minutes of the time of the House to speak for this measure.

From the remarks of the speakers in opposition to this bill who have preceded me, it is apparent that there are two main classes of objections to the legislation now under consideration. The first class of objections may be termed "political objections", which arise because most all those interested in a personal way in this measure are southern Democrats, and, consequently, it is evidently the plan of our friends, the Republican political strategists, to endeavor to discredit this as dangerous legislation and thus cause those of us from the Northern States to vote against it.

With reference to the purely political opposition to this bill, I believe few will take such opposition seriously. We in the North know that our prosperity is closely tied up with the prosperity of the Southern States. We know that when the people of the Southern States are prosperous they will buy the products from our fields and our factories. We know that when they are not prosperous we will all suffer from the business stagnation. While we in the North, as consumers of cotton, must protect ourselves against excessively high prices for cotton goods, there is no danger that this legislation will cause any shortage in cotton, in view of the present surplus of over 10,000,000 bales carried over from previous years.

On the political side of this argument I listened to the gentleman from New York, who has so often been mentioned as one of the receptive Republican Presidential candidates for 1936 [Mr. WADSWORTH], attack the present activity of the Agricultural Adjustment Administration in behalf of agriculture. He bitterly criticized what has been done and what is being done and what it is proposed to do under this legislation. He bitterly assails all those in authority, including the President. He speaks of a "regimented people obedient to the bureaucracy of the Capital." I cannot agree with the logic of his outburst against the President. If this is his opening gun in his campaign for the Presidency in 1936, I can assure him that he will have to use much heavier artillery than he has used here in his denunciation of the efforts of the President in behalf of agriculture. In this connection I cannot help but remember the misdirected efforts of his party during the years they were in power; one illustration of which was the $500,000,000 Federal Farm Board fiasco. While you wasted hundreds of millions of dollars in endeavoring to buy enough grain to raise farm prices, the present administration is now sending money back to the farmers in the form of checks for acreage reduction.

This is benefiting the farmers instead of the grain brokers. Our friend the gentleman from New York also attacks the President on the grounds that such legislation as is herein proposed destroys the constitutional liberties of the American people. He makes much use of the phrase "preservation of liberty to our people."

I believe the distinguished former United States Senator from New York is not so much interested in the preservation

of the liberty of the cotton farmers of the South as he is in the preservation of the powers of wealth as represented by the Mellon-Mills-Insull crowd. I believe that he fears for the liberties of those who have for so long grown rich at the expense of the farmers and at the expense of labor and at the expense of small businesses which they have striven to crush. I believe that he fears that under the leadership of President Franklin D. Roosevelt the so-called "liberties" of these unscrupulous powers are threatened, and it is because of his interest in them that he has risen in his place and so vigorously denounced the President and his policies.

The second class of opposition to this proposed cotton-control measure seems to come for the most part from those sections of the country engaged in the manufacture of cotton cloth.

I do not criticize these manufacturers for desiring cheap raw materials; however, this brings me to what I believe is the fundamental question involved with reference to this legislation. This question is, Is it sound economic policy that for the sake of the cheap cotton desired by the manufacturing centers to keep a great portion of the population of the 16 cotton-growing States in poverty?

I believe that any fair-minded person will agree that the prosperity of the cotton-growing States is of more importance than the meager financial rewards which may accrue to those interested in having cheap cotton.

The essential principle contained in this legislation is an effort to force the production of a definitely specified amount of cotton by means of a tax which must be paid on each pound of cotton ginned in excess of the quota assigned. This tax is levied only, as stated in the bill on page 3, section 3, when the persons who "own, rent, share crop, or control two thirds of the land in the United States on which cotton is produced" favor the levying of such a tax. In other words, this bill becomes operative if and when the cotton farmers who control two thirds of the cotton acreage in the United States want it. It forces the minority to agree to the wishes of the majority. It forces those large landowners who will not cooperate with the present form of voluntary reduction as has been in operation during this past year to pay a tax on that part of their ginned cotton which is in excess of the quota.

It was brought out in the hearings that a certain number of large cotton planters were unwilling to cooperate in helping to reduce the present surplus of cotton, and by the use of machinery, fertilizer, and by the narrowing of the space between the rows of cotton, they have increased their production. They have thus been evading the efforts of the Agricultural Adjustment Administration to bring about the necessary reduction in the production of cotton in order that cotton may sell at a price above the cost of production.

This bill is aimed primarily at those who have thus selfishly refused to do what is conceded by all to be for the best interests of the cotton growers throughout the South.

As I have just mentioned, we have heard something with reference to the effect of the use of machinery upon the cotton crop, and I wish to digress just a minute to pay my respects to what I believe is one of the greatest enemies of American agriculture today. I refer to the Farm Machinery Trust. It is my belief that no one single organization has done more and is now doing more to rob those engaged in agriculture than those large companies which control the farm-machinery business in the United States. They have for all practical purposes a complete monopoly on the business. They maintain the prices of their products at wartime rates and force the farmers of the entire country to bear the burdens of the excessive salaries they pay their executives.

In this connection I hope our President may soon direct Dr. Tugwell or some other member of the so-called "brain trust" to investigate this unjust situation for the purpose of bringing about lower prices for farm machinery.

In conclusion, may I state again that I favor this legislation? While it is specifically emergency legislation, to be in effect for 2 years, I believe it will materially help to restore prosperity in the South without placing an excessive burden on any other section of the country. While in operation it should enable the disposal of the present tremendous surplus of cotton which has such a distressing effect upon the market. Most important of all, it should enable the cotton farmer to receive the cost of production plus a fair profit for his cotton.

When the cotton farmers of the South can secure the cost of production for their cotton they should be in a position to enter again into profitable trade relationship with other sections of the Nation to the mutual benefit of the entire country. [Applause.]

Mr. JONES. Mr. Chairman, I yield 4 minutes to the gentleman from Louisiana [Mr. SANDLIN].

Mr. SANDLIN. Mr. Chairman, the cotton-growing sections of this country owe a debt of gratitude to Senator BANKHEAD of Alabama and to his illustrious brother, our own beloved BILL BANKHEAD of the House. In all my 14 years of service in this House I have not voted for a measure with more pleasure than I shall vote for this one, because I believe it will be of great material benefit, not only to the southern section of the country, but to the whole United States. I am for this bill, because those affected are practically unanimous for it. I am for it, because the only way in which the production of cotton can be controlled is on the bale basis; it is the only way in which it can be intelligently handled, and I am for it because it will confer a benefit on my section, and on every other district in the United States. No district represented by any Member of this House but will be benefited by the passage of this measure. There is no way that cotton can be controlled by common consent. Those of us who have lived in the South all of our lives and have heard this question discussed know that it cannot be done. Of course, when this measure is put into effect, there will be some dissatisfaction. When you tell a man who has been raising 10 bales of cotton that he cannot put more than 8 bales of it on the market he will be dissatisfied, but the final result will be satisfactory to him. The farmers are for it, with practically no objection to it. They want to try it. If it is not satisfactory it does not have to become a permanent law. The body which passes the law can repeal it. I feel sure that it will pass this House by an overwhelming majority and be accepted by the body at the other end of the Capitol, and finally be approved by the President, and when it is done the price of cotton in the South will be stabilized, and we will not be afraid every day that cotton will go down to 5 or 6 cents a pound. I am happy to support the measure. [Applause.]

Mr. HOPE. Mr. Chairman, I yield 15 minutes to the gentleman from Wisconsin [Mr. BOILEAU].

Mr. BOILEAU. Mr. Chairman, during the past 3 years I have at various times expressed my opinion with reference to the program for the relief of agriculture. I have favored the Frazier bill as a method for refinancing agriculture, and I have favored the Swank cost of production bill as the most effective way of getting adequate prices for the farmer for his agricultural commodities. I am still convinced that that program is the ideal program and the program that would give most relief to agriculture. However, we have not adopted that program. The Congress of the United States and the President of the United States have adopted the program embodied in the Agricultural Adjustment Act and I believe that so long as we have that program, so long as that is the only program that we are using to relieve agriculture, we should utilize that program and make it as effective as possible, perfect it wherever we possibly can and do as much as we can in the matter of giving relief to our farmers.

Consequently, I am going to vote for this measure because I believe it does give a good deal of assistance to the cotton farmers of the country and because I feel it will help the cotton section of this country and because I know they are in need of that assistance.

There has been a good deal of discussion about the compulsory features of this bill. Many Members of the House

have discussed the compulsory features of the bill and have used that as their main argument against the bill. Also, several Members, speaking in opposition to the compulsory features, have said that they would be in favor of the bill if, instead of compulsion, it contained a provision that made it more persuasive, or if it provided more of an incentive to the farmer to reduce his production. They have said they would favor the bill provided the program was so inviting that the farmer would be, through good business judgment, compelled to voluntarily come under the provisions of the bill and reduce his production.

So far as I am concerned, I do not see where there is such a very great difference between compulsion in one form or in another. Mr. Oscar Johnson has been quoted here, and he made a statement before the committee. I think it is significant to note that he changed his remarks quite materially the second time he testified before the committee. This is what he said on the second day, after he spent much of his time the first day talking about compulsion and opposing that feature of the bill:

> I should like to see it made possible for the cooperator to get an advantage that could not be received by the man who stays on the outside, so that the man on the outside would be compelled to come in by the dictates of good business practice, and not by fear of fine and imprisonment.

He believes in the principle of compelling the farmers to come under the provisions of the bill, because he realizes that unless you do compel them you cannot get the cooperation that is necessary to make this program a success. He suggests one method of compulsion; the bill suggests another. As far as I am concerned, it seems like tweedledum and tweedledee. I am going along with the bill because I do not think it does any harm to other kinds of farmers, and because the cotton farmers of the country are unanimous in their demand for it.

There has been some question raised as to whether or not the cotton farmers really do want it. Statements have been made before our Committee on Agriculture which would indicate there is a strong sentiment in the cotton section for this bill. Although suggestions have been made that perhaps that does not express the opinion of the greater percentage of the farmers, not one word has been presented on this floor nor in the committee which refutes the presumption that the farmers actually do want it. If they want it, I am going to help, as far as I am able, to give it to them. I believe in helping the farmers in all sections of the country.

This bill, as originally drawn, did not meet with my approval. I felt I could not go along with the bill because it enabled the cotton farmers to reduce their acreage in cotton, and plant those idle acres in wheat or tobacco, or use it to pasture dairy cows or beef cattle, or to expand their production of other agricultural commodities. I felt that if the cotton farmers came here asking for relief, they should come with clean hands, and should be satisfied to have a provision incorporated in the bill that would prohibit them from using that land to compete with farmers who are not getting benefits from the bill. I am pleased to say that the committee has accepted such an amendment, and that amendment is written in the bill in the shape of a committee amendment, and I assume there is no opposition on the part of those in favor of the bill and that that amendment will be adopted by the House.

Mr. FULMER. Will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. FULMER. The gentleman comes from a great dairy State. I believe the milk or butter fat that is produced there is used largely in making cheese. I want to say that if the South should become prosperous by receiving a fair price for cotton, which would be equally distributed among every class, especially the colored people, there would be an increased market for the gentleman's cheese, because they are the greatest cheese-eating people in the world, and it would be of more benefit to the gentleman's people than anything else.

Mr. BOILEAU. I want to commend them for their good judgment, because there is nothing in which there is more nourishment than dairy products.

I am in accord with this bill, because it will help the cotton farmer, and it will hurt nobody else. When we can get a program of that kind, I think we should all support it as far as we are able.

Some questions were asked about share-croppers and tenant farmers. The committee has gone as far as it possibly can go to protect the interests of the share-cropper and the tenant. If it did not have those protective provisions, many of us on the committee would not have supported the bill and voted to report it out, but the bill goes as far as is humanly possible to protect the interest of the share-cropper and the tenant farmer. They will be protected, and there will be no danger of their being discriminated against.

These voluntary agreements under the Agricultural Adjustment Act have been successful, but there are a certain percentage of cotton farmers who have been chiselers; and if we are going to have a program such as this, it requires the cooperation of all producers of that commodity; and as long as we are having a program incorporating the principles of the Agricultural Adjustment Act, we should have as much compulsion as possible in the bill, so that the Administration can enforce cooperation on the part of those who would like to chisel and who would like to get the benefits of an increased price, but who do not want to sacrifice anything for the common good of all those who produce that particular commodity.

This bill adopts a principle that is unique in our treatment of agricultural problems. Because it happens to be unique and is a departure from what we have known in the past is no reason why we should not adopt it today. Because we have not tried it before does not argue that it is an ineffective way of handling the situation.

We in this Congress are all ready and willing to travel untrodden paths, and we are inclined, especially during this depression, to try something new to give relief to the people who are in need of relief. Because a suggested method happens to be a little unusual and, perchance, some of its provisions might be a little harsh, does not argue against the merits of the bill or the propriety of its provisions. I know that if this were a bill to help the dairy farmers, and if it happened to be a little harsh, and an unusual departure, I would nevertheless support it if I were convinced it would help the farmer. I am willing to do for the cotton farmer what I would expect you men to do for us. If the bill is sound, if it will give relief, we should all unite in an effort to grant the relief that the bill contemplates.

Mr. CULKIN. Will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. CULKIN. If the principle in this bill were applied to dairy products, in which the gentleman's State and district are interested, would he vote for it? Would he say this bill would help the dairy industry?

Mr. BOILEAU. I would say that if this bill were advocated for the dairy industry, I should go into it as thoroughly as I possibly could with all those men whom I respect as leaders in the dairy industry. I would say that my inclination at the present time would be to favor it.

I do want to say, however, that I would not feel competent to suggest this as a program for the relief of the dairy industry without having the advice of the able men in my State and in the gentleman's State who understand the dairy program, and who could contribute to the sum total of our understanding of the wisdom of such contemplated action with respect to the dairy industry. I can see, and I think the gentleman will readily understand, that there are many phases of the dairy industry that would make this a little more difficult of application than it would be with regard to cotton.

I do want to emphasize that I am for controlled production of dairy products. I am for control for the purpose of reducing the surplus production of milk that goes into cheese, butter, and other products. I am for the control of milk in my own State as well as in every other State of the country, because I believe we must accept the principle of controlled production if we are to maintain relatively high

market prices at the present time under present circumstances.

Mr. CULKIN. I assume the gentleman refers to the principle contained in this bill, compulsory control.

Mr. BOILEAU. This bill goes to the point of making control compulsory; but it is my contention that with any kind of controlled production, there must be some method of compulsion whether it be by direct mandate of law saying that if you produce more than your share you shall go to jail, or whether you compel the farmer, by artificially creating a situation that makes it compulsory for him to come in the program, by using good business judgment. The old A.A.A. agreements have been in operation about a year. It is compulsory. Take for instance the cotton and the wheat programs of the A.A.A. The farmers are given cash benefit payments for cooperating. This in effect compels everybody to cooperate. You do not know of very many wheat farmers who are not cooperating at the present time. We have heard statements to the effect thta the voluntary-reduction program is failing because some few farmers are not cooperating and that, therefore, the provisions of this bill must be made compulsory. We see in this bill merely a different method of compulsion. The bill does not say they shall not grow more cotton; but the provisions of this bill have been made so inviting, that all cotton farmers will want to come under the program. We give every cotton producer a fair allotment which is exempt from taxation; and the allotment is the amount to which production must be restricted if we are to successfully carry on the program. We say that, with respect to the individual's allotment of production, he is exempt from taxation; but that does not say that he cannot grow more. The bill merely provides that when the farmer grows more than the specified allotment, a tax is imposed on the excess production at the time it is ginned; and the tax is of such a nature that it makes it very inviting for them not to produce more than the quota; it is very persuasive.

Mr. HOPE. Mr. Chairman, will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. HOPE. Is there not this difference in the two methods, however: While in both cases the Secretary makes an allotment to each farmer, under the voluntary method if a man is not satisfied with the allotment—and I may say from my own experience with the wheat allotment that about 50 percent of the farmers are not satisfied—he does not have to take it; but under the compulsory method the Secretary says, "You can grow 9 bales of cotton and no more unless you pay a prohibitive tax." Is not that the difference between the voluntary method and the compulsory method?

Mr. BOILEAU. The farmer can still produce as much as he wants to; but for such cotton as he sells above his quota, he will receive only half price.

Mr. HOPE. Through the operation of a prohibitive tax.

Mr. BOILEAU. That is the persuasion to which Mr. Johnson referred; that is the part that makes it so important from the standpoint of good business judgment for the farmer to come into the program and limit his production. There is a difference of method; yes; but there is not so much difference in principle. Through this method we are making it so inviting that the chiseler will be compelled to come in and cooperate with the rest of the farmers. [Applause.]

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield 4 minutes to the gentleman from Mississippi [Mr. ELLZEY].

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. ELLZEY].

Mr. ELLZEY of Mississippi. Mr. Chairman, about a year ago a group of Congressmen formed a farm bloc, and under the leadership of the gentleman from Texas [Mr. SUMNERS], night after night we met in open forum in the room of the Judiciary Committee to discuss remedial legislation that would be beneficial to the farmers. Especially did we study the refinancing of farm loans and also methods to increase the price of agricultural commodities, particularly cotton and wheat. Please bear in mind that at that time the price of cotton was approximately 4 cents per pound and wheat 25 cents per bushel. Many farmers were on the verge of losing their homes because of the foreclosure of mortgages on same. It was my privilege to be assigned to a subcommittee to study legislation which would make possible the refinancing of farm mortgages throughout the Nation. Under the Roosevelt administration it is most gratifying to all of us that legislation has been enacted into law which has made possible the refinancing of farm lands. In my section of the country it required quite a long time for the Government agencies to begin functioning, but finally the organization has been perfected with the result that many farmers have been permitted to retain their homes.

During the early days of the present administration the Committee on Agriculture caught the vision and sponsored the enactment of the Agricultural Adjustment Act which made possible the present cotton program.

I want the Chairman and members of the Committee on Agriculture to know that, in my humble judgment, the Agricultural Adjustment Act brought the greatest hope of happiness and prosperity to the South of any agricultural legislation ever enacted. Permit me to congratulate you, therefore, for the splendid service you have rendered to the Southland. Especially, Mr. Chairman, do I feel that the State of Mississippi is particularly fortunate in having as one member of this Committee on Agriculture our good friend Hon. WALL DOXEY, who is rendering such excellent service in behalf of the Mississippi farmers and is always vitally interested in their welfare.

Splendid progress has been made thus far under the program which fostered acreage control. With your permission, I should like to enumerate some of the benefits derived from the cotton program of this administration:

First. Cotton has advanced in price from 4 to 12 cents a pound. For short-staple cotton last year most of the farmers received from 8 to 10 cents per pound and for long staple 12 to 14 cents per pound.

Second. In my own State of Mississippi during the year 1933 the profits derived from the cotton program amounted to the sum of $15,235,791. For the year 1934 the program calls for Mississippi growers to receive a total profit of $13,413,645.

Furthermore, let us bear in mind that the total profits paid the farmers throughout the Cotton Belt during the year 1933 was $160,000,000, and the total profits proposed for the year of 1934 is $126,000,000.

Third. Many farmers of my State have been enabled to pay their back taxes, old debts, and to buy the necessities of life. In addition to this, most of them have been able to keep their children in school, and to support their churches.

Fourth. Those of you representing the industrial sections of this Nation, I call to your attention the fact that, as a result of a higher price, made possible by the present cotton program, it is now possible for the South to continue purchasing the manufactured products from your industrial sections. With the South receiving a good price for cotton, it is always glad to purchase the manufactured products of industry. Let me emphasize the fact that it is impossible for us to buy your goods unless we do have a fair commodity price for our cotton. This increased purchasing power alone would easily justify the passage of the Bankhead bill, which in reality will guarantee the continued success of the cotton program.

May I tell you the necessity for additional legislation? First of all the program is threatened with defeat because of intensive cultivation and the application of high-priced commercial fertilizer. It is possible by intensive cultivation and the application of high-priced fertilizer to produce as much cotton on 6 acres as hitherto produced on 10 acres.

An unofficial report from nine Southern States shows a tremendous increase in the sale of commercial fertilizer, to wit:

	Tons
In year 1931 (December)	19,000
In year 1932 (December)	36,000
In year 1933 (December)	126,000

In the second place, there is a very small group, approximately 10 percent of citizens, who are unwilling to cooperate with the program of the other 90 percent. Unless the Bankhead bill, which provides for baleage control in addition to acreage control, is passed, this small group is likely to defeat the entire program.

In reference to this matter I have a letter here to which I call your particular attention. This letter comes from an agricultural committee of a typical county in my State.

FAYETTE, MISS., *March 2, 1934.*

Hon. RUSSELL ELLZEY,
Member of Congress, Washington, D.C.

DEAR MR. ELLZEY: We find in checking cotton contracts that estimates are in many cases very much too high, and we believe that unless there is some measure of compulsion employed that these producers will not agree to the reduction necessary that our county may be accepted.

We further believe that unless something is done to prohibit the use of fertilizer, that if we have a normal season, cotton reduction will not be lowered materially by the 1934 cotton-reduction program. We have discussed this matter with numbers of farmers, and we find that in almost every instance that these farmers are of the same opinion that we are voicing in this letter; therefore we earnestly urge that something be done to prevent the failure of the 1934 cotton-reduction campaign.

Yours very truly,

L. D. STARNES,
Chairman.
M. R. SMITH,
C. A. SHELTON,
County Control Committee.
JAMES H. PRICE,
County Agent.

In addition to this letter I have received a telegram from Mr. A. D. Stewart, vice president of the Mississippi Cooperative Cotton Association. In part he stated that sentiment of 80 percent of the cotton farmers in Mississippi favor the Bankhead bill. Also, in his communication in behalf of the membership of this association of the farmers of this State, he urged me to use my influence in behalf of the Bankhead bill.

I should like to call to your attention what I believe may happen if the baleage control is not enacted into law. First of all, I think an overproduction of cotton for the year of 1934 is clearly evident. In the second place, instead of receiving the present price of 12 cents or more per pound for cotton, in my judgment, we will again be paid from 4 to 5 cents per pound for our cotton. This would absolutely destroy the purchasing power of the people throughout the entire Southland.

Third, many industries of the industrial sections would be forced to close their doors because the people of the Cotton Belt would be unable to purchase their manufactured products. Gentlemen, I believe, therefore, that you Representatives from the industrial sections should be vitally interested in the success of this program and the passage of the Bankhead bill.

Fourth, if the present cotton program should collapse, and I am fully convinced that it will unless we have definite baleage control, I fully believe that many farmers now engaged in the cotton industry would be forced into other industry. My section, and I dare say a good part of the entire South, is well adapted to the dairy industry.

If our farmers are forced out of the cotton industry, many of them will become interested in an enlarged dairy program. May I remind you of the fact that we have far shorter winters than you do in the dairy sections of Iowa, Minnesota, Wisconsin, and New York? Certainly we have cheaper labor. Hitherto our dairy farmers have been unable to finance their cooperative creameries, but under this Administration the Farm Credit Administration makes it possible for the dairy farmers to establish creameries and manufacture milk into all of its various products. You can readily see, therefore, gentlemen, that the South could become your greatest competitor in the dairy industry. I do not think that our farmers will be interested in such an extensive program if our cotton program continues to be such a splendid success. Otherwise we shall be forced to go to other industries, and I submit this thought, therefore, to you gentlemen who are interested in the dairy industry.

Mr. CULKIN. Will the gentleman yield?

Mr. ELLZEY of Mississippi. Yes; I gladly yield to the gentleman from New York.

Mr. CULKIN. Does the gentleman suggest that the Administration is going to finance the dairy industry in the South?

Mr. ELLZEY of Mississippi. May I say this, and I am sure the gentleman is familiar with the facts, that the Farm Credit Administration is organizing institutions which will finance groups of farmers and assist them in the marketing of their farm products.

Mr. CULKIN. But the gentleman does not mean that the Administration will increase the output of the dairy industry over what it is today?

Mr. ELLZEY of Mississippi. I mean to say that the administration plans to finance farmers in the production and distribution of farm products, and we are going to take advantage of these plans. I presume the people in the gentleman's section will do likewise.

Mr. CULKIN. Of course, we cannot raise cotton in our climate. It does not seem to me to be sound governmental policy to increase the dairy output in any portion of the United States.

Mr. ELLZEY of Mississippi. In that respect I am not arguing with the gentleman. I simply want to make certain that our cotton program is a success. If it is a success, we shall doubtless not be interested in engaging in the dairy industry on such an extensive scale.

Mr. CULKIN. If the South does go into the dairying industry, that will make them worse off than they are, because it not only intensifies the desperate condition of the northern dairymen but will increase their own misery.

Mr. ELLZEY of Mississippi. I realize that fact. We want a guaranty of a successful cotton industry, and that is what this bill provides in baleage control. Let us consider some of the objections offered thus far. It has been said that the Bankhead bill would be unconstitutional. In connection with every act of this recovery program thus far this has always been objection no. 1. Another gentleman said it would take away the liberty of the farmers. I wonder if that is a true conception of liberty. If we do pass this bill, we may have such so-called "liberty" as we had under that gentleman's administration when cotton was 5 cents a pound and wheat was 25 cents per bushel.

The whole truth of the matter is simply that this bill makes possible the cooperation of about 10 percent of our farmers who are now unwilling to cooperate. This is the whole crux of the matter. I appeal to you to pass this bill. Coming from a great cotton belt, as I do, I believe the passage of this act will make this program a continued success, and we shall have happiness and the restoration of purchasing power. Our people in the South will march forward with contentment and prosperity.

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield the gentleman from Georgia [Mr. BROWN] 4 minutes.

Mr. HOPE. Mr. Chairman, I also yield 4 minutes to the gentleman from Georgia.

Mr. BROWN of Georgia. Mr. Chairman, my district produces more cotton by 20 percent than any district in Georgia. My district is situated in the piedmont section of Georgia, and the cotton produced in the piedmont section of Georgia and the Carolinas is considered the best staple cotton of the South. We all realize that the main money crop of the South is cotton and the second largest money crop is cottonseed.

The present Bankhead bill does not materially affect any class except the cotton farmers of the South; and if the farmers of the South want this bill enacted into law, I feel that other sections of the country should not object. I am not in favor of any legislation which would foster interest in one section of the country and at the same time paralyze the struggling energies of another section of this country. On the other hand, I feel that when one section of the coun-

try can be really benefited by legislation which will not retard the progress of any other section, the Members from other sections should join in making laws to benefit the section affected. [Applause.]

During my campaign for election to Congress last summer, when the voluntary cotton-control program was first announced, I did not think the cotton farmer would cooperate as he should, but I am glad to say that at least 90 percent of the farmers in my district followed the suggestion of our great President and plowed up their cotton. These same people, almost unanimously, after the cotton was gathered borrowed 10 cents per pound on the cotton as collateral. I repeat that almost to a man they followed our great leader. Whether or not the voluntary plan in the future will be successful is problematical. Mr. Oscar Johnson testified before the Committee on Agriculture that he thought it would and that the production of cotton probably could be reduced to 10,000,000 bales by the voluntary plan. But a great majority of the people believe unless the Bankhead bill is passed that cotton will decrease as much as 3 or 4 cents a pound immediately after defeat of the bill.

The large and small mills of the country are trying to get information as to the probability of this bill passing; and, if not, they are anxious to rush the cotton on the market at once, as they believe cotton will immediately be reduced in price. I was hopeful that the voluntary plan of production would be tried out for this year without resorting to compulsory reduction; but such a large majority of the cotton growers of the South are asking for the compulsory method, I shall support the Bankhead bill, though there are many objectionable features in it which I hope will be eliminated.

If the essential features of this bill are not enacted into law, I am satisfied the speculators of the country will put cotton down 3 or 4 cents a pound overnight. Whether the voluntary plan will work or not, it looks like, under the present circumstances, in order to hold cotton at the present price, the expedient thing to do is to enact the principles of this bill into law immediately.

I believe that the cotton average for 15 years would be fairer than the cotton average for 5 years, in view of the fact that the boll weevil visited some sections of the Cotton Belt before others 15 years ago, and within the 15-year period they have destroyed cotton in practically every section of each State. Some States, like Georgia and the Carolinas, began to diversify and leave cotton to some extent. For this reason I am afraid the 5-year average would be an injustice to some sections of the Cotton Belt.

The main problem of the country 1 year ago was to increase the purchasing power of the people and to put idle men and women back to work. To do this meant that the whole country must work as a unit. Every group, every individual, must cooperate for the common good. As a means of accomplishing this Nation-wide drive to bring back prosperity the Recovery Act was made a law. It is undoubtedly the boldest step that this or any other Government has ever taken to protect its citizens from ruin and starvation. It was labeled as an experiment in the beginning, but with its leaders very positive and concrete results are being obtained already.

In the 1 year that has elapsed since the inauguration of our President, business activity over the country has increased to a very large degree, and over 4,000,000 people have been reemployed. Weekly wage payments have risen, thereby increasing the real purchasing power of workers by a large percent. Our whole industrial machinery has taken on new life, and is throbbing like a great ship leaving the perilous narrows and entering the open sea of prosperity. The completion of the major codes under the Recovery Act has contributed immensely to this progress. Many enthusiasts proudly and unhesitatingly proclaim the Blue Eagle, emblem in the new deal, to be in reality the blue bird of happiness. Average minimum wage rates have risen from about $7 to nearly $15 per week, and the weekly hours have dropped from 55 or 60 to 40 and less. It is estimated that over 5,000,000 people will be reemployed simply by the operation of all the codes. This shows what united effort can do. This shows what courage in the face of depression can accomplish. This shows the folly of accepting anything as inevitable fate. In the few brief months we have demonstrated that by working together under fine leadership we have the ability to win and maintain prosperity. [Applause.]

But it must be remembered that despite these pleasing and significant gains, they have been confined to preliminary encounters with the forces of depression. The real battle lies ahead. In spite of the truth that business throughout America is improving, the long pull is certainly ahead. Abuses of long practice and flaws of our economic policies cannot be eradicated by the simple act of signing a bill or of writing laws on our statute books. Human nature is not going to be changed as by a miracle, though it can be altered gradually by necessity to conform with the law of self-preservation. Just because the rules of the game have changed does not mean that anyone has been excused from playing. There is no magic in the N.R.A.; there is nothing in it that will automatically lift us from the depths of depression to a land of abundance where there will be no work to do and where our worries will cease. It is a man-made plan, but it will work if we want it to work. The same sound principles of buying and selling will be applicable under the new deal. Men and women will continue to buy good wares. Keen thinking, analytical judgment, and decisive action will be just as much or more in need than before. They will never be affected by a moratorium.

When the President was inaugurated there were about 12,000,000 men and women in this country who were walking the streets in an agonized search for means of livelihood. They had to be helped and helped quickly.

The second phase of the National Recovery Act planned to give these unemployed some work to take care of them temporarily. This was the purpose of the $3,300,000,000 Public Works fund. This money was turned into channels of trade to act as a stimulant, or primer, until the complete program has been put into effect. Of course, we knew it would take time for every section and every industry of the country to realize equal benefits from the remedies. As our President said in his speech to the American people a few months ago, "We must be patient until the whole program has been put into operation." Working out a plan for the whole country, so that every class and every industry will be benefited alike, presents more difficult problems than we sometimes think in our impatience. We need to continue in our efforts to bring about a permanent prosperity.

The public is always anxious to see things move rapidly. But when the destiny of a nation is concerned, when the lives of people are at stake, it is never wise for a leader to take steps until he knows he is right. This wise policy accounts in some part for the delay in the expenditure of some of the money that was appropriated for Public Works. Another reason for delay in the actual spending of this huge sum is that it was necessary to set up an organization to handle the funds and to prepare a comprehensive program. In order to select the most useful and valuable projects the Administrator has established an organization that reaches outward into every State. The State, county, and city projects must first be submitted to and approved by the State engineers. Then they must be carefully studied by the State advisory boards, the regional advisors, and finally by examining boards at Washington before they are finally adopted. There are obvious good reasons for such an organization, even though it may take longer for these funds to reach the pay envelops of work-hungry citizens.

The authority in power ruled that each project must be socially desirable and that it should contribute something of value to the community, and that it must not be a useless, temporary project that is undertaken simply to supply work for the unemployed.

One phase of the new deal that is perhaps of more vital interest and concern, especially to the cotton farmers of the South, is that which deals with the agricultural situation.

In his speech to the Nation on July 24, 1933, President Roosevelt said that the farm act—

Is based on the fact that the purchasing power of nearly half our population depends on adequate prices for farm products. We have been producing more of some crops than we can consume or can sell in a depressed world market. The cure is not to produce so much.

There in a few words he gave the cause and the remedy for the ills of the farmers. With half the people of the United States dependent directly or indirectly on agriculture for a living, it is a very evident fact that the prosperity of practically every business is dependent on agricultural prosperity, and that this depression cannot and will not definitely end until the prices of farm products rise high enough to give the farmers some profit over the cost of production. All former depressions have ended when the farmers had money to spend for things besides the bare necessities of life. This depression that we are passing through will be no exception.

It is true that the farmers have gone on year after year producing more than the world could consume. Overproduction and large surpluses of farm products presented one of the major problems that the administration had to solve before anything could be done to help the farmers out of their plight. Acreage was reduced last year after the cotton crop was planted, but the situation has not been helped as much as was expected. In spite of the reduced acreage we have had a large crop, and cotton prices have lagged below what was anticipated and are certainly all out of proportion to the prices of manufactured products which the farmer has to buy. Something must be done to level up these prices. It seems to me that the only permanent solution of the agricultural problem is through some form of controlled production. However, I think the present Bankhead bill is rather drastic and should be amended in some particulars. For instance, I think it would be better to limit this production to 1 year, and if it is successful it can be extended by the next Congress in January. I also think the tax feature should be eliminated and the surplus cotton over and above the allotment should be held and not ginned and placed on the market as a part of the allotment for each individual cotton grower. This would accomplish the same end and would not be quite as harsh a remedy as the tax feature of the present bill.

A great majority of the farmers in my district seem to be in favor of the principles of the Bankhead bill, and I appreciate the fact that the cotton farmers of the South are the most independent people, in thought and action, you will find anywhere in this country, and for this reason it would be much wiser to control the production by having the cotton raised above the allotment for each individual farmer carried to the next year as part of the allotment for the next year rather than paying the penalty of taxing the same.

On the opening day of this session of Congress I introduced a bill (H.R. 6145) providing for the establishment of growers' cooperative commodity markets for the sale, exchange, storage, and processing of all agricultural, horticultural, poultry, livestock, and dairy products.

My bill fits in with the present program of the Government for curtailment of production of cotton and other commodities in different sections of the country, by providing for the marketing of crops, particularly perishable products, produced on land taken out of cotton production or production of other commodities which the Government is trying to reduce, especially for the small producer.

In my own State 1,250,000 acres of land is being taken out of cotton production. Part of it is some of the best land in the State. It cannot always be idle. This situation is true in many other States of the Union.

My bill provides for the operation of markets by the growers as distinguished from markets operated by business men and municipalities. This bill, if enacted into law, in my opinion, would be more beneficial than anything else that could be done in the present crisis not only to the cotton growers but also to the farmers in every section of this Nation who have only one main money crop.

Another handicap under which the cotton farmer has been forced to work for many years is the fact that his product was sold in a competitive market, and he was forced to buy in a protected market. I understood that the processing tax was primarily intended to correct this condition by giving to the farmer this tax which was levied upon the consumer. This is the same form of protection that has been given to the manufacturers for years and years through the protective tariffs. I do not think that the floor stocks should have been subject to this tax and perhaps it would have been better for the farmers and the mills, especially the small mills, if the collection of this tax had been postponed until this year, and this fund borrowed from the Reconstruction Finance Corporation until that time. If the processing tax remains, we must fight for a tax on cotton substitutes to keep the buying public from turning away from cotton.

Our program cannot succeed when half the buying public is broke. The farmers must have a restored purchasing power before the factories can operate profitably, and before the merchants can do an increased business, and before we can have a permanent prosperity.

But regardless of the ultimate results of the various and untried plans that are being worked out for our salvation, we can say today that the operation of the National Recovery Administration has demonstrated again the extraordinary capacity of the American people to organize and govern themselves. It has demonstrated that we need not drift helplessly or surge impatiently into revolutionary violence as long as we have leaders with the vision and the courage to mobilize the energies of the American people.

Mankind must recognize the necessity for change in everything. We cannot stand still. Cicilization is going forward or it is going backward. Those who refuse to tolerate change or admit that it is inevitable soon find themselves alone, hopelessly lost, floating in a sea of bewilderment.

My friends, I am not pessimistic about the outcome of the policies of the present administration. I have faith in our President and I have faith in the American people. And if the administration of Franklin D. Roosevelt made no other contribution to our history he would deserve imperishable fame as the President who restored the faith of the American people in themselves. [Applause.]

Let us make no footsteps backward. Let us go forward, and with our eyes fixed upon the stars of determination and hope, hand in hand and heart to heart with our great and heroic leader, Franklin D. Roosevelt. Let us strive to insure the life, the progress, and future greatness not only of Georgia and the other Southern States, but of all the States of the American Union, and point the way to prosperity and happiness and peace to the human race. [Applause.]

Mr. HOPE. Mr. Chairman, I yield 15 minutes to the gentleman from Minnesota [Mr. CHASE].

Mr. CHASE. Mr. Chairman, I ask unanimous consent to extend my remarks and to be permitted to quote very briefly from a few statements, campaign platforms, and certain speeches.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

COMPULSORY CONTROL OF PRODUCTION

Mr. CHASE. Mr. Chairman, ladies and gentlemen of the Committee, the question which overshadows all other questions pertaining to this innocent-appearing cotton bill is whether or not the Congress shall commit America to the principle of compulsory control of production.

That question must be met, faced squarely, and answered by this House on this bill.

The personality of the bill's sponsor before this body is not an issue here. If it were, the measure would carry unanimously, so great is the respect and esteem felt by all Members for the distinguished gentleman from Alabama [Mr. BANKHEAD]. I would welcome the privilege of supporting any measure sponsored by him.

The possibility of pleasing the cotton growers is not an issue. Of course, Members will help gladly in a constructive program to assist the cotton States, and we of the Middle West would be happy to go along with the Representatives of the cotton States on any worthy measure. But how can the bill be amended to a point where we honestly and honorably can support it? The proposal is frankly an experiment, which may or may not succeed, and conceivably may harm rather than help the South.

I wish this afternoon to speak very briefly on one point only, and that is the principle of compulsory control of production.

I have a great admiration for the chairman of my committee, the Committee on Agriculture. My admiration was never greater than when I heard him talk for 35 minutes this afternoon, and during that address, using all his splendid oratorical ability, he did not say one thing in support of this particular bill.

But for 15 minutes he excoriated the Representative of the State of New York [Mr. WADSWORTH], and I respectfully declare that the more men in this Chamber of the charming personality and most unusual ability of the gentleman from New York [Mr. WADSWORTH], the greater will be the worth-while improvement in this body. It is a privilege to be associated with him in the House. [Applause.]

Here is what the distinguished chairman of my committee did say:

> This bill is necessary, or some step is necessary, in order to handle this situation.

The chairman of the committee made the statement that this question was submitted to the cotton farmers of the South and 95 percent of them endorsed it. Manifestly the statement was a slip. It was submitted to 1 percent of the cotton farmers of the South, and a little more than half of that 1 percent answered, and 95 percent of that one half of 1 percent endorsed some plan of production control, not this plan.

In excoriating my distinguished colleague from the State of New York the chairman said, "Do you want the liberty of the racketeer?" I answer, "No"; we want the liberty of our forefathers; we want the liberty guaranteed us by every major candidate of the Democratic Party, and in every national platform of the Democratic Party.

Then, the gentleman discussed little pigs and told us that our brilliant colleague from New York shed tears in his shoes over the slaughter of the little pigs. Just what was the purpose of the assertion, what was its value, and how does it justify compulsory control of cotton production?

I should like, if I may, to devote my attention squarely to the one main point in the bill under discussion, presenting the argument under two main heads. First, the evolution of the principle of compulsory control from the original socialistic economic philosophy; second, its violent conflict with the accepted ideals of the Democratic Party.

No one claims that any increased emergency exists, although Representatives from the cotton-producing States may know whether or not one is imminent.

Also the matter of the measure's constitutionality may be presented by others.

The purpose of this address is to discuss frankly the wisdom and the need of this country now—today—abandoning the fundamental principle of voluntary action that has served it since colonial days, and substituting therefor the principle of compulsory control of production, or autocratic regulation by a designated bureau, of the business of free American citizens, who until this time have been deemed independent as well as free.

The proposed action would constitute the first definite step from the highway America thus far has traveled, down the unfamiliar road that points to Soviet economic planning and leads to and beyond State socialism.

Consider briefly the economic philosophy of socialism as it has developed from the days of Karl Marx.

In his Communist Manifesto Marx declared:

> You are horrified at our intending to do away with private property. But in your existing society, private property is already done away with for nine tenths of the population; its existence for the few is solely due to its nonexistence in the hands of those nine tenths. You reproach us, therefore, with intending to do away with a form of property, the necessary condition for whose existence is, the nonexistence of any property for the immense majority of society.
>
> In one word, you reproach us with intending to do away with your property. Precisely so; that is just what we intend.

In A History of Socialist Thought, Laidler says of Fabian socialism:

> PUBLIC CONTROL PROBABLY FIRST STEP
>
> If we were sensible we would bring these combinations under common ownership immediately. But the human race generally contrives to exhaust every device which stupidity can suggest before the right line of action is ultimately taken. I think therefore, that some probably inefficient method of taxation and public control over combination will, as a matter of fact, be adopted. Such legislation will immensely restrict individual liberty in certain directions, will produce much friction, and may possibly hamper production; until by a long series of experiments men shall discover what is the most reasonable way of acquiring for the community as a whole the wealth which it produces. But in any case individualism or anything whatever in the nature of laissez faire goes by the board.

Later, in discussing post-war socialist thought, Laidler says:

> THE ECONOMIC SCHEME
>
> Kautsky discusses at length the so-called "economic scheme" proposed after the war by Rudolf Wissell and Dr. Otto Neurath. Under their plans the individual capitalist would remain the owner and manager of his business, but he would not be permitted to decide what he would produce.

Is not the "economic scheme" referred to a reasonably exact statement of the real principle offered the country in the guise of compulsory control of production in this bill we are discussing here this afternoon?

Now turn for a moment from the socialism of Germany to that of Russia. Valerian Obolensky-Ossinsky says on page 97 of Socialist Planned Economy in the Soviet Union:

> The plan for the specialization of agricultural production has in view the distribution of crops on a scientific basis, so that the most profitable crops and the most valuable branches of agriculture from the point of view of the national economy will be rationally introduced. The distribution and specialization of state farms and machine and tractor stations is subordinate primarily to the plan of the distribution of agriculture.

Now from Russia come back to the socialism of the United States. I quote from the Political Science Quarterly of December 1928, and invite the attention particularly of the gentlemen from Iowa:

> It is not generally remembered in discussing farm relief that we are now on the verge, probably, of a vast technological reconstruction of the industry. Ancient axioms, which have seemed almost native to the soil, are being called in question. The corn crop, for instance, the king of all American farm products, may very well disappear. Its cultivation contributes to erosion; it is costly to raise; it has new but formidable enemies, such as the borer.

The author was R. G. Tugwell, of Columbia University, and I wonder if Professor Tugwell in preparing the statement quoted deemed it his "social duty to encourage" the passage of corn from American agriculture and to promote a policy of bureaucratic control of agriculture through compulsory control of agriculture.

And now let us turn to the cotton-growing State of South Carolina. In his book, America Goes Socialistic, published in January of this year, Henry Savage, Jr., says:

> Less patent but really more pregnant with socialism is another quality of our bureaucracy—that of having delegated to it (contrary to the Constitution) the power to make regulations having the force of law. Many of the bureaus have such legislative powers. * * * And already a great bureaucracy is in the making to administer the Industrial Recovery Act, another under it to control the oil industry, another to administer the farm measures, and yet another to care for the execution of the provisions of the security regulation bill.
>
> This delegation of law-making authority is called pregnant with socialism because it means that self-regulating bureaus, not directly answerable to the voters, are put in a position to exalt themselves, to gather unto themselves more power, greater efficiency of administration without fear of the individual or his legal rights. It is pregnant with socialism because it involves a confession on the part of the legislatures that parliamentary government has seen its day; that such a form of government cannot even pretend to consider all the legislation called for by the functions undertaken by the Government; that the rapidity of change and intricacy of our modern social and technical order call for a new

form, or revolutionary changes in the old form of government, on the legislative side at least. No better illustration of this statement can be adduced than the special session of the Seventy-third Congress in the spring of 1933. Almost every measure passed by it was a complete delegation of its powers in the matter.

If this is the noncritical opinion of an authoritative writer on socialism upon the legislation enacted by this Congress prior to this day, what must his conclusion be should we write into American statutory law the principle of compulsory control of production?

Is it necessary for us to take this road? Was the economic philosophy of our fathers a mistake? Are changing conditions in modern life and American agriculture producing problems beyond our thinking? And how do the American people regard the proposals made to this Congress?

To the last question the following editorial from the February 23 issue of the Norman County Herald, published at Ada, Minn., is an arresting answer:

REGIMENTING THE FARMERS

We have heard rather disquieting reports from Washington about some ideas for the closer regulation of agriculture, which are said to be moving in the minds of some of the people who have had a great deal to do with the Agricultural Adjustment Administration.

We are prepared to believe almost anything these days, but we can hardly take seriously the belief that the Government is planning to set up as complete and drastic control over farming as exists in Soviet Russia. If the rumors that reach us are true, the talked-of plans would involve a complete regimentation of all farmers. Nobody would be permitted to grow any crop for market without first having a Federal license; he would be fined if he violated any of the Federal regulations, and the Government could go into court and get an injunction against him if he persisted in sowing oats when his license permitted only barley, for example.

We are told that these proposals have emanated from some of the "legalistic" minds in Washington and that they are being seriously discussed. We can understand the passion for planning and regulating human affairs; most thoughtful youngsters share it, before they have lived long enough in the world to understand human nature and to realize that human affairs are not conducted according to plan and that people generally resent being regulated. If this were a logical world, it would be easy to run it. It is a perfectly illogical world, in which the principal obstacle to smooth running is the obstinate persistence of most of us in doing what we like in the way we like to do it.

We do not think American farmers are ready to be relegated to the position of serfs or of robots.

And this is unbiased, nonpolitical comment upon the principle of this bill which you gentleman plan to pass, committing this country to regimentation of agriculture by instituting for the first time in American history a program based upon the application of compulsion in regulating production of an agricultural commodity.

Now, from this road of socialistic planning and compulsory control to which America has been invited, turn back for a moment to the old, familiar, traveled highway of our fathers.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. CHASE. It is a real pleasure to yield to the gentleman.

Mr. OLIVER of Alabama. Was the gentleman in favor of the McNary-Haugen bill?

Mr. CHASE. With the permission of the gentleman from Alabama, I shall devote my attention exclusively to this one point of compulsory control, but I shall be happy to have him make a statement at this point if he desires to do so.

Mr. OLIVER of Alabama. The reason I asked the question was not to interject an immaterial issue, because I feel that it is a pertinent inquiry at this time in view of the fact that the gentleman has just quoted one who is deeply interested in farm legislation. I felt that it was not only pertinent but proper to suggest to the farm leaders of the West that those of us from the South who are interested in farm legislation gave very hearty support to the McNary-Haugen bill, the provisions of which I know the gentleman is familiar with. That bill had the united and strong support of the farmers of the West, and Members from the South supported it on that account even though the bill was not one that primarily was drafted at the instance of Southern farmers.

Mr. CHASE. It has been a pleasure to yield to the gentleman from Alabama.

Mr. CHRISTIANSON. Will the gentleman yield to me?

Mr. CHASE. Certainly; I am happy to yield to my colleague.

Mr. CHRISTIANSON. What was the newspaper from which the gentleman quoted?

Mr. CHASE. The name of the paper is the Norman County Herald, published at Ada, Minn., and the editor is Mr. W. C. Lee.

Mr. CHRISTIANSON. That is a Farmer-Labor newspaper, is it?

Mr. CHASE. I do not say that it is a Farmer-Labor newspaper, or Democratic or Republican. I would call it a Progressive newspaper.

Mr. CHRISTIANSON. How does the gentleman distinguish between the policy of this bill and the policy of the Farmer-Labor Party?

Mr. CHASE. I make no effort to distinguish between them.

Mr. McFADDEN. Will the gentleman yield?

Mr. CHASE. I gladly yield to the gentleman from Pennsylvania.

Mr. McFADDEN. I want to ask the gentleman whether he is familiar with the bill which is in the offing and will be presented to Congress in the near future, to amend the A.A.A. Act. I saw a typewritten copy of that bill, and it provided for a licensing system, limitation of acreage, limitation of farm production, and fixed a penalty.

Mr. CHASE. I am somewhat acquainted with some features of the bill, and desired to discuss some prospective legislation in connection with the pending legislation but decided that the bill immediately before the House is sufficient for me to bring to your attention the problem, even speaking exclusively on this one point.

Mr. McFADDEN. Let me say that there is a great similarity between this bill and that bill, and I am informed and believe that the two bills originated under the direction of Mordecai Ezekiel and Mr. Tugwell.

Mr. BANKHEAD. Will the gentleman yield?

Mr. CHASE. I yield with pleasure to the gentleman from Alabama.

Mr. BANKHEAD. I want to tell the gentleman from Pennsylvania that there is not a scintilla of basis for the suggestion he has just made. Neither gentleman he referred to, as far as I know, and I think I know something about this bill, has been consulted or had any hand in the preparation of this bill. The gentleman from Pennsylvania is drawing vividly on his imagination.

Mr. JONES. Will the gentleman from Minnesota yield to me?

Mr. CHASE. With pleasure, to my chairman.

Mr. JONES. I want to say that neither one of the gentlemen referred to by the gentleman from Pennsylvania appeared before the committee, and no member of the committee had anything to do with them, as far as I know.

Mr. McFADDEN. My authority is as responsible as anything that has been said on this floor. I want to call the attention of the gentleman to this significant fact. And that is that this bill fits into the form of government that is being advocated by Mr. Tugwell and those associated with him.

Mr. JOHNSON of Minnesota. Will the gentleman yield?

Mr. CHASE. Gladly, to my colleague. Will you wait just a moment for me to address the Chair?

Mr. Chairman, I have had my original time cut from 30 minutes to 15 minutes, and now ask unanimous consent to include in the extension of my remarks a platform statement of the President of the United States.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to include a platform statement in his remarks. Is there objection?

There was no objection.

Mr. CHASE. Mr. Chairman, I am pleased now to yield to the gentleman from Minnesota [Mr. JOHNSON].

Mr. JOHNSON of Minnesota. Mr. Chairman, for the information of my friend here, the Farmer-Labor Governor of Minnesota, Governor Olson, is for a compulsory reduction. He believes, as I do, that the voluntary is all right so far as it goes, but it should be compulsory, so that it would not allow chiselers to come in.

Mr. CHASE. That is a more serious charge than I would make about either my colleague or the Farmer-Labor Governor of Minnesota. It is particularly astonishing in view of the fact that compulsory control is also a doctrine of the Communist Party, which in its national platform is vigorously critical of the Farmer-Labor Party.

Mr. GLOVER. Mr. Chairman, will the gentleman yield?

Mr. CHASE. Gladly.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. CHASE. I yield myself 5 more minutes to answer these questions.

Mr. GLOVER. I am interested in the gentleman's statement in his discussion of Karl Marx and all of his kind up to now, and socialism; but for the life of me I cannot see the reasoning of his argument about this bill, which is democratic in its form, which provides that two thirds of those interested in this plan shall have it within their power to say whether or not this act becomes effective. Is not that Democratic and is it not Republican?

Mr. CHASE. The gentleman will in a minute. If he will listen now, he will hear some good Democratic doctrine.

Thomas Jefferson declared:

> The true foundation of republican government is the equal right of every citizen, in his person and property, and in their management.

Said Woodrow Wilson:

> The last thing that any American could contemplate with equanimity would be the introduction of anything resembling Prussian autocracy into the food control in this country.

The first plank in the Democratic platform of 1856 was:

> That the Federal Government is one of limited power, derived solely from the Constitution; and the grants of power made therein ought to be strictly construed by all the departments and agents of the Government; and that it is inexpedient and dangerous to exercise doubtful constitutional powers.

The Democratic platform of 1892 enunciated this policy:

> * * * we solemnly declare that the need of a return to these fundamental principles of a free popular government, based on home rule and individual liberty, was never more urgent than now, when the tendency to centralize all power at the Federal capital has become a menace to the reserved rights of the States that strikes at the very roots of our Government, under the Constitution, as framed by the fathers of the Republic.

In no platform before 1856 or since, did the Democratic Party ever declare for or suggest such a program as compulsory control of production. The agricultural plank in the 1932 platform was as follows:

> We favor the restoration of agriculture, the Nation's basic industry; better financing of farm mortgages through recognized farm-bank agencies at low rates of interest on an amortization plan, giving preference to credits for the redemption of farms and homes sold under foreclosure.
>
> Extension and development of farm cooperative movement and effective control of crop surpluses so that our farmers may have the full benefit of the domestic market.
>
> The enactment of every constitutional measure that will aid the farmers to receive for their basic farm commodities prices in excess of cost.

That is definite, is it not? There is nothing there about compulsory control of production, is there?

With the tremendous power granted to it by the American people, the Democratic Party necessarily has the corresponding duty to shape legislation in accordance with American ideals, the pledges of its platforms, and the promises of its presidents.

In his speech at Topeka, Kans., September 14, 1932, Governor Roosevelt said this:

> I want now to state what seem to be the specifications upon which most of the reasonable leaders of agriculture have agreed, and to express here and now my whole-hearted accord with these specifications.
>
> * * * * * * *
>
> Fourth. It must make use of existing agencies and so far as possible be decentralized in its administration so that the chief responsibility for its operation will rest with locality rather than with newly created bureaucratic machinery in Washington.
>
> * * * * * * *
>
> Sixth. The plan must be insofar as possible, voluntary. I like the idea that the plan should not be put into operation unless it has the support of a reasonable proportion of the producers of the exportable commodity to which it is to apply. It must be so organized that the benefits will go to the man who participates.

At Baltimore on October 25, 1932, Governor Roosevelt said in part:

> Of course it is absurd to talk of lowering tariff duties on farm products. I declared that all prosperity in the broader sense springs from the soil. I promised to endeavor to restore the purchasing power of the farm dollar by making the tariff effective for agriculture, and raising the price of farmers' products. I know of no effective excessively high tariff duties on farm products. I do not intend that such duties shall be lowered. To do so would be inconsistent with my entire farm program, and every farmer knows it and will not be deceived.

In his inaugural address President Roosevelt said:

> The basic thought that guides * * * is the insistence, as a first consideration, upon the interdependence of the various elements in and parts of the United States—a recognition of the old and permanently important manifestation of the American spirit of the pioneer. It is the way to recovery. It is the immediate way. It is the strongest assurance that the recovery will endure.

And last week he said:

> I am always a little amused and perhaps at times a little saddened—and I think the American people feel the same way—by those few writers and speakers who proclaim tearfully either that we are now committed to communism and collectivism or that we have adopted fascism and a dictatorship.

That surely does not sound as though the President favors the Soviet system of compulsory control of cotton production or the regimentation of the cotton farmers. On the contrary, it is apparent that from Jefferson to Roosevelt, in its platforms and the public pronouncements of its Presidents, the Democratic Party has stood for a national ideal, based on free, independent, voluntary action by individuals and States.

Now bring the argument to the basic principle in this bill under discussion here.

On February 16 the President wrote the Chairman of the Committee on Agriculture, urging "reasonable assurance of crop limitation" and referring to "some form of control." He did not mention compulsory control and did not endorse compulsory control.

Mr. McFADDEN. Mr. Chairman, will the gentleman yield?

Mr. CHASE. With pleasure.

Mr. McFADDEN. In view of what the gentleman has just said, I recall that Theodore Roosevelt, the year that he passed on, made a statement to the effect that Felix Frankfurter is the most dangerous man in the United States to our form of government.

Mr. CHASE. Mr. Chairman, I had intended to confine my later observations entirely to citation of Democratic authorities, but find that the Farmer-Labor Party and the Republican Party have been introduced also. Please note that this has been by no act of mine.

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. CHASE. It is a pleasure to do so.

Mr. MAY. I should like to suggest something here and call the attention of the gentleman from Texas [Mr. JONES], and the author of the bill [Mr. BANKHEAD] to this. If the gentlemen in the Department of Agriculture, Mr. Tugwell and Mr. Ezekiel, are to have something to do with the enforcement of this legislation, what is the reason for disclaiming any connection of theirs with the preparation of of the bill?

Mr. JONES. I do not know that there is any reason for it except that it is not so.

Mr. CHASE. Mr. Chairman, permit me now to finish my statement.

The spokesman for the administration on this measure should be the Secretary of Agriculture. If this bill becomes

law, responsibility for its enforcement will rest on him. Does he favor the bill? Does he favor the radical, socialistic innovation of compulsory control? Let him answer. I quote from page 42 of the committee hearing:

The CHAIRMAN. Mr. FLANNAGAN has a question, Mr. Secretary.
Mr. FLANNAGAN. Mr. Secretary, I should like to know what you think of compulsory control as a policy of our Government.
Secretary WALLACE. Mr. FLANNAGAN, I believe you have asked me such a leading question that I am going to ask to be excused.
Mr. FLANNAGAN. I will excuse you from answering it. To say the least, it is embarrassing. I believe it is a dangerous policy, myself.
I believe, as a matter of policy, it is dangerous for us to adopt a system of compulsion affecting matters of this kind. Now, do you not think it would be much better, as suggested by Chairman JONES, to leave the voluntary plan in effect, and do you not think that we could accomplish the same result, as Mr. JONES suggested, by a minor amendment to the present law?
Secretary WALLACE. Well, it has been my hope that we could.

Does that show much enthusiasm for compulsory control on the part of either the Secretary or the Congressman?

In conclusion, please remember that this socialistic innovation of compulsory control is unnecessary.

This is true because there is no pressing emergency.

It is true because voluntary action is the American way. The American farmer is not a serf. And voluntary control of cotton production has proved and is proving successful.

Again let the hearings provide the proof. I quote from three men—a cotton producer, a member of your Committee on Agriculture, and the Secretary of Agriculture.

First, on page 47, from the statement of Mr. Oscar Johnston, farmer and cotton producer, Bolivar County, Miss., and also connected with the Department of Agriculture as manager of the Nation's cotton pool:

The voluntary plan, in my judgment as a producer, is so attractive that no producer can afford to stay out. It is so attractive, in my judgment as a business man and a farmer, that no man can afford to deprive himself of the certainty of rental payments and of the certainty of parity prices for so much of his 1934 crop as he has contracted to raise; that no man can afford to take the chance or hazard of the uncertainty and risk that must be taken by the man who stays out.
I believe that we can get by voluntary action everything that is asked for by the present bill.

Second, on page 42, the gentleman from Arkansas, Judge GLOVER, said this:

I think you can depend upon practically all of the farmers signing up; they have signed up in my community and in my State, and I do not know of but very few who will not sign up, and I think the plan is working very well.
I understand that practically all of them have signed up under the present plan and that there is no complaint. At least, that is true in my State.

Third, on page 38 of the hearing, is this informing colloquy between the ranking Republican member of the Committee on Agriculture and the Secretary of Agriculture:

Mr. HOPE. Do you consider that your whole production program or reduction is going to fail unless you do adopt some legislation of this type which will bring about compulsory control?
Secretary WALLACE. I have much more faith in the voluntary approach than many people have.
Mr. HOPE. You feel, then, that the voluntary plan has been a success?
Secretary WALLACE. I think it has been a rather remarkable success.

Please not the unanimity of opinion; the cotton grower who is absolutely an expert, the representative on the committee from the cotton-growing State of Arkansas, and the Secretary of Agriculture, who must administer the act, are all in accord that the voluntary plan is a success.

Their position was endorsed in this Chamber Saturday by the gentleman from Mississippi [Mr. DOXEY] when he declared "the voluntary plan has been a wonderful, wonderful, splendid success."

If voluntary action is securing results, compulsory action is unnecessary, and there exists no sound reason for introducing in liberty-loving America the Soviet plan of regimenting agriculture even to the extent of enacting a law to provide compulsory-production control.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

Mr. CHASE. Mr. Chairman, I yield myself 2 more minutes.

In summary, it is conceded that no pressing emergency confronts the cotton industry just now, and it is proved that the principle of voluntary control has been a remarkable success.

Then, why this bill?

Why give to a Federal bureau the power to regulate arbitrarily the business of a free American farmer and compel the farmer to comply with said bureau's ruling under penalty of $5,000 fine, 2 years imprisonment, or both?

Shall America abandon the ideals of its founders and kneel at the feet of the Soviet? Have results in Russia demonstrated beyond doubt the superiority of this socialistic-economic philosophy?

Even the depression does not justify a hasty step, so radical, so dangerous, and so unnecessary.

I yield back the remainder of my time. [Applause.]

Mr. JONES. Mr. Chairman, I yield 4 minutes to the gentleman from Minnesota [Mr. JOHNSON].

Mr. JOHNSON of Minnesota. Mr. Chairman, the bill now being considered by this body is of great importance; and although I intend to vote in behalf of this measure, nevertheless I did not intend to make any speech on the floor, feeling that the bill could be best presented by members of the Committee on Agriculture. However, I must rise and defend the party of which I am a member and the charges made by my colleague [Mr. CHRISTIANSON] of Minnesota, who is trying to drag the Farmer-Labor Party in this bill.

I am proud of the Farmer-Labor Party and the principles upon which it was brought into being. My colleague takes in considerable territory when he refers to communism and other "isms"; and may I state that if the principles upon which this great progressive third party were carried out by the two old parties, much of the misery and suffering would not have been visited upon this great Nation during the past 4 years. I am very happy that the Democratic Party has realized the present conditions, and it is indeed gratifying to see that many of the measures now sponsored by the Democratic Party and which are being made a reality were for many years urged by members of my party.

I am a farmer, and I believe that I know something about farming, raising and selling crops, and the problems that confront the farmers of today. I have served as an officer and have taken an active part in many cooperative organizations and know the stumbling blocks that face the farmers who market through cooperatives and the difficulties that we farmers have to face in order to be able to demand fair prices. I make these statements to support this legislation.

What would have happened to the hog prices if they had not killed off the little pigs and the brood sows a year ago? I wrote the Secretary of Agriculture and asked him how it was that the packers were allowed to put back the processing tax on the producer instead of the consumer, because they admitted they could not put it onto the consumer. They made their millions. That is one thing I ought to mention before I forget it. I understand from a report I got from the Department of Agriculture that they marketed almost 2,000,000 more hogs in 1933 than they did in 1932. What would have happened in 1934 if those pigs had not been taken out of the market, because they would have been ready at this time to come on the market?

(Here the gavel fell.)

Mr. JONES. Mr. Chairman, I yield to the gentleman from Minnesota 1 additional minute.

Mr. JOHNSON of Minnesota. I think perhaps the administration has made mistakes. There is no question about that, but they are trying to do what they possibly can. When the Republicans talk about communism in this country, I want to tell you right now there would be communism and socialism in this country much faster if this rock-ribbed Republican Party would have been in power a few years longer. [Laughter and applause.]

(Here the gavel fell.)

Mr. BOILEAU. Mr. Chairman, I yield 15 minutes to the gentleman from North Dakota [Mr. LEMKE].

Mr. LEMKE. Mr. Chairman, I am against the Bankhead bill, H.R. 8402, not because I am against the administration—I am for it—but because I am against bureaucracy and plutocracy. I am against the centralization of more power in the departments here in Washington. These departments are getting too internationally minded. I am against the international bankers' communism of Professors Tugwell, Mordecai Ezekiel, and Louis H. Bean, all of whom are now safely lodged in the Department of Agriculture, and from that point of vantage bravely talk about regimentation of the farmers. They little know the temper of the American farmer. When that temper breaks, it will break with a vengeance. These professorial communists are not the communists of the street, of the working people, who believe in the equality and brotherhood of all mankind, but are the self-assuming superior class-conscious communistic economists of the coupon clippers.

They talk glibly about the regimentation of agriculture and of subsistence homesteads. In their ignorance they would attempt to put 30,000,000 men, women, and children who live on the farms under the yoke and tie them to the Department of Agriculture so that this professorial staff could direct their very lives and their very existence and regulate their number by birth control. That is the ultimate outcome of this class of legislation. This bill would definitely commit this Nation to a policy of compulsory control of agricultural production. Such legislation I do not believe the Members of this House will approve.

I have always maintained that the person who does not know, and knows he does not know, is not dangerous to society, but the person who does not know and does not know that he does not know, is dangerous, and especially if he believes he belongs to the so-called "brain trust"; then he is not only dangerous but becomes a nuisance. We have altogether too many of that class in swivel chairs in the departments of government, who, in their ignorance, attempt to lord it over the people. There is too much bureaucracy and plutocracy.

The trouble is not so much with an overproduction of cotton as with a maldistribution—with underconsumption. Thousands of millions of our population could use more cotton, more clothes. Millions still go to bed without mattresses, without sheets, and without proper bedding, while millions are wearing cast-off, second-hand, germ-infested, disease-laden clothes which the Boy Scouts were asked by the administration a few weeks ago to gather and distribute to the needy. Why this inconsistency? Why not, in place of these filthy, germ-infested, disease-laden, second-hand clothes, take the cotton and let some of the 12,000,000 that are still unemployed manufacture it into finished clothes for these people? Why always go back end forward?

Under these conditions, it is foolish to talk of overproduction. The remedy is not by surrendering our markets to foreign countries. Markets once surrendered are seldom, if ever, recovered—and especially in this age of keen competition and substitution. Nor is the remedy by surrendering to the Department of Agriculture here in Washington not only the individual liberties of the farmers, but those of their children and the children to come. We are informed that the actual growers or producers of cotton are not in favor of this compulsory measure. Some of the landlords and landowners may be for it, but the tenants are not. The tenants realize that the tax burden provided for in this measure will be passed on to them by the landlords.

This is the beginning of the regimentation of the farmers—the beginning to license him—to tag him—to bring him under the absolute control of a bureaucracy here in Washington. It is the age of planned starvation and of planned rags. The more that are hungry, the more that are ragged, the more the farmer is asked to reduce the things needed to feed the hungry and clothe the poor. Sponsors of this program forget that the greatness of this Nation is due to the fact that we always had sense enough to produce an abundance of all things that we needed.

The next victim after cotton, in the regimentation of agriculture, will be the sugar industry. We produce only about 40 percent of the sugar domestically consumed, yet we are told that our sugar producers must be limited to their present acreage so that foreign producers may prosper—may sell us the other 60 percent. Our Department of Agriculture is apparently more concerned with the welfare of the sugar producers in Cuba, the Philippine Islands, and other countries than it is with the welfare of our own citizens.

We are informed that the Secretary of Agriculture feels that the beet-sugar industry in the North is a hothouse plant, and that the sugarcane industry in the South is commercially unsound. Therefore sugar production in the United States must forever be limited to 40 percent of domestic consumption. All this so that our Secretary may so journey, with his professorial staff, in foreign lands seeking foreign markets for our international manufacturers, such as the International Harvester Co. and the like—all this at the expense of American agriculture.

We are getting altogether too internationally minded. We have just established a new bank, the Export-Import Bank of Washington, with a capital of $11,000,000 furnished entirely by the Reconstruction Finance Corporation—that is, by the Government of the United States. The operation of this bank is limited exclusively to international trade—to barter away American agricultural markets by the use of American credit abroad and through limitation of production at home; by regimentation of the farmers; by surrendering our foreign markets and opening our home markets to foreign competition. Two other such banks are in the process of being created. These banks will undoubtedly loan millions of American dollars and billions of American credit to foreign countries to enable them to buy American-made goods from our international manufacturers and to enable them to more successfully compete with our farmers in our own domestic markets.

No wonder that we hear so much of the necessity of the regimentation of the farmers—of subsistence homesteads. Why not once more be American-minded first and internationally minded afterward?

If we must search for foreign markets, let us limit that search to the Western Hemisphere. We have had enough of European diplomacy, European hatred, European intrigue and war. Let us follow the advice of George Washington and mind our own business. The Western Hemisphere produces everything we need. It is not necessary for us to surrender our agricultural industry to Europe, Asia, or any other country. America and American youth will forever go forward, will expand. Let us develop our own markets and our own country. The deserts will forever grow smaller, not larger.

The Secretary of Agriculture is not now so sure that he can get away with compulsory control of agriculture. Testifying on this measure before the Senate Committee on Agriculture on January 20 last, he stated:

> I shall confine my remarks to the broad principles involved. I think most of you are aware that we have been very skeptical about approaching the agricultural problem in a compulsory manner. We hesitated to advocate bringing in powers of government in such a way as to have the appearance of licensing the farmers' fields, or controlling in a compulsory manner the movement of the products to market. That is the position that we took last spring, and we still feel that it would be very dangerous to invoke governmental compulsion except under rather unusual circumstances * * *.
>
> I have felt very strongly that when the time comes for abandoning the processing tax we should be exceedingly careful to see that the transition is handled in such a way that it will not be greatly destructive to agriculture. I have felt that the danger might be that the thing would be done so suddenly that we would fumble the ball during the transition.

The Secretary of Agriculture says that he is afraid that in abandoning the processing tax, they might fumble the ball. To fumble the ball seems to be the established practice in the Department of Agriculture. The Secretary, during the special session, opposed the Norris-Simpson amendment, which would have given the farmers of this Nation the cost of production with a reasonable profit for that part of their products domestically consumed. He suggested that parity

prices and processing and parity taxes would get them more. Let us see now whether or not he fumbled the ball.

On January 15, 1934, the average farm price for barley was 43.7 cents per bushel; the parity price was 71.8 cents. Did the farmer get the parity price? He did not. On the same date the average farm price for wheat was 69.4 cents per bushel, and the parity price was $1.025 per bushel. Did the farmer get parity? He did not. On the same day the average farm price on rye was 53.6 cents per bushel, and the parity price was 83.5 cents. Did the farmer get parity? He did not. And again on the same date the average farm price on flax was $1.614, and the parity price was $1.962. But why bother about flax? The Secretary of Agriculture says we have no business producing flax. He is going to regiment flax out of existence although we produce about 50 percent of our domestic consumption. We are going to surrender the production of flax to the Argentine and Russia in order to get foreign trade for the manufacturers of farm machinery.

But that is not all. On February 28, 1934, the Agricultural Adjustment Administration released notice to the distillers advising them of an additional parity tax as follows: On field corn a parity tax of 29.5 cents in addition to the 0.5 cent processing tax; on barley a parity tax of 30.8 cents; on rye a parity tax of 28.8 cents; on wheat in addition to the processing tax of 30 cents, a parity tax of 3.2 cents; on oats a parity tax of 15.3 cents. What becomes of this parity tax? Does the farmer receive it? He does not. Barley, rye, oats, and flax are not considered as basic commodities under the Agricultural Adjustment Act. Therefore, the farmers receive no benefit from this parity tax, but, on the other hand, if the law of supply and demand governs at all, the parity tax will reduce the price to the farmer somewhere near the amount of the tax.

The funds derived from these extra taxes are made to the Agricultural Adjustment Administration and are said to be available for benefit payments to farmers participating in crop production control programs, but since, as we have said above, barley, oats, rye, and flax are not considered basic commodities, the farmers producing these products receive no benefit payments. The parity tax tends to reduce the price paid to the farmers to the amount of the parity tax.

This parity tax has undoubtedly been used together with millions of dollars of the processing tax for the purchase of relief food for the poor and unemployed. The Wall Street Journal states this amount to be over $33,000,000. The farmer is made the goat and is now compelled to take care of the unemployed for whose condition the Wall Street gamblers in stocks and bonds are responsible. Surely, in the light of that record of the Agricultural Adjustment Administration we should hesitate to give them any more control over agriculture. We certainly should not permit them to regiment the farmers.

Let us now take a look at another picture in connection with the program of control of farm-crop production. I notice in a recent bulletin of the Department of Commerce, that the United States in 1933 imported 62,474,911 pounds of meat products of which 43,024,989 pounds were canned meats. That meat practically all came from the Argentine Republic. It required about 100,000,000 pounds of fresh beef, dressed weight, to yield 40,000,000 pounds of canned meat. Therefore, the imports in 1933 of this one item was equal to 100,000,000 pounds of dressed beef. This, in turn, was equal to 250,000 head of cattle.

Why continue to talk about reducing American production when at the same time we are deliberately importing the same commodity from other parts of the world? Why pretend that we are trying to raise the prices of our own farm products when at the same time, we are destroying the prices of our own farm products by importing the cheapest and lowest grade of the same product and using that as a basis for determining the price of our own product at home.

The report of the Department of Commerce, to which I have just referred, shows that this more than 40,000,000 pounds of canned beef had a foreign invoice value of only $2,812,806, or only about 6.25 cents per pound. Since it required 2½ pounds of dressed beef to produce 1 pound of canned beef, the prices of the dressed beef, without any allowance for processing, would be only about 2 cents per pound. Thus we pour into the United States literally the equivalent of 100,000,000 pounds of fresh beef in the form of canned beef with a starting price at not more than 2 cents per pound.

Of course this forced all of the low-grade old dairy and beef cows from American farms into the sausage market and reduced the prices on beef cattle all up the line, and thus destroyed the whole price structure. Why go through the foolish gesture of limiting American production when at the same time we are importing tremendous quantities of the same products? Why continue to make the gesture of improving the prices to the farmers while at the same time we are destroying the prices by importing tremendous quantities of the lowest grade of the article in question?

I have been reliably informed that some of this canned meat was actually purchased by the United States Government at the prices which I have indicated, and used by our Army and in the Civilian Conservation camps. Our American boys, working on American projects in the interior of this country, were fed the old cows and bulls from the Argentine, and this in competition, in many cases, with their own parents, who were producing American meats. This I am informed has now been stopped.

Thus, while one arm of the Government asked the farmers to reduce production and pretends that it will help to advance the price, another arm of the Government imports the article in question at the lowest possible price, thus setting the bottom level to which all of the domestic products are related. Undoubtedly, the bringing in of this canned meat, which represents more than 100,000,000 pounds of dressed beef of the lowest character during the last year, laid the foundation for the destructively low prices for the 7,000,000,000 pounds of beef produced in the United States. No wonder that American livestock was selling from 1 to 2.75 cents per pound last fall in our western markets. Under this show, are we in favor of the regimentation of agriculture here in Washington?

Let us look at another illustration. According to the monthly summary of foreign commerce of the United States, published by the Department of Commerce, we find that in the calendar year of 1933, while the Agricultural Adjustment Administration was proposing a reduction in the production of dairy products, and while the dairy industry was approaching destruction because of low prices, we imported 50,000,000 pounds of cheese. It would require between half a billion and a billion pounds of fresh milk to produce this amount of cheese. Why should we continue to talk about restricting the production of dairy products and continue to talk about raising the prices to the farmers and at the same time import tremendous quantities of the very same article at prices which mean the absolute ruination of the farmer?

I know that it will be said that this cheese, which is imported, differs in some slight manner from American cheese, and that our farmers do not know how to make the sort of cheese which we import. But the report of the Department of Commerce specifically sets forth that more than 10,000,000 pounds of this cheese was the common ordinary type of Swiss cheese which Members of Congress eat daily in the House restaurant every time they order a Swiss-cheese sandwich. And still our dairy farmers are told that they must kill every tenth cow only in order that we may import more Swiss cheese and other dairy products so that we may surrender our domestic market to foreign competitors.

May we not add one or two more practical illustrations of this ridiculous situation? The rice farmers of Louisiana, Arkansas, and Texas have been prevailed upon to cut down on production and let their lands lay idle. Yet, we find in this same report of the Department of Commerce, that during 1933 we imported over 30,000,000 pounds of rice. Again, the farmers of the Spring-Wheat Belt in the Northwest have been asked to cut their acreage 15 percent. In my State, North Dakota, this means a reduction of 1,500,-

000 acres among the wheat farmers. They have responded to this demand, thinking that they would be protected against imports.

Now we find, however, that enough rye has been imported during recent months to more than equal the reduction of wheat from this 1,500,000 acres. In other words, with the return of beer the consumers have turned to the consumption of rye bread, and so our farmers are told to discontinue the production of wheat while we import rye with which to feed our people, and our farm land lies idle. This 8,000,000 bushels of rye imported is equivalent to 1,000,000 rye acres. In other words, if the farmers of North Dakota could use the land that they are now allowing to lie idle and paying taxes on, they could use the 1,500,000 acres and produce the rye that we are now importing from Canada and Poland.

Our agricultural legislation in the special session of Congress has been a failure. It has been make-believe and not real relief. The refinancing of farm indebtedness under the Farm Credit Administration has proven utterly inadequate to save the farm homes. Hundreds and thousands of farm foreclosures are pending or in process at this very time, and hundreds and thousands of farm families will lose their homes and their all unless something intelligent is done during this session.

Equally inadequate has been the Agricultural Adjustment Act. In spite of the dialogs between Henry and Rex, which bewilder us and amuse us, it has not been much of a success. False propaganda is being sent out to the industrial East and agricultural South concerning the success of the allotment plan in the North and West, and equally false propaganda is sent out to the North and West telling us about the success of the Agricultural Department's cotton operations in the South. The bill now before us brands that propaganda as false and shows us that the Cotton Adjustment Act is a failure. In order to bolster it up, we are now asked to regiment the farmers of this Nation—to place their future under the control of a bureaucracy and plutocracy here in Washington.

I am glad that the Secretary of Agriculture doubts the wisdom of that. He used to be a westerner—he used to be for the Frazier-Lemke bill and for the cost of production—but since he got mixed up with all those doctors and professors he has become somewhat bewildered and does not know where he is going.

May I ask the Secretary of Agriculture to come back to agriculture and view it, not from the pencil-pushers' views here in Washington but from the practical side of agriculture? The gang that he is with now do not know how to play ball. They just fumble it. If he will come back to us and play with us, we will guarantee him that we will make a touchdown in the first quarter and we will name that the Frazier-Lemke bill, which will refinance the farmers at 1½-percent interest and 1½-percent principal on the amortization plan, not by issuing bonds but by issuing Federal Reserve notes direct; and we will guarantee another touchdown in the second quarter, the Swank-Thomas bill, giving to the farmers the cost of production for that part of their products domestically consumed. There will be no fumbling of the ball. We will put it straight across the goal line.

In conclusion, let me say to the Members of the House who have not already signed the petitions to discharge the committees having charge of the Frazier-Lemke and the Swank-Thomas bills that these petitions are here at the Speaker's desk. Come and sign them. Give agriculture a "new deal" and a "square deal", and not merely a "new shuffle." [Applause.]

Mr. COX. Mr. Chairman, will the gentleman from Mississippi yield?

Mr. DOXEY. Certainly.

Mr. COX Can the gentleman inform the Committee if any friend of this bill intends to make any serious attempt at justifying it on constitutional grounds? I have been sitting here all day hoping to hear that phase of the question discussed, but I have heard nothing on it yet

Mr. DOXEY. I certainly cannot inform the gentleman as to the character of the speeches yet to be made, but I can refer him to the speeches printed in the RECORD of March 8, wherein the constitutionality of the measure is explained; and I can refer him to speeches that have been made heretofore in reference to this bill, specifically by my colleague [Mr. WHITTINGTON] on Saturday. If he will refer to the RECORD, I think the gentleman will be convinced absolutely one way or the other about it. Certainly the decisions are cited. I hope this answers the gentleman's inquiry.

Mr. Chairman, I yield 6 minutes to the gentleman from Georgia [Mr. TARVER].

Mr. TARVER. Mr. Chairman, the gentleman from Wisconsin [Mr. CHASE] undertook to quote from the speech delivered by President Roosevelt at the meeting of the code authorities in the city of Washington a week ago yesterday, some views which he conceived to be in accord with the conclusions he had reached as to what disposition should be made of this bill; but he did not quote that portion of the President's address which pointed out in more forceful terms than I am able to, the impropriety in times like these of undertaking to criticize what is being attempted to be done by the Government without endeavoring at the same time to suggest something in lieu of what is proposed which constitutes a remedy for existing ills. To use the thought if not the language of the President in regard to the statement of the gentleman from Wisconsin [Mr. CHASE] a situation dangerous in the extreme faces the cotton farmers of the South with a cotton crop of some 14,000,000 or 15,000,000 bales impending for this year despite the efforts of the Agricultural Adjustment Administration, and the possibility of prices for cotton of 6 or 7 cents a pound this fall. Under these conditions a remedy is suggested by, let us say, the Committee on Agriculture, a remedy which has the approval as we are informed of the President of the United States, yet the gentleman from Wisconsin and other gentlemen criticize it on the floor; but what do they suggest in place of it; what would they suggest as a means of preventing the catastrophe with which the farmer is face to face at this time.

Mr. HOPE. Mr. Chairman, will the gentleman yield?

Mr. TARVER. I regret I cannot yield. I have only 6 minutes whereas the gentleman from Kansas consumed nearly 20 minutes.

I first considered the principle involved in this bill with a great deal of misgiving. I believe that the liberties and the rights of the farmers in this country are just as near and as dear to me as they are to any Member of this House. The spirit of independence of the American farmer is, to my mind, the principal assurance we have in this country today that our Government will continue to endure. Entertaining the views I do, I am very reluctant to crib, cabin, and confine the cotton farmers of this country by an act of Congress saying how much of their lands they shall be allowed to plant in cotton and what they shall do with lands not planted in cotton or withdrawn from cotton production, or at least delegating this authority to the Secretary of Agriculture.

I believe there is serious doubt as to the constitutionality of this measure. I say this frankly. I would not consider voting for it for a moment if it were not for the fact that we have been assured by the Secretary of Agriculture that more than 90 percent of the cotton farmers of this country who have communicated their views to his Department have expressed themselves as in favor of this bill; and were it not for the further provision contained in the bill itself that it shall not be made effective until the Secretary of Agriculture shall have ascertained that those who control, share crop, rent, or own two thirds of the land devoted to cotton production are in favor of such action.

The cotton farmer of America has been shown a mighty cold deal during the last few years of Republican administration, and it was not until March 4, a year ago, that any consideration whatever was given him by the Government of the United States or those in charge of it. Since that time,

however, there can be no question but that there has been an honest, sincere effort on the part of the American Government to do something for the cotton farmers of the South, as well as for the farmers of the rest of the country. Under such conditions, when, according to conservative estimates, more than 90 percent of the cotton farmers of the country, together with the administration, come to Congress and ask for authority to carry into effect this plan, I do not see how anybody, especially one who comes from the South, who represents a section devoted to the production of cotton, can feel that he is properly representing his people unless he votes to go along with the administration on this bill.

I have received some 400 or 500 letters from cotton farmers in my district regarding it. I have received only two letters indicating opposition to its terms. [Applause.]

There is a general feeling that since a vast majority of the cotton farmers have voluntarily signed the acreage-reduction contracts, those who have refused to sign should not be allowed to profiteer at the expense of those who have signed by planting more acreage to cotton this year than ever before in an effort to make a "killing" at the expense of those who are cooperating with the Government. I heartily concur in that feeling, and I am willing to go to the limit of what Congress may constitutionally do in order to aid the farmer who is cooperating. I shall submerge my doubts as to the wisdom and constitutionality of this bill in order to go along with what I believe the cotton farmer wants. The purposes of the bill are good. Without some legislation I anticipate a tremendous cotton crop this year despite the acreage-reduction program. The cotton farmer cannot stand that. Something has got to be done for him, and this is the only thing that is offered. It may not work out as we hope; he may kick me in the pants this fall for voting for it, but I would rather leave Congress than to vote against the only chance he has for help in a tremendous emergency.

I am glad it is not a permanent measure. I wish that it were definitely restricted to 1 year. Congress will be in session again next January, and if it works out satisfactorily, it will be no trouble to reenact it. Experimental legislation ought to be tried out before it is written permanently into law. There are some amendments I should like to see made to it, and I intend to offer at least two if I have the opportunity. I should like to see the bill provide for at least 4 bales of tax-exempt cotton to be allotted to the head of every family having as many as 5 dependents. Without regard to previous cotton production, 4 bales of cotton is mighty little to allot to a family of 6 people when it is the only money crop they have.

I should like to see the bill amended so as to allow the Secretary of Agriculture, in making allotments between States, to take into consideration the extent to which some States have reduced production, while others have increased. The farmers of my own State have for years been diversifying their crops, reducing cotton production, doing all they could by themselves alone to solve the cotton problem. If all other States had followed their example there would be no cotton problem today. But other States have in some instances increased production by leaps and bounds. It is unfair to the farmers of my State, and of some other States, not to take these facts into account in allocating tax-exempt cotton as between the States. The bill as drawn provides for similar relief in cases where individual farmers have reduced production out of proportion to others. If it is fair to do that as between individuals, it is fair to do it as between States. It is my earnest hope that the bill may be amended to provide for it.

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, while you, doubtless, will not look upon me as an expert in cotton production or cotton control, yet I want you to believe me when I tell you that I am interested in the situation confronting the men interested in this great southern crop. We in the North know that when you in the South are prosperous we have a better market for the goods we manufacture. I wish to discuss this bill in the light of history and in the light of present-day events throughout the world; and I have reduced what I have to say to as small a compass as I could and yet do justice to the subject.

The first General Assembly of Virginia met July 31, 1619, at Jamestown. The first law passed by that historic legislature was one fixing the price of tobacco. It was enacted that the price for the best grade of tobacco should be 3 shillings a pound, and 19 pence a pound for the second grade.

Following the enactment of this price-fixing legislation the cultivation of tobacco increased so rapidly that by 1631 the price had fallen to 6 pence a pound. The plan to fix the price by law having failed, the right to cultivate tobacco was restricted to 1,500 plants per poll. This law went so far as to forbid carpenters and other mechanics from planting tobacco " or to do any other work in the ground."

Notwithstanding these drastic measures the price of tobacco continued to fall. The price per pound in 1639 was only 3 pence. At this juncture the Legislative Assembly of Virginia enacted a law that half of the good tobacco and all of the bad tobacco grown should be destroyed. Furthermore, it was provided that the crop raised in 1640 should not be sold for less than 12 pence a pound, nor should the crop produced in 1641 sell for less than 25 pence per pound, under penalty of forfeiture of the whole crop. This legislative effort was no more effective in maintaining the price than the previous measure had been. The price of tobacco in 1645 was only 1½ pence and in 1665 only 1 pence per pound.

The plan to limit production in its various phases having failed in Virginia, it was thought it would be more successful if the area were extended. Therefore, steps were taken to broaden its field of operation. The Colonies of Virginia, Maryland, and Carolina entered into a treaty in 1666 to stop planting tobacco for 1 year in order to raise the price. This treaty was duly ratified and the plan to restrict planting was adopted.

The combined action of the three Colonies utterly failed to maintain the price. Finally, the price dropped so low in 1683 that large groups of people joined in a petition urging more drastic action. This request being denied, the people organized groups to go through the country and destroy tobacco plants wherever found. This movement assumed the proportions of a riot. In April 1664, to prevent the wholesale destruction of property and crops, the assembly enacted a law that if persons to the number of eight or more should go about destroying tobacco plants, they should be adjudged traitors and suffer death.

Now that over 300 years have elapsed since the Virginia Assembly sought to fix and stabilize prices by legislative control and later by treaty, it will be interesting to see how far present legislative action will overcome the law of supply and demand.

The chief purpose and the major concern of the advocates of the production-control plan now under consideration in Congress is to increase and then stabilize the price of cotton.

Inasmuch as the provisions of the cotton control bill are drafted for the benefit of cotton, I desire to discuss the problem which it is sought to solve by legislation. That there is a surplus of cotton and that the price is very low, no one disputes. The cotton acreage, in the United States, however, has increased during the past decade from 33,000,000 acres to 48,000,000 acres. This increase in acreage has been largely in the States of Oklahoma and Texas. Since the year 1800 American cotton growers, until recent years, have enjoyed almost a monopolistic control of the world's market. Because of this advantage the American producer of cotton has been able heretofore to dictate the price. This advantage no longer exists. Conditions have changed.

A very thorough investigation of the cotton industry has been made by Mr. Robert I. C. Pecard, M.A., of the McGill Graduate School of Economics. In a recent article in a Canadian publication he shows the extent to which cotton production has increased in India, British Africa, and the

Anglo Egyptian Sudan; also, he calls attention to the potential acreage suitable and available in these areas for cotton growing.

Without going into detail I shall summarize by quoting those parts of Mr. Pecard's statement which are pertinent to the problem of low prices caused by overproduction. Referring to the cotton industry, he states:

> The whole organization of the cotton industry is now highly centralized, and the East India Cotton Association, formed in 1921, controls both spot and future markets.

Continuing, he says:

> Over 26,000,000 acres are under cultivation and exports in 1929 and 1930, over 4,000,000 bales, were double those of 1920–21. There is good reason to believe that with continued improvement in the staple grown and in marketing operations, India can hope to take a much larger share of Canadian requirements than the present insignificant amount.

Speaking of British East Africa, Mr. Pecard points out that:

> Cotton was introduced into Egypt in 1863. By 1911, 2,807 square miles had been planted, and exports were about 600 bales. Three years later, 1914, over 1,384,000 bales were shipped abroad.

Commenting on the production of cotton, actual and potential, in the Uganda he states:

> The plant was first cultivated to any extent in 1896 and by 1912 the output had reached 50,000 bales. * * * An American expert estimates that 10,000,000 acres, or 16 times the present area, are "ideally suited" for cotton.

Mr. Pecard then shows the possibilities of cotton production in the Sudan. I quote briefly from his article:

> The Sudan, it would appear, will likely become the greatest Empire producer of cotton of the longer staple variety, capable of serving all Canadian demands in addition to those of many other manufacturing countries. * * * While the Canadian demand may not appear to be very extensive, $22,000,000 worth of raw cotton is an order not to be neglected without much consideration as to possible future supplies.

Mr. Chairman, I ask your serious attention to a new phase of the international question as it relates to cotton. A report has recently been issued by the Ministry of Foreign Affairs of Brazil under date of 1933. Here is what this report reveals: Areas in cultivation, 650,000 hectares (2½ acres in a hectare) or 1,625,000 acres in cultivation. Areas capable of cotton cultivation, 88,800,000 hectares, or 222,000,000 acres, approximately 150 times the present area under cultivation.

Concessions have been granted by Brazil to Japanese colonization companies for the opening up of agricultural colonies in Brazil's cotton-growing regions. This fact and the further fact that over 30,000 Japanese migrated from Japan to Brazil during the period from 1930 to 1932 is not without significance to our cotton growers.

It was thought for a long time that only the eastern portion of Brazil was suitable to the raising of cotton. It has now developed that there is an unlimited area equally suited to the growth of cotton. The source of my information is the Brazilian Ministry of Foreign Affairs. Our own Department of Agriculture has just sent a cotton expert to Brazil to study the potential production of cotton there in the next few years in relation to our Government's limitation of production here. Brazil has granted concessions to Japan to carry out a colonization scheme, and within 3 years over 30,000 Japanese workers have gone into Brazil to raise cotton. It is not my intention to go into detail with regard to what is going on between Japan and Brazil, but the great market for cotton products is over in the Orient. But in Brazil there are 222,000,000 acres ideally suited for the raising of cotton with low costs of labor. The ministry reports that there are 369 textile factories working in the country and employing nearly 118,000 workmen, which reflects the importance of a product whose agricultural and industrial activities give employment to nearly 6,000,000 people, or 13.6 percent of the country's population.

There is another side to the picture that must not be lost sight of. Canada has a cotton industry, the products of which are valued at over $225,000,000 annually. If it be the future policy of Canada to purchase as much raw cotton as possible from British sources, and if she is in a position to manufacture cotton textiles for export, it would seem to me that nothing should be done to cripple the cotton-textile industry of the United States.

I feel that forethought and good judgment would suggest the highest measure of protection to the American cotton-textile industries. Under present conditions the cotton farmer needs our domestic textile industry as an outlet for his cotton, and this will become increasingly so in the years to come.

A legislative policy that increases the cost of production of textiles, that diminishes the purchasing power of labor, that suffers and permits our textiles to be displaced by textiles imported from other countries, is unsound and unwise.

A survey conducted by one of Canada's leading publications covering its tariff policy refers specifically to the cotton industry, the woolen industry, and the rayon industry. I quote from the survey:

> In these three branches of the textile industry, accordingly, the new employment resulting this year from the tariff, providing it is only reasonably effective, will mean a total of 18,000 new jobs. Last year's average wage in the industry—men, women, and learners considered—was a little in excess of $900. On such a basis, this year's disbursements of wages to new employees, not considering the increase which full-time operations will bring to old, will reach a total of more than $16,000,000.

The cotton farmer, the cotton-textile manufacturer, and the American laborer should pause before bartering away a dependable home market which is of the highest importance to each of them.

The elation manifested by our foreign competitors over recent proposals is not altogether reassuring to those of us who believe that a domestic market which absorbs 95 percent of all that we produce should be carefully guarded from foreign exploitation.

The cotton acreage under cultivation in the United States increased from 35,878,000 acres in 1920 to 45,091,000 in 1930. With 26,000,000 acres devoted to cotton growing in foreign lands and 10,000,000 more acres to be added as rapidly as the land in the Uganda can be brought under cultivation, the importance of protecting the textile industries of the United States from foreign competition cannot be overemphasized. The cotton-textile industries of the country will eventually be the last line of defense for the farmers of the South. During the year 1929 there were 424,916 wage earners in the United States employed in the manufacture of cotton goods.

What about the cotton-textile industry in India? The cotton mills in the fiscal year 1930–31 produced 867,045,000 pounds of yarn and 2,561,133,000 yards of cloth of which 133,426,000 yards were exported. Recent figures show that India has 278 spinning and weaving mills employing 324,600 hands; and in all India 8,702,760 spindles and 161,952 looms.

The control plan coupled with the A.A.A. and N.R.A. programs as it applies to cotton presupposes for its success a higher tariff wall to protect our textile industry than has ever been erected under previous tariff acts.

The fact that for 2 years foreign industries have been permitted to flood our market with textiles and thus deprive our men and women of the opportunity to work holds out little hope for adequate protection to insure the ultimate success of the cotton-control plan.

The chief hope for American agriculture and American industry today is the preservation of the domestic market. It is this market that must of necessity determine the future weal of the American people. [Applause.]

Mr. Chairman, I am in dead earnest about this situation and I will tell you why. We have a bill before the Ways and Means Committee which proposes to permit the President to enter into reciprocal foreign-trade agreements with various foreign countries. Your markets are going to be your own spindles at home. Look up the record of Japan, of India, and of Great Britain. I believe it is absolutely suicidal to the cotton farmers of the South at this particular juncture, before a real effort is made to build up their own

domestic market for manufactured goods, to start off on a plan to destroy cotton areas. I think it would be well for you gentlemen who are really interested in the Southland to examine very carefully into the intricacies of the new-planned economy for agriculture and see where you are headed. [Applause.]

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon [Mr. PIERCE].

Mr. PIERCE. Mr. Chairman, I am well aware of the significance of the subject that we have before us. I am a farmer. I raise wheat, cattle, sheep, and hogs. I am not interested particularly in cotton, but I cannot see how anyone, whether he be farmer, merchant, or lawyer, can fail to see the problem that is just ahead of us. I recommend to the gentleman from Minnesota the reading of Secretary Wallace's recent speech before the Foreign Policy Association, America Must Choose. Is it nationalism, internationalism, or is it the middle course which we must choose?

I have given much thought to this subject, and as far as I am concerned, I am willing to accept the challenge of the gentleman from Minnesota [Mr. CHASE], who spoke so deliberately about liberty and controlled production. I am willing to accept the challenge of the gentleman from New York and the others who contend so seriously that this is a curtailment of liberty and the end of American ideals.

Mr. McFADDEN. Will the gentleman yield?

Mr. PIERCE. I yield to the gentleman from Pennsylvania.

Mr. McFADDEN. May I call the gentleman's attention to the fact that the article of Secretary Wallace, to which the gentleman refers is a copyrighted article by the Foreign Policy Association, one of our leading international associations that is working to internationalize the United States?

Mr. PIERCE. It is either that or nationalization, as I understand Henry Wallace. He seeks a middle course by which we may admit a certain amount of foreign commodities and continue to do a certain amount of exclusive business in this country. If we draw the line simply on nationalism, even then we must curtail production. What made the steel business so very profitable? The control of production. What made it possible for the International Harvester Co. to pay such great dividends? Exclusively controlled production or monopoly of the mowers and binders which they made. They did not throw them on the market beyond demand. This cannot be done by the farmer. Agricultural production can be controlled and regulated only by Government agencies.

I shall vote for H.R. 8402, the Bankhead cotton bill. My reasons are:

First. It is an emergency measure that may be abandoned at any time should the Executive department of our Government determine it is best to do so.

Second. The great majority of the Congressmen from the cotton-producing districts want the bill enacted into a law.

Third. Before it can go into operation two thirds of the cotton producers must vote for its enforcement.

Fourth. The land now in cotton which cannot continue to grow cotton, should this bill become a law and go into operation, cannot be used to grow other basic commodities.

Fifth. The bill provides that any excess over the allotment grown one year, by reason of favorable weather conditions, may be available any following year to make up for a short crop.

Sixth. This plan of control of production must be tried. Cotton appears to be the commodity on which such an act can be most easily enforced, because all cotton from the producing fields must go through the gin, where it will be comparatively easy to check up and assume control.

Seventh. Cotton needs this control more than any other farm commodity, as a larger percentage of it has to be exported.

Eighth. Should a producer wish to market cotton in excess of his allotment, the tax of 50 percent of the average central market price is reasonable.

Ninth. The bill is fair in the method of allotment to State, county, and individual. It takes a 5-year average and gives a chance for cotton protection to those districts that have not been producing their share on account of causes beyond their control.

Tenth. The bill wisely grants great discretionary power to the Secretary of Agriculture. If we must have absolute control of production, then it must be enforced with justice, sympathy, and understanding.

PERIODS OF AGRICULTURAL PROSPERITY

If I read the story of agriculture correctly, there have been three great periods of prosperity for the American farmer. The first period was one of 25 years, commencing at the inauguration of our present Government and lasting down to Napoleon's defeat at Waterloo. Historical records disclose that it was not generally believed the debts of the Revolution assumed by the Federal Government under the Hamilton assumption bill could ever be paid. The total value of all imports was not enough to pay the interest, but the interest was met and the debts were reduced in Washington's time and paid in full during Jefferson's administration. What was the cause of this unexpected prosperity during the first quarter of the nineteenth century? Certainly it was due to the demand for agricultural products, and that demand came from Europe's tragedy.

The same year that Washington was inaugurated the French mob showed its head, and a few months later the French Revolution was in full swing. The French boys from the Gironde came marching down the streets of Paris singing the Marseillaise. Modern nationalism was born, and national songs were chorused throughout Europe. The mob's master appeared in Napoleon, who, in an eventful quarter of a century, led the French armies from the shifting sands of Egypt to the drifting snows of Russia.

Europe, during that period, afforded a ready cash market for all farm products, at what then seemed fabulous prices. American debts to foreign countries were paid. The American people enjoyed a period of relief from financial pressure, and the American farmer actually prospered.

Then, for 40 years, came the settlement of the Mississippi Valley, bringing much new land into cultivation, resulting in falling prices for farm commodities. Had it not been for the increased prices of farm lands, there would have been great distress during this period among the farmers. Then came that unjustifiable War between the States, creating a ready market at high prices for all the beef, cotton, wheat, and bacon that could be produced. The American farmer of the North again prospered by reason of war, which brought the usual financial gains to business and industries. The brief war between France and Germany in 1870–71, with Europe calling for food they could not produce in sufficient quantity, continued prosperity for American farmers. Then followed another period of 40 years, which was generally a time of falling prices. During this period the American frontier disappeared under the pressure of the westward movement of hopeful, land-hungry, pioneering American farmers.

Then came the greatest catastrophe of all history, the World War. As the boys suffered, fought, and died in the trenches, the American farmer again prospered through the war-created call for food, and all he had to sell brought a ready cash price.

CHANGE FROM DEBTOR TO CREDITOR NATION

From a debtor Nation at the beginning of the World War, paying annually $200,000,000 in interest to foreign nations, we found ourselves at the end of the war a creditor Nation, demanding from the foreign nations $500,000,000 in interest annually. During the half century from Appomattox to the Marne, when we owed that $200,000,000 annual interest, the countries to which we made this yearly contribution were glad to take our surplus farm products, wheat and cotton in quantity, in lieu of gold. During the 20 years in which we have been a creditor Nation, we have constantly built our tariff walls higher and higher. We have said to our debtors, "You defaulters, pay us what you owe

us, $500,000,000 interest each year in bars of gold. We do not want your manufactured articles, because we can make better articles here in America ourselves. We cannot use your paper money. Give us gold, gold." The debtor nations replied, "America has almost half of the known gold of the world used as money. We have little of it, how shall we pay?" Is it any wonder that we cannot sell our farm products on foreign shores when we refuse to take their commodities in exchange?

THE OUTLOOK FOR AGRICULTURE

The American farmer has been exceedingly prosperous for about one third of the time since Washington was inaugurated as President, about one third of the time fairly prosperous, and the other one third of the time in dire financial distress. Now what are the prospects? Shall we again be able to sell our wheat and cotton in foreign markets? With what is the foreigner to pay? We refuse his goods, he does not have gold.

Barring war or famine, a sufficient foreign market for our surplus farm products under the present world conditions is an iridescent dream. There is but one certain effective method for dealing with surplus farm commodities, that is, controlled production. You do not like it, I do not like it. You say, if it must come, let it be voluntary, but, when voluntary, it does not come with sufficient force to be effective. You may talk about liberty and freedom, but we face a condition. One man's liberty extends clear up to the place where another man's liberty commences. If a group of men insist on producing an article like cotton in such quantity that his neighbors cannot market theirs, the higher law, the "greatest good to the greatest number" must be set in operation by social organization.

Indeed, we are far on the road toward that place where all will be able to eat, to live, and to hope, and where no one can, by honest or dishonest methods, acquire such a quantity of the world's goods as to deprive others of their just share. Call it whatever you wish, a new deal, a new era.

IS CONTROLLED PRODUCTION PERMANENT?

Do I fear that this emergency cotton bill will become permanent? I do not care if it does, if it proves to be a good system, if it meets the emergency. Will it come in wheat? I hope not. I dread to see the day come when an official will come to my farm in Oregon and say, "Plant this field to oats, this field to alfalfa, this field to wheat, leave this field unplanted", with power to enforce this decision, making compulsory, strait-jacket control of agriculture. Long before this becomes universal and American freedom of action disappears, the powers that control the economic world can meet and solve the greatest of the problems confronting every civilized nation, the problem of unemployment.

Thirty millions or more of men and women with dependents are today helpless victims of our economic maladjustment. When they have work and homes, and money to spend, the agricultural surplus will vanish. It may be wiped out by catastrophe of nature, by war, or by redistribution of earning power.

Because of machinery, there can be no comparison between the present time and any time in the past. We must continue to use it, but its profits must belong to the entire people and not to a few who, by all sorts of methods, acquire control. While recognizing that machinery has been the great cause of unemployment, we must never lose sight of the fact that money and the control thereof is the root cause of the unequal distribution of the world's goods, and this must be remedied.

Let us give the Bankhead cotton bill a chance, a fair, honest trial. The day has passed forever when a person, yes, even in free America, can do entirely as he wishes even with his own. His own must be used that it will do the least possible injury to others. Whether we like it or not does not matter. The world has moved on, the day of laissez-faire has passed. The day of rugged individualism has gone forever. The cotton planter of Texas must not, by use of machinery and fertilizer, financially ruin the cotton planter of Carolina. These things must be ordered and arranged. No longer can they be left to chance and greed.

During the days of the World War, this Government assumed the right to take your boy or mine and send him into the shell-ridden trenches of the western front to save what we call democratic civilization. This same civilization is today in danger, the foundations are giving away. Millions are starving, millions wanting jobs, millions have become bankrupt. If it takes a regimented control of agriculture to save the marvelous achievement of the inventive genius of the world, let it come. The last century has made the world a neighborhood; we now strive to make it a brotherhood. [Applause.]

Mr. DOXEY. Mr. Chairman, I yield 5 minutes to the gentleman from Alabama [Mr. JEFFERS].

Mr. JEFFERS. Mr. Chairman, this is an important day in the history of agriculture. We have at last come to the actual consideration of this far-reaching legislation of interest to our agricultural people—the Bankhead bill—which provides a plan for the control of the production of cotton, the great commodity crop of the South. Leading up to the consideration of this legislation, I desire to review briefly the striking events of the past 12 months which have so materially revolutionized the agricultural situation throughout the Cotton Belt, and, indeed, the entire economic condition of our Southland.

When we passed the Agricultural Adjustment Act in May last year the new deal for agriculture was inaugurated. The 1933 cotton crop had already been planted and was then growing and flourishing. On account of the ideal weather conditions then prevailing it was estimated that we were faced with a production of 17,500,000 bales of cotton for 1933, which would have been the second largest crop in history. In addition to that, there was in existence a carry-over, or surplus, of something over 12,000,000 bales. That huge surplus was the disheartening price breaker, the millstone around our necks. If nothing had been done about the situation, and nature allowed to take its course, we would have had on our hands in the fall of 1933 about 30,000,000 bales of cotton. It is easy to see that if that had happened the price of cotton last fall would have fallen far below the cost of production, as had been the case in 1932 and 1931. It would have probably fallen to below 5 cents per pound, if, indeed, there would have been any market for it at all. This would have meant the absolute bankruptcy of the entire South, and a great proportion of our agricultural people would have been on the road to a state of peasantry. Those who now stand on the side lines and condemn and criticize the honest efforts of the A.A.A. to help our agricultural people to get back on their feet seem to ignore the fact that the average American farmer was headed for peasantry as fast as he could go a year or two ago, and that something had to be done and done quickly.

The new administration in Washington was given a clear picture as soon as possible of the deplorable condition confronting the cotton-producing States, and as soon as Congress passed the Agricultural Adjustment Act the Government agencies immediately swung into action and offered a working plan to the farmers of the South, which was generally referred to as the "plow-up" campaign. It will ever be a wonderful and romantic chapter in the history of agriculture how then our southern agricultural people rallied almost unanimously to the support of the new and startling proposal which had been placed before them by their Government, bringing about the quick success of this movement in the Cotton Belt. It was a magnificent accomplishment which soon became the talk of this Nation and the world. Within a few short weeks the extension service in the several States and in every county had been furnished the details of the plan which they were called upon to superintend. More than 25,000 local committeemen were speedily selected, and these loyal and patriotic citizens worked day and night, giving unselfishly of their energy and their time, with the remarkable result that in an incredibly short time the campaign was completed and more than 1,000,000 farmers had actually signed contracts to take 10,400,000 acres of growing cotton out of production. The farmers of the South turned the roots of that cotton up to the sky—cotton which, had it been allowed to mature, would have amounted to around

four and one-half million bales and would have brought the 1933 crop up to at least 17,500,000 bales, and that amount, with the huge surplus already on hand, would have undoubtedly pushed the price down to ruinous levels.

Permit me to say here that I feel proud of the fact that, as one Member of this Congress, it was my privilege to have a part in the enactment of the legislation which provided the machinery for this great cooperative movement between our governmental agencies and our agricultural people.

Taking into consideration the $112,148,000 paid to the 1,000,000 farmers who participated in the plow-up campaign and $48,000,000 covering the option cotton, and the amount the crop itself finally brought, we find that the total value of the lint of the 1933 cotton crop was $777,864,000, which was more than twice as much money as the South received for the crop of 1932 or 1931.

The fact that the cotton producers themselves had almost unanimously cooperated in the plow-up campaign was regarded as a splendid achievement, and made it possible to secure from the Agricultural Adjustment Administration, and from the President himself, approval of the 10-cent loan which followed. Had we not been able to secure the 10-cent loan on cotton, thereby pegging the price just at that time, it is undoubtedly true that the price of cotton would have fallen several cents per pound within the next few days on the strength of the next crop estimate which was published.

This 10-cent-per-pound loan on cotton was agreed to by the President following the cotton conference held in Washington last fall and which was attended by delegations from the cotton-producing States. At the conclusion of the deliberations of that cotton conference, over a period of 4 days, a committee of 15 was selected to call upon the President and lay before him the distressed condition of our cotton producers which existed at that time. Senator BANKHEAD was the chairman and spokesman for this committee. I had the honor of serving as one of Alabama's representatives on this committee when we placed the case before the President, and other members of the committee from Alabama were Congressmen ALLGOOD and HILL. We cannot estimate how much the 10-cent loan did really mean to us by steadying the price of cotton and preventing a sharp decline in price at that time, but we do know that the 10-cent loan would not have been possible at all if the producers had failed to cooperate with the Government in the preceding plow-up campaign.

The great credit for all that has been accomplished thus far must go to our southern cotton producers themselves and their spirit of cheerful cooperation won for them the commendation and plaudits of the people of the Nation. The dramatic success of the several steps which were included in the 1933 cotton campaign is sufficient proof that, given the proper incentive and leadership, farmers can and will cooperate honestly and successfully for the betterment of their own conditions. In other words, agriculture has begun to learn to speak the language of intelligently controlled industry, which does not destroy prices by flooding the market with more goods than can be sold at fair value. We must now bring about 100-percent cooperation.

Surveying the splendid results of the efforts already made, we can look to the future with renewed hope. Our agricultural people, for whom I have the honor to speak, especially those in my district, are facing the future with greater confidence, and I think they feel that they are closer to their Government and that their Government is closer to them than ever before in history.

In the address that President Roosevelt delivered before a joint session of the two Houses of Congress on January 3, 1934, he said:

> We have plowed the furrow and planted the good seed; the hard beginning is over. If we would reap the full harvest, we must cultivate the soil where this good seed is sprouting and the plant is reaching up to mature growth.

The agricultural people of the South have indeed made a good beginning, and we must not and cannot turn back. Through the unanimous cooperation of all of our people success and prosperity will crown our efforts.

We all realize that the task is not finished with the accomplishments of 1933. In fact, we have just begun to work to attain the ultimate goal. The farmers of the Cotton Belt, realizing the necessity for unanimous cooperation among the producers themselves have expressed themselves very forcibly in favor of a workable compulsory control plan. While I was in my district last fall I had the privilege of addressing several great gatherings, composed not only of farming people, but of business men of every class, and in each instance the opinion was practically unanimous in favor of legislation providing for a real compulsory control plan with teeth in it. The Secretary of Agriculture had indicated that he wanted to have clear and unmistakable evidence from the cotton growers themselves that they really did desire a compulsory control bill. We have brought him the answer direct from our farmers, and the Secretary has also received the answer from the thousands of questionnaires which were sent out through the Cotton Belt.

So, my friends, I bring to your attention at this time the necessity of supporting this Bankhead bill as a further forward step. We of the agricultural South need now the support of the other agricultural sections of our Nation. This means much to us. We will aid you in your worthy undertakings, and we earnestly solicit your support to our cause now. The people who will be affected by this legislation have told us that they desire its passage. They desire the opportunity of operating under its terms and provisions, because they believe that the unanimous cooperation which will be brought about by the control plan embodied in this bill will enable them to steadily maintain an intelligent control of the amount of cotton to be placed upon the market each year, so that they may be assured from year to year of an equitable price for the great commodity crop of the South, which is produced by their labors, and which will mean a fair margin of profit to the producers themselves over and above the cost of production, and so that they and their families may be enabled to enjoy the necessities and comforts of life to which they are so justly entitled, and that eventually the life of our agricultural people may achieve its ultimate of fullness and happiness. [Applause.]

Mr. DOXEY. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri [Mr. RUFFIN].

Mr. RUFFIN. Mr. Chairman, I have been interested in this principle of legislation since I first read the discussions in reference to this matter in the Senate some 2 or 3 years ago. There is no particular reason why I cannot vote on this matter free from any pressure whatever, representing as I do the State of Missouri. There are only about a half dozen counties in my State that raise cotton. I have not been asked to vote for or against this bill. I am not certain that the bill is constitutional. I am assuming that it is. I have had doubts about the constitutionality of other laws we have passed.

This bill marks another step in the onward rush of events of this country. It is compulsory control of production. If we have controlled production of cotton, it is only going to be a few months until we will have controlled production of wheat and controlled production of the other basic agricultural commodities. This, of course, also will eventually mean controlled production of everything that we manufacture. This is inevitable. I see no more opportunity of blocking this onward course of events than I do of damming up the Mississippi River. We may be able to control or divert the river but we have no way of stopping it. I am voting for this bill realizing fully that no man knows where we are going to come out and what is going to happen next, with the hope that we can control these great forces that are cracking all around us, and that in some way or other, with the help of the Lord and such assistance as we can command through constituted government, we will come out on top.

Mr. DOXEY. Mr. Chairman, I yield 4 minutes to the gentleman from Kansas [Mr. CARPENTER].

Mr. CARPENTER of Kansas. Mr. Chairman, I recognize there is some considerable sentiment in the South for this legislation and that their Representatives are impelled by

conscientious motives in behalf of their constituents in supporting this legislation, and for that reason I have been wondering whether it is wise for me to speak on this bill, but I have some thoughts in my system in regard to this kind of legislation which are hard for me to suppress, so I might as well express them.

Generally when a proposition of this sort comes up which only affects one section of the country it is the usual practice to say, "Well, if this only affects that section, all right; let them have it." This is what I would be pleased to do in this case. But when such a revolutionary measure as this comes up for serious consideration by this Congress, of which I am a Member, I do not see how I can sit here and keep my mouth closed, or how I can explain to my farmers back home why I sat here and permitted such a measure, that may be the beginning of like legislation affecting all agricultural commodities, to pass this body without my protest. I am in favor of any voluntary proposition for the regulation of agricultural commodities, or anything else in this country, but I am opposed to the involuntary servitude that is incorporated in this bill. This is the first step in establishing the Government of this country as the landlord of every farmer in the United States, and it is this first step that I am opposing.

What does this law propose to do? In short, it gives the Secretary of Agriculture the right to tell every cotton producer just how many bales of cotton he can raise. To my mind this is against the principles on which this Nation was founded and would lead us into a sort of Russian communistic state in this country.

I think there are other ways to adjust our agricultural difficulties in this country: Such as tariff legislation, silver legislation, and providing the naked and hungry with our surplus commodities. As I have said, in my opinion such legislation as is included in this proposed Bankhead bill is against the principles upon which this Government was established, those principles that were responsible for the Boston Tea Party. Evidently the tea was good, but the tax was not so good, and the tax is not so good in this bill.

I have had some legislative experience, both here and in other legislative bodies, and it has been my experience that it is the desire of every legislator to include some kind of a tax provision in his proposed bill. I do not know of any provision in the Constitution, either of my State or of the Federal Government, that provides that every bill introduced in either the State legislature or in the Congress of the United States must include some variety of a new tax. If any meritorious bill is brought before the legislative assembly, either State or national, that does not have a new tax provision in it, it does not get very far, but if you can suggest some kind of a new tax to further add to the burden of the already tax-burdened people of this country, the bill generally has very little difficulty in being enacted into law.

Congress in this emergency has already delegated considerable power of taxation to the Secretary of Agriculture, and if we keep constantly creating additional taxes, where is this power of taxation going to lead us?

Those advocating this proposed legislation appear to have great hopes for its success and therefore I say, I fear its success, so far as the future liberty of the citizens of this country are concerned, more than its failure. While it would appear from the committee hearings on this bill that the Secretary of Agriculture was not very enthusiastic for it and stated it was "very nice of the South to offer itself as an experimental economic laboratory", and that "it would be very interesting to see the varied human reactions coming out of trying such a program", he made this statement, reported on page 32 of the committee hearings:

> It has been suggested to me by some of our attorneys that if this measure should be challenged in the courts, the position of those whose duty it would be to sustain it would be materially strengthened if the measure was enacted only for the duration of an emergency. If the committee agrees that this suggestion is valid, it might be well to include in the title of the bill a declaration of emergency.

The principal reason therefore, given for this kind of legislation at this time, is based upon a declaration of emergency. I care not what the emergency is, it is not great enough to start this country on a course of further governmental interference that will lead us to such a state wherein we will be denied the "blessings of liberty to ourselves and our posterity", as set forth in the preamble of the Constitution of the United States.

Mr. DOXEY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. HILL of Alabama, Chairman of the Committee of the Whole House on the state of the Union, reported that the Committee having had under consideration the bill H.R. 8402, the cotton control bill, had come to no resolution thereon.

H.R. 8402—A BILL TO PLACE THE COTTON INDUSTRY ON A SOUND COMMERCIAL BASIS

Mr. CRAVENS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. CRAVENS. Mr. Speaker, I feel had the farmer been let alone originally and allowed to proceed in his own way and had he not been discriminated against by a high protective tariff, he could easily have worked out his own salvation without any special legislation for his benefit.

However, because of discrimination and because of lack of purchasing power of the people of the world, the farmer today faces utter ruin, and it is only proper that the National Government should offer such aid as is in its power to give—the same aid it has already extended by legislation to other classes of our citizens.

The farmers of the North, the West, and Middle West are not personally or directly interested in the bill under discussion—the Bankhead cotton control bill—except insofar as it shows the attitude of the administration and Congress to aid and help them solve their problems, which, no doubt, are just as great as those of the cotton growers of the South.

This bill affects only the South, and but for the enormous carry-over of around 10,000,000 bales the cotton farmer would need no aid, but this enormous carry-over hangs over his head like the sword of Damocles.

It has been said on reputable authority, if only the poor of India and China had a change of clothing there would not be a spare pound of cotton in the United States or the world; and, I feel reasonably sure, if these same poor were properly fed there would not be any surplus of wheat, corn, hogs, or cattle, but the poor are going hungry and naked, in spite of the abundance with which they could be both properly clothed and properly fed. Poverty is on every hand, not only in this country, but in every nation in the world, and some remedy must be found to restore the people of this country, at least, to some measure of prosperity and happiness.

After the financial crash of 1929, the Republican Party was in full power for 3 years, yet in that time nothing was done or even seriously attempted to remedy the terrible conditions confronting our people, except giving out false and unfounded assurances that prosperity was just around the corner.

In my judgment, our great surplus of cotton, corn, wheat, hogs, and cattle can in some degree be reduced if the President of the United States is given the requested power of entering into reciprocal agreements with foreign nations and given the right to adjust the tariff to meet present-day conditions, and I sincerely trust this authority will be granted in the fullest measure by the present Congress.

No man in the history of our country has shown himself so well informed as to the needs of the great masses of our people, nor in such wonderful sympathy with them, as President Roosevelt; and so far as I am concerned, except in cases where already committed otherwise to the people of my district, I am willing to follow his lead, and in the present instance the bill under consideration, we are advised, has his hearty approval.

This bill affects directly only the people of the South, and it is beyond my understanding why it should be opposed by a single Member of Congress, Democrat or Republican, who has the welfare of the farmer really at heart.

A very distinguished Republican Member of this House stated on last Saturday, "This Bankhead cotton control bill is only another step in turning over the Government to absolute control by bureaucracy"; and I would like to inquire if the Republican Party has not fathered and fostered the spirit of bureaucracy since the founding of this Government. However, I deny this bill is anything but democratic in its tendency, but, even if so, it is the least undesirable form of Government interference in business, for it could not become effective until approved by two thirds of those vitally interested and affected.

We must, for the redemption of the South from poverty and distress, from the loss of homes, farms, and business, do away with this specter of such an enormous carry-over; and no solution so fair or so generally acceptable to those directly affected has yet been devised by the mind of man.

This bill does not affect the Northeastern States, States of the West, Middle West, or any other part of our great country, unless they care to look at it from a purely selfish standpoint.

It only directly affects the cotton-growing States, and, if, as said by some, it is an experiment, why not let the South experiment, if it chooses, and the experiment cannot possibly injuriously affect any other section of the country.

This bill is not an attempt to force something on the cotton farmer he does not want, but, on the contrary, an attempt to help him get what he does want and must have if he is to survive—a profit from his cotton.

This bill, when made effective by the will of at least two thirds of those affected, enables that large majority to compel those selfishly inclined to limit their production so as to insure a reasonable profit for all.

The land taken out of cotton production by this bill, while available for other useful purposes, in no way competes with any other section of the country, so there can be no reasonable objection offered by a Member whose district produces corn, wheat, or any other staple crop.

During this debate I have heard it said many times that the farmers of the South were in better condition financially than the farmers of other sections, but personally knowing the conditions in many parts of the cotton-growing section, I hardly think these statements are correct, but even so, it affords no reason for opposing the bill, which is in the nature of a bill initiated by the people themselves and only operative when approved by at least a two-thirds majority, and for that reason alone the objection that it is a menace to liberty, or an unwarranted interference by the Government in business fails.

This bill, in my judgment, will restore to the South a measure of prosperity, which in the end will rebound to the benefit of the entire Nation. It will enable the cotton farmer to pay his debts and save his home and, in addition, will give him a purchasing power to be felt throughout the Nation.

The time has come when the agricultural sections of the United States should give some thought to cooperation, regardless of locality or the kind of crops they are best suited to produce, and this is an opportunity afforded the other agricultural parts of the United States to show the South a spirit of friendly cooperation, with full assurance the South will not fail to respond whole-heartedly to the needs of all other sections.

The committee amendment to section 6 affords ample protection to all other farming sections of the United States against the South using the land taken out of cotton production in competition with the crops of those sections, therefore I cannot understand the attitude of any Member of Congress representing an agricultural district opposing this bill.

The measure is democratic in its tendency, as it allows those affected to decide the question for themselves without interference from others. It is purely a local question for the South, and all we ask is that the South be allowed to decide it.

COTTON MARKETING CONTROL—GOVERNMENT UNDER TWO-THIRDS RULE CONSIDERED JUST

Mr. HOEPPEL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOEPPEL. Mr. Speaker and Members of the House, the bill under discussion has been attacked in reference to the constitutional question involved in the limitation it seeks to place through a marketing tax upon the production of cotton. Candidly, when this bill was first advanced, I was opposed to it, but after hearing the debate and ascertaining that the majority of the Representatives from the Southern States are in favor of it, I am inclined to favor the passage of the bill. I have also observed that the leading members of the farm group and outstanding agricultural representatives from the Northwest and the Western States seem to favor this measure. Therefore, I am inclined to the belief that the bill must have merit in the interests of the cotton grower, otherwise these outstanding farm specialists from the West and Northwest who are not themselves interested in cotton would not espouse it.

No one can deny that we are in a state of economic battle—even more serious in its prolonged consequences to our own citizens than war, and as the Congress of only 531 Members has the right to declare war, affecting all of our citizens, it would seem that 66 percent of the actual cotton growers ought to have the right to agree to a plan which their representatives and they themselves consider the means to their economic salvation. Inasmuch as cotton production is sectional, I doubt whether Members of Congress outside of this sectional area should enforce their will by a negative vote over the expressed desire of the Representatives from the South and the people in the Cotton Belt.

By analogy from the standpoint of my own State, I feel that if the Membership of Congress from California were practically in accord on a proposition for the protection of the citrus-fruit and grape-growing industry in our State, subject to the expressed will of 66 percent of those engaged in those industries, I should look askance at opposition to the interests of California from any other sectional group. For this reason, I propose to vote for this bill, notwithstanding that I am not in accord with the general idea of bureaucratic control from Washington with its throng of office holders and wastage in Government finances through the various avenues of bureaucratic control and administrative "red tape."

The cotton industry is of such importance to millions of our citizens within a sectional area that it may be expedient to accept this bill as an experiment which, if found to be efficacious, might be applied later to other groups of a basic nature.

I wish to state, however, that basically I am opposed to any form of governmental control of private business as long as there are other alternatives. We have as yet failed to enact, or even to advance, legislation which in my opinion would obviate the necessity of the various bureaucracies with their surplusage of personnel. The expenditure by the Government for the next fiscal year of approximately $1,000,000,000 to the farmers of America to obtain the reduction of basic commodities appears as an unnecessary subsidy. It is my opinion that if the Government were to enact legislation remonetizing silver on the basis of 16 to 1, or approximately in that ratio, stimulation through subsidies would be necessary. But with a single metallic standard, the international banking ring will continue to crucify the American people on a cross of gold!

Any form of rehabilitation of silver as a circulating medium on an established parity with gold will weaken or destroy the power of the financial group which has dominated the governments of the world and brought on wars and economic distress through the power of contraction and

expansion of currency, predicated upon a single metallic standard—gold.

The farm group in the Congress has consistently advanced the suggestion that the extension of governmental credit direct to the farmers at a very low rate of interest would alleviate the situation of the legitimate farmer and make unnecessary the subsidies we are now paying.

The subsidies we are extending to entrenched wealth of America through the continued issuance of tax-exempt bonds, which add a double burden to ourselves and posterity, are an evidence of the lack of sympathy on the part of Congress for the common man. How long we can continue to vote subsidies to the farm groups of America and to the banking hierarchy of Wall Street, which subsidies the consumers must eventually pay notwithstanding their diminishing purchasing power, remains to be seen.

The solution of the problems of the depression does not lie in subsidies of any sort to any individual or group. Until we restore the purchasing power of the Nation by the extension of Government credit direct to the individual at a very low rate of interest and upon a basis of sufficient collateral, I feel that we will continue to flounder and fail to reach the proverbial corner which was the dream of the former administration.

The inordinate debts and the excessive interest rates which the people must pay with their present diminished purchasing power, predicated as these debts and interest rates are on the cheap dollar of our more prosperous years, adds a double burden to the debtor class. In the midst of this emergency we should not criticize any expenditures for the relief of our unfortunate unemployed and distressed citizens, nor should we, under any circumstances, add to our burdens by permitting monopolistic control of our currency and credit by the international banking crowd which dominates the Federal Reserve System. The right to coin money and to extend credit should be reaffirmed by the Congress of the United States and immediately applied directly, and if this is done we will not be called upon to vote for measures of this kind which are of doubtful value.

BANKHEAD COTTON BILL

Mr. MITCHELL. Mr. Speaker, I as unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. MITCHELL. Mr. Speaker, I do not believe the proposed act is constitutional. I do not believe this bill is for the best interest of the people of the South or my congressional district.

I fear we will lose the world market for cotton from the South and give it to foreign countries by this bill.

We export 60 percent of our cotton. The price is therefore fixed in the world market. To reduce production so as to improve the price at home means a reduction of our domestic consumption. If one of our own Southern States will not reduce production for another cotton-producing State, how do we expect cooperation from foreign countries? Why not expect an increase from them because of the enactment of this law. It is inevitable that we will reduce cotton production in the South and that foreign nations will increase production. Cotton is our greatest export product.

As has been well said, England lost the world market on rubber by similar action to this we are about to take and will never get it back. She tried to reduce her production and force up the world price of rubber, and by so doing lost her market to other countries.

By reducing cotton production in the South we will increase production in Egypt, Brazil, India, China, and Japan. This is already being done.

We are selling our opportunities to the people of other nations. Why do this? We deprive many of our people of the right to earn their own living.

It is said Egypt will increase its crop this year by 455,000 bales. If cotton sells for 12 cents per pound this will mean a transfer of $27,000,000 of production and purchasing power from the South to Egypt. Argentina is now growing greater cotton crops. Brazil, it is said, can raise 15,000,000 bales of cotton. England is raising cotton. Why give the rest of the world the advantage of our reduction to let them increase their acreage and their national income at our loss and expense?

Cotton must move in the world market. We must again recognize the inexorable law of supply and demand. We cannot ignore this basic principle in government. We cannot lift ourselves by our own bootstraps. I am willing always for the people to regulate their own internal affairs in the respective States. I believe in their sovereignty. I do not believe in compulsory regulation by the Government in the different States.

This bill is quite different from the Agricultural Adjustment Act, which permits voluntary production by signed agreements of the farmers and producers who are affected. The provisions of this bill are mandatory and not voluntary. It is most drastic in its provisions. Why have additional legislation on this subject at this time? Give the legislation already provided under the A.A.A. time in which to have effect. We can then determine whether more drastic legislation of the kind here proposed should be considered.

As a member of the Committee on Agriculture, I listened to the hearings and found no reason for this legislation, which so vitally affects the future welfare of my people in the Southland. I am not prepared to agree to the necessity for, or wisdom of, compulsory control of production. Give voluntary-reduction program a chance and trial. The people can determine for themselves and instruct their Representatives in the future if they want their liberties and property rights taken from them by the Federal Government. I refuse to support legislation of this kind. I am not in favor of a permanent Government maintained by Representatives out of Washington. I am against carpet-bag rule. We had enough of that following the Civil War to last our people and their descendants throughout all time. I am not in favor of the farmer of my district having a policeman or deputy United States marshal at his elbow all the time, or prowling around the farm homes of the South, looking for something to tax, or an opportunity to arrest some farmer and hale him before the Federal court, because he has a bale of cotton stored in the barn on his premises without a tag or label. I believe in the sovereignty and independence of the people. We fought for this right in the early history of this country and have sacrificed blood and treasure to maintain it from that day to this.

The allotment plan in this bill means the farmer can only raise his average number of bales for the past 5 years. All over this is taken up in taxes by the Government. He cannot cultivate his own farm land in wheat, corn, peanuts, tobacco, or any other basic-commodity crop without being subject to a fine and penitentiary sentence. Think of legislation of this kind in America! I am persuaded that this bill will never pass in the opposite side of the Capitol. I am sure it will pass here, for the Members of this body are really not familiar with the provisions of the bill. They are deceived in its terms and purposes. It is too drastic. It is un-American, undemocratic, and unworthy of the South, from whence it has its origin. I am opposed basically to any form of Government control of private business. I am opposed to unnecessary and expensive boards and bureaus of control which a bill of this kind will require. I am opposed to the principle of the bill. I am opposed to the harsh punishment set out in the bill, to be visited upon the farmers if they ignorantly violate the rules and regulations that may be prescribed by the Secretary of Agriculture in Washington. Even he is not asking for the passage of the bill. He says, in effect, that if the southern farmer wants to put his head in the noose, he will draw the rope.

How unfair to our people back home, who do not know of the harsh provisions of this bill! Had the bill passed the Committee on Agriculture as it was originally drawn and presented, before it was amended, it would have caused

bloodshed in the South. The present bill, if passed, will work untold injury to our people. They will no longer be free in their person and property, but ever subject to Government inspection and control. The farmers of my district are unwilling for the Federal Government to tell them what crops they can plant, and in what field and the number of acres they may cultivate. They will rise up in mass against legislation of this kind; yet that is exactly what this bill does. It is intended to put our dairy farmers entirely out of business, so as to help the producers in the East and Central States and the Northwest.

It would force us to leave millions of acres of land out of cultivation. It will throw millions of the tenant farmers in this country out of work and put them on charity. What is needed is more men employed and made self-sustaining, and fewer to be fed from the C.W.A. This must reach an end, or there will be no one left to pay the tax burdens in this country.

What is needed is fewer taxes, instead of additional processing taxes. This bill commits us to a policy of Government control of agriculture.

Already there is signed up 85 percent of the cotton acreage in the United States for this year by the farmers of the South, under the voluntary-control program. This guarantees a reduction of cotton this year. Why disturb a situation that is working so admirably now by all those interested in cotton production? This bill is pressed without any necessity for its passage. The surplus in cotton has decreased rapidly in the past few months. No new or drastic method like the one before us should be tried on our people, who are already uneasy and nervous over the many experiments in government which we have enacted during the past year. We need to give the public a rest. Let business and industry have an opportunity to recover without so many serious remedies.

This bill says to every cotton farmer, "You can produce so many bales, but no more." It is most difficult for those not already engaged in cotton raising to ever get into the business. All land taken out of cotton production, to comply with the terms of this bill, must become subject to the rules and regulations of the Secretary of Agriculture. He is not allowed to put this land back in any staple crop that would be a competitive crop to any other section of the country. He can grow peas or small grass, but must use this on his farm and not sell it. We take away the right to work. The farmer cannot raise his cotton crop, sell what he makes and keep his money, but all over his quota that he makes—and this quota is figured here in Washington (by experts and professors)—he is required to give one half of it to the Government. If he does not do this, he has violated the law, is tried as a criminal and sent to the penitentiary because he has tried to do as he pleased with his own property which he has worked and accumulated. He has raised cotton and sold it in the past and paid for his farm, and now he is to be tried and fined under this law if he seeks to raise cotton upon it and sell in the world market. Why not let us continue to be free American citizens? Free in our person and free in our property rights. I will never vote to send a citizen to the penitentiary whose only crime is that he has failed to pay a tax on the production of a bale or two of cotton. Send him to the penitentiary for producing more cotton than some chief of a bureau here in Washington has figured he is entitled to raise on his own farm. You first confiscate his property by a tax on it and then penitentiary him because he does not, and cannot, pay it. You call him a tax dodger. You, in effect, say, by this bill, "If a farmer raises more cotton than the Secretary of Agriculture says he is entitled to, on his land, he is guilty of a felony and may be sent to the penitentiary." He has committed no greater offense than to toil in the sun "to earn a living by the sweat of his brow."

I cannot support legislation of this kind. It is tyranny. It makes the Secretary of Agriculture a czar, with greater and more far-reaching authority than the kings and emperors of the Dark Ages. I respect the farmers of my district too much to vote to conscript their land and take away their rights and liberties to do as they please with what they have worked for and have a deed to. We have enjoyed the blessings of liberty too long. We have enjoyed the freedom of our homes too many years to surrender now to any new and untried theory of this kind. No one knows what drastic and technical rules the Department will prescribe to enforce this law. We are now doing everything possible under the voluntary crop-reduction plan, and let us go on with this program. We are helping all classes of farmers under its provisions. Why wreck the plan in force by surrendering all the rights that are dear to a brave and chivalrous people who have been famed and renowned throughout the world as the guardians of liberty and the defenders of State rights? Let us stand by the landmarks of the fathers and be sovereign in our homes and farms. Let us stand by the traditions of the South, and continue in opposition to the Federal Government interfering in our local affairs.

We do not need 15,000 "revenue officers" on the pay rolls, to harass and annoy the people. This bill should not pass. If this bill is passed, the same law will soon be proposed for corn, wheat, tobacco, and all other farm products.

This bill, when enacted into law, means that where a farmer has been assigned a certain quota of cotton, as ascertained by the Secretary of Agriculture and his agents, say, 10 bales, he is then entitled to 10 bales of tax-exempt certificates. When his crop is picked he hauls the cotton to the gin. He presents his tax-exempt certificates and is then released from the payment of any tax on that allowance or quota.

If he attempts to gin more than 10 bales he is required to pay 50 percent, or one half, of the market price levy on all cotton above the amount called for by his exemption certificates.

He is required to pay a prohibitive tax on every pound he grows in excess of his allowance. In other words, if, under favorable weather conditions, the farmer grows 15 bales instead of 10, then one half of the 5 bales is conscripted by the Federal Government as a tax.

If we reduce one half the acreage of cotton production in the South, what will become of the one half of our citizens now engaged in its production? Must they be thrown out of employment and forced to surrender to the mandates of the Government one half of the farm lands they now own and in which their life earnings are involved?

I do not favor a farm dictator for our people. I do not favor a policy of government for agriculture, which means, if not now, in the near future, a license will be required on every field and farm before it can be cultivated by its owner. This should never be.

The present voluntary plan is working well. Farmers are now urged to reduce their acreage and crops and are paid for the same.

Americans, a free people, are not willing to surrender freedom of speech and action in never-ending Government regulation, inspection, and taxation. This bill should not be passed.

Governments are created as agencies of men for their protection and service and not that men are made to be governed. I do not believe in one-man rule. I do not believe in autocrats or bureaucrats. "A people are best governed who are least governed." I believe in personal liberty and personal initiative for our people. These principles of government are as true and sacred today as when spoken by Jefferson, the founder of the Democratic Party.

THE INDEPENDENT OFFICES APPROPRIATION BILL

Mr. O'CONNOR. Mr. Speaker, by direction of the Committee on Rules, I present the following privileged report (No. 967) for printing under the rule.

The resolution is as follows:

House Resolution 299

Resolved, That immediately upon the adoption of this resolution the Committee of the Whole House on the state of the Union be, and it is hereby, discharged from the further consideration of the bill H.R. 6663 and the Senate amendments thereto; that the said Senate amendments be, and hereby are, disagreed to by the

House; that the conference requested by the Senate on the disagreeing votes of the two Houses on the said bill be, and hereby is, agreed to by the House; that the Speaker shall immediately appoint the conferees without intervening motion; and that the conferees on the part of the House are hereby given specific authority to agree, with or without amendment, or disagree to any amendment of the Senate to the bill H.R. 6663, notwithstanding the provisions of clause 2 of rule XX.

DISPENSING WITH BUSINESS ON CALENDAR WEDNESDAY

Mr. BYRNS. Mr. Speaker, I ask unanimous consent that the business on Calendar Wednesday, tomorrow, be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

ORDER OF BUSINESS

Mr. BYRNS. Mr. Speaker, as gentlemen of the House are aware, we have a rule in the morning which will have to be considered before we take up the pending cotton bill. I believe it may result in our getting away earlier tomorrow evening if we meet at 11 o'clock. I therefore ask unanimous consent that when the House adjourns today it adjourn to meet at 11 o'clock tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

Mr. MAPES. Reserving the right to object, has the gentleman from Tennessee consulted with the leader on the Republican side?

Mr. BYRNS. No; I have not had that opportunity. Mr. Speaker, I will withdraw my request.

PAYMENT OF EXPENSES OF REPRESENTATIVES TO ISTANBUL, TURKEY (H.DOC. NO. 283)

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

I commend to the favorable consideration of the Congress the enclosed report from the Secretary of State, to the end that legislation may be enacted authorizing an appropriation in the sum of $90,000, or so much thereof as may be necessary, for the expenses of representatives of the United States to meet at Istanbul, Turkey, with representatives of the Turkish Republic, for the purpose of examining the claims presented by either Government against the other, and for the expense of proceedings before an umpire if necessary.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 13, 1934.*

PAYMENT OF CLAIMS OF OFFICERS AND EMPLOYEES OF THE FOREIGN SERVICE (H.DOC. NO. 284)

The SPEAKER also laid before the House the following message from the President of the United States which was read and with the accompanying papers referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

I enclose herewith a report which the Secretary of State has addressed to me in regard to claims of certain officers and employees of the Foreign Service of the United States for reimbursement of losses sustained by them by reason of catastrophes, war, and other causes, during or incident to their service in foreign countries.

I recommend that an appropriation in the amount suggested by the Secretary of State be authorized in order to relieve these officers and employees of the Government of the burden these losses have occasioned.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 13, 1934.*

EXTENSION OF REMARKS

Mr. HOEPPEL. Mr. Speaker, I ask unanimous consent to insert in the RECORD an editorial entitled "We Must Create More Jobs."

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. LAMBETH. I object.

Mr. HOEPPEL. Will the gentleman withhold his objection for a moment?

Mr. LAMBETH. I will.

Mr. HOEPPEL. I want to say to the gentleman that this is boosting the administration.

Mr. LAMBETH. The gentleman can boost the administration in his own remarks, but I object to making the RECORD a scrapbook.

Mr. GILCHRIST. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting in the RECORD an address before the Iowa Hog Corn Committee by R. M. Evans.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

Mr. LAMBETH. Mr. Speaker, I shall have to object.

Mr. GILCHRIST. All right. I will add this to my remarks tomorrow.

EDUCATION

Mr. ALLGOOD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address that I made before the Committee on Education.

The SPEAKER. Is there objection?

There was no objection.

Mr. ALLGOOD. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

The CHAIRMAN. I should like to call on Representative ALLGOOD, of Alabama. Mr. ALLGOOD, you may have all the time you wish.

Mr. ALLGOOD. That is very kind of you, Mr. Chairman, but I will not intrude on your time. I wish to make a few remarks and express my interest in legislation of this character.

I realize that as a rule it has not been the policy of the Federal Government to appropriate money for public education, yet there are exceptions to the rule. For instance, we have appropriated money for vocational education which has been well spent and for a worthy cause. I believe the program of vocational education has worked well throughout the Nation. I know it has in Alabama. It has made possible the giving of scientific training in agriculture to the farm boys of my State. For the girls and young ladies in high school it has made possible training in home-making arts such as cooking, sewing, interior decorating, home care of the sick, canning and preserving of foods, and other related arts. I have on several occasions been invited to attend these schools and to see first-hand the value of the teaching these vocational teachers are doing. It has been my pleasure to attend several of these schools and I assure you that I cannot praise the good work that has been accomplished by them too highly. I therefore know that this money of the Federal Government has been well spent in my State. Thousands of young men and women throughout the South have been trained to go out and fight successfully the battles of life. No curtailment should ever be considered in this type of Federal aid.

If we go back in the history of the country to the period of the War between the States, commonly known as the "Civil War", we can get a picture of a condition that is altogether different to the conditions that exist now as regards the South. Through the authority of the emancipation proclamation 4,000,000 Negroes held in servitude were given freedom. They were illiterate and penniless and were faced with the responsibilities of earning a living in a poorly prepared manner. As a race or class we find that today the Negro of the South owns very little property and therefore pays little or no taxes. The education of the Negro children has been the burden of the white taxpayers of the South. Furthermore, I desire to call to your attention the fact that the war was fought mostly upon southern soil. Our property was destroyed and our wealth exhausted. A great part of our wealth of the South was invested in slaves, and as a result of the war this wealth was totally wiped out. Thus we had a bankrupt South with the sudden addition of added educational responsibilities. We have tried to meet these responsibilities, and in the main the education which has been given the Negroes has been paid for by the white people of the South. For these reasons the white taxpayers of the South have had extra burdens to bear which other sections of the Nation have not had. In my judgment no better use of $100,000,000 could be made so as to supplement the revenues of our States for public education. This money to be spent and supervised by State authorities. Our national well-being rests primarily on an educated citizenship. The need is great. The call comes from every section of the Nation.

If you will take the Comptroller General's report of 1930, Mr. Chairman, you will find some facts that show more conclusively the serious needs of the South. From this report we find that the per capita savings in the State of Massachusetts is approximately $650, while that in Alabama is less than $100 per capita. The average checking account in Massachusetts is around $900, while in Alabama it approximates $150. So we see what happens when a panic comes—and they have been coming—that we have not in the South any large surplus to act as a shock absorber and to keep us going. We could not ourselves have kept the schools going in my State this year. They were forced in some instances to close their doors and turn the children away and place the teaching force in the ranks of the unemployed.

I have given this background of conditions in my State because I am familiar with the deplorable conditions confronting the superintendents of education and the teachers of my State and district. I was in conference with the county superintendents of education in my district last November and I was thus brought face to face with the critical needs of the common schools of the rural counties of Alabama. Our schools were faced with closing at midterm. For this, as well as other good reasons, I supported President Roosevelt's call for $950,000,000 of additional relief aid, and then, without hesitancy, I called upon Administrator Hopkins for the use of a part of this relief fund to keep the common schools of this Nation from closing. For these efforts of mine I have letters and telegrams in great number from superintendents, teachers, parents, and children of my district.

I desire to add one other fact by answering the common question which the opposition to this bill always asks. The question is this: Why go into this field of education that is a State function and add more expense and burden to the Federal Government? My answer to that question is a plain straightforward and honest statement. The Federal Government has gone into almost every other field of service. The Federal Government has provided pensions, hospitalization, and retirement pay for the soldiers as well as Government employees. It has extended billions of credit to banks, railroads, life-insurance companies, and other corporations. It has provided subsidies to shipping interests and for the transportation of mail. It has provided food and clothing for free distribution to needy people, and through the C.W.A. we have given emergency employment to 4,000,000 unemployed people during this winter. I maintain that it is as justifiable for this Federal Government to assist in keeping the schools open for the childhood of the Nation.

In conclusion, I wish to call your attention, Mr. Chairman, to the fact that the schools of the Nation will begin the next school term in September of this year and the Congress will not be in session again until next January, so, therefore, if we mean to do anything for public education let us do it now by reporting out this bill and then work with all our might for its passage.

WILD LIFE

Mr. WALTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address by the gentleman from Pennsylvania [Mr. BERLIN].

The SPEAKER. Is there objection?

There was no objection.

The address is as follows:

Ladies and gentlemen of the radio audience, I was agreeably surprised and pleased on my arrival at the studio to learn that my very dear friend, Seth Gordon, former secretary of the Pennsylvania Game Commission, was to introduce me to this audience.

Mr. Gordon is now secretary of the American Game Association, with offices in the city of Washington, and, in my opinion, one of the ablest and best-informed persons in the United States on wild life and the conservation thereof. He has made a life study of this subject and deserves, from everyone interested, the very greatest commendation for his contributions to this great cause.

I am sure that there are many listening tonight who during the last year visited one or more of the national forests or the national parks. I am sure of this because better than one out of every four men, women, and children of the land were entertained in these natural areas in 1933. Thirty-two millions is the number estimated to have visited the national forests. Three millions visited the national parks, which are, of course, fewer, thus accounting for the great discrepancy in figures.

What do these figures mean? They mean to me that a vast majority of the people in this country are truly interested in nature and the wild animal life these areas support and protect. So it is that I feel that my appeal tonight will not fall upon unfriendly or indifferent ears.

Let us say that you visited one of the national forests last year. Perhaps as you emerged into a clearing or suddenly came upon an eminence of rock and looked about, a deer, a bear, or perhaps only a tiny chipmunk suddenly appeared to share the scene. Your attention was immediately drawn to the animal, no matter the beauty and grandeur of the scenery itself.

Take another set of circumstances. Here in Washington we have the National Academy of Sciences. It contains all manner of mechanical and scientific contrivances, many of which are so arranged that a visitor may operate them by pressing a button. It is a truly fascinating place.

Here in Washington we also have one of the finest zoos in the country, supported by the Federal Government.

Where do you find the most visitors? Where lies the greater interest? The zoo is the answer. The exhibits of wild life are of far greater interest and, I dare say, of far greater educational value than the cold and inanimate wheels, cogs, and cams exhibited at the Academy.

Just as upon that mountainside, or in that clearing, it is the animal life that first attracts your attention—the bird, the slender-legged, white-tailed deer, or old bruin himself lumbering through the underbrush. Who has not thrilled to the bound of the snowshoe rabbit across white ground or to the works of that industrious and intelligent little creature of the crystal streams—the beaver? It seems impossible that there lives a man or woman who, having seen these things, does not respond with a desire to see them again. This appreciation of the creatures that inhabit field, forest, and stream leads, I am sure, to a wish that they be perpetuated—that they have adequate breeding grounds, adequate water, adequate protection. And it is just there that we fail in our duty—we do not put force into our desires and convert them into realities, with the result that year by year the wild life which we so admire grows less and less, all from a variety of causes which we could prevent did we but exert ourselves the slightest bit.

So I want to tell you about the steps that the Congress is taking toward the goal which, I am certain, we would all like to have achieved. Of course, achievement is not possible without your support—without the expression of your desire that the Nation's wild animals, its upland birds and its migratory birds, and its fishes have the care and protection that their immense value to us justifies.

We are, I think, just a little lazy, you might say, in our attitude toward this problem—and it is a very pressing and important problem.

We, perhaps, hike through miles of virgin forest, enjoying every step of the way, breathing in the piney odor, the scent of balsam or fir. We mark the flight of the wild turkey, the partridge, or the lilting songbird with delight. Returning home we feel that it has been an inspiring day. We have seen much game, many birds; we have tramped through apparently endless forest.

So, we say, truly the forests must be endless and the game inexhaustible. Or, at best, we say there seems to be plenty of animal and bird life about. Nature is indeed prodigal.

The actual fact, however, my friends, is that the forests are not endless nor the game inexhaustible, even though nature be prodigal. Man has encroached upon the forests and the home of its inhabitants we so admire. Man has been thoughtless, careless, and selfish in his exploitation of these invaluable natural resources, just as he has with others. We cannot sit back and rest upon the inspiration we derived from our walk through the forest or along the stream. We must not let our sentimental reactions obliterate the realities. It is a case, indeed, where what we do not see will hurt us.

So, taking up these realities, we come to three bills now before the Congress. The first is the so-called "Robinson bill", introduced by Senator ROBINSON of Arkansas. This measure would permit the President of the United States to set aside refuges for game and fish in national forests and upon other public lands with the consent of the States in which those lands may be located. These refuges are absolutely necessary if we are to keep the supply of game and fish we now have and encourage the breeding of more.

The other two bills are identical. One was introduced in the House and the other in the Senate. These twin measures provide for the coordination of the efforts of the Federal Government departments that are working out projects involving the wild life of the Nation.

That you may have some idea of the need for coordination, consider that there are five departments of the Government having authority affecting wild life. They are the Navy Department, the War Department, Department of Commerce, Department of the Interior, and the Department of Agriculture. In the latter are 2 bureaus whose activities touch this subject, in the Commerce Department are 2 more, and in the Interior Department are 3.

With the activities of these bureaus uncoordinated as they touch upon conservation of our wild-life resources, the opportunity for confusion and wasted or duplicated effort is enormous.

As an illustration, let us say that the Reclamation Service of the Department of the Interior decides to drain a large area in the Southwest with the idea of converting it into farm land. At the same time, the Bureau of Biological Survey enters a nearby area intent upon establishing wild-life refuges and breeding grounds. Presently the drainage project is completed and the land is found unfit, for one reason or another, for agricultural purposes. The money is wasted. But that is secondary. What is more serious is a fact that the homes and breeding ground of countless thousands upon thousands of valuable migratory birds have been destroyed. Meanwhile, the Biological Survey is going ahead with its nearby project, whereas, had the work of the two bureaus been coordinated—had they been in a position to get together before either had embarked upon the individual project, things would have been done more efficiently and the country would have been spared the loss of much money and invaluable wild life.

Take another example. On the upper reaches of the Mississippi, the Federal Government was supporting, financially, refuges and breeding grounds for the hard-pressed wild life of that large area. The War Department, meanwhile, decided to build two dams not far away. The result would have been to destroy the effect of the Government's campaign to preserve the wild life there. Happily, the situation was discovered in time, and the two departments involved were brought into conference. The upshot of it was that the War Department changed its plans and decided to build a series of low dams instead of the two big ones, thereby insuring continuance of the valuable conservation program. However, the plans for the big dams necessitated considerable expense, of course, and these had to be scrapped. Had the Robinson bill been effective then, all this time and money would have been spared for all affected departments would have known what projects affecting wild life were contemplated.

You hear a great deal these days, in connection with the Department of Agriculture's efforts to rehabilitate farming, about marginal lands. These are the lands which the Government is seeking to remove from cultivation because they are poor, extremely poor, areas to farm and in many cases they afford the

cultivator less than a living. However, once abandoned, and the occupant moved to more productive acres, these lands may often be used as ideal refuges and breeding grounds for wild life. That they be used for such purposes has been recommended to the Government, and it is to be hoped that the recommendation be accepted and acted upon.

There is one more bill before the Congress which I should like to call to your attention. It is called the "duck stamp" bill—no; it is not a design for a new commemorative stamp. It is far more practical and real than that. The duck stamp bill provides that all hunters of migratory birds be compelled to take out a Federal license in the form of a $1 stamp before their regular hunting license is valid.

This, you might say, is a self-liquidating project. Ninety percent of the money received for the stamps is to be used for the purpose of restoring and maintaining refuges and breeding grounds, the balance of the funds to be used for expenses of administration, such as printing the stamps, and so forth.

Surely $1 could not be more prudently invested by the sportsman, and I might say here there is nothing in the law to prevent him from buying as many of these stamps as he wishes, and thus contributing further to the work in which he has a direct interest.

These four bills, the Robinson, the twin measures for coordination, and the duck-stamp measure have the support of President Roosevelt. Action upon them should not be delayed, and I am happy to say there does not appear to be any insurmountable opposition to their passage, but that does not mean that your active interest is not necessary. It is essential, and I appeal for the support of the millions in our land who have a keen love for field, forest, and stream.

As to what can be done in the matter of preserving and encouraging wild life, I point with pride to my own State of Pennsylvania, where there is in practical operation one of the most successful and efficient conservation programs in the country. This model project is financed by the comparatively modest sum of two and one-half million dollars annually. One and one-half millions come from the sportsmen of the State, through payment of license fees.

And as a simple illustration of what such program as that of Pennsylvania means to the native wild life, consider that the famous black bear, the "clown of the woods" as he is called, and the joy of every child, is more abundant in Pennsylvania than in any other State of the Union. A system of game refuges, unequaled anywhere else, and a persistent and wisely directed restocking campaign is responsible for this happy conditions.

Since my election to Congress I have been honored by appointment to the House Committee on Conservation of Wild Life Resources, and as a member of that committee I am applying my best efforts along the lines which I have outlined to you tonight, using as a basis for my action 30 years of association with conservation activities in Pennsylvania.

To emphasize the conditions which confront us, I am going to quote the words of J. N. Darling, the famous politicial cartoonist known to millions as "Ding." Mr. Darling, in phrases as graphic as his pen-and-ink drawings, said in a recent article on conservation: "The absent-minded professor, who came down to breakfast, poured the maple sirup on his bald head and scratched his pancakes, was no more disorderly in his progress toward the goal of his physical needs than have been the inhabitants of this North American Continent in their misdirected utilization of the Nation's natural resources. The mess which we have created for ourselves is equally astonishing and inexcusable."

Ladies and gentlemen, the work which we in Congress are attempting to do is directed toward the untangling of the unfortunate knot into which we have drawn these resources. As such, it is work which affects every one of us, and so your support is justified and utterly necessary if we are to succeed.

This work is, you might say, the first step in an orderly program for the conservation which the country faces as a necessity. Other steps are being considered. Mr. Darling, whose words I just quoted, was a member of the President's Committee on Wild Life Restoration. That committee has made its survey and presented its report to Mr. Roosevelt. If the recommendations it contains are presented to the Congress for study and legislation is subsequently drawn up to give force and authority to them, then more valuable steps will have been taken toward our goal.

This committee says, and I quote from its report: "A national wild-life-restoration program is economically justifiable and immediately practical by utilizing submarginal and commercially-unprofitable agricultural lands now contributing largely to the surplus of agricultural products."

The committee then goes on to propose the use of $25,000,000 of Public Works and Civil Works funds to start acquisition of the areas recommended for game refuges and breeding grounds.

So, you see, a program is actually being formulated. It will take considerable study and careful planning, but the movement is under way. Action is being taken, and you can stimulate the progress of this action by making your enthusiastic support known to us here in Washington. Your Congressman will be glad to receive your commendation of this work, so do not hesitate to express yourself on this vital subject. Your endorsement will mean passage of the required legislation sooner and action was never more necessary than it is this time.

Mr. FISH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by incorporating therein a newspaper article on aviation by Elliott Roosevelt, a son of the President of the United States.

The SPEAKER. Is there objection?

Mr. LAMBETH. Mr. Speaker, I object.

Mr. FISH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by including a statement by Mr. Andrew W. Mellon, a former Secretary of the Treasury, in answer to the charges that his income taxes were not correct and denouncing the Government action against him for alleged tax evasion as politics of the crudest sort.

The SPEAKER. Is there objection?

Mr. O'MALLEY. Mr. Speaker, I object.

THE AIR MAIL

Mrs. ROGERS of Massachusetts. Mr. Speaker, would the floor leader, the gentleman from Tennessee [Mr. BYRNS], yield to me for a question?

Mr. BYRNS. Certainly.

Mrs. ROGERS of Massachusetts. I am very anxious to know when the bill will come out that will send the carrying of the air mail back to the commercial companies. I notice that the President said in his instructions to the Secretary of War to cooperate with the Department of Commerce and the Post Office Department, that he thought the commercial pilots who were in the future to fly the air mail——

Mr. O'MALLEY. Mr. Speaker, I demand the regular order.

Mr. SNELL. This is the regular order.

Mrs. ROGERS of Massachusetts. Be asked to instruct the Army pilots in flying.

Mr. O'CONNOR. Mr. Speaker, what is the regular order? The gentleman from Tennessee [Mr. BYRNS] has not obtained the floor.

The SPEAKER. The Chair recognizes the gentleman from Tennessee now, and the lady will propound her inquiry.

Mrs. ROGERS of Massachusetts. The President seems to know apparently what companies will be getting the air-mail contracts. That is, I infer that from his statement.

Mr. BYRNS. I am very sorry that I cannot give the lady the slightest information in regard to just when that bill will come out. I hope very soon. It is now in the committee, I understand, in the course of preparation. Whether or not hearings are being held on it at this time I do not know, but I am very hopeful, and I think it is the intention of the committee to report it out at the earliest possible date.

Mrs. ROGERS of Massachusetts. I believe the gentleman would be just as anxious as I to return the air mail to the commercial companies.

Mr. BYRNS. I do not know whether the lady and I would agree in every particular about that, but I am very anxious to see the matter settled so that we can carry the mail with the least possible loss of life. I hope satisfactory terms can be reached whereby commercial companies can be employed, but I do not want companies which have been guilty of fraud in the past recognized.

Mrs. ROGERS of Massachusetts. I realize that fully, so far as the gentleman personally is concerned, I also know that the gentleman would like to have the industry started again and service given not only to the air-mail public, but to the people who travel by air.

Mr. BYRNS. I should be delighted to see that done and I am sure the lady will agree with me in my expectation that the contracts that are made will be above criticism and not open to the same criticism which has been leveled at some of the contracts previously made.

Mrs. ROGERS of Massachusetts. Of course that is a matter that has not been settled yet, I think the gentleman will agree. I know the gentleman is anxious, and I feel sure that he will hasten the matter.

Mr. BYRNS. I hope the bill will come out very soon, and I have every expectation that it will but I have no direct information.

Mrs. ROGERS of Massachusetts. The gentleman has no information as to which companies will be given the contracts?

Mr. BYRNS. Oh, no.

Mrs. ROGERS of Massachusetts. I thought perhaps the President knew, because he spoke of the training of Army pilots through cooperation with private companies, who later on will carry the mails.

Mr. O'CONNOR. I hope those companies which practiced fraud on the last Postmaster General, a member of the Republican National Committee, do not get the contracts back again.

Mr. SNELL. As long as the gentleman has started the matter of fraud, will the gentleman state just which companies committed fraud?

Mr. O'CONNOR. The contracts were made by those companies, and were put in there by a Republican national committeeman, the former Postmaster General.

Mr. FISH. What about the present Democratic Postmaster General?

Mr. SNELL. As far as any information has come to the public, they have not proved any fraud committed by any one of them.

Mr. BYRNS. Oh, I think we have abundant prima facie evidence, that has convinced the country, whether it convinced the gentleman or not.

Mr. FISH. Mr. Speaker, I ask unanimous consent that the gentleman from Tennessee may have 1 hour in which to discuss this subject.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 3025. An act to amend section 12B of the Federal Reserve Act so as to extend for 1 year the temporary plan for deposit insurance, and for other purposes; to the Committee on Banking and Currency.

ENROLLED BILL SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 7199. An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1935, and for other purposes.

ADJOURNMENT

Mr. BYRNS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 28 minutes p.m.) the House adjourned until tomorrow, Wednesday, March 14, 1934, at 12 o'clock noon.

COMMITTEE HEARINGS

COMMITTEE ON THE PUBLIC LANDS

(Wednesday, Mar. 14, 10:30 a.m.)

Room 328, House Office Building.

COMMITTEE ON MERCHANT MARINE, RADIO, AND FISHERIES

(Wednesday, Mar. 14, 10 a.m.)

Continue hearings on H.R. 7147, 7148, and 7149. In committee room.

COMMITTEE ON THE POST OFFICE AND POST ROADS

(Wednesday, Mar. 14, 1934, 10 a.m.)

Continue hearings on air mail.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

382. A communication from the President of the United States, transmitting supplemental estimates of appropriation pertaining to the legislative establishment under the Architect of the Capitol for the fiscal year 1934, in the sum of $248,820.02; also a draft of proposed legislation affecting an existing appropriation (H.Doc. No. 282); to the Committee on Appropriations and ordered to be printed.

383. A letter from the Assistant Secretary of Labor, transmitting pursuant to law a report that there is an accumulation of miscellaneous material in the office of the Secretary, the Bureau of Labor Statistics, the Children's Bureau, and the United States Employment Service which will be of no further use in the transaction of official business, and which have no historical value; to the Committee on Disposition of Useless Executive Papers.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. LUDLOW: Committee on Appropriations. H.R. 8617. A bill making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1935, and for other purposes; with amendment (Rept. No. 962). Referred to the Committee of the Whole House on the state of the Union.

Mr. CHRISTIANSON: Committee on Indian Affairs. H.R. 7085. A bill to amend the act approved June 28, 1932 (47 Stat.L. 337); without amendment (Rept. No. 965). Referred to the Committee of the Whole House on the state of the Union.

Mr. McDUFFIE: Committee on Insular Affairs. H.R. 8573. A bill to provide for the complete independence of the Philippine Islands, to provide for the adoption of a constitution and a form of government for the Philippine Islands, and for other purposes; without amendment (Rept. No. 968). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BLACK: Committee on Claims. H.R. 471. A bill for the relief of Physicians and Surgeons Hospital, Ltd.; with amendment (Rept. No. 931). Referred to the Committee of the Whole House.

Mr. THOM: Committee on Claims. H.R. 1306. A bill for the relief of Clarence A. Wimley; with amendment (Rept. No. 932). Referred to the Committee of the Whole House.

Mr. CLARK of North Carolina: Committee on Claims. H.R. 1308. A bill for the relief of John Parker Clark, Sr.; with amendment (Rept. No. 933). Referred to the Committee of the Whole House.

Mr. CLARK of North Carolina: Committee on Claims. H.R. 1345. A bill for the relief of John Parker Clark, Jr.; with amendment (Rept. No. 934). Referred to the Committee of the Whole House.

Mr. BLANCHARD: Committee on Claims. H.R. 1794. A bill for the relief of Bertha A. Bishop; with amendment (Rept. No. 935). Referred to the Committee of the Whole House.

Mr. BLANCHARD: Committee on Claims. S. 1949. An act for the relief of C. J. Mast; with amendment (Rept. No. 936). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 4387. A bill for the relief of Mary A. Rockwell; without amendment (Rept. No. 937). Referred to the Committee of the Whole House.

Mrs. CLARKE of New York: Committee on Claims. H.R. 5064. A bill to pay certain fees to Maude G. Nicholson, widow of George A. Nicholson, late a United States commissioner; with amendment (Rept. No. 938). Referred to the Committee of the Whole House.

Mr. O'BRIEN: Committee on Claims. H.R. 5400. A bill for the relief of Thomas F. Olsen; with amendment (Rept. No. 939). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. H.R. 5566. A bill for the relief of Gerald Mackey; with amendment (Rept. No. 940). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. H.R. 5817. A bill for the relief of the Mary Black Clinic; with amendment (Rept. No. 941). Referred to the Committee of the Whole House.

Mr. O'BRIEN: Committee on Claims. H.R. 6284. A bill for the relief of John R. Novak; with amendment (Rept. No. 942). Referred to the Committee of the Whole House.

Mrs. CLARKE of New York: Committee on Claims. H.R. 6625. A bill for the relief of Charles Farr; with amendment (Rept. No. 943). Referred to the Committee of the Whole House.

Mr. RAMSPECK: Committee on Claims. H.R. 6654. A bill for the relief of Nephew K. Clark; without amendment (Rept. No. 944). Referred to the Committee of the Whole House.

Mrs. CLARKE of New York: Committee on Claims. H.R. 6857. A bill to reimburse officers, enlisted men, and civilian employees of the Army and their families and dependents, or their legal representatives, for losses sustained as a result of the hurricane which occurred in Texas on August 16, 17, and 18, 1915; without amendment (Rept. No. 945). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. H.R. 7163. A bill for the relief of the D. F. Tyler Corporation and the Norfolk Dredging Co.; with amendment (Rept. No. 946). Referred to the Committee of the Whole House.

Mr. BLANCHARD: Committee on Claims. H.R. 7367. A bill for the relief of Sarah Smolen; with amendment (Rept. No. 947). Referred to the Committee of the Whole House.

Mr. BLANCHARD: Committee on Claims. H.R. 7728. A bill for the relief of James Slevin; with amendment (Rept. No. 948). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8077. A bill for the relief of the Allegheny Forging Co.; with amendment (Rept. No. 949). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8078. A bill for the relief of the Allegheny Forging Co.; with amendment (Rept. No. 950). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8079. A bill for the relief of the Allegheny Forging Co.; with amendment (Rept. No. 951). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8108. A bill for the relief of Jeannette Weir; with amendment (Rept. No. 952). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8115. A bill for the relief of May L. Marshall, administratrix of the estate of Jerry A. Litchfield; with amendment (Rept. No. 953). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8157. A bill for the relief of First Lt. Walter T. Wilsey; with amendment (Rept. No. 954). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. H.R. 8328. A bill for the relief of the heirs of C. K. Bowen, deceased; with amendment (Rept. No. 955). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. S. 170. An act for the relief of Patrick Henry Walsh; with amendment (Rept. No. 956). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. S. 620. An act for the relief of Catherine Wright; with amendment (Rept. No. 957). Referred to the Committee of the Whole House.

Mr. BLACK: Committee on Claims. S. 1191. An act for the relief of the Sultzbach Clothing Co.; with amendment (Rept. No. 958). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. S. 1401. An act to pay a gratuity to Emma Ferguson Starrett; with amendment (Rept. No. 959). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. S. 1430. An act for the relief of M. Thomas Petroy; with amendment (Rept. No. 960). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. S. 1516. An act for the relief of Michael Bello; with amendment (Rept. No. 961). Referred to the Committee of the Whole House.

Mr. CARTWRIGHT: Committee on Indian Affairs. H.R. 7543. A bill to compensate the heirs of James Taylor, a deceased Cherokee Indian, for all their title, interest, or claim to certain lands in the State of North Carolina, now held by the United States as a part of the forest reserve, and for other purposes; with amendment (Rept. No. 964). Referred to the Committee of the Whole House.

Mr. CHRISTIANSON: Committee on Indian Affairs. H.R. 8448. A bill for the relief of N. Lester Troast; without amendment (Rept. No. 966). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. LUDLOW: A bill (H.R. 8617) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1935, and for other purposes; to the Committee on Appropriations.

By Mr. ELLENBOGEN: A bill (H.R. 8618) to reduce the fees in naturalization proceedings, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. COCHRAN of Missouri: A bill (H.R. 8619) to authorize the Reconstruction Finance Corporation to make loans to aid in the operation and maintenance of institutions for religious instruction and worship, and for other purposes; to the Committee on Banking and Currency.

By Mr. ELLENBOGEN: A bill (H.R. 8620) to reduce the fees charged for copies of naturalization certificates, to supplement naturalization laws, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. SMITH of Washington: A bill (H.R. 8621) to provide for the construction of a post-office building at Centralia, Wash.; to the Committee on Public Buildings and Grounds.

Also, a bill (H.R. 8622) to provide for the construction of a post-office building at Shelton, Wash.; to the Committee on Public Buildings and Grounds.

By Mr. LUDLOW: A bill (H.R. 8623) to provide for the conservation and settlement of estates of absentees and absconders in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. McSWAIN: A bill (H.R. 8624) to authorize the retirement of a certain officer; to the Committee on Military Affairs.

By Mr. FERNANDEZ: A bill (H.R. 8625) to provide for the addition or additions of certain lands to the Chalmette National Monument in the State of Louisiana, and for other purposes; to the Committee on the Public Lands.

By Mr. EDMONDS: Resolution (H.Res. 298) directing the Committee on Expenditures in the Executive Departments to make certain investigations; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CROSS of Texas: A bill (H.R. 8626) granting a pension to Lucy Mahala Tuggle; to the Committee on Pensions.

Also, a bill (H.R. 8627) granting a pension to Georgia L. Grubb; to the Committee on Pensions.

Also, a bill (H.R. 8628) granting a pension to Edward Wright; to the Committee on Pensions.

By Mr. DOCKWEILER: A bill (H.R. 8629) for the relief of Eugene F. Lawler; to the Committee on Military Affairs.

Also, a bill (H.R. 8630) for the relief of Jessie P. Bleakley; to the Committee on Claims.

Also, a bill (H.R. 8631) for the relief of Samuel Kaufman; to the Committee on Military Affairs.

By Mr. EDMONDS: A bill (H.R. 8632) for the relief of Edith W. Foley; to the Committee on Claims.

By Mr. FOCHT: A bill (H.R. 8633) granting an increase of pension to Mary E. Dile; to the Committee on Invalid Pensions.

By Mr. HENNEY: A bill (H.R. 8634) for the relief of the National Cheese Producers' Federation of Plymouth, Wis.; to the Committee on Claims.

Also, a bill (H.R. 8635) for the relief of Clarence H. Lowell; to the Committee on Military Affairs.

By Mr. McGUGIN: A bill (H.R. 8636) granting an increase of pension to Nancy E. Pettit; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H.R. 8637) granting a pension to Sarah L. Ellison; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2958. By Mr. CULKIN: Petition of the Woman's Christian Temperance Union of Beaver Falls, N.Y., urging the approval of House bill 6097 providing for Federal supervision of motion pictures; to the Committee on Interstate and Foreign Commerce.

2959. By Mr. DONDERO: Petition of citizens of the State of Michigan, protesting against certain phases of the Economy Act and the regulations thereunder, and petitioning Congress to take action to restore all benefits as of March 19, 1933, to disabled veterans with service-connected disabilities; to the Committee on World War Veterans' Legislation.

2960. By Mr. ENGLEBRIGHT: Petition of citizens of Sonora, Jamestown, Columbia, Red Bluff, Redding, Downieville, Loyalton, Goodyears Bar, Santa Paula, and Petaluma, requesting restoration of pensions, hospitalization, and care of veterans of Spanish-American War as existed prior to enactment of Public Law No. 2, Seventy-second Congress; to the Committee on Pensions.

2961. By Mr. GUYER: Petition of 6,000 citizens of Kansas, protesting against monopolistic control of radio broadcast, and asking especially for freedom of broadcast for religious services; to the Committee on the Merchant Marine, Radio, and Fisheries.

2962. By Mr. FULMER: Petition of the postal employees of the Columbia post office, Columbia, S.C., respectfully urging that you use your influence to have promulgated and passed the necessary legislation to eliminate, for the fiscal year ending June 30, 1935, the provision of existing law whereby the furlough without pay of postal and other Government employees can be invoked by heads of departments; to the Committee on the Post Office and Post Roads.

2963. Also, petition of the postal employees of the Orangeburg, S.C., post office, respectfully urging that you use your influence to have promulgated and passed the necessary legislation to eliminate, for the fiscal year ending June 30, 1934, the provisions of the existing law whereby the furlough without pay of postal and other Government employees can be invoked by heads of departments; to the Committee on the Post Office and Post Roads.

2964. By Mr. KENNEDY of New York: Petition of the Legislature of the State of New York, that the Congress of the United States provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control of the waterways and enact the necessary legislation in carrying into effect such work; to the Committee on Flood Control.

2965. By Mr. KENNEY: Petition of the mayor and Council of the Borough of Northvale, county of Bergen, State of New Jersey, endorsing House bill 3082, entitled "A bill to amend the Reconstruction Finance Corporation Act so as to extend the provisions thereof to provide emergency financial facilities to the municipalities of the Nation"; to the Committee on Banking and Currency.

2966. Also, petition of the Common Council of the City of Englewood, N.J., approving and endorsing House bill 3082, entitled "A bill to amend the Reconstruction Finance Corporation Act so as to extend the provisions thereof to provide emergency financial facilities to the municipalities of the Nation"; to the Committee on Banking and Currency.

2967. By Mr. KINZER: Resolution of the Lancaster sector, Army of the United States, Lancaster, Pa., requesting provision to accept and train full quota of applications for citizens' military training camps; to the Committee on Appropriations.

2968. By Mr. LINDSAY: Petition of Meyer, Lyra & Co., Inc., general exporters, New York City, favoring House bill 8430; to the Committee on Ways and Means.

2969. Also, petition of Michael M. Helfgott, attorney, New York City, urging the passage of House bill 8409; to the Committee on Invalid Pensions.

2970. By Mr. LUDLOW: Petition of members of the Second Baptist Missionary Society of Indianapolis, Ind., favoring early hearings and favorable action on the Patman motion picture bill (H.R. 6097) providing higher moral standards for films entering interstate and international commerce; to the Committee on Interstate and Foreign Commerce.

2971. By Mr. MANSFIELD: Petition of 140 cotton farmers of Matagorda County, Tex., favoring cotton allotment on basis of total land in cultivation, but opposing allotment on basis of previous cotton production; to the Committee on Agriculture.

2972. By Mr. MARTIN of Massachusetts: Petition of Minnie A. Knapp and sundry residents of Attleboro, Mass., favoring old-age compensation as provided in House bill 7019; to the Committee on Labor.

2973. By Mr. RUDD: Petition of Meyer, Lyra & Co., Inc., New York City, favoring the passage of House bill 8430; to the Committee on Ways and Means.

2974. By Mr. TRAEGER: Petition of the Council of the city of Los Angeles, dated February 27, 1934, that the United States Government transfer its official designation of an air-mail aviation field for the city of Los Angeles to the Los Angeles Municipal Airport, together with other Federal aviation services pertaining thereto, for permanent location; to the Committee on the Post Office and Post Roads.

2975. By the SPEAKER: Petition of the Sumter County Ministerial Association, respectfully petitioning your honorable body for early hearings and favorable action on the Patman motion-picture bill (H.R. 6097) providing higher moral standards for films entering interstate and international commerce; to the Committee on Interstate and Foreign Commerce.

2976. Also, petition of the municipal government of Sarrat, Province of Ilocos Norte, P.I., urging passage of the King bill for Philippine independence; to the Committee on Insular Affairs.

2977. Also, petition of the municipal government of Nasugbu, Batangas, P.I., urging passage of the King bill for Philippine independence; to the Committee on Insular Affairs.

SENATE

WEDNESDAY, MARCH 14, 1934

(Legislative day of Wednesday, Feb. 28, 1934)

The Senate met as in executive session at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On motion of Mr. ROBINSON of Arkansas, and by unanimous consent, the reading of the Journal for the calendar days Monday, March 12, and Tuesday, March 13, was dispensed with, and the Journal was approved.

CALL OF THE ROLL

Mr. LEWIS. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Bulow	Dickinson	Hastings
Ashurst	Byrd	Dieterich	Hatch
Austin	Byrnes	Dill	Hatfield
Bachman	Capper	Duffy	Hayden
Bailey	Carey	Erickson	Hebert
Bankhead	Clark	Fess	Johnson
Barbour	Connally	Frazier	Kean
Barkley	Coolidge	George	Keyes
Black	Copeland	Gibson	La Follette
Bone	Costigan	Goldsborough	Lewis
Borah	Couzens	Gore	Logan
Brown	Cutting	Hale	Lonergan
Bulkley	Davis	Harrison	Long

McAdoo	O'Mahoney	Russell	Townsend
McCarran	Overton	Schall	Tydings
McGill	Patterson	Sheppard	Vandenberg
McKellar	Pittman	Shipstead	Van Nuys
McNary	Pope	Smith	Wagner
Metcalf	Reed	Steiwer	Walcott
Neely	Reynolds	Stephens	Walsh
Norris	Robinson, Ark.	Thomas, Utah	Wheeler
Nye	Robinson, Ind.	Thompson	White

Mr. HEBERT. I desire to announce that the Senator from South Dakota [Mr. NORBECK] is necessarily absent from the Senate.

Mr. LEWIS. I desire to announce the necessary absence of the Senator from Virginia [Mr. GLASS]; also, that the Senator from Arkansas [Mrs. CARAWAY], the senior Senator from Florida [Mr. FLETCHER], the junior Senator from Florida [Mr. TRAMMELL], the Senator from Utah [Mr. KING], and the Senator from Oklahoma [Mr. THOMAS] are necessarily detained from the Senate on official business.

I regret to announce that the Senator from Iowa [Mr. MURPHY] is detained from the Senate on account of a severe cold.

The VICE PRESIDENT. Eighty-eight Senators have answered to their names. A quorum is present.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The Senate resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed on July 18, 1932.

The VICE PRESIDENT. The question is on agreeing to the resolution of ratification, with the reservation reported by the committee.

Mr. LA FOLLETTE. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. LA FOLLETTE. It is my understanding that the committee reservation was agreed to yesterday.

The VICE PRESIDENT. The reservation was agreed to yesterday; and the question is on agreeing to the resolution of ratification, as so amended.

Mr. LEWIS. Mr. President, the reservations submitted by the Senator from Missouri [Mr. CLARK] and those by myself having been withdrawn, and others, I think, more or less withdrawn from consideration, I wish to yield to my colleague [Mr. DIETERICH], who wishes to present his view as to reservations offered by him.

Mr. DIETERICH. Mr. President, on February 9 and February 13 I gave notice of the presentation of certain reservations to be offered as amendments to the resolution of ratification. It seems that all the other reservations, other than the committee reservation, have been withdrawn. It is not my desire to try to prolong the argument on the pending treaty. After conferring with my colleague [Mr. LEWIS], who has been leading the fight against the ratification of the treaty, conscious of the argument he has presented which would clearly indicate that, even though these reservations were adopted, the treaty would be so objectionable that I could not support it, I have determined that I will not offer the reservations which I have heretofore submitted.

The VICE PRESIDENT. The reservations submitted by the Senator from Illinois are withdrawn. The question is on agreeing to the resolution of ratification as amended by the reservation reported by the committee.

Mr. LA FOLLETTE. Mr. President, in my time I ask unanimous consent that there may be read at the desk an editorial appearing in this morning's Washington Herald.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The Chief Clerk read as follows:

[From the Washington Herald, Wednesday, Mar. 14, 1934]

UNITED STATES SENATE SHOULD RATIFY ST. LAWRENCE TREATY WITH CANADA

The completion of the St. Lawrence waterway from the Great Lakes to the sea depends upon the ratification by the Senate of the so-called "St. Lawrence Treaty with Canada."

One cannot read the speeches of Senators on this subject without realizing how feigned and unsubstantial are the arguments against ratification.

In a special message from President Roosevelt to the Senate on January 10 the case for ratification was summed up perfectly with a brevity and comprehensiveness which are characteristic of the President, who based his plea properly upon "broad national reasons."

His message is accompanied by an admirable presentation of the facts forming the inducement and the justification of the treaty.

The two main considerations are navigation and power.

The completed seaway from Duluth to the Atlantic Ocean will provide a waterway in which ocean-going vessels may move with unrestricted speed over 97 percent of the total distance.

The capacity of the existing waterway is practically absorbed by the commerce of today. With a return of normal conditions it will be greatly exceeded.

The completion of the project will create a new seacoast for the United States, a new shore line 3,500 miles in length reaching into the heart of the Nation and converting 30 American cities, located on the Lakes and connecting channels, into virtual seaports.

This extended coast line of the United States—for it is nothing else—practically brings to 28 of the 48 States a proximity to the great sea routes, which will give them in many important respects the advantages of a maritime position.

It will open up a region which has a production and consumption capacity comparable with the North Atlantic States.

Such a vast development cannot fail to be of benefit to the Nation as a whole.

The second great objective relates to electric power.

As the President says, the St. Lawrence River is a source of incomparably cheap power located within a short distance of a great industrial and urban market and within cheap and easy transmission distance to millions of consumers.

While Canada can develop a huge amount of new power at the two rapids which lie wholly within Canadian territory, the power resources of the portion of the St. Lawrence River which lies in American and Canadian territory jointly cannot be developed without the aid of this treaty.

Such power development will be one of the most economical on the continent. Its transmission cost to the thickly populated areas which constitute the market for it will afford great relief from burdensome and excessive charges.

It will provide a yardstick on electrical costs which will afford protection against the too-familiar and long-existing exploitation of the public in the matter of rates.

And it will assure a great industrial section of the United States that its future growth in population and industry will not find the vital public need of cheap and abundant power unprovided for.

The President, referring to the familiar and rather overworked arguments of the treaty's opponents, makes a telling reply when he says:

"Let us be wholly frank in saying that it is better economics to send grain or other raw materials from our Northwest to Europe via the Great Lakes and St. Lawrence than it is to send them around three sides of a square—via Texas ports or the Mississippi, thence through the Gulf of Mexico, and thence from the southern end of the North Atlantic to its northern end. It is well to remember that a straight line is the shortest distance between two points."

Again he alludes to the historic fact that every great improvement directed to better commercial communications, whether in the case of railroads into new territory, or the deepening of great rivers, or the building of canals, or even the cutting of the Isthmus of Panama, have all been subjected to opposition on the part of local interests.

He dismisses these fears as imaginary and conjured up. The people who are under their spell fail to realize, he points out, that improved transportation always results in increased commerce, benefiting directly and indirectly all the sections.

From careful surveys it has been demonstrated that the building of the St. Lawrence seaway will not injure the railroads or throw their employees out of work.

It will not in any way interfere with the proper use of the Mississippi River or Missouri River for navigation, and it contains adequate provision for the needs of the Chicago Drainage District and for navigation between Lake Michigan and the Mississippi River.

Why should there be any hesitation to ratify this treaty?

There is no undertaking which the mind can envisage which is so sure eventually, and in the near and immediate future, to be accomplished.

It is certain! It is destined!

Why should it not be done now, when in addition to every other reason for not delaying it, there is the pressing duty of providing work for the thousands who are unemployed?

Opposition to this treaty will not be a source of pride or pleasant recollection to any Senator who is so mistaken or deluded as to cast a vote against it!

It is a vote against the country's interests, and against the desires of the people!

Mr. LEWIS. Mr. President, the able Senator from North Carolina [Mr. BAILEY] having tendered previously a reservation, in his desire to join with us in removing as early as possible any wholly unnecessary matter previous to the vote upon the main question, I am authorized by him to state that he withdraws his reservation, and to ask that it be

treated as withdrawn along with others which were withdrawn under my suggestion.

The VICE PRESIDENT. The reservation offered by the Senator from North Carolina [Mr. BAILEY] is withdrawn.

Mr. LA FOLLETTE. Mr. President, I have data which I had prepared, dealing with two aspects of the pending problem, which under limitation of debate it has been impossible for me to submit to the Senate. I, therefore, ask unanimous consent that the material dealing with the diversion of water at Messina, N.Y., may be inserted in the RECORD as a part of my remarks, together with certain data and tables dealing with the question of commerce from ports along the Atlantic and Gulf coasts.

I also wish to place in the RECORD a telegram received some weeks ago from Mr. D. B. Robertson, president of the Brotherhood of Locomotive Firemen and Enginemen.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The telegram and data are as follows:

MIAMI, FLA., *February 5, 1934.*

Senator ROBERT LA FOLLETTE,
Senate Office Building, Washington, D.C.:

President Roosevelt's statement in his message that Canada could complete the Great Lakes-St. Lawrence seaway alone without the power project if United States failed to cooperate presents a factor which is sufficient, in my opinion, to warrant reconsideration of whole subject by railway labor organizations, because United States would be placed at a disadvantage as against Canada if St. Lawrence seaway was completed by Canada alone, and we should lose opportunity of power development. So far as the public power project on the St. Lawrence is concerned, you will remember that railway labor has always strongly favored similar developments in the public interest at Muscle Shoals and Boulder Dam. The railway labor organization of which I am chief executive would place no obstacle in the way of public development of the St. Lawrence project, and does not countenance or support any effort to make a vote upon the treaty a test of support of our legislative program.

D. B. ROBERTSON.

(Mr. Robertson is president of the Brotherhood of Locomotive Firemen and Enginemen. He appeared before the Senate Committee on Foreign Relations on Friday, Dec. 2, 1932, to present the views then held by the railroad labor organizations concerning the Great Lakes-St. Lawrence Treaty.)

COMMERCE OF THE OCEAN AND GULF PORTS

Out of the States on the oceans or the Gulf only two have leading seaports which consistently show a larger percentage of foreign than coastwise and intercoastal commerce.

The only ports in the United States in this classification are New Orleans, La., and Baltimore, Md. Both of these ports, however, show more domestic than foreign commerce when all shipping handled in their harbors is taken into consideration.

These two cities occupy a uniquely favored position among all the ports on the Atlantic, Gulf, and Pacific coasts, due in part to advantages of geographical location and in part to enormous expenditures by the Federal Government to promote the commerce that passes through their harbors.

New Orleans is the chief beneficiary among all the seaports of the United States of channel, flood control, and other work on the Mississippi River system undertaken by the Federal Government.

Up to June 30, 1933, Congress had appropriated $504,471,484.04 for the improvement of navigation on the Mississippi River system plus $359,435,763.12 for flood control. In addition $44,000,000 has been allotted by the Public Works Administration within recent months for flood control on the Mississippi River proper, plus $33,500,000 for locks and dams on the upper Mississippi. This appropriation of $941,407,247.16 in Federal funds takes no account of harbor improvements, the construction of the intracoastal waterway, and other items which increase the total to upward of $1,000,000,000.

Like New Orleans, Baltimore enjoys a great natural advantage which no project in another section can adversely affect due to its location as the great port of an inland waterway.

Situated on Chesapeake Bay, with the Susquehanna and Potomac Rivers emptying into this great watercourse, Baltimore has an enormous interest in the shipping of heavy, bulky products which do not flow in the commerce designated as intercoastal or coastwise trade. Nevertheless, this trade gives employment and profit to the harbor in volume and accounts for a large portion of the total shipping of the harbor.

The shipping of the port of Baltimore for the year 1931 was as follows:

Water-borne commerce of Baltimore Harbor, 1931

Classes of commodities	Foreign		Coastwise		Internal		Local	Total
	Imports	Exports	Receipts	Shipments	Receipts	Shipments		
	Tons	*Tons*	*Tons*	*Tons*	*Tons*	*Tons*	*Tons*	*Tons*
Animals and products	2,879	11,654	4,381	2,745	22,371	3,874	1,310	49,214
Vegetable food products	524,613	346,628	87,266	143,571	129,238	82,327	33,797	1,347,440
Other vegetable products	86,454	11,375	8,757	6,115	4,788	8,496	5,851	131,836
Textiles	12,764	2,189	17,313	2,675	35,301	7,114	1,581	78,937
Wood and paper	292,547	13,460	128,748	6,547	42,666	1,839	3,220	489,024
Nonmetallic minerals	1,865,372	240,229	1,965,612	307,545	845,641	1,820,928	1,334,357	8,379,684
Ores, metals, and manufactures	1,442,618	133,289	46,630	418,754	324,794	136,577	46,429	2,549,091
Machinery and vehicles	895	8,433	2,655	11,607	15,666	4,979	780	45,020
Chemicals	160,324	117,019	208,234	110,135	33,779	432,892	93,252	1,155,635
Unclassified	5,872	6,515	189,232	271,088	147,835	69,886	404,015	1,094,443
Total	4,394,338	890,796	1,758,825	1,280,782	1,602,079	2,568,912	1,924,592	15,320,324

Value: Foreign, $115,613,229 (total 5,285,134 tons); coastwise, $210,169,893 (total 3,939,607 tons); internal, $133,701,350 (total 4,170,991 tons); local, $51,937,592 (total 1,924,592 tons). Percent: Foreign tonnage, 34.5; domestic tonnage, 65.5.

The work in the jetties in the Southwest Pass of the Mississippi River had required $24,228,199.80 in Federal funds to June 30, 1933.

According to the report of the Chief of Engineers, the United States Army, for 1933, New Orleans showed a heavy preponderance of domestic over foreign commerce in 1932, when the internal shipments and receipts of this magnificent harbor near the mouth of the Mississippi are included.

In the report of the Chief of Engineers for 1932 the same showing is made for 1931, with the following table showing principal items of shipment and receipt and value of same:

Water-borne commerce of New Orleans Harbor, 1931

Classes of commodities	Foreign		Coastwise		Internal		Total
	Imports	Exports	Receipts	Shipments	Receipts	Shipments	
	Tons	*Tons*	*Tons*	*Tons*	*Tons*	*Tons*	*Tons*
Animals and animal products	26,029	56,845	737	28,291	203,036	12,924	327,862

Wood and paper	102,684	559,405	24,424	96,421	80,593	31,976	895,503
Nonmetallic minerals	342,519	719,718	2,309,588	1,499,203	1,088,661	110,245	6,069,934
Ores, metals, and manufactures	280,260	47,181	49,039	19,877	88,549	23,460	508,366
Machinery and vehicles	1,736	15,450	7,644	1,138	15,075	2,060	43,103
Chemicals	117,066	51,896	48,111	17,428	44,934	37,340	316,775
Unclassified	7,070	1,781	122,320	119,374	16,149	49,464	316,158
Total	2,299,882	2,236,909	2,834,380	2,101,217	1,986,715	704,812	12,163,915

Value: Foreign, $227,763,294 (total 4,536,791 tons); coastwise, $137,591,584 (total 4,935,597 tons); internal, $148,366,789 (total 2,691,527 tons). Percent: Foreign tonnage, 37.3; domestic tonnage, 62.7.

Additional traffic: Cargoes in transit, 5,187,168 tons, valued at $150,124,517; ferry traffic, 14,491,813 tons, valued at $2,001,422,454, which includes transfer of 8,891,479 tons of locomotives and railroad cars (weight empty).

In the calendar year 1921 the port of Galveston exported 3,265,605 tons delivered by rail at the port.

Of this total, 15 States tributary to the Great Lakes-St. Lawrence project shipped 1,125,317 tons to Galveston for export. Of the shipments from these States to Galveston for export, 994,717 tons consisted of hard winter wheat, originating in four States, Colorado, Kansas, Nebraska, and Missouri.

Excluding the wheat, the 15 tributary States shipped 130,600 tons to Galveston for export, or approximately 4 percent of exports.

Of the exports, Texas was the origin of 1,304,192 tons, including 424,544 tons of cotton, 165,079 tons of sulphur, 154,491 tons of cottonseed cake and meal, and 512,897 tons of wheat.

In the same year imports handled through Galveston by rail amounted to 1,748,212 tons.

Of these imports, 18,939 tons, or 0.01 percent, were destined for the 15 States tributary to the Great Lakes-St. Lawrence project.

Texas was the destination of 1,609,149 tons, including 1,037,629 tons of company oil, 455,435 tons of commercial oil, and 64,837 tons of sugar.

A later study of all the ports on Galveston Bay, including Galveston, Houston, Texas City, and Corpus Christi, for the calendar year 1926 shows that oil from Mexico was the chief import and Texas its principal destination. Cuban sugar ranked second, destined chiefly for refineries in Texas and Louisiana.

Petroleum was the principal export in 1926, the total being in excess of 1,800,000 tons, originating chiefly from Texas refineries. The bulk of the grain exports, 1,200,000 tons, was hard winter wheat originating in north Texas, Colorado, Kansas, Missouri, and Oklahoma.

Cotton exports of 625,632 tons ranked third in the commodity list. The petroleum and cotton exports originated entirely outside the 15 States tributary to the Great Lakes-St. Lawrence and the exports originating in the seaway area were almost exclusively confined to hard winter wheat.

(Source: Port Series No. 6, revised 1928, Corps of Engineers, U.S. Army, U.S. Shipping Board.)

The figures for 1921 are as follows:

Origin and destination of exports and imports of Galveston, Tex., in seaway area

State	Origin of exports	Destination of imports	Hard winter wheat included in exports
Wyoming	7,010		
Colorado	117,162	210	103,476
North Dakota	2,841		2,841
South Dakota	2,471	186	2,439
Nebraska	70,319	186	69,510
Kansas	555,393	145	539,431
Minnesota	48,573	1,994	48,501
Iowa	24,922	266	24,861
Missouri	285,819	2,050	284,300
Wisconsin	45	497	45
Illinois	10,762	10,169	10,470
Michigan		33	
Indiana		3,054	
Ohio		149	
Kentucky			
Total	1,125,317	18,939	1,083,874

Source: Port Series No. 6, prepared and published 1924, Board of Engineers for Rivers and Harbors, War Department, in cooperation with the Bureau of Research, U.S Shipping Board.

As these figures show, an analysis of the commerce of the leading ports of the United States indicates that no existing seaport in this country will suffer any diversion of its export and import trade which will not be more than offset by the increased domestic commerce which will follow the opening up of the Great Lakes ports of the Middle West to our coastwise and intercoastal commerce.

The figures presented for each of the leading ports on the Atlantic coast can be duplicated by analysis of the commerce of of ports on the Gulf and the Pacific coasts.

For all our ports, taken as a whole, the domestic commerce exceeds foreign exports and imports in a ratio of about 4 to 1. Furthermore, since our domestic, coastwise, and intercoastal commerce is confined by law exclusively to the use of American ships, the completion of the Great Lakes-St. Lawrence seaway will increase the use of such ships and greatly benefit the American merchant marine and the shipbuilding industry.

What is true of individual ports is likewise true of the States which are tributary to these ports.

The President has submitted to the Senate a report showing that the completion of the Great Lakes-St. Lawrence project will extend the coastline of the United States by 3,576 miles. Thus the United States will be bordered for thousands of miles on each of its four main boundaries by great natural watercourses providing ocean navigation. This will mean the maximum development of our home market. Only four States east of the Mississippi River, each within a few hundred miles of deep water, will remain without a coastline—Vermont, West Virginia, Kentucky, and Tennessee. Vermont will ultimately gain access to the St. Lawrence seaway through development of the Lake Champlain project. West Virginia, Kentucky, and Tennessee are within the area bordered by the Ohio and Mississippi Rivers with their inland-waterway projects already under improvement.

Taking the 48 States represented in this body there is not a single State which can be adversely affected by this great national project, if we are to accept the results of the exhaustive study which the President caused to be made before submitting his message to the Senate.

Of the 28 States which will have direct access to ocean navigation upon completion of this project the ports of 26 States show an overwhelming preponderance of coastwise trade over foreign exports and imports. The only exceptions—Maryland and Louisiana—as has been shown, have a greater interest in the maintenance and development of their domestic commerce than in foreign trade, when the enormous internal shipping handled by the ports of Baltimore and New Orleans are taken into account.

There follows a complete analysis of the commerce of the leading ports of the 28 coastal States. The preponderance of domestic over foreign commerce, in the case of these ports, runs as high as 99 percent in the case of New Haven, Conn.; Bridgeport, Conn., 98 per cent; San Francisco, Calif, 80 percent; Boston, Mass., 79 percent; Portland, Oreg., 72 percent; Providence, R.I., 84 percent; Beaumont, Tex., 95 percent; Port Arthur, Tex., 83 percent; Seattle, Wash., 74 precent; Norfolk, Va., 81 percent; Newport News, Va., 90 percent; Philadelphia, Pa., 70 percent.

Even the great port of New York, with its enormous foreign trade, shows nearly 60 percent of its total commerce in the coastwise and intercoastal trade, excluding entirely the internal and local commerce which must properly be classed with the domestic shipping of the harbor.

The table is as follows:

Ratio of domestic commerce to total commerce, calendar year 1930

[Commerce in cargo tons of 2,240 pounds]

State	Port	Intercoastal commerce	Coastwise commerce	Total domestic commerce	Foreign commerce	Total commerce	Ratio of domestic commerce to total commerce
							Percent
Alabama	Mobile	259,072	1,076,261	1,335,333	775,992	2,153,780	65.01

It is fair to conclude that the 28 coastal States thus stand to gain rather than to lose tonnage for their harbors through extension of the coastline of the United States to the great markets of the Middle West.

Of the 20 interior States which will not border directly on this extended coastline, 10 are within the tributary area of the Great Lakes-St. Lawrence seaway and will thus directly benefit by being brought hundreds of miles nearer to deep water for the shipment of their products and receipt of consumers' goods. These States are: North Dakota, South Dakota, Nebraska, Iowa, Kansas, Kentucky, Missouri, Colorado, Montana, and Wyoming.

The remaining 10 interior States which can suffer no possible diversion of traffic simply because they have no ocean ports will certainly benefit from any project that insures a stimulus to the trade and development of the Nation as a whole. These States are: Arizona, Arkansas, Idaho, Nevada, New Mexico, Oklahoma, Tennessee, Utah, Vermont, and West Virginia.

The President has, indeed, wisely summoned this body to consider the pending treaty from the broad national point of view. Upon analysis it is clearly shown, as the President states, that "local fears of economic harm to special localities or to special interests are grossly exaggerated."

When the facts are looked squarely in the face; when the existing commerce of all the ports on the Atlantic, Gulf, and Pacific coasts is subjected to analysis; when the relation of this project to each of the 48 States is considered, no one can deny the truth of the President's statement that "local or special interests conjure up imaginary fears and fail to realize that improved transportation results in increased commerce benefiting directly or indirectly all sections."

DIVERSION AT MASSENA, N.Y., BY THE ALUMINUM CO.

One phase of the pending treaty which has not received consideration thus far in the debate in the Senate is the direct interest of the Aluminum Co. of America in blocking ratification and thus preventing the public use and development of the power resources of the St. Lawrence River.

On June 5, 1933, the Senator from Nebraska [Mr. NORRIS] touched upon this subject briefly in a colloquy with the Senator from Missouri [Mr. PATTERSON].

On page 5076 of the CONGRESSIONAL RECORD the following appears:

"Mr. NYE. The Republican Party, in its convention at Chicago in 1932, adopted the following plank by a unanimous vote:

"'The Republican Party stands committed to the development of the Great Lakes-St. Lawrence seaway. * * *'

"Has there been anything to indicate that the treaty that has been negotiated is repugnant to the Republican Party?

"Mr. PATTERSON. Yes, indeed; there have been a number of things that have transpired since that time. Among other things we surrendered by the treaty our sovereignty over Lake Michigan, something we have insisted upon for more than 100 years. * * *

"Mr. NORRIS. The Senator from North Dakota asked whether there is any difference between the project as the Republican Party endorsed it and the treaty now pending. I think there is one difference, and there is only one that I know of. There has been an amendment to the treaty (in committee) that takes away from Mr. Mellon and his associates the perpetual right that they otherwise would have had."

The change that was made in the treaty to which the Senator from Nebraska referred was an exchange of notes between the United States and Canada on January 13, 1933. These notes committed both nations to the categorical declaration that: "The effect of the Great Lakes-St. Lawrence Waterway Treaty signed at Washington, July 18, 1932, is not in any respect to recognize, confirm, or establish any rights or claims of any person or corporation in respect to the diversion of water for power purposes through the Massena Canal and Grass River, or to limit the freedom of the United States or the State of New York, or other competent authority to treat the question of the continuance, control, or elimination of such diversion as a domestic question."

The diversion of the water of the St. Lawrence referred to in these notes has for 28 years been made by the Aluminum Co. of America to develop water power for its private use and profit at its manufacturing plant at Massena, N.Y.

The Aluminum Co. has for years diverted an average of 20,000 cubic second-feet of water from the St. Lawrence for this purpose. This diversion is equal to one fifth of the entire American share of the flow of the St. Lawrence River. If devoted to the public

use under the terms of the pending treaty, it would produce electricity of a value sufficient to amortize the entire cost of New York's public power project in a period of 40 years, or an estimated value of $100,000,000. This water has been diverted by the Aluminum Co. for 28 years without paying a dollar of revenue in consideration therefor to the State or Federal Treasuries.

While Andrew W. Mellon was connected in an official capacity with the last administration the pending treaty was under negotiation. An item at that time was inserted in the plans for the works covering an expenditure of $1,318,000 for the construction of a weir at the mouth of the Aluminum Co.'s canal by which this diversion to the Aluminum Co. plant might be maintained and increased in volume. It was this item to which the Senator from Nebraska referred and which was eliminated by the Committee on Foreign Relations in reporting the treaty to the Senate.

The late Senator Thomas J. Walsh, of Montana, took the initiative in the committee in obtaining the exchange of notes between the United States and Canada to prevent the Aluminum Co. from setting up any claim to the right to divert water from the St. Lawrence under the terms of the treaty. In statements before the committee and in official communications to the Power Authority of the State of New York, Senator Walsh repeatedly expressed the view that ratification of the treaty in its pending form would absolutely extinguish any right claimed by the Aluminum Co. to continue the present diversion.

He based this opinion upon the fact that once the Federal Government takes jurisdiction over the St. Lawrence River to develop the stream for navigation purposes, the claims of private parties to the use of such waters are thereby extinguished. The State Department expressed the same view in the hearings before the committee through Assistant Secretary of State Rogers.

The State of New York has likewise officially asserted its power to terminate the Aluminum Co. diversion upon ratification of the treaty with Canada providing for the development of the St. Lawrence for navigation and power purposes.

A brief covering this subject in detail has been prepared by Frank P. Walsh, the distinguished lawyer appointed by Governor Roosevelt in 1931 as chairman of the Power Authority of the State of New York.

In this brief Chairman Walsh makes it clear that the Aluminum Co. of America has an enormous stake in the defeat of the pending treaty and that it will profit to the extent of millions of dollars every year that the public power project on the St. Lawrence River is postponed from fulfillment.

The following excerpts are quoted from this brief:

"The Aluminum Co. of America owns the Massena Power Canal and operates it through its subsidiary, the St. Lawrence River Power Co., which it bought in 1906. The canal is 3 miles long. It diverts the waters of the St. Lawrence above the projected dam (provided at Crysler Island under the pending treaty) and conducts them through its power plant into the Grass River which returns them to the St. Lawrence below the dam.

"The average flow of the St. Lawrence River is slightly in excess of 200,000 cubic feet a second. If permitted, this diversion would reduce the power to be developed by the public project by about 150,000 horsepower, or more than 1,000,000,000 kilowatt-hours per year. At $15 per horsepower-year this would mean a loss of about $2,250,000 per year, or a total of nearly $100,000,000 over the 40-year period in which the capital cost of the public project would be amortized. This loss would be imposed for the benefit of the Aluminum Co. at the expense of the public project and of the consumers of electricity."

As a result of the notes exchanged between the United States and Canada which are made a part of the treaty as reported from the Committee on Foreign Relations, the Aluminum Co. is deprived of any color of claim to a right of diversion under the treaty which would place this burden and inflict this injury upon the public power project of the State of New York.

By the same token, the defeat of the treaty will preserve the existing diversion by the Aluminum Co. and protect it from interference by the Federal Government.

As a practical matter, the Aluminum Co. has nothing to fear in the continued enjoyment of the use of this natural resource so long as the Federal Government is prevented from developing the St. Lawrence for navigation. The water which is now diverted at Massena cannot be devoted to the public use without ratification of a treaty with Canada and without the public development of power at the dam provided by the treaty below the Aluminum Co.'s diversion canal.

It is true that the State of New York might revoke the charter under which this canal was dug since this charter was made conditional upon the use of the canal for navigation. It never has been, in fact, used for any other purpose than the development of hydroelectric power. Until the treaty is ratified, however, the Aluminum Co. through its lobbyists and attorneys could effectively argue that the present diversion merely utilizes for private profit a natural resource which is now running to waste.

If the treaty is ratified, on the other hand, it is certain that the State of New York will be able to exercise its power to end this diversion and devote the entire American share of the waters of the St. Lawrence to the benefit of the public project and of the consumers of electricity. In the brief prepared by Chairman Walsh, of the Power Authority, the following is stated:

"Whatever rights the Aluminum Co. of America or its subsidiary may possess in the Massena power canal are derived from chapter 484 of the Laws of 1896 and chapter 542 of the Laws of 1898 of the State of New York. These acts chartered the St. Lawrence Power Co., which the Aluminum Co. subsequently acquired for a period of 50 years and gave it the right to construct a canal for power and navigation with the proviso that 'the canal and locks of said company shall be open to the public use for navigation by vessels, boats, and other craft upon payment of just and reasonable tolls and compensation therefor and under reasonable regulations.'

"The canal was never operated as a navigation canal. It was constructed for the sole purpose of developing power. There are no facilities for public navigation, nor is there any need for such facilities.

"Whatever rights were granted to the company are a bald gratuity. There is no provision in the law requiring it to pay a rental or other compensation to the State nor is there any other provision in the act to compensate the State for utilization of the diverted waters.

"With respect to the status of such conditional grants, the opinion of the appellate division of the Supreme Court of New York in an action brought by the State in 1923 against the New York & Ontario Power Co., Frontier Corporation, et al., may be quoted, as follows:

"'All grants of gift or grants for private beneficial use and not for the benefit of the public are conditional grants, made subject to the paramount right of the State to improve the stream. Conditional grants are in effect licenses only. * * * The recapture of property which the legislature has unconditionally granted is a taking of property for a public use for which compensation must be paid (*Langdon* v. *Mayor, supra*); but, since all property and rights within a conditional grant are held subject to the paramount right of the State, the recapture thereof is not a taking within the meaning of the Constitution (art. I, ch. 6) and compensation may not be had therefor.'

"It is the position of the Power Authority, as it was the view of the St. Lawrence Power Development Commission, upon advice of its counsel, that the State has the power to revoke whatever rights may have been granted to the Aluminum Co. or its subsidiary to divert water from the St. Lawrence River through the Massena Power Canal.

"The Joint Board of Engineers, in its report of June 24, 1921 (p. 25, par. 87), to the International Joint Commission, stated:

"'The amount of water ordinarily used at the Massena plant is somewhat in excess of 20,000 cubic feet per second. The head at this plant is about 33½ feet and the total drop from the intake of the power canal to the outlet of Grass River is 47.8 feet.'"

After the exchange of notes between the United States and Canada and the assertion of the policy of the State of New York to terminate this diversion upon ratification of the pending treaty, the opposition of the Aluminum Co. to this public project has been manifested through many different channels.

On February 2, former Gov. John S. Fisher, of Pennsylvania, president of the Pittsburgh Chamber of Commerce, addressed a letter to the junior Senator from Pennsylvania [Mr. DAVIS], which appears on page 1922 of the CONGRESSIONAL RECORD of February 5.

Governor Fisher was nominated and elected and served as chief executive of his State during the period when Andrew W. Mellon sat in the Cabinet as Secretary of the Treasury and dominated the Republican machine in Pennsylvania. The letter signed by Governor Fisher, February 2, 1934, as president of the Pittsburgh Chamber of Commerce, reads as follows:

"At a public hearing on the St. Lawrence seaway project, held today at the Pittsburgh Chamber of Commerce, at which the trade industrial transportation and power interests were fully represented, strong protest against ratification of this treaty was unanimously recorded. Pending full report of our meeting will you not call attention of the Senate to action taken?"

On February 12, the junior Senator from Pennsylvania [Mr. DAVIS] inserted in the RECORD on pages 2381–2384, inclusive, another communication from the Pittsburgh Chamber of Commerce, dated February 8, 1934. This was in the form of a letter addressed to President Roosevelt, copy of which was furnished to the Senator from Pennsylvania. There was also attached a resolution adopted by the Pittsburgh chamber. The letter and the resolution vigorously attacked the President's message to the Senate recommending ratification of the pending treaty.

The resolution was as follows:

"*Resolved*, That the Chamber of Commerce of Pittsburgh vigorously oppose the ratification of the St. Lawrence Seaway Treaty, providing for the construction of the Great Lakes-St. Lawrence seaway, including canals, locks, and dams for navigation and power purposes, which is now pending in the Senate of the United States * * *."

The resolution recites 12 separate grounds upon which defeat of the treaty is demanded.

Accompanying the resolution was a report restating nearly all of the familiar arguments which have been used over and over again in the propaganda which has been directed by special interests against the treaty.

The report conjures up the "imaginary fears of local, special, and sectional interests", to which the President referred in his message. It charges that the coal industry will be adversely affected; that "the proposed canal would divert a large volume of freight from railroads that serve the district"; "that the estimated costs of the project variously range from $543,000,000 to $1,350,000,000"; "that the saving in transportation cost would be inconsequential"; "that Lake Michigan should not be internationalized, as it will be under the proposed treaty"; and "that the entire body of the Great Lakes should not be opened to foreign ships which are not subject to the La Follette Seamen's Act."

Every one of the above statements, as shown by the reports submitted to the Senate by the President from five separate agencies of the Federal and State governments is inaccurate or wholly false, and could only be circulated by the Pittsburgh Chamber of Commerce, in the face of the record, for the purpose of arousing unfounded and unreasoning prejudice against the pending treaty.

The report accompanying the resolution contains numerous inconsistencies and contradictions of statements of fact contained elsewhere in this document.

After charging that the seaway will seriously damage the railroads and their employees, the report states that its maximum capacity will be only 6 percent of the traffic carried by the Baltimore & Ohio, Chesapeake & Ohio, Erie, New York Central, Norfolk & Western, and Pennsylvania Railroads.

The report sets forth as an estimate of the cost of the project the figure of $1,350,000,000, attributing it to Hugh L. Cooper.

Before this report was written, Mr. Cooper had repudiated this estimate in a telegram to the Senator from Michigan, Mr. VANDENBERG, published in the CONGRESSIONAL RECORD, stating that his estimate had no relationship to the project provided by the pending treaty and had been made in reference to an entirely different project covering power developments unrelated to the treaty.

The report also uses an estimate of $800,000,000 which it attributes to President Hoover. This estimate was publicly repudiated by the former President when it was first attributed to him in connection with this treaty.

The Mellon family, of Pittsburgh, is well known as a dominant factor in the power and public-utility industry. Its interest is by no means confined to the diversion of water from the St. Lawrence River for use at its plant at Massena.

There have already been published in the RECORD during the debate numerous references from the public papers of former Governor Smith and President Roosevelt, while serving as chief executive of the State of New York, to the attempt of the Aluminum Co., in combination with the Du Pont and General Electric interests, to obtain a lease upon all the water-power resources of the St. Lawrence for private exploitation.

The report from the Pittsburgh Chamber of Commerce centers its attack upon the navigation features of the treaty, but devotes a few paragraphs to an attack upon the public power project on the St. Lawrence.

It repeats the statement that "out of approximately 5,000,000 horsepower, the ultimate capacity of the three sections, the United States will have but 1,000,000 horsepower—20 percent."

The paragraph dealing with this subject is so cleverly worded that it is evident its purpose is to impress upon the minds of readers the false impression that the United States will receive only one fifth of the water power developed under the treaty, of which the United States secures half, while 3,000,000 horsepower lies within wholly Canadian territory and has no relationship whatever and is unaffected by the terms of this treaty.

Mr. LA FOLLETTE. Mr. President, I also ask unanimous consent to have printed in the RECORD as a part of my remarks a letter received by me from William Nelson Pelouze, chairman of the Illinois Deep Waterway Commission, under date of March 12, 1934.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GREAT LAKES-ST.LAWRENCE TIDEWATER ASSOCIATION,
Chicago, Ill., March 12, 1934.

Senator ROBERT M. LA FOLLETTE, JR.,
Senate Office Building, Washington, D.C.

DEAR SENATOR LA FOLLETTE: For 11 years I have been the chairman of the Illinois commission appointed by the different governors in accordance with the acts of the several legislatures, and feel that I am thoroughly conversant with the benefits that will accrue to Chicago and Illinois if the St. Lawrence Treaty is ratified. I believe, also, that I know the source of the propaganda that has brought about the opposition in Illinois.

The United States Army Engineers have assured the President that there will be ample diversion to make the Illinois waterway practical for commercial navigation. They have also stated that in addition there will be plenty of water diverted to meet the requirements for the removal of sewage. No mention has ever been made of any diversion for the purpose of power development or was any diversion of water intended to be used for the purpose of power development. And while water now being diverted is used for the development of power at Lockport plant, it is doubtful whether there will be sufficient water diverted for that purpose in 1938.

It is this doubt that is the real cause back of the propaganda opposing the ratification of the St. Lawrence Treaty. All other propaganda is only a subterfuge and a smoke screen for power development.

The sanitary district has within the past year applied to the Federal Power Commission for permission to build 3 additional power plants—1 on the Desplaines River and 2 on the Illinois River. It has been reported that the profits from the Lockport power plant might be estimated at about $1,000,000 annually, and assuming that each of the other 3 power plants is built would result equally as profitable, the profits of the 4 power plants would be only $4,000,000 annually.

It is strikingly significant that the principal opposition to the ratification of the St. Lawrence Treaty emanates from a comparatively few men who are now or were closely affiliated with the sanitary district. I refer to Mayor E. J. Kelly, chief engineer of the sanitary district; Col. R. R. McCormick, publisher Chicago Tribune, former president of the sanitary district, who is or has been a legal adviser of the sanitary district; and Col. Robert Isham Randolph, president of the Mississippi Valley Assocation, said to have been in the employ of the sanitary district for many years as an engineer. No mention of power development ever appears, it is superbly camouflaged, but remains the smoke screen shadowing the propaganda opposing the ratification of the treaty.

With Chicago a great ocean port, ships flying the flags of all nations will come to Chicago. Every ship will have to pay the usual pilot and health fees and will have to recoal and be supplied with commissary subsistence sufficient for the return trip. The ships will have to be painted, repaired, and new equipment purchased, bills of lading and clearance papers will be negotiated through our Chicago banks, insurance on cargoes will be placed with our local insurance companies, by all of which it is conservatively estimated Chicago will profit to an extent of $100,000,000 annually, and when you add to this amount the saving in freight, the benefits will be more than doubled. Remember that Chicago will have the same base ocean rate to the markets of the world now enjoyed by New York and the other Atlantic seaboard cities.

Should we sacrifice the great potential benefits that will surely accrue by allowing the St. Lawrence Treaty to be defeated simply because there may not be enough water diverted for power development with its consequent benefits so limited in comparison?

Chicago and Illinois are destined to benefit more than any other State or city on the Great Lakes because of their strategic position, situated at the intersection of the two waterways—the St. Lawrence and the Illinois.

At first the opposition stressed the fact that there would not be enough water diverted for navigation purposes. This claim has been so thoroughly disproven by the United States engineers that now very little is said on that subject and much stress is given to the patriotic appeal that Lake Michigan is not an international body of water and, therefore, should not have been mentioned in the treaty. Another "smoke screen" for power development.

The States of Michigan and Wisconsin have far greater area bordering on Lake Michigan than has Illinois, and yet those States are enthusiastic advocates for the ratification of the St. Lawrence Treaty. As a matter of fact, the people of Chicago and Illinois have not been told the truth.

Very truly yours,

WM. NELSON PELOUZE.

The VICE PRESIDENT. The question is on agreeing to the resolution of ratification with the reservation, which will be read.

The Chief Clerk read as follows:

Resolved (two thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Great Lakes-St. Lawrence Deep Waterway Treaty between the United States and Canada, signed at Washington, July 18, 1932, this advice and consent being subject to and conditioned on the agreements, provisions, and interpretations set forth in an exchange of notes between the United States and Canada, dated January 13, 1933, respecting private diversions of water on the St. Lawrence River.

Mr. LONG and other Senators demanded the yeas and nays.

The yeas and nays were ordered, and the roll was called.

Mr. LA FOLLETTE. I have been requested to announce the unavoidable absence of the senior Senator from South Dakota [Mr. NORBECK] and to state that if present he would vote "yea."

Mr. LEWIS. I am authorized to announce that a pair has been arranged between the Senator from Iowa [Mr. MURPHY] and the Senator from South Dakota [Mr. NORBECK], on the one hand, and the Senator from Virginia [Mr. GLASS] on the other. I am informed that if present the Senator from Iowa and the Senator from South Dakota would both vote "yea." I regret to announce that the Senator from Iowa is detained from the Senate by a severe cold.

I am also requested to announce the necessary absence of the Senator from Virginia [Mr. GLASS] and to state that were he present and voting he would vote "nay."

I desire to announce that the following Senators are necessarily detained from the Senate on official business: The Senator from Arkansas [Mrs. CARAWAY], the Senator from Utah [Mr. KING], the senior Senator from Florida [Mr. FLETCHER], the junior Senator from Florida [Mr. TRAMMELL], and the Senator from Oklahoma [Mr. THOMAS].

Mr. FESS. I am advised that a special 2-to-1 pair has been arranged on this vote for the Senator from Virginia [Mr. GLASS], with whom I maintain a general pair. Therefore I will allow my vote to stand.

The result was announced—yeas 46, nays 42, as follows:

YEAS—46

Ashurst	Costigan	Hayden	Robinson, Ind.
Bachman	Couzens	Johnson	Schall
Bankhead	Cutting	La Follette	Sheppard
Barkley	Dill	Logan	Shipstead
Black	Duffy	McAdoo	Smith
Bone	Erickson	McKellar	Thomas, Utah
Borah	Fess	Norris	Thompson
Brown	Frazier	Nye	Vandenberg
Bulkley	Gibson	O'Mahoney	Van Nuys
Bulow	Gore	Pittman	Wheeler
Byrnes	Harrison	Pope	
Capper	Hatch	Robinson, Ark.	

NAYS—42

Adams	Dickinson	Lonergan	Russell
Austin	Dieterich	Long	Steiwer
Bailey	George	McCarran	Stephens
Barbour	Goldsborough	McGill	Townsend
Byrd	Hale	McNary	Tydings
Carey	Hastings	Metcalf	Wagner
Clark	Hatfield	Neely	Walcott
Connally	Hebert	Overton	Walsh
Coolidge	Kean	Patterson	White
Copeland	Keyes	Reed	
Davis	Lewis	Reynolds	

NOT VOTING—8

Caraway	Glass	Murphy	Thomas, Okla.
Fletcher	King	Norbeck	Trammell

The VICE PRESIDENT. On this question the yeas are 46, the nays are 42. Two thirds of the Senators present and voting not having voted in the affirmative, the resolution of ratification is not agreed to, and the treaty is not ratified.

Mr. GORE. Mr. President, I desire to state that it had been my intention to submit a few remarks on the treaty today, but the roll call had commenced when I entered the Chamber.

Mr. TRAMMELL. Mr. President, I desire to announce that the vote on the St. Lawrence Waterway Treaty having occurred much sooner than I had expected from a reading of the unanimous-consent agreement, I was absent temporarily at the White House, and so was not able to vote. Had I been present, I should have voted in the affirmative.

Mr. GLASS. Mr. President, I had been given to understand that the vote on the St. Lawrence Waterway Treaty would take place at 6 o'clock. When the voting began, I was sick in bed at my hotel and could not be here. However, on learning that the vote was being taken, I took a taxi immediately and arrived in the Senate Chamber just as the result of the vote was announced.

Had I been present, I should have voted against the ratification of the treaty. I understand that I was paired against the treaty, but I desire to have it known more generally that I was against it.

Mr. ROBINSON of Arkansas obtained the floor.

Mr. LONG. Mr. President, will the Senator yield to enable me to make a motion? I desire to move to reconsider the vote by which the resolution of ratification was rejected, and to lay that motion on the table.

Mr. LEWIS. Mr. President, I ask that the motion be deferred at this time. It is not parliamentary, I will say to my able friend. I ask him for the present to withhold it. It is my intention to make the motion to reconsider at the proper parliamentary stage; and I suggest to my friend that at this moment he defer it.

The VICE PRESIDENT. The Senator from Arkansas did not yield for that purpose.

Mr. ROBINSON of Arkansas. I do not yield for that purpose.

As the Senate is in executive session, I suggest that we proceed with executive business for a few minutes.

REPORTS OF COMMITTEES

The VICE PRESIDENT. Reports of committees are in order.

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported back favorably the nominations of sundry postmasters.

Mr. TRAMMELL, from the Committee on Naval Affairs, reported back favorably the nominations of sundry officers in the Navy and the Marine Corps.

Mr. KING, from the Committee on the Judiciary, reported back favorably the nomination of Florence E. Allen, of Ohio, to be United States circuit judge, sixth circuit.

The VICE PRESIDENT. The nominations will be placed on the calendar.

The calendar is in order.

POSTMASTERS

The Chief Clerk proceeded to read sundry nominations of postmasters.

Mr. McKELLAR. I ask that the nominations of postmasters be confirmed en bloc.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the nominations of postmasters are confirmed en bloc.

That completes the calendar.

LEGISLATIVE SESSION

Mr. ROBINSON of Arkansas. I move that the Senate resume legislative session.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas.

The motion was agreed to, and the Senate resumed legislative session.

SUPPLEMENTAL ESTIMATE OF APPROPRIATION FOR ARMY AIR CORPS (S.DOC. NO. 153)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the War Department, fiscal year 1935, to be expended in the discretion of the President and under his direction, for the Air Corps of the Army, to be immediately available, amounting to $10,000,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a letter in the nature of a petition from Mrs. Catherine O'Brien, of New York City, N.Y., praying for the prompt passage of legislation for the payment of the so-called "soldiers' bonus", which was referred to the Committee on Finance.

He also laid before the Senate the memorial of Mrs. Clara E. Carr, of Chicago, Ill., remonstrating against the enactment of the so-called "Vinson-Trammell naval construction bill", which was ordered to lie on the table.

Mr. FESS presented resolutions adopted by the Chambers of Commerce of Columbus and Toledo, in the State of Ohio, protesting against provisions of Senate bill 2693, the proposed National Securities Exchange Act of 1934, which were referred to the Committee on Banking and Currency.

Mr. CAPPER presented a petition of sundry citizens of Frankfort, Kans., praying for the passage of the so-called "Frazier farm refinancing bill", which was referred to the Committee on Agriculture and Forestry.

He also presented memorials, numerously signed, of sundry citizens of Wichita and Hutchinson, in the State of Kansas, remonstrating against the passage of the so-called "Copeland-Tugwell bill" to prevent the manufacture, shipment, or sale of adulterated or misbranded foods and drugs and to prevent the false advertisement of such commodities, which were referred to the Committee on Commerce.

He also presented a telegram in the nature of a petition from Thomas O. Barcus Post, No. 1368, Veterans of Foreign Wars, of Neodesha, and sundry citizens of Tonganoxie, all in the State of Kansas, praying for the passage of legislation providing for the prompt payment of the so-called "soldiers' bonus", which were referred to the Committee on Finance.

He also presented a petition of sundry citizens of Morris County, Kans., praying for the passage of legislation imposing a tax of 5 cents per pound on imported coconut oil and sesame seed, which were referred to the Committee on Finance.

OLD-AGE PENSIONS

Mr. WHEELER presented a letter from Richard W. Hogue, director Independent Legislative Bureau, of Washington, D.C., with an accompanying clipping from the Washington Star of the 9th instant, which were referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

INDEPENDENT LEGISLATIVE BUREAU,
Washington, D.C., March 14, 1934.

Hon. BURTON K. WHEELER,
Senate Office Building, Washington, D.C.

DEAR SENATOR WHEELER: As one of those who wished to attend the meeting of the Cosmos Club on last Thursday evening but were unable to do so you will, I know, be glad to see the enclosed article from the Washington Star. Its account of the meeting is accurate, fair, and comprehensive.

Because of your interest in legislation of a humane character and for the public good, you will be gratified to know of the unqualified success of this meeting. I think you will agree that it was one of the most unique and impressive gatherings of its kind ever assembled in Washington. It is a very rare occurrence when such a representative number of members of both parties, in the Senate and the House, meet for an evening of nonpartisan consideration of important social legislation. The fact that economists, social scientists, editors, and religious leaders were also present adds to its impressiveness and value.

The matters discussed are of immediate and great importance. The need for legislative action upon them is being urged by a wide-spread, disinterested, and well-informed public opinion. They are to be brought to the floor of both Houses of Congress very soon. For the benefit of those Members who were unable to be present on Thursday night, I wish to suggest the value of placing in the CONGRESSIONAL RECORD the enclosed article, together with the explanatory comment contained in this letter.

Cordially yours,

RICHARD W. HOGUE.

[Enclosure]

[From the Washington Star, Mar. 9, 1934]

THIRTY CONGRESSMEN PLEDGE HELP FOR OLD-AGE PENSIONS—WILL SUPPORT ENACTMENT OF DILL-CONNERY AND WAGNER-LEWIS BILLS—CAPPER PROMISES AID IN SECURING PASSAGE—OTHER SPEAKERS AT SOCIAL SECURITY DINNER FAVOR PENDING MEASURE

Approximately 30 Senators and Representatives pledged their support to enactment of the Dill-Connery bill for old-age pensions and the Wagner-Lewis bill for unemployed insurance last night at a dinner given in the Cosmos Club by the American Association for Social Security.

Senator DILL, of Washington, long a leader in the fight for old-age pensions, said: "It costs less under this system than under the old-fashioned scheme of living among relatives or in 'poor-houses.' A realization that the aged poor in the United States must be cared for by some form of Government subsidy has brought the theory of old-age pensions to the fore in recent years."

The bill, which the Washington Senator is sponsoring, would provide that one third of the funds needed for the care of the aged would be paid by the Federal Government and two thirds by the States. The age at which pensions would become active under this bill is 65 years. Approximately forty to fifty millions of dollars would be the total annual cost and would provide comfortable livings for about one half million persons, it was explained.

WOULD TAX MANUFACTURERS

The Wagner-Lewis bill, of which the Senator from New York has been an advocate during many sessions of Congress, would provide an excise tax on manufacturers, who would pay a certain income each year to the Federal Government, which amount would be regulated by any existing unemployed insurance agreements between manufacturers and States at the time the Federal legislation became effective. It was pointed out that this form of insurance would be a "leveling" influence since at this time manufacturers in some States are subject to such assessments, while those in other States are not. As a result, manufacturers claim they are placed at an unfair trade disadvantage, when they are forced to pay the tax and a manufacturer in a nearby State does not.

"I feel certain the bill for old-age pensions will pass the Senate, for 27 States already are operating under similar legislation, and Senators from those States, I'm sure, will favor the national bill", Senator DILL said in conclusion.

Senator CAPPER said that, as an employer of thousands of men, he was firmly behind Senator WAGNER's unemployed-insurance bill. The old-age pensions bill, the Kansas Senator added, is needed legislation for the Nation and for the District. "I pledge my support to securing the passage of this legislation", he concluded.

BISHOP REVIEWS NEED

Bishop James E. Freeman inspired the meeting in a brief review of the need for this type of support.

"Measures that have to do with humanitarian interest meet today with complete unanimity of opinion and popularity among the peoples of every country", he said. "By reason of the pressure of recent events human needs are receiving greater sympathy. This legislation has no political slant, but comes out of our hearts, and there will be more of this sort of legislation in the days which lie ahead", the bishop concluded.

Senator WAGNER, in referring to his bill, said that it was a piece of legislation intended to supply a more assured and independent life for everyone.

"Obligation of government to see that workers and the general public are protected for greater security is needed, and will be assured by this legislation", the New Yorker declared. "Only 3 years ago I had intimate friends accuse me of 'socialism' when I proposed this legislation, while today it is being met with enthusiasm", the Senator added.

Senator BLACK, of Alabama, voiced a further development in future legislation when he said that at this time he had refrained from introducing a bill for national "health insurance" only because he feared that it might endanger the possibility of the passage of the old-age pensions and unemployed-insurance measures.

"Experience has proved that millions of people become unemployed and a burden under the present system", Senator BLACK said, "and I am of the belief that in future the national wealth will and must be used for the people of the Nation.

MORE UNITED STATES AID NEEDED

"I believe in the changing ideals. The only way to assure economic stability for everyone is through more Federal aid", the Alabaman said.

Representative CROSSER, of Ohio, assured the Members of Congress and other guests that he would support this legislation, but pleaded for them to "look deeper" and to "search for the fundamentals behind this remedial measure, and to try for curing the evils at the root and not above ground."

Senator CAREY, of Wyoming, said he was very much interested and advocated passage of both legislative measures.

Senator BONE, of Washington, declared: "We must destroy some of the abuses which have made our civilization difficult. In fact, our civilization stands indicted when we realize that we have the most highly industrialized machine in history and yet our people are destitute and hungry. We must give our people security. Poverty in old age in this day is ridiculous", he concluded.

Senator FRAZIER, of North Dakota, said he believed that many people never would be able to take care of themselves and that "we must take care of them through some assured form of income."

Prof. Paul Douglas, of the University of Chicago, author and lecturer on economic subjects, said the new deal is heading toward security and that these are not just temporary measures. "These are measures which are being enacted to relieve distress and assure people of their livelihood", he said.

Representative CONNERY, joint sponsor of the old-age pension bill, spoke briefly of his fight to get it accepted, and said any compromise would be agreeable to him—that what he wanted was its passage.

Father John O'Grady, of the Catholic Charities of the District of Columbia, who has been prominent in social-service reforms for many years, said:

"The present method of the conduct of the District of Columbia's welfare system under direction of a board is a mistake and should be changed to be under the direct supervision of one man, who will be responsible to the District Commissioners."

Col. E. G. Bliss, representing the Washington Chamber of Commerce, which has adopted a resolution backing the enactment of old-age pensions for the District, said that his greatest surprise had been the willingness and enthusiasm of the members of his committee, which had recommended its passage.

Abraham Epstein, executive secretary of the association, presided over the meeting.

Other Members of Congress attending were Senators BULKLEY, of Ohio, HATCH, of New Mexico, MCCARRAN, of Nevada, O'MAHONEY, of Wyoming, SHIPSTEAD, of Minnesota, THOMAS, of Utah, and TOWNSEND, of Delaware; and Representatives COLLINS, of Mississippi, O'MALLEY, of Wisconsin, DUNN, of Pennsylvania, RAMSPECK, of Georgia, KVALE, of Minnesota, WEST, of Ohio, ELLENBOGEN, of Pennsylvania, OLIVER, of Alabama, KELLER, of Illinois, LESINSKI, of Michigan, LEMKE, of North Dakota, and GOLDSBOROUGH, of Maryland.

A number of other Members of Congress were called from attending the meeting by a Democratic caucus held last night. However, they sent assurances that they intended supporting the measures.

REPORTS OF COMMITTEES

Mr. LOGAN, from the Committee on Claims, to which was referred the bill (S. 770) for the relief of certain claimants who suffered loss by fire in the State of Minnesota during October 1918, reported it with an amendment and submitted a report (No. 470) thereon.

Mr. WHITE, from the Committee on Claims, to which was referred the bill (S. 2809) conferring jurisdiction upon the Court of Claims to hear and determine the claims of the International Arms & Fuze Co., Inc., reported it with an amendment and submitted a report (No. 471) thereon.

BANKRUPTCY AND RECEIVERSHIP PROCEEDINGS—EXPENSES OF SPECIAL COMMITTEE

Mr. ASHURST, from the Committee on the Judiciary, to which was referred the resolution (S.Res. 203) increasing the limit of expenditures of the special committee to investigate bankruptcy and receivership proceedings, reported it without amendment and moved that the resolution be re-

ferred to the Committee to Audit and Control the Contingent Expenses of the Senate, which motion was agreed to.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McNARY:

A bill (S. 3049) authorizing the Secretary of the Interior to grant a patent of certain lands to Truman H. Ide; to the Committee on Public Lands and Surveys.

By Mr. COPELAND:

A bill (S. 3050) for the relief of the Sachs Mercantile Co., Inc.; to the Committee on Claims.

A bill (S. 3051) to provide for a preliminary examination and survey of Echo Bay, New Rochelle, N.Y. (with an accompanying paper); to the Committee on Commerce.

A bill (S. 3052) for the relief of Lt. Philip Egner; to the Committee on Military Affairs.

A bill (S. 3053) to amend section 39 of title 39 of the United States Code (with accompanying papers); to the Committee on Post Offices and Post Roads.

By Mr. TRAMMELL:

A bill (S. 3054) authorizing the Reconstruction Finance Corporation to make loans to municipalities, counties, school and road districts, or political subdivisions of States to aid in the refinancing of their outstanding indebtedness; to the Committee on Banking and Currency.

By Mr. TYDINGS:

A bill (S. 3055) to provide for the complete independence of the Philippine Islands, to provide for the adoption of a constitution and a form of government for the Philippine Islands, and for other purposes; to the Committee on Territories and Insular Affairs.

By Mr. COSTIGAN:

A bill (S. 3056) to amend the Legislative Appropriation Act, fiscal year 1934, with respect to expenses of the investigation of banking and stock market practices by the Senate Committee on Banking and Currency; to the Committee on Appropriations.

By Mr. CONNALLY:

A bill (S. 3057) to permit claimants for damages by reason of failure of patents to lands patented by the United States on the Texas-Oklahoma boundary line to file suit in the Court of Claims, and for other purposes; to the Committee on Claims.

By Mr. TRAMMELL:

A bill (S. 3058) to regulate the distribution, promotion, retirement, and discharge of commissioned officers of the Marine Corps, and for other purposes; to the Committee on Naval Affairs.

STATISTICAL STUDIES BY DEPARTMENT OF LABOR—AMENDMENT

Mr. WALSH, on behalf of the Committee on Education and Labor, submitted an amendment intended to be proposed to the bill (S. 2689) to authorize the Department of Labor to make special statistical studies upon payment of the cost thereof, and for other purposes, which was ordered to lie on the table and to be printed.

EXPENSES OF INVESTIGATION OF BANKING AND SECURITIES EXCHANGES

Mr. FLETCHER submitted the following resolution (S.Res. 208), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Banking and Currency, or any subcommittee thereof, authorized by Senate Resolution 84, agreed to March 4, 1932, and extended by subsequent resolutions, to investigate dealings in securities, effects of same, the business of banking, and the practices of securities exchanges, hereby is authorized to expend from the contingent fund of the Senate $50,000 in addition to the amount heretofore authorized for such purpose.

AMERICAN RIGHTS AND INTERESTS IN GREAT LAKES-ST. LAWRENCE TREATY

Mr. NYE. Mr. President, I send to the desk a resolution and ask that it be read.

The VICE PRESIDENT. The clerk will read the resolution.

The resolution (S.Res. 207) was read, as follows:

Whereas it has been publicly charged that the Great Lakes-St. Lawrence Deep Waterway Treaty, now pending in the Senate, betrays American rights and interests to a foreign nation; and

Whereas this charge has repeatedly been made by the members of a political organization known as the "Republican Party" among others by the temporary chairman of the last Republican National Convention, and by a member of the Cabinets of Presidents Harding, Coolidge, and Hoover, under whom the treaty was negotiated: Be it

Resolved, That a select committee be appointed by the Chair to investigate these charges, said committee to consist of the Senator from Iowa [Mr. DICKINSON], the Senator from Pennsylvania [Mr. DAVIS], the Senator from Oregon [Mr. McNARY], the Senator from Rhode Island [Mr. HEBERT], the Senator from New Jersey [Mr. KEAN], the Senator from New Hampshire [Mr. KEYES], the Senator from Connecticut [Mr. WALCOTT], the Senator from Delaware [Mr. HASTINGS], and the Senator from Maine [Mr. HALE]; and be it further

Resolved, That a select committee forthwith summon the Secretaries of State by whom this treaty was negotiated, and by whom it is charged American rights and interests have been betrayed, namely, Charles Evans Hughes, of New York, Secretary of State from 1921 to 1925; Frank B. Kellogg, of Minnesota, Secretary of State from 1925 to 1929; and Henry L. Stimson, of New York, Secretary of State from 1929 to 1933.

Mr. NYE. I ask unanimous consent for the immediate consideration of the resolution.

Mr. McNARY. Mr. President, I have not had time to read this amusing resolution, and I want time to examine it. For that reason I ask that it go over.

The VICE PRESIDENT. The resolution will lie over under the rule.

SURVEY OF INDEPENDENT BONDHOLDERS' COMMITTEE FOR COLOMBIA

Mr. BARBOUR. Mr. President, I ask unanimous consent that the report of a survey of the Independent Bondholders' Committee for the Republic of Colombia be printed in full in the RECORD.

The chairman of this committee is the Honorable Robert L. Owen, former Senator from Oklahoma. A similar report was presented to the Senate last year by the Senator from Oklahoma [Mr. THOMAS].

There being no objection, the report was ordered to be printed in the RECORD, as follows:

COLOMBIA—FINANCIAL MEASURES AND THEIR EFFECT UPON HOLDERS OF COLOMBIAN EXTERNAL OBLIGATIONS

Disposition of foreign exchange unequal: Following the restrictions imposed upon foreign exchange and the movement of gold in the fall of 1931, the Colombian Government adopted measures for the regulation of service payments upon the external debts of the departments and municipalities, as well as the private mortgage banks. Consequently, under decree no. 1951, executed in October 1931 the National Government instructed the departments and municipalities which had dollar bonds outstanding in New York to deposit with the Banco de la Republica for the account of the bondholders, in pesos, the amount of interest payments. Under this decree various departments and municipalities deposited during November and December 1931 and January 1932 within Colombia in pesos certain funds amounting to approximately 2,000,000 pesos.

These regulations were accompanied with a proposal whereby the National Government would issue its own scrip to the American bondholders, bearing interest at 6 percent and covering interest requirements due upon the departmental and municipal bonds for 18 months, effective as of the date of the suspension of cash payments. In return, the National Government would appropriate the peso deposits which were to correspond to the issued scrip.

Since the financial position of Colombia became temporarily strained, while, at the same time, the various departments and municipalities did not approve the proposed scrip plan, and refused to conform with the decreed regulations of the National Government regarding the depositing of debt service in pesos for the account of the bondholders, decree no. 280 was executed on February 16, 1932, authorizing the departments and municipalities to cease making such deposits, thereby violating the trust agreements.

Following this decree, the departments and municipalities defaulted on their dollar bonds altogether. This decree also permitted the private mortgage banks to disregard the provisions of decree no. 1951, while it sanctioned the default of the private mortgage banks on their external bonds. Contrary to this, the Government continued to service, in full, its own bonds and short-term debts, as well as those of the Agricultural Mortgage Bank. The Government, however, suspended sinking-fund installments on both its own and guaranteed bonds of the Agricultural Mortgage Bank as of January 1932.

Authorized the purchase of bonds: The above decree, no. 280, in addition made various other provisions regarding mortgage debts and imposed measures regulating the relation of the mortgage

banks and their customers. Furthermore, the decree authorized the Banco de la Republica to earmark monthly $150,000 in foreign exchange and make such foreign exchange available pro rata to mortgage banks with which they would buy mortgage bonds in New York for the account of their debtor customers upon the deposit of the corresponding funds in pesos. These bonds, taken at 80 percent of par, were to be applied for the discharge of mortgage obligations to the respective banks. The market price of the bonds had depreciated to about $20 (average) in New York because of the omission of interest payments and the suspension of sinking-fund installments.

Decree no. 711, executed April 22, 1932, supplemented decree no. 280, and authorized the Banco de la Republica to set aside an additional sum of $150,000 in foreign exchange monthly, the proceeds to be utilized by the debtors of the commercial banks for the purchase of national bonds in New York. These bonds were to be tendered for the discharge of commercial debts due to the banks, the bonds taken at 80 percent of par value, as compared with their market value in New York of between $17 and $35. The dollar bonds thus acquired by the commercial banks were to be converted into internal peso bonds of the national government, carrying 6-percent interest.

Distribution of exchange for purchase of bonds unjustified: Under the last two decrees Colombia authorized the Central Bank to earmark monthly $300,000 in foreign exchange to be used for the purchase of Colombian bonds (national and mortgage bank bonds) at depreciated prices in New York. Through these measures approximately $7,500,000 par national bonds were retired up to the close of June 30, 1933, and approximately $7,500,000 par mortgage bonds were thus liquidated. In addition, it is estimated that approximately a million dollars worth of sterling securities were retired through the same process.

In its news bulletin released August 21, 1933, the Consulate General of Colombia published certain data of the Office of Control of Exchange and Exports covering the operation of that office for the first 6 months of 1933, in which it was reported that ₱3,272,500 in foreign exchange were sold for the purchase of foreign securities, while for the full year approximately ₱6,000,000 were appropriated for this purpose. This obviously refers to the purchase of the national bonds of Colombia and those of the Colombian mortgage banks in the foreign markets, mainly in New York, where over 90 percent of the Colombian bonds are outstanding.

Up to this time we find, therefore, that the Colombian Government restricted foreign payments because of an alleged shortage of foreign exchange and gold, but such restrictions were imposed only upon the departments and municipalities and private mortgage banks. The Government itself continued to make cash payments to its own creditors. In other words, while the Government claimed that there was no foreign exchange and gold for meeting the departmental and municipal obligations, there was made available foreign exchange for interest payments on the national bonds and those of the Agricultural Mortgage Bank.

This act of the national Government of Colombia obviously discriminates against the holders of the Colombian department and municipal bonds because of the fact that, while the Government claimed shortage of gold and foreign exchange for the payment of interest on the departmental and municipal and mortgage bonds, it authorized the utilization of at least $3,600,000 in foreign exchange annually (and perhaps more) for the purchase of Colombian bonds at depreciated prices. This is aside from the fact that interest on the national bonds and short-term notes, as well as the bonds of the Agricultural Mortgage Bank, was paid in full, despite the fact that the servicing of the departmental and municipal bonds should have priority because the latter bonds were distributed among the American investors before the National Government issued its own bonds and contracted short-term obligations to the American bankers.

It is estimated that if that amount of foreign exchange authorized for the purchase of bonds would be allowed to be used by departments and municipalities for the payment of debt service on their bonds, as would be proper, the American bondholders would receive approximately 63 percent of the interest due them. The interest due on the bonds now outstanding and held by the American investors is $4,202,000 annually on the departmental debt and $1,706,000 on the municipal bonds. Furthermore, the Colombian Government imposed new decrees through which property belonging in reality to the bondholders was arbitrarily appropriated.

Appropriation of bondholders' property confiscatory: Decree no. 970, promulgated June 4, 1932, authorized the Banco de la Republica and other banks in Colombia holding funds on deposit for the American bondholders to return to the departments and municipalities the respective deposits made pursuant to decree no. 1951. This decree was supplemented by decree no. 1212, executed July 15, 1932, whereby the Banco de la Republica, which was finally the sole depositary, was ordered to refund these deposits to the original depositors. These funds were reported to have been used, upon withdrawal by the various departments and municipalities, for the purpose of subscribing to the national defense bonds or for the construction of public works.

The funds on deposit for the American bondholders amounted to approximately ₱2,000,000, and were distributed as follows:

Antioquia (department of)	₱762,011
Cundinamarca	325,056
Caldas	117,166
Cauca Valley	133,119
Santander	99,131
Bogota (municipality of)	257,548
Cali (approximately)	100,000

Foreign exchange modifications unequal: Unfortunately, the Colombian Government did not cease ordering additional measures which proved to be detrimental to the interests of the holders of the department and municipal bonds. At the end of September 1933, when the regulations controlling international payments and foreign exchange were modified, no consideration was given to the effects which the decreed measures would have upon the holders of department and municipal bonds. Although the Government set aside a certain amount of foreign exchange over and above its own current requirements, it did not provide for similar treatment for the departments and municipalities and did not allow these debtors to acquire foreign exchange on equal terms.

These modifications provided that the exporters place at the disposal of the Banco de la Republica 15 percent of the export bills at the stipulated rate of ₱113 per $100 United States currency. Proceeds of this were to be offered to the Government to meet their own obligations abroad. It is estimated that foreign exchange to the extent of about $7,500,000 will thus be made available to the Government, as compared with the interest requirements of only $1,500,000—the equivalent of one-third payment in cash of the interest due upon the National and the Agricultural Mortgage Bank guaranteed bonds—leaving a balance of approximately $6,000,000. This amount would be sufficient to provide for full-interest payments upon the outstanding bonds of the departments and municipalities.

An interpretation of these measures leaves no doubt that these measures were discriminatory to the holders of the departmental and municipal bonds. Furthermore, the Banco de la Republica was authorized to set aside $250,000 foreign exchange weekly to liquidate old obligations, while the defaults of the departments and municipalities continue to remain the implied policy of the Government.

Summary and conclusion: In summarizing briefly the various decrees and measures which the Colombian Government imposed during 1931, 1932, and 1933 we find that when restrictions were imposed upon international payments and foreign exchange, these restrictions were applied only to the holders of the department and municipal bonds. In the second place, the Colombian Government decreed the default of the departments and municipalities and actually returned to them property belonging to the American bondholders when it authorized the withdrawal of peso deposits which were set aside for the bondholders.

Furthermore, the appropriations of foreign exchange for the purchase of bonds at depreciated prices, which drop in prices was caused by the omission of interest payments and the imposition of other arbitrary measures which impaired the credit standing of Colombia, is not justified under any circumstances when the Colombian Government claimed its inability to provide foreign exchange for the payment of interest on the department and municipal debts. Finally, the unequal treatment which the various creditors, and in particular the holders of the department and municipal bonds, received regarding the assignment of foreign exchange reserves, in the various decreed regulations, was without any consideration whatsoever for its creditors.

We should not lose sight of the fact that the department and municipal bonds were distributed to the American bondholders before the Colombian Government placed its own bonds in New York; and consequently the former must have priority in any monetary or debt regulation of the Colombian Government. Moreover, the Colombian department and municipal bonds are all secured by assets such as railroads, highways, public utilities, and by tax revenues which are today in excess of the service requirements on the respective bonds.

Under the provisions of the trust agreements under which the various loans were negotiated, the revenues derived from the pledged assets and tax sources should be placed aside until the amount due to the bondholders would be satisfied, providing the decreed measures would be removed. In a like manner the modification of the discriminatory measures in the assignment of foreign exchange and foreign payments would permit the transfer of such funds to dollar exchange and thereby the interest due to the American bondholders would be paid.

MEASURES AFFECTING THE MORTGAGE BANKS

Aside from the measures discussed in the previous paragraphs which are equally applicable to the private mortgage banks and their bondholders, the Colombian authorities have instituted additional measures which are injurious to the holders of the mortgage bank bonds.

Among other provisions, these decrees authorized the liquidation of mortgage debts to the mortgage banks by the tender of internal and external bonds of the respective banks, while the remaining debts were arbitrarily reduced by 40 percent, thus reducing correspondingly the face value of the assets of the banks.

It is obvious that the purchase of mortgage bonds in New York, with funds which otherwise should be applied for the payment of the interest on the bonds, is not justified; but the injustice thus done the bondholders is far surpassed by the effects which will be produced by recent agreements regarding the mortgage banks of Colombia.

Under the auspices of the Government, certain agreements were entered into between the private mortgage banks—which consist

of the Mortgage Bank of Colombia and the Mortgage Bank of Bogota—and the Government-owned and operated institutions—the Agricultural Mortgage Bank and the Central Mortgage Bank of Colombia. These agreements concerning the Mortgage Bank of Colombia and the Mortgage Bank of Bogota on the one hand, and the Agricultural Mortgage Bank and the Central Mortgage Bank of Colombia on the other, are somewhat different in detail, but the main goal is the liquidation of these banks and the transfer of the assets, as well as the liabilities, to the above-mentioned Government institutions in a manner which will practically wash out the interest of the American bondholders and provide for a larger return to local Colombian interests of what remaining assets there are. These agreements are not only illegal but they are misleading to the holders of the private mortgage bank bonds.

Method of transfer of assets detrimental to bondholders: The agreement of the Mortgage Bank of Bogota with the Agricultural Mortgage Bank of Colombia provides for the transfer of certain assets and the assumption of liabilities arising from the foreign dollar bonds, from the former to the latter, at such a level at which the book value of the assets will be equal to the face value of the dollar bonds. The Agricultural Mortgage Bank promised to issue to the Mortgage Bank of Bogota its own bonds for 50 percent of the difference between the book value of the assets taken over and the liabilities assumed for the dollar bonds of the latter. The bonds thus received are to be distributed among the shareholders as the equity arising from the difference between the assets and liabilities. This, however, does not constitute an equitable distribution for the foreign bondholders, inasmuch as the Agricultural Mortgage Bank does not guarantee in full the liabilities assumed from the Mortgage Bank of Bogota regarding the outstanding dollar mortgage bonds.

The Mortgage Bank of Colombia has also entered into an agreement with the Agricultural Mortgage Bank and the Central Mortgage Bank for the transfer of its assets and liabilities to the latter two institutions. The Central Mortgage Bank promised to accept certain assets pertaining particularly to liens and loans to departments and municipalities and to issue, in exchange, its own mortgage bonds. Both transactions to be accomplished on a 60 percent basis. The Agricultural Mortgage Bank takes over such assets at book value as would cover the face value of the dollar bonds; but the extent of liability assumed will be determined by the value of the assets realized. In addition, the Agricultural Mortgage Bank is to take over the balance of the assets over and above the assets received by the Central Mortgage Bank and the Agricultural Mortgage Bank under the above-mentioned agreement, giving in consideration 2,000,000 pesos (in 100,000 monthly cash installments) in cash and the balance in bonds. Such assets to be taken at 60 percent of their face value. The cash is to be used for the liquidation of short-term credits due to American banks to the full extent, or by 100-percent payment. The balance of the bonds thus received are to be distributed among the shareholders, who, in effect, would receive approximately 50 percent of their original investment.

LIABILITY TO BONDHOLDERS RELEGATED TO LAST PLACE

Although both plans would appear to be harmless on the surface and would secure for the American bondholders certain value realized from the liquidation of the respective assets, an analysis of the plan certainly indicates that the whole affair will work out to the disadvantage of the American bondholders.

In the first place, assets of the banks are not specifically allocated by statute for the satisfaction of any class of liabilities, and nothing can prevent the responsible authorities from allocating good assets to the satisfaction of the internal bondholders or the shareholders of the banks. On the other hand, it is a well-known fact that both mortgage banks, in particular the Mortgage Bank of Colombia, have portfolios consisting of poor assets (good assets have been liquidated in the past 2 years through the purchase of mortgage bonds in New York in the open market) and the assignment of such assets for the satisfaction of the outstanding dollar bonds of the mortgage banks will not measure anywhere near the liability existing to the American bondholders.

The Agricultural Mortgage Bank, which in both cases assumes the foreign bonds of both mortgage banks taken over, does not guarantee full liability for these bonds; but it agrees to make good for such a percentage of these bonds as the assets taken over will permit. That is, the Agricultural Mortgage Bank takes over these assets and promises to pay the American bondholders as much as these assets will yield.

In the absence, therefore, of the allocation of any specific assets to the dollar bonds, it is difficult to determine what is likely to be the final value of these assets for the satisfaction of the American bondholders. Furthermore, the allocation of assets to the shareholders before the creditors and bondholders are satisfied, or receive such compensation as the liquidation of all assets will permit, does not appear to be equitable under any circumstances.

The adopted proposals, despite assurances to the contrary, appear to be discriminatory to the American bondholders, inasmuch as, in effect, the plans place the American bondholders as the last beneficiaries of the mortgage banks, while, by statute and under the trust agreements, the bondholders are the preferential creditors of these banks.

MEASURES AFFECTING THE HOLDERS OF THE NATIONAL BONDS

The Colombian Government decreed various other measures which also affect the holders of the national bonds. On March 29, 1933, decree no. 643 was introduced, which authorized the President of the Republic to suspend, partially or totally, the service payments on the external debts of the Republic, including the guaranteed bonds of the Agricultural Mortgage Bank. The same decree authorized the President to negotiate with bondholders regarding the payment of interest, amortization, and other conditions regulating the debts of the Republic.

Although this decree placed the creditors of Colombia on an equal basis, the Colombian Government, soon after this decree was executed, entered into an agreement with its short-term creditors whereby the interest was paid to the extent of 3 percent in gold and 2 percent in paper pesos, earmarked in Colombia for the account of the banking syndicate. On the other hand, the Colombian Government authorized the payment of only 2 percent in cash on interest due to the bondholders, meeting the balance of 4 percent in scrip.

Unfortunately, even this arrangement is not likely to be carried out by the Colombian Government, inasmuch as the Colombian Congress has been reported as having authorized the Government to suspend totally interest payments on the national debts, as well as the bonds of the Agricultural Mortgage Bank.

Complete suspension of payments due to all foreign creditors of Colombia would appear to place them on an equal footing, but it is regrettable that the authorities have already made arrangements to pay to a banking syndicate which holds short-term notes of the Colombian Government 2-percent interest, payable in Colombian pesos. On the other hand, it appears that the Colombian Congress authorized the Government to meet the service on the national bonds wholly in scrip, bearing interest at 4 percent for the year 1934. This scrip would be amortizable in 10 years, beginning 1936.

Revenue is sufficient for debt service: Suspension of payment by Colombia is not warranted by the budgetary position of the Republic. In the first place the payment of interest in full on the external debt would require approximately ₱4,800,000, which is only 12½ percent of the total revenue of ₱39,897,000 realized in 1933. Total interest payment on the external and internal debt would absorb approximately ₱7,500,000, or 18.8 percent of the total revenue.

Comparing the relationship of debt-service payment to total budget in Colombia with that of Argentina, the only Latin-American country which maintains full payment on its external debt, we find that debt-service payments in the case of Argentina absorbs 35.3 percent of the total budget, as compared with 18.8 percent in the case of Colombia. Past experience has proven that national governments can earmark at least 30 percent of their budget for debt service without placing a strain upon their financial position.

The budgetary results of the Colombian Government for the year 1933 were satisfactory. The ordinary budget showed a surplus of ₱6,349,883 with revenues reaching a total of ₱39,897,331 and ordinary expenditures ₱33,547,448. This surplus was appropriated for national defense and for reserves to cover deficiencies of former years. In addition, the Colombian Government has been spending considerable sums of money for public works and subsidies which, however, have been financed through an extraordinary budget and the flotation of internal bond issues. Budgetary equilibrium was attained by the creation of new revenues and drastic reduction of normal expenditures in the past 4 years.

The national budget promulgated for 1934 provides for an estimated revenue of 36,428,000 pesos, at which level expenditures are to be balanced. During parliamentary discussions of the budget, it was reported that appropriations set aside for war expenditures were 10,000,000 pesos. It is very unfortunate that Colombia should appropriate so large a sum of money for war purposes when this expenditure will absorb 27½ percent of the total budget, as compared with only 12½ percent, the total requirements of interest payments on all the external debts of the the national government.

Balance of payments favorable: In a similar manner the balance of international payments in Colombia indicates that payments on the external debts could be effected without straining the credit and currency position of the nation.

Colombia has normally an excess of exports over imports; while she is also a producer of a substantial amount of gold. The merchandise surplus of exports in 1932 was approximately 37,000,000 pesos, while in 1931 it was 56,000,000 pesos. For 1933 the export surplus was reduced to approximately 13,000,000 pesos, but without including the value of exports of petroleum products which exceeded 9,063,000 pesos for the year.

Excluding the income from the exports of the oil and banana industries, because the major portion from these exports accrue to the foreign interests which own and control them, and Colombia derives only the cost of labor paid for the development of these industries and taxes paid by foreign companies, the net surplus in the visible trade balance is still sufficient to meet interest requirements on all the foreign debts of Colombia, providing, of course, that foreign payments were effectively controlled and reserves were not diverted to other purposes.

During 1933 the office of control of exchange and exports purchased 56,224,753 pesos in foreign exchange and sold 57,524,263, leaving a deficit of 1,299,510 pesos. Out of these sales it is understood that approximately 8,000,000 pesos were handed over to the Government for the purchase of war materials abroad. The control office sold also to the Government 3,200,000 pesos for the payment of interest on their external debts. In addition, 6,000,000 pesos in foreign exchange were sold for the purchase of Colombian securities in foreign markets, mainly in New York, where the bulk of Colombian bonds are outstanding.

It is evident that for the year 1933 Colombia appropriated 32 percent of its income from exports to buy war materials, the

purchase of Colombian securities abroad, and for other foreign expenditures. More than 10 percent of this income alone was devoted to the purchase of Colombian securities abroad at depreciated prices.

The amount of interest due on the Colombian foreign debts presently outstanding does not exceed 13,500,000 pesos annually, calculated at the par of the exchange. This is made up of about 4,800,000 pesos for the national Government, 1,150,000 for the agricultural mortgage bank, 5,650,000 for the departmental and municipal debts, and about 1,900,000 for the bonds of the private mortgage banks. Total interest requirements would absorb approximately 25 percent of the effective income from exports, excluding the income from the oil and banana industries. Despite a drop in the favorable trade balance in 1933, the surplus was just sufficient to meet interest requirements on the entire external debt of Colombia.

Full payment of service on the external debt would require approximately 25 percent of the exports, a ratio which is a better showing than in the case of many other nations which have external debts. This ratio in the case of Argentina reaches approximately 40 percent. Furthermore, Colombia produces a substantial amount of gold, which, calculated now at the value of $35 per ounce, set by the United States Treasury, will yield more than $13,000,000—an amount sufficient to pay in full interest due on all the external public obligations of Colombia, including bonds and short-term debts of the national Government, bonds of the departments and municipalities, and bonds of the private and public mortgage banks. The amount of gold produced in 1933 was 373,729 ounces.

United States monetary policy highly beneficial: Not only the gold-purchasing program of the United States Treasury will prove of great advantage to Colombia, but the general policy of the United States Government to raise commodity prices is decidedly of distinct benefit to this Republic. Benefits are already visible. The price of coffee has advanced from an average of 11½ cents per pound in the fall of 1933 to approximately 15 cents per pound at present. The value of Colombian coffee exported in 1933 reached a total of approximately $45,000,000, whereas the same volume of coffee taken at current prices will yield an estimated value of $64,000,000 in 1934, or a gain of approximately $19,000,000. This increase in the value of coffee alone can now take care of the interest due on the external debts of Colombia with a wide margin. This increment is about 150 percent over the annual interest requirements of $12,850,000, due on the external debts of Colombia.

Furthermore, the trade relationship between Colombia and the United States offers a convincing argument that Colombia should not delay any further payment of interest due to the American bondholders.

Colombia's chief money crop is coffee, which contributes annually more than 70 percent of the total exports. However, in effect, coffee contributes more than 90 percent of the income derived from the exports. The United States consumers absorb approximately 85 percent of the Colombian coffee, thus, in effect, providing 94.4 percent of the effective annual income of Colombia. In addition we absorb most of the petroleum products exported and their banana shipments sent abroad. In other words, the United States public, who are the creditors of Colombia, buy the coffee output of that country and thus provide, in effect, 95 percent of their wealth.

In 1931 the total exports of Colombia were approximately ₱98,000,000, of which ₱81,000,000 were exported to the United States. Of total exports of over ₱70,000,000 in 1932, approximately ₱54,000,000 were shipped to the American markets. On the other hand, our exports to Colombia were ₱17,000,000 in 1931 and about ₱13,000,000 in 1932. The surplus of exports of Colombia to the United States, therefore, was ₱66,000,000 in 1931 and ₱41,000,000 in 1932. Although the aggregate export surplus dropped in 1933, it is estimated that Colombia's foreign-trade balance with the United States was about ₱30,000,000. On the other hand, the amount of interest requirements due on Colombian bonds outstanding in the United States is approximately $11,300,000 annually.

It is true that Colombian currency has depreciated and is still quoted at a discount in comparison with the American dollar, but a substantial improvement has taken place since the gold-purchasing program of the United States Government was adopted. Whereas the discount in October 1933 was approximately 65 percent, it is now only 44 percent. This discount should be normally further reduced, because of the fact that Colombia has an excess of exports over imports and produces a substantial amount of gold, enabling the Republic to balance its foreign payments. Despite the inflationary measures taken by the Colombian Government to stimulate industry and increase prices, as well as to liquidate the debt problem at home, and despite the extraordinary drain of gold and foreign-exchange reserves for the purchase of war material abroad and the repatriation of Colombian bonds, the gold reserves of the Banco de la Republica are now approximately ₱18,000,000, as compared with approximately ₱12,000,000 at the beginning of 1931.

In summarizing, the Independent Bondholders Committee for the Republic of Colombia finds that the defaults of Colombia are not justified by its economic and financial position, as well as its trade relations with the United States, especially as these factors have been aided by the monetary policy of the United States Government. The national income of Colombia and its budgetary situation, as well as the budgets of its political subdivisions, have been gradually improving, while its banking and currency position should be readjusted in time. Its international balance of payments is also amenable to satisfactory arrangements so as to provide sufficient surplus of dollar drafts to Colombia to effect payments to the holders of Colombian bonds in the United States.

MOTOR TRANSPORT—ARTICLE BY SENATOR REYNOLDS

Mr. NEELY. Mr. President, I ask unanimous consent to have printed in the RECORD an article which appeared in last Sunday's New York Herald Tribune, entitled "Car Influence Helps Nation", written by the junior Senator from North Carolina [Mr. REYNOLDS].

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CAR INFLUENCE HELPS NATION, SAYS REYNOLDS—UNITED STATES SENATOR EMPHASIZES BENEFITS WHICH FOLLOW EXTENSION OF MOTOR TRANSPORT

(The following article on the effect of automotive transportation throughout this country is the first of a series of three by Senator ROBERT R. REYNOLDS, of North Carolina. Senator REYNOLDS is a vice president of the American Automobile Association.)

(By ROBERT R. REYNOLDS, United States Senator from North Carolina)

Shortly after I assumed my duties as a Member of the United States Senate in 1932 considerable attention was focused on my small roadster parked in the Senate garage. Numerous newspaper stories were written about its vintage and scars of long service. Photographers snapped pictures of it alongside the blooded models owned by my senatorial colleagues. But its story was only half told.

Without an automobile I could not have entered the race for the office I am now honored to hold. The reasons are not far to seek. My only hope for success lay in a whirlwind campaign that would enable me to present my political cause in every polling precinct in my State. Such a campaign could not have been made by older forms of transportation, even if the time and money had been available. This is true because many sections of North Carolina are accessible only by highway. Thus I can say in all frankness that the automobile made it possible for me to achieve my great ambition to become a Senator.

I mention this, not because it has any unusual significance but because it is an instance of the importance that individual transportation—the automobile and the open road—has assumed in the daily affairs of millions of Americans. And my own experience has caused me to often pause to wonder if our people as a whole have grasped fully the profound significance the automobile has in our modern scheme.

Of all the mechanical inventions and scientific discoveries of the last half century, motor transportation has, in my opinion, exercised the greatest influence on our economic and social structure.

Before discussing this in more detail, however, let us glance at the magnitude of our rubber-tired system of transportation. When considered as an agency of national service, its size is almost staggering. It represents an investment of roughly $25,000,000,000 in rolling stock, replacement and service plants, and highways. It includes 23,500,000 vehicles scattered over our land—1 to every 5 persons. It moves over 3,000,000 miles of highways, of which almost a million miles have been surfaced. And it employs, directly and indirectly, about 10 percent of the "gainful workers" in the United States. This number is, of course, in addition to the many millions at work in hotels, shops, and other channels of trade largely dependent upon the patronage and trade of those who drive automobiles.

FLEXIBLE TRANSPORT REVIEWED

Nevertheless, I fear that too many of us never view our highway transport as a great national industry, but rather in terms of the individual automobile. The result is that many persons driving along a highway scowl at the driver of a truck without any consideration of the importance of that truck in their own day-to-day existence. They condemn the use of the highways by busses without any regard for the part they play in the economical transportation of millions. In other words, the great mass of our citizens have never appreciated the tremendous advances in the progress of our Nation that are directly attributable to the cheap and flexible transportation offered by the motor car.

To say that it is the very basis of our national well-being is not putting it too strongly. One has only to consider that the annual retail turn-over in our highway transport system is in the vicinity of $9,000,000,000 a year, or roughly one fourth of all consumer expenditures, to realize the deep-rooted effect highway transport has on our country. To think of the motor vehicle merely as a speedier substitute for the horse is to underestimate its range.

The invention of the automobile and its wide diffusion has influenced the shift of our population, aided the growth of suburbs and affected the size of villages; marketing areas have been completely changed; the isolation of the farmer has been lessened; our educational system has been revolutionized, with the rural consolidated school replacing the one-room schoolhouse and its limited facilities; highway transportation, along with electricity, has dispersed our factories, with the result that manufacturing is no longer limited to certain regional areas, and, equally as important, the American people have learned to play and now enjoy a new-type vacation.

POPULATION CHANGE EMPHASIZED

Obviously all the effects of motor transportation cannot be covered at any length within the brief space of this series of articles. So I shall touch only on the more important. Population change, particularly since the advent of the automobile, is deserving of special mention.

One of the striking features of population change in the United States during the first third of the present century may be described in general terms as a shift from the country to the city. Improved farm facilities lessened the need for man power and the new mobility offered a ready means of reaching large municipalities. In these there were constantly being developed new opportunities not offered on the farm. As a result, cities grew fast and the new residents absorbed city influences and became "urbanized."

And as population of the cities increased the ease and rapidity of travel by motor car made it possible for the cities to extend their borders and bring in much territory that was formerly rural. Small communities within a wide radius of large municipalities are no longer isolated, but offer much of the city itself.

The net result has been that suburban areas surrounding metropolitan centers are growing faster than the central cities, largely due to the convenience of the automobile in providing transportation. Recent census figures revealed a 39.2-percent increase in the population of suburbs as against 19.4 percent in the central cities.

More recently there has been fresh evidence of a complete turn in the movement toward the cities and we may anticipate a new gain in the farm population. Here again the mobility offered by the automobile has been a factor, although the influence of the depression, with decreased employment in the cities, must not be discounted. Many of those leaving the cities once were farmers, or families of farmers, who see in rural life the security of at least a self-sufficient existence. An unprecedented number of inquiries received by Federal and State Departments of Agriculture, farm-loan agencies, and other farm groups indicate that many people are feeling the urge to return to the country. Farms at their present low prices are in larger demand than for some years past. Time alone can tell whether the movement from city to farm will continue or is a temporary condition.

But certain things are evident. The open country has found a new interdependence with the rest of the country, which has brought about a changed situation in villages and small towns. Highways and automobiles now make it possible for the farmer and his family to drive to or through several villages in the routine of delivering farm commodities or shopping. The village is also a crossroads for city travelers and visitors from other villages. Therefore the rural trading post has come to occupy an enlarging place in our national make-up.

All this, of course, has changed marketing areas. This is particularly true of the marketing territories of most cities. The trading area has expanded greatly in recent years. Stores in many cities deliver merchandise regularly within a radius of from 25 to 100 miles. Motor transportation is responsible for our new regionalism. The passenger car determines the scope of the social community, and the truck is a factor in the dimensions of the economic region. And the truck is still basically a private rather than a common carrier.

DEPENDENCE ON MOTOR VEHICLES

Here, again, are reasons for a better appreciation of our motor transportation. Suppose we consider what would happen if there were a sudden halt in the movement of vehicles over our highways. There would be an immediate threat of at least semi-starvation in some localities until such time as our whole distributing system could be readjusted. Farmers, who own more than 5,000,000 motor vehicles, could neither readily nor cheaply transport their livestock and products to market. Distribution of the limited supplies of foodstuffs in local areas could not be made and retail outlets would have their shelves speedily emptied.

Furthermore, our daily supply of groceries and meat and milk could not be delivered properly; many housekeepers could not go to market; fire apparatus could not respond to calls; freight trains would move comparatively empty because they are largely filled with merchandise brought in trucks; our rural free delivery would be at a standstill, and 45,000 towns and villages without rail facilities would be isolated.

Of course, I mention the above, not with any thought that such an eventuality will ever come, but because it shows the importance of a transportation system we are sometimes inclined to accept as commonplace.

In discussing the effect of the automobile on travel, I am more at home. Travel has always been my hobby. At home and abroad, the motor car has been my means of transportation on numerous trips to new fields of adventure. In 1924 it was my good fortune to travel around the world under motor power, visiting many lands where the automobile was still a curiosity. Thus it is a great source of gratification to me to find my fellow Americans more and more responding to the urge to travel.

It is today an objective of every man, woman, and child. It is evidence of national restlessness—the urge to go places and see things. We have literally come to the point where "hop in" is more than an expression; it reflects a state of mind.

URGE TO TRAVEL IS EXTENDED

This new desire for travel is an outgrowth of individual transportation; its effect upon attitudes and ideas cannot be accurately summarized. But there is clearly an enhancement of geographic consciousness. The farmer departs from the Kansas wheat field to see the cities, the mountains, and the ocean; the resident of the seaboard leaves home to see the wheat fields and the plains. Except in very isolated sections of our country, it would be difficult to find those persons, quite common a century ago, who had never left the countries of their birth. Today our people from every section are constantly meeting.

The importance of these personal contacts cannot be overestimated. They have in large measure eliminated imaginary boundaries and with it provincialism and isolation. The far-flung areas of our country are being knitted closer together. We have a new solidarity of purpose. It would have been difficult 10 years ago to have conceived the Blue Eagle of the N.R.A., with all its meanings, as a universal emblem.

In the first of these articles, that I have undertaken at the request of the New York Herald Tribune, I have mentioned a few of the many effects of the automobile on the life of our country. In the second I shall discuss some of the problems ahead that must be solved if the development of motor transportation is to continue on anything comparable to the scale of recent years. In the third article I hope to deal with the opportunities for further motorizing lands abroad as well as the opportunities for recreational travel in new fields.

If the series results in a better appreciation of our highway transport on the part of my readers, I shall feel that my objective has been gained and my effort rewarded.

THE TARIFF

Mr. METCALF. Mr. President, I send to the desk an editorial from the Boston Evening American of Wednesday, March 7, 1934, on the subject of the tariff. The editorial reflects the wisdom of the editorial policy of Mr. William Randolph Hearst insofar as it relates to this important subject. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Boston American, Mar. 7, 1934]

GOVERNMENT BY PERSONAL WHIM IS DESPOTISM

We are advancing fast toward absolutism. We are retreating fast from constitutional democracy.

Encroachment after encroachment upon popular liberties follow one another.

Usurpation leads to further usurpation of dictatorial authority.

The President seems to think he can easily enlarge his already extended powers by merely weaving into a request for new authorizations some passing references to the existing emergency and the prevailing unemployment.

This is the familiar balustrade upon which he again leans in casually asking Congress for power personally to negotiate and conclude tariff treaties without their submission to the Senate for ratification, without recommendation or guidance by the Tariff Commission, without check from any quarter, without the concurrence of any other person or official body, without revealed method or proven principle or established precedent or even thorough survey of the facts.

Autocratic authority is so substituted for constitutional prerogatives and procedure.

The President becomes the Grand Panjandrum of American business, with power, by personal treaties, independently of any action by the representatives of the people, to raise or lower tariff rates 50 percent in all trade bargaining with foreign nations.

Conceding the virtuous intentions of the President and without dwelling upon the naive insensibility to business actualities revealed in his proposals, it is manifest—clear beyond all shadow of doubt—that this power should not be given at all.

The authority belongs to Congress and should be exercised by Congress.

If Congress, in its servile desire to surrender its functions, should confer more of its powers on the President, that power in this instance should be limited strictly to the right to raise tariff rates as a reprisal for prohibitive rates or quotas imposed by foreign nations on American products.

This power would at least be the right to defend American industry.

But the power to lower tariff rates 50 percent is the power to destroy American industry!

It is the power to cripple the 95 percent of production and employment which supplies domestic markets in order to favor the 5 percent which competes in foreign markets.

Such a policy is not only allowing the tail to wag the dog; it is destroying the dog to save the tail.

And the tail would be utterly valueless without the dog, not only in the simile but in the actuality.

There is another reason—although no other reason is needed for not giving the President power to make these bargains with foreign nations—and that reason is that the bargains will not be scrupulously carried out by foreign nations, most of which are unreliable in their dealings with America, and some of which are definitely dishonest.

The American Government is an utter innocent in the diplomatic field, and the foreign nations know it.

They borrow money of us and do not pay it. They make agreements and do not keep them.

To use the popular phrase, they are sharpers and we are hicks. We play their shell game and they make fools of us.

We buy their green goods and they laugh at us. We lose our money, and they take it and spend it to compete with us.

We labor under a load of taxation inherited from their war, and they show their appreciation by piling their taxation upon us on top of our own.

They have not even the gratitude which a sharper should show toward the simpletons who support him.

If we open our home markets to their goods, on their worthless pledges, we will find that we have sacrificed American industry and American labor for a bond that is without value, and a word that is without honor.

Take Mr. Roosevelt's historic apple swap, an example of ingenuous innocence which has never been matched in the whole history of our fatuous foreign relations.

Under this arrangement the United States permits the entry of some $10,000,000 worth of French wines and France agrees to allow the importation of some $1,000,000 worth of American apples.

For some reason or other even this one-sided agreement has not operated reciprocally, various shipments of American apples having been left to rot on the French docks or seek a market elsewhere.

We confidently leaned again on the broken reed of French sincerity and honest intent and experienced the usual consequences.

What reason have we to believe or to hope that other bargains would be more scrupulously kept, or that the United States can ever depend on the pledges of nations which repudiate their debts and dishonor their agreements?

The reaction of Congress to this startling proposal of the President's will be watched by thoughtful Americans with profound concern.

Perhaps it is with the issue here presented that real recovery in the United States will begin—the recovery of itself and its self-respect—the recovery of its constitutional rights, its independence and its liberty.

CARRIAGE OF AIR MAIL BY THE ARMY

The Senate resumed the consideration of the bill (H.R. 7966) to authorize the Postmaster General to accept and use equipment, landing fields, men, and material of the War Department for carrying the mails by air, and for other purposes.

Mr. CAREY. Mr. President, I move that this bill be referred to the Committee on Military Affairs.

As I understand, the bill turns over to the Post Office Department the air equipment of the Army. The testimony taken the other day before the Committee on Appropriations led me to believe that the Army is not equipped to carry the mail. As the Army is involved, I think the Committee on Military Affairs should have an opportunity to consider the advisability of passing this measure.

Mr. ROBINSON of Arkansas. Mr. President, I move to lay on the table the motion of the Senator from Wyoming.

Mr. ROBINSON of Indiana, Mr. FESS, and other Senators called for the yeas and nays, and they were ordered.

Mr. CLARK. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. CLARK. What is the motion of the Senator from Wyoming?

The VICE PRESIDENT. The motion of the Senator from Wyoming is to refer the bill under consideration to the Committee on Military Affairs. The question is on the motion of the Senator from Arkansas to lay that motion on the table.

Mr. McKELLAR. The motions refer to the temporary air mail bill.

The VICE PRESIDENT. The clerk will call the roll on the motion of the Senator from Arkansas.

The Chief Clerk called the roll.

Mr. ROBINSON of Indiana (after having voted in the negative). I inquire if the junior Senator from Mississippi [Mr. STEPHENS] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. ROBINSON of Indiana. I have a general pair with that Senator, and since he has not voted, it will be necessary for me to withdraw my vote.

Mr. LEWIS. I desire to announce that the Senator from Arkansas [Mrs. CARAWAY], the Senator from Mississippi [Mr. STEPHENS], and the Senator from Oklahoma [Mr. THOMAS] are necessarily detained from the Senate on official business. I desire further to announce that the Senator from Iowa [Mr. MURPHY] has a general pair with the Senator from South Dakota [Mr. NORBECK].

The result was announced—yeas 61, nays 29, as follows:

YEAS—61

Adams	Copeland	La Follette	Robinson, Ark.
Ashurst	Costigan	Lewis	Russell
Bachman	Couzens	Logan	Sheppard
Bailey	Dieterich	Lonergan	Shipstead
Bankhead	Dill	McAdoo	Smith
Barkley	Duffy	McCarran	Thomas, Utah
Black	Erickson	McGill	Thompson
Bone	Fletcher	McKellar	Trammell
Brown	Frazier	Neely	Tydings
Bulkley	George	Norris	Van Nuys
Bulow	Glass	Nye	Wagner
Byrd	Gore	O'Mahoney	Walsh
Byrnes	Harrison	Overton	Wheeler
Clark	Hatch	Pittman	
Connally	Hayden	Pope	
Coolidge	King	Reynolds	

NAYS—29

Austin	Fess	Kean	Steiwer
Barbour	Gibson	Keyes	Townsend
Borah	Goldsborough	Long	Vandenberg
Capper	Hale	McNary	Walcott
Carey	Hastings	Metcalf	White
Cutting	Hatfield	Patterson	
Davis	Hebert	Reed	
Dickinson	Johnson	Schall	

NOT VOTING—6

Caraway	Norbeck	Stephens	Thomas, Okla.
Murphy	Robinson, Ind.		

So Mr. CAREY's motion was laid on the table.

DEPARTMENT OF AGRICULTURE AND FARM-CREDIT APPROPRIATIONS

Mr. RUSSELL. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of the agricultural appropriation bill.

Mr. McKELLAR. Mr. President, in view of the fact that the Senator from Georgia assures me that it will take but a short time to dispose of the agricultural appropriation bill, I am glad to join in the request.

The VICE PRESIDENT. Is there objection to the request of the Senator from Georgia?

There being no objection, the Senate proceeded to the consideration of the bill (H.R. 8134) making appropriations for the Department of Agriculture and for the Farm Credit Administration for the fiscal year ending June 30, 1935, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. RUSSELL. Mr. President, I ask unanimous consent that the formal reading of the bill be dispensed with, and that the bill be read for amendment, committee amendments to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the clerk will state the first amendment of the committee.

The first amendment of the Committee on Appropriations was, under the heading "Title I—Department of Agriculture, Office of the Secretary, Salaries", on page 2, line 23, after the word "appropriation", to strike out "unit" and insert "unit,"; so as to read:

For the Secretary of Agriculture, Assistant Secretary, and for other personal services in the District of Columbia, and elsewhere, $548,560: *Provided*, That in expending appropriations or portions of appropriations contained in this act for the payment for personal services in the District of Columbia in accordance with the Classification Act of 1923, as amended, with the exception of the Assistant Secretary, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act as amended: *Provided further*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade, in the same or different bureau, office, or other appropriation unit, (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the Classification Act of 1923, as amended, and is specifically authorized by other law, or (5) to reduce the compensation of any person in a grade in which only one position is allocated.

The amendment was agreed to.

The next amendment was, under the heading "Bureau of Dairy Industry, salaries and general expenses", on page 29, line 5, after the words "Bureau of", to strike out "Dairying" and insert "Dairying,", so as to read:

For carrying out the provisions of the act approved May 29, 1924 (U.S.C., title 7, secs. 401–404), establishing a Bureau of Dairying, for salaries in the city of Washington and elsewhere, and for all other necessary expenses, as follows.

The amendment was agreed to.

The next amendment was, under the heading "Bureau of Plant Industry, salaries and general expenses", on page 31, line 17, after the word "and", to strike out "improvements" and insert "improvement", so as to read:

Drug and related plants: For the investigation, testing, and improvement of plants yielding drugs, spices, poisons, oils, and related products and byproducts, $34,101.

The amendment was agreed to.

The next amendment was, on page 33, at the end of line 2, to strike out "$187,066" and insert "$237,066", so as to read:

Forest pathology: For the investigation of diseases of forest and ornamental trees and shrubs, including a study of the nature and habits of the parasitic fungi causing the chestnut-tree bark disease, the white-pine blister rust, and other epidemic tree diseases, for the purpose of discovering new methods of control and applying methods of eradication or control already discovered, and including $117,600 for investigations of diseases of forest trees and forest products, under section 3 of the act approved May 22, 1928 (U.S.C., supp. VI, title 16, sec. 581b), $237,066.

The amendment was agreed to.

The next amendment was, on page 33, line 3, before the word "and", to strike out "Fruits" and insert "Fruit", and in line 7, after the word "related", to strike out "plants" and insert "plants", so as to read:

Fruit and vegetable crops and diseases: For investigation and control of diseases, for improvement of methods of culture, propagation, breeding, selection, and related activities concerned with the production of fruits, nuts, vegetables, ornamentals, and related plants, for investigation of methods of harvesting, packing, shipping, storing, and utilizing these products, and for studies of the physiological and related changes of such products during processes of marketing and while in commercial storage, $990,936.

The amendment was agreed to.

The next amendment was, on page 35, line 22, after the figures "$100,848", to insert "and in addition thereto, $12,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935", so as to read:

Western irrigation agriculture: For investigations in connection with western irrigation agriculture, the utilization of lands reclaimed under the Reclamation Act, and other areas in the arid and semiarid regions, $100,848, and in addition thereto, $12,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935.

The amendment was agreed to.

The next amendment was, on page 36, line 1, after the name "Bureau of Plant Industry", to strike out "$3,426,342" and insert "$3,476,342"; and in line 2, after the word "exceed", to strike out "$1,427,637" and insert "$1,435,137", so as to read:

Total, Bureau of Plant Industry, $3,476,342, of which amount not to exceed $1,435,137 may be expended for personal services in the District of Columbia and not to exceed $3,750 shall be available for the purchase of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia.

The amendment was agreed to.

The next amendment was, under the heading "Forest Service—Forest-Fire Cooperation", on page 44, line 5, after the word "act", to strike out "$1,198,619" and insert "$1,498,619", so as to read:

For cooperation with the various States or other appropriate agencies in forest-fire prevention and suppression and the protection of timbered and cut-over lands in accordance with the provisions of sections 1, 2, and 3 of the act entitled "An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purpses, in order to promote continuous production of timber on lands chiefly valuable therefor", approved June 7, 1924 (U.S.C., title 16, secs. 564–570), as amended, including also the study of the effect of tax laws and the investigation of timber insurance as provided in section 3 of said act, $1,498,619, of which $23,859 shall be available for departmental personal services in the District of Columbia and not to exceed $1,500 for the purchase of supplies and equipment required for the purposes of said act in the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 45, line 1, to change the total appropriation for the Forest Service from $8,244,323 to $8,544,323.

The amendment was agreed to.

The next amendment was, under the heading "Bureau of Entomology and Plant Quarantine" on page 49, after line 11, to insert the following subhead: "Salaries and general expenses."

The amendment was agreed to.

The next amendment was, on page 50, at the end of line 17, to strike out "$203,010" and insert "$279,030", so as to read:

Japanese bettle control: For the control and prevention of spread of the Japanese bettle, $279,030.

The amendment was agreed to.

The next amendment was, on page 51, line 22, after the figures "$45,462", to strike out the comma and "and no expenditure shall be made for these purposes until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed, by State, county, or local authorities, or by individuals or organizations for the accomplishment of such purposes", so as to read:

Phony-peach eradication: For determining and applying such methods of eradication, control, and/or prevention of spread of the disease of peach trees known as phony peach as in the judgment of the Secretary of Agriculture may be necessary, including cooperation with such authorities of the States concerned, organizations of growers, or individuals, as he may deem necessary to accomplish such puposes, including the certification of products out of the infested areas to meet the requirements of State quarantines, $45,462: *Provided*, That no part of the money herein appropriated shall be used to pay the cost or value of trees or other property injured or destroyed.

The amendment was agreed to.

The next amendment was, on page 52, at the end of line 24, to strike out "$262,701" and insert "$362,701", so as to read:

Cereal and forage insects: For insects affecting cereal and forage crops, including surgarcane and rice, and including research on the European corn borer, $362,701.

The amendment was agreed to.

The next amendment was, on page 53, line 5, after the word "cotton", to strike out "$114,763" and insert "$136,000, and in addition thereto $39,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935", so as to read:

Cotton insects: For insects affecting cotton, $136,000, and in addition thereto $39,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935.

The amendment was agreed to.

The next amendment was, on page 55, line 1, after the figures "$552,966" to insert "and in addition thereto $95,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935", so as to read:

Foreign plant quarantines: For enforcement of foreign plant quarantines, at the port of entry and/or port of export, and to prevent the movement of cotton and cottonseed from Mexico into the United States, including the regulation of the entry into the United States of railway cars and other vehicles, and freight, express, baggage, or other materials from Mexico, and the inspection, cleaning, and disinfection thereof, including construction and repair of necessary buildings, plants, and equipment, for the fumigation, disinfection, or cleaning of products, railway cars, or other vehicles entering the United States from Mexico, $552,966, and in addition thereto $95,000 of the unexpended balance for this purpose for the fiscal year 1933 is continued available for the same purpose for the fiscal year 1935: *Provided*, That any moneys received in payment of charges fixed by the Secretary of Agriculture on account of such cleaning and disinfection shall be covered into the Treasury as miscellaneous receipts.

The amendment was agreed to.

The next amendment was, on page 55, after line 19, to insert:

Dutch-elm disease: For control and prevention of spread of the Dutch-elm disease in the United States, $300,000.

The amendment was agreed to.

The next amendment was, on page 55, after line 21, to insert the following:

Gypsy and brown-tail moths: For the control and prevention of spread of the gypsy and brown-tail moths, $360,000.

The amendment was agreed to.

The next amendment was, on page 56, line 2, before the word "of", to strike out "$2,882,309" and insert "$3,739,566", and in line 3, after the word "exceed", to strike out "$632,430" and insert "$674,430", so as to read:

Total, Bureau of Entomology and Plant Quarantine, $3,739,566, of which amount not to exceed $674,430 may be expended for personal services in the District of Columbia, and not to exceed $12,750 shall be available for the puchase of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of field work outside the District of Columbia.

The amendment was agreed to.

Mr. SMITH. Mr. President, I desire to take this occasion to call the attention of the Senate to the fact that the most important bill affecting agriculture does not come to the Committee on Agriculture and Forestry for consideration. Under our confused system of the Budget and the mix-up we have in our procedure, a bill is presented, and, although we have appointed a committee whose duty it is to devote their time to matters affecting agriculture, the bill which makes appropriations for the functioning of the Department of Agriculture never goes to the Committee on Agriculture.

As far as I am concerned, I am not asking for work, but I do think that the Senate ought to take cognizance of this absurd procedure, and say that things which pertain in their very essence to certain committees shall be considered by those committees.

The only chance that any members of the Agricultural Committee have officially to investigate the provisions of such a bill, which has been considered and decided entirely outside the jurisdiction of the Committee on Agriculture, is when they are named as conferees on the measure when it goes to conference.

Mr. President, I enter my protest here and now against such procedure, and I hope that a sufficient number of Senators on both sides of the Chamber will join with me in order that we may remedy this absurd situation. I wanted to make that statement now in order that the Senate might be advised of my position in regard to this question.

Of course, a good many Senators already recognize the fact that, as far as appropriations are concerned, we are merely a ratifying body for the so-called "Budget Bureau." Inasmuch as the people of America have confidence enough in men to select them to come here to represent them, I think the time has come for us to modify the overlordship of that Bureau. We know the needs of agriculture. We are the ones to make the appropriations, and that function ought not to be restricted within the jurisdiction and will of mere appointees in the Government.

Mr. GLASS. Mr. President, I had supposed that the Appropriations Committee of the Senate was the committee appointed to frame appropriation bills, but under the custom and practice we have three members of the Committee on Agriculture sitting in and assisting in the framing of the bill. So that no discourtesy was either intended or has been practiced against the Committee on Agriculture and Forestry.

Mr. SMITH. Mr. President, I was not talking about discourtesy. I was talking about our policy. I was a Member of the Senate when bills of this kind were considered by the Committee on Agriculture, and when bills with reference to finance were considered by the Committee on Finance. I am talking about the policy the Senate has adopted, which is an absurd policy. There is no question of discourtesy involved, Mr. President. Whenever one Senator wants to be discourteous to another, the one against whom the discourtesy is aimed can take care of himself. I can take care of myself, and I presume other Senators can take care of themselves. I am merely talking about the policy at this time, which, I repeat, in my opinion, is an absurd one.

Mr. ROBINSON of Arkansas. Mr. President, the present system of making appropriations for the departments was worked out after a great many years of study. There is necessity for coordination of authorities who frame the appropriation bills, otherwise the old system of having committees for the various departments, which might be described as an effort to see which one could get the most from the Treasury, would prevail.

The present system contemplates that the legislative committees shall consider and report and have charge of, in both Houses, various measures of legislation authorizing the appropriations. When the appropriations have been authorized, under the prevailing practice the making of the appropriations is concentrated in a single committee known as the "Appropriations Committee." There is something, of course, that can be said on the other side of the proposition, but I feel justified in saying that it appears to me that the weight of the argument supports the present system.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I yield to the Senator from Georgia.

Mr. RUSSELL. The Senator from Arkansas is, of course, more familiar with the reasons for the change in the rules than I am, but I might point out to the Senator that at the present time the rules require that three members of the standing committee dealing with the Department of Agriculture shall be members of the subcommittee on appropriations to handle agricultural appropriation bills. The three Members who are on that subcommittee are the Senator from South Carolina [Mr. SMITH], the present Chairman of the Committee on Agriculture and Forestry; the minority leader, the Senator from Oregon [Mr. MCNARY], who was formerly Chairman of the Committee on Agriculture; and the senior Senator from Montana [Mr. WHEELER]. Therefore, the standing committee has representation by virtue of having these ex-officio members of the standing committee on the subcommittee of the Committee on Appropriations, and under the rules they are members of the subcommittee which handles the appropriation measures for the Department of Agriculture.

Mr. ROBINSON of Arkansas. The Senator from Georgia is entirely correct in his statement. So, in addition to what I have already said, the advice and assistance of the ranking members of the Committee on Agriculture are available to the Committee on Appropriations. If each committee, as under the old practice, were authorized to serve as an appropriations committee, we would have a very difficult problem in keeping appropriations anywhere near within revenues. I do not desire to enter into a prolonged discussion of the subject at this time, but I felt constrained to make the statement which I have made.

Mr. SMITH. Mr. President, I want to state that my position is that when it comes to the question of the needs of any one department, and let us take, for example, the Department of Agriculture, the committee charged with ascertaining what are the needs of agriculture or what are the needs of finance officials to carry out the needs of that Department, should be the committee charged with studying those needs—in this case, the Committee on Agriculture and Forestry.

Mr. ROBINSON of Arkansas. Will the Senator from South Carolina yield?

Mr. SMITH. Just one more word. When it comes to the question of the amount necessary, Mr. President, our present procedure is tantamount to charging the Department with no regard for the Treasury, no regard for the needs of that particular division of our organized life, and, therefore, we must hedge it about with extraneous and outside policies in order that those who are charged with the work and charged with the duty of looking after the welfare of agriculture, or any other one of the divisions for which the committees are set up, shall be limited. It is not a question of the matter of finance, it is a question of the honesty of the committee in meeting the conditions that confront

them with reference to any one of the departments. That, Mr. President, is the position I take.

We have now before us for consideration an agricultural appropriation bill. I do not think that three men are competent to pass upon what are the actual needs of various sections of our country. The members of the Committee on Agriculture are appointed from different parts of the country in order that the committee having charge of agriculture may know the needs of the different sections and may know what is necessary to meet the demands. We have the Department of Agriculture and we have the Committee on Agriculture, but under the Budget system they do not have a great deal to say about appropriations for agriculture. I believe the old system was infinitely superior to the present system when it comes to the question of saving money and keeping the country out of debt.

Mr. ROBINSON of Arkansas. Mr. President, the Senator from South Carolina in his statement apparently overlooks the fact that the legislative committee that authorizes appropriations for the Department of Agriculture is the Committee on Agriculture, of which he is the chairman. When an appropriation is authorized it is true that there is no compulsion upon the Committee on Appropriations actually to make available the funds authorized, but practically every item of appropriation that is carried in these general appropriation bills has been authorized by law, which law was first considered and reported by the proper legislative committee.

The system that prevails is that the legislative authority shall be distributed among a large number of standing committees of the Senate but that the appropriation authority shall be concentrated in a single committee of the Senate. Of course there are emergencies in which the rule has not been followed, but, as stated by the Senator from Georgia, the rule is designed to prevent excessive and ill-considered expenditures. I had a number of years' experience under the old system prior to the adoption of the present plan, and I think that the present plan is more conducive to wholesome public service and to the conservation of the public interest than the old plan, under which there were often efforts made by the various departments to secure large appropriations that could not well be comprehended within a budget. One may make little of a budget, if he wishes to do so, but, after all, there is incontrovertible necessity for some plan of coordinating expenditures with revenue; otherwise deficits will always exist.

Mr. SMITH. Mr. President, one more word and I shall be through. I do not want to take up any more time in the consideration of the pending bill, but on the proper occasion I shall desire to give a digest of what is contained in the bill; and I think I shall be able to show that the Agricultural Department will be materially crippled by the passage of the pending measure.

The VICE PRESIDENT. The clerk will state the next amendment of the Committee on Appropriations.

The next amendment was, under the heading "Bureau of Agricultural Engineering", on page 64, line 2, after the word "and" to insert "general"; so as to make the subhead read: "Salaries and general expenses."

The amendment was agreed to.

The next amendment was, under the heading "Bureau of Agricultural Economics—Salaries and general expenses", on page 67, line 21, after the word "cotton", to strike out "or corn", so as to read:

Crop and livestock estimates: For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, staples of cotton, stocks, and value of farm crops, and numbers, grades, and value of livestock and livestock products on farms, in cooperation with the Extension Service and other Federal, State, and local agencies, $603,701: *Provided*, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton.

The amendment was agreed to.

The next amendment was, on page 70, line 5, after the word "staple", to strike out "estimates" and insert "statistics", so as to read:

Cotton grade and staple statistics: To enable the Secretary of Agriculture to carry into effect the act entitled "An act authorizing the Secretary of Agriculture to collect and publish statistics of the grade and staple length of cotton", approved March 3, 1927 (U.S.C., supp. VI, title 7, secs. 471–476), $207,174.

The amendment was agreed to.

The next amendment was, at the top of page 81, to insert:

INTERNATIONAL PRODUCTION CONTROL COMMITTEES

During the fiscal year 1935 the Secretary of Agriculture may expend not to exceed $10,000, from the funds available for carrying into effect the Agricultural Adjustment Act approved May 12, 1933 (Public, No. 10, 73d Cong.), the share of the United States as a member of the International Wheat Advisory Committee or like events or bodies concerned with the reduction of agricultural surpluses or other objectives of the Agricultural Adjustment Act, together with traveling and all other necessary expenses relating thereto.

The amendment was agreed to.

The next amendment was, under the subhead "Grasshopper control, Bureau of Entomology", on page 81, line 21, after the word "expenses", to strike out "$2,000,000" and insert "$2,354,893", so as to read:

For the application of such methods of control of grasshoppers as, in the judgment of the Secretary of Agriculture, may be necessary, in cooperation with such authorities of the States concerned, organizations, or individuals as he may deem essential to accomplish such purposes, including the employment of persons and means in the District of Columbia and elsewhere, printing and binding, rent outside of the District of Columbia, and for other expenses, $2,354,893, to be available during the fiscal years 1934 and 1935, and to be immediately available, of which amount not to exceed $7,500 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 82, line 11, after the word "indicated" and the colon, to strike out "*And provided*" and insert "*Provided*", so as to read:

Provided further, That no part of this appropriation shall be used to pay the cost or value of farm animals, farm crops, or other property injured or destroyed.

The amendment was agreed to.

The next amendment was, on page 83, at the end of line 8, to strike out "$59,428,887" and insert "$60,991,037", so as to read:

Total, title I, Department of Agriculture, $60,991,037.

The amendment was agreed to.

The VICE PRESIDENT. That completes the committee amendments.

Mr. RUSSELL. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 3, line 13, it is proposed to strike out "$20,000" and to insert "$22,990."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Georgia.

The amendment was agreed to.

Mr. RUSSELL. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment offered by the Senator from Georgia will be stated.

The CHIEF CLERK. On page 3, lines 19 and 20, it is proposed to strike out the words "but not to exceed $720 may be so used for any one person."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. RUSSELL. I offer another amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 22, line 11, it is proposed to strike out the word "provided" and in lieu thereof to insert the word "provide."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. RUSSELL. I offer another amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 2, line 4, after the word "Agriculture", it is proposed to insert:

Under Secretary of Agriculture, $10,000, and there is hereby established in the Department of Agriculture the position of Under Secretary of Agriculture, to be appointed by the President, by and with the advice and consent of the Senate, and whose compensation shall be at the rate of $10,000 per annum.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Georgia.

The amendment was agreed to.

Mr. RUSSELL. I offer another amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 18, after line 9, insert the following:

Meteorological station, Missoula, Mont.: For the establishment, equipment, and maintenance of a meteorological station upon a site to be selected by the Secretary at Missoula, Mont., $10,000, to be immediately available.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

CARRIAGE OF AIR MAIL BY THE ARMY

The Senate resumed the consideration of the bill (H.R. 7966) to authorize the Postmaster General to accept and use equipment, landing fields, men, and material of the War Department, for carrying the mails by air, and for other purposes.

The VICE PRESIDENT. The question is on the engrossment of the amendments and the third reading of the bill.

Mr. FESS. Mr. President, yesterday the leader of the majority of the Senate, the Senator from Arkansas [Mr. ROBINSON], in speaking in reply to what had been said by the Senator from Indiana [Mr. ROBINSON], made this statement:

For many months the subject matter of those contracts has been under investigation by a special committee of the Senate. So far as my information goes, there can be no controversy as to the conclusion that in the initiation of the contracts there was fraud and collusion.

The Senator from Arkansas said, "So far as my information goes." I think I am willing to admit that statement based upon information so far as it has gone. If that qualification was not there it would be a very serious statement. But the Senator from Arkansas has had no opportunity of making an examination of the facts and I think that his conclusion in the matter is very largely, I regret to say, what the public has come to believe, because of the accusations that have been made and the general tendency which has been evidenced to reach conclusions without first hearing the other side of the issue. So, after reading the statement of the Senator from Arkansas, which was quite offensive to me yesterday, it is not so today, for it is based upon the information he has, so far as that information goes. If I were to make up my mind from what has been stated, there having been no chance to refute the charges made, in all probability I would reach exactly the same conclusion as that which the Senator from Arkansas expressed yesterday.

Mr. President, I wish to take the time, and shall exercise the right under the rules of the Senate, to show the other side of this question which has never as yet been presented. I probably will not be able to get through with the testimony today, but I will take the time, whatever may be necessary, in order that the Senate and the country may know the other side of this controversy.

Mr. President, the problem that confronted a previous Postmaster General when he undertook to build up the great aviation industry was rather complicated. That industry had been builded in a haphazard way. Certain interests in various localities had become interested in establishing a route to give air-transportation facilities to their citizens. The air-mail business is not old; in fact, it is very youthful. I recall seeing the two Wright brothers flying one of the original planes in a field that is located only 4 miles from my home. I recall that thousands of people came there when it was announced that a demonstration flight would be made. One could hear people detailing descriptions of the flight. They would say, "Long before we reached the field we could see the air men in the air." It was a most romantic story. I recall very distinctly the first effort that was ever put forth to use the airplane for commercial purposes. That was when Phil Parmalee carried a roll of 800 yards of silk from the city of Dayton to the city of Columbus. The plane which he used went over the town in which I lived. The route which the plane would take had been announced in advance, as well as the time when it would reach the college over which at that time I was presiding. I dismissed the students for the time being, stating to them that they had an opportunity to witness the first effort in history to carry a commercially salable article from one city to another. That was only a little while ago. Then came the World War.

When that terrific convulsion broke upon our country and upon the world there was an opinion in some quarters that the decision would be made in the air. Never before or since was there a time when those in control of the affairs of the country undertook to such an extent to call together the genius of invention and discovery for such an important purpose. The problem confronting the Government then under the leadership of Woodrow Wilson was to build an airplane engine that would be capable of meeting any air force of the enemy. Today, in the old historic house on the Wilbur Wright Field, 7 miles from Dayton, are stored hundreds upon hundreds of the old Liberty motors that were built at that time as the climax of achievement in this particular field of activity. The war had not progressed very long until the advantage of the combat plane was made obvious.

After the war closed, following the terrific stimulus to the building of aircraft for military purposes, our people seemed to forget that there was any necessity to maintain this new industry and to make such inventions and improvements as would be demanded by a new system of transportation involving the hazards of the heavier-than-air plane.

President Coolidge in 1925, realizing that we had fallen behind other countries and that they were fast surpassing us, in the use of the airplane not only for military purposes as a matter of national defense, but for commercial possibilities as well, became convinced of the wisdom of making a study of the possibilities of aircraft, military and commercial. In response to that conviction on his part he was authorized by Congress to appoint a national aircraft board. That board was headed by the distinguished Dwight Morrow, not then a Senator, not at that time regarded in any political light whatsoever. But the President, having known him from the days when they were college men together, had confidence in him and called upon him to serve.

The outcome was the appointment of a board composed of Mr. Morrow and other eminent gentlemen, the first of whom was Maj. Gen. James G. Harbord, retired, of New York City. It is quite probable that the able Senator from North Caroline [Mr. BAILEY], now presiding over this body, will recall that at one critical moment during the World War, I think after Belleau Wood, the report came that General Harbord had been killed. When the report reached the distinguished and brilliant Gen. Charles G. Dawes he said, "It cannot be true, because I have no message from Hades", which was a suggestion that General Harbord very much enjoyed, as evidenced by his letters home, which were later published.

With General Harbord were associated Rear Admiral Frank Fletcher, retired; Mr. Howard E. Coffin, of Detroit, a

famous engineer called in for consultation purposes; Col. Hiram Bingham, later a United States Senator; Hon. Carl Vinson, of Georgia, a distinguished Democratic Member of the House; Hon. James S. Parker, who recently passed away, also a distinguished Member of the House, later becoming chairman of the Committee on Interstate and Foreign Commerce of that body; Hon. Arthur C. Denison, of Michigan, of the United States Court of Appeals; and William F. Durand, of Stanford University, president of the American Society of Mechanical Engineers.

The board, which was headed by Mr. Morrow, represented the legislative branch of the Government—the Senate and the House; it represented the judicial department of the Government in the person of Judge Denison, still adding honor and glory to the Federal Court of Appeals; it represented the executive department; it represented the Army and the Navy; and represented the finest skill in engineering and business in America.

That aircraft board started its studies. It collected facts for 4 months. It had more than 100 men, representing the highest standard of talent, before it prior to the time it made its findings. Before the board came to any definite conclusion a subcommittee was appointed, headed by Judge Denison, of Michigan; and after studying, analyzing, and classifying the data presented by this group of rather superior minds, the board made their recommendations.

The report submitted at that time indicates how many planes we had. Unfortunately, the showing was not very good:

> More than 16,000 airplanes, with motors, were delivered by American manufacturers. In addition approximately 25,000 motors were produced and at the time of the armistice were being provided at the rate of 4,000 per month. Competent authorities believe that by March 1919 the country could have been producing 10,000 Liberty motors a month.

That is a statement of the air situation. The board raised certain questions as a basis for investigation and recommendation.

The first question was:

> In determining an aviation policy for the United States Government, what should be the relation between the military and civilian services?

In that connection, the argument was made that, while the two fields developed a similar service, the one service was for maneuverability, for combat contest, while the other service was for commercial purposes—wholly different in requirements, in equipment of planes, and in the training of personnel.

Their second question was:

> How can the civilian use of aircraft be promoted?

It was answered that it could be promoted by a certain amount of encouragement on the part of the Government, and also by a stimulation of public interest in the various municipalities and locations.

The argument for Government interest in the development of an aviation service was that—

> It creates a reservoir of highy skilled pilots and ground personnel. Whatever is done to increase the use of aircraft, to spread familiarity with aircraft among the people, and in general to develop "air-mindedness", will make it easier rapidly to build up an expanded air power if an emergency arises.
>
> * * * * * * *
>
> There has been no more inspiring chapter in American enterprise and courage than the establishment and conduct of the United States air mail.

Mr. President, was that statement made by an authoritative body? Was that declaration made by men of ulterior purposes? Was that judgment reached on a basis of collusion, on a basis of fraud? Who will charge these men with fraudulent intent when they make the statement that—

> There has been no more inspiring chapter in American enterprise and courage than the establishment and conduct of the United States air mail.

Then the board goes on to speak of certain things that should be done and certain burdens we ought to avoid:

> We recommend the progressive extension of the Air Mail Service, preferably by contract, and also that steps be taken to meet the manifest need for airways and air-navigation facilities, including an adequate weather service maintained by public authority and planned with special reference to the needs of air commerce.

That is the recommendation of this group of men—that the Air Mail Service be built up, preferably by contract. That is the basis on which Mr. Brown is assailed.

Not only that, but there has been much talk about avoiding competitive bidding. Let us see what this report states as to avoiding competitive bidding:

> Existing statutes covering the procurement of supplies and requiring competitive bidding be modified where necessary to allow putting the recommendations previously made into effect.

What should every contract look to establish? This group of men, free of political bias, with no ulterior purposes—no purpose except to build up an air industry—make this recommendation, and the special agency by which it is to be done is the air mail:

> We therefore recommend—

Says this board—

> (1) The adoption of a policy of continuity in orders and of a standard rate of replacement.
>
> (2) Production orders be given only to companies which maintain design staffs of reasonable size and keep them active.

Mr. President, that is a sound principle upon which to build an air service; and that is precisely why this board recommended that it be done by contract, instead of by competitive bidding, because bidding may be participated in by companies that do not maintain a design staff, that are not capable of producing planes that meet the requirements of the Commerce Department of the Government. I will read the recommendation again:

> Production orders be given only to companies which maintain design staffs of reasonable size—

And have the ability to keep those staffs alive and abreast of the growing needs. When Mr. Brown said, "I will not accept a bid from any company that does not comply with that requirement", those that could not comply find fault with him and say that he discriminated against them.

The board also recommends that—

> (3) Proprietary rights in design be fully recognized.

What do they mean by that? If there is a design that is not patented, or even one that is patented, the contract ought to preserve the rights of the designer, just as the copyright and patent laws of the country are intended to secure those rights to the individual.

I think that is wise. Also, that is one of the features in the subsequent contracts that were made.

> (7) Governmental research in aeronautic science be actively continued and the testing facilities of the various department agencies should be made readily available to the civil industry.

This report is signed by Dwight W. Morrow, Judge Arthur C. Denison, William F. Durand, Hiram Bingham, J. S. Parker, Carl Vinson, James G. Harbord, Frank F. Fletcher, and Howard E. Coffin.

They recommended that there be three Assistant Secretaries appointed:

(1) An Assistant Secretary of War, to have charge of Army aviation.

(2) An Assistant Secretary of the Navy, to have charge of naval aviation.

(3) An Assistant Secretary of Commerce, to have charge of commercial aviation.

And those men, in pursuance of the authorization of Congress, proceeded to build an American aviation system.

The first law of any consequence touching air mail was enacted back in 1920. Then it was provided that a plane might carry mail under certain conditions, especially if it did not cost more than if carried in the usual way.

Mr. McKELLAR. Mr. President, I know the Senator does not want to get his facts wrong, and he is inadvertently doing so. The first air-mail route authorized by the Government was in 1918, and an appropriation of $100,000 was made for it for the purpose of carrying the mails between here and New York, and Army planes and Army flyers were to carry that mail.

Mr. FESS. Perhaps the Senator is right, so far as the Government's carrying the mail is concerned. I am speaking, not of the Government's carrying the mail, but of commercial agencies' carrying the mail.

Following that, we made an appropriation of $1,250,000 for the installation of an air route from New York to the Pacific coast. That amount of money was taken out of the appropriation for the mail service of the country.

Then in 1925 Congress enacted a law which permitted a company to carry mail under a contract, provided it did not cost more than three fourths of the revenue.

In 1926 another law was enacted, enlarging the air-mail authority. That law was in this language:

The Postmaster General is authorized to contract with any individual, firm, or corporation for the transportation of air mail by aircraft between such points as he may designate, and to further contract for the transportation by aircraft of first-class mail other than air mail at fixed rates per pound, including equipment, under such rates, rules, and regulations as he may prescribe, not exceeding $3 per pound for air mail for the first 1,000 miles and not to exceed 30 cents per pound additional for each additional 100 miles.

Mr. President, that was the law of 1926. Then a further law was enacted May 17, 1928, and contained this provision:

That the Postmaster General may by negotiation with an air-mail contractor who has satisfactorily operated under the authority of this act for a period of 2 years or more arrange, with the consent of the surety, * * * that the holder shall have the right of carriage of air mail over the route set out in the certificate so long as he complies with such rules, regulations, and orders as shall from time to time be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting air-mail operations to the advances in the art of flying.

Mr. President, some criticism of Congress for the enactment of that law may be justified. There may be some reason why that authority should not have been granted. It was granted, however. The very thing about which there is complaint now is the law. It is charged that Mr. Brown ignored competitive bidding and made contracts, as if he had not any authority to do so, when the law is specific that the Postmaster General not only shall have authority to carry on negotiations but that he may make such rules and regulations as he sees fit to adjust the air-mail operations to the advance in the art of flying, in the interest of the aviation industry. That law is on the statute books untouched. Let me read it again:

The Postmaster General may by negotiation with an air-mail contractor who has satisfactorily operated under the authority of this act for a period of 2 years or more.

Of course, if a bid were submitted by one who had not had 2 years' experience in flying, he would be disqualified to enter into a contract, and that might lead to complaint on the part of some disappointed individual who wanted a Government contract.

The Postmaster General, in the name of such air-mail contractor, shall provide—

That the holder shall have the right of carriage of air mail over the route set out in the certificate—

Note this—

so long as he complies with such rules, regulations, and orders as shall from time to time be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting air-mail operations to the advances in the art of flying.

Mr. President, that is the authority the Postmaster General may exercise which it has been charged here is arbitrary. As I have stated, whether the law should have been passed or not may be questioned; but there is no question as to the authority of the Postmaster General to act under it.

The next law that was enacted was dated May 17, 1928, and that is the one about which we have been talking, the McNary-Watres Act. Please note this law of 1928, which provides—and I want Senators to realize the import of this language:

Provided, That such certificate—

Referring to the certificate issued by the Postmaster General to the contractor—

Provided, That such certificate shall be for a period not exceeding 10 years.

That is, 10 years from the beginning of carrying the mail under the contract. Notice into what confusion we may fall. Under the law of 1928, a contract might extend 10 years. The contract is to be the result of negotiation. There are to be very few limitations. There is a provision that after the contractors serve 2 years, then their certificates may be extended for the remainder of the period, but not beyond 10 years from the beginning of the contract.

Let me repeat that statement, so that there may be no misunderstanding. The extension of a contract could not be made until the contractor had operated for 2 years under it. Then the maximum extension could not be more than 8 years, because it could not go beyond 10 years from the beginning of the contract.

The compensation was to be paid under the former law, for the subsequent law did not change the former law in that respect. What was that provision? The rate was not to be more than $3 a pound.

What is the situation? All the contractors who entered into contracts under the law of 1928 have, in their own right, if they meet the requirements of the law, the privilege of demanding extensions of their contracts so that the contracts shall run 10 years from the beginning.

There was such a hodge-podge, such a crazy-quilt method of figuring costs to the Government that it was universally disliked. For example, the cost of carrying the mail from Boston to New York was $3 a pound; from New York to Chicago, only 86 cents a pound, owing to the enormous amount of mail carried; from Chicago to the Pacific coast, $3 a pound; from the city of Cleveland to the city of Pittsburgh, only a short distance, $3 a pound; from New York to Miami, only 76 cents a pound. It was a crazy-quilt, a hodge-podge.

The Postmaster General, very desirous of building up aviation, saw the lack of logic in the arrangement of what we call the air map. He found one route from coast to coast made up of four links, one link owned by one company, another link owned by a second company, another link owned by a third company, another link owned by a fourth company, most of them controlled by local interests. California would be interested in the far-western link, New York in the eastern link, Denver in the middle link, Salt Lake City, likewise, in the middle link. What happened? Mail going over that disjointed route, with four companies operating, would cost the Government $8.81 a pound.

The Postmaster General said:

I will let no contract for a transcontinental route that is not under one management. I will make no contract where the companies are different so that mail must be transferred at four or five different points on the way. I want such a contract that, when the mail is loaded at New York for San Francisco, it will go through without being changed to another plane, if that is possible, and if it is changed to another plane, it must be changed under the management of the same company.

Where is the man outside of the insane asylum who would say that that was not good business and was not in the interest of the public welfare? Of course, those who did not want to merge would find fault with it, thinking they ought to have a separate contract, a contract broken up in the fashion just described. We can see why the Postmaster General would not do such a thing.

Mr. President, let it be kept in mind that under the law there was provided a contract period of 10 years maximum, and also that the contractors could, after serving 2 years, have that maximum secured to them, with the poundage basis of cost fixed upon us, and with an illogical method of carrying the mail fixed upon us. There was a desire to remedy the condition, but how could it be done?

Mr. Brown, soon after he took office, recognizing that under the law he would be called upon to make the extensions, because the contractors could demand them after 2 years of service, tried, as any other wise man would have done, to ascertain whether he could find a different yardstick with which to adjust payment for carrying the air mail. He did not like the idea of the differentiation by reason of which the charge was $3 a pound at one place, 86 cents a pound at another place, 76 cents a pound at another. So what did he do? Did he sit down at his table and ignore information

that could be gotten from the people who knew the problem because they were in the business? He did not. He called all the operators to meet him in the Post Office Department. He laid the problem before them. He pointed out the crazy-quilt structure. He said to them, "We are going to modify this thing. I will not continue to make contracts under this plan." He asked all the contractors operating under the law then in effect to go into a conference and work out a plan, which would be an adjustable one, and after they had worked it out to bring it to him.

All the contractors met with the Postmaster General. Let it be noted that this occurred in 1928. It was the first big problem the Postmaster General had before him. They studied for days and days as to how they could agree on a uniform rate. They reported that it was impossible for them to reach an agreement, because some of their routes were through mountainous sections, some of them were along coasts where there was much fog, almost continuously, and some of their routes were over a flat country where the carriage was not difficult.

Those who could carry mail more cheaply, and urged a cheaper rate, were opposed by those who could not carry it at a cheap rate because of the hazards of the routes their planes had to fly. The contractors returned to Mr. Brown and notified him that they could not reach an agreement as to a yardstick with which to measure costs.

The Postmaster General then asked them to appoint a subcommittee. This was in 1928. They did so, and authorized that subcommittee to make a study of a uniform yardstick of cost so that the Government might know whether it could make better contracts.

That subcommittee went to work. In 60 days the contractors were back with the Postmaster General to receive the subcommittee's report. The subcommittee was unable to reach any specific recommendation, and the second meeting of 1928 had to be abandoned on the ground that they could not agree among themselves as to a basis of cost.

Mr. President, the Postmaster General is now being indicted because he called together the only people who knew the cost of operation, in order to get information from them as to whether they could reduce rates or agree upon some common yardstick. They could not do so.

Then the Postmaster General for the third time said:

I want you to look into it further with the understanding that, if you do not reach some agreement among yourselves, I will have to take the matter over myself, and I will do it myself.

The third time they came back unable to agree.

Then the Postmaster General called into conference his interdepartmental committee to study the problem. That committee decided that they could not do what they wanted to do without a new law. They decided it would be necessary to have the law of 1928 modified, that there was authority needed which was not contained in the law. They went to work with a knowledge as to how they wanted to solve the problem, and they went to work to outline a law, and in due time laid that proposed law before the two branches of Congress. Mr. KELLY, of the House, who knows more about mail matters than any other man in either branch of the Congress, introduced the bill in the House. Mr. Watres was the chairman of the committee, and for that reason the bill bears his name.

The distinguished Senator from Oregon on this side of the House introduced the bill in the Senate. What was that bill for? It was to enable the Postmaster General, after having been in consultation for months, to have the authority under which to build a great air-mail service, which he could not build under the law as it then was.

What is that law? I will read it:

The Postmaster General is authorized to award contracts for the transportation of air mail by aircraft between such points as he may designate to the lowest responsible bidder at fixed rates per mile for definite weight spaces, 1 cubic foot of space being computed as the equivalent of 9 pounds of air mail, such rates not to exceed $1.25 per mile.

That is the change of the method of computing air-mail cost. Before that it was $3 a pound without reference to distance. Under the new law it is based upon space. It is computed on the basis of a fixed, definite weight space, "1 cubic foot of space being computed as the equivalent of 9 pounds of air mail", and the maximum price cannot be above $1.25 per mile. That law mentions, it will be noted, competitive bidding:

Provided, That where the air mail moving between the designated points does not exceed 25 cubic feet, or 225 pounds, per trip, the Postmaster General may award to the lowest responsible bidder, who has owned and operated an air transportation service on a fixed daily schedule over a distance of not less than 250 miles and for a period of not less than 6 months prior to the advertisement for bids, a contract.

Mr. President, that provision is to permit an enlargement. It says if it does not exceed 25 cubic feet or 225 pounds per trip, then the Postmaster General can receive new bids, but the qualification of the bidder is that he must have a route not less than 250 miles on a daily schedule of not less than 6 months already in operation, with this provision as to rates:

A contract at a rate not to exceed 40 cents per mile for a weight space of 25 cubic feet, or 225 pounds.

And whenever the space is not filled up by the air mail, the Postmaster General is authorized to require them to accept any mail of the first class to fill it up.

That is a provision of the first section of the famous Watres Act, which was the result of the consultations of the interdepartmental committee.

The Postmaster General had in mind that in the case of transcontinental routes there should be competitive bidding. And let it not be forgotten that every one of the transcontinental routes was let after competitive bidding. So the contracts were made specifically in accordance with that section of the law.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER (Mr. BACHMAN in the chair). Does the Senator from Ohio yield to the Senator from Tennessee?

Mr. FESS. I yield.

Mr. McKELLAR. I am quite sure the Senator does not want to make that statement.

Mr. FESS. I do not wish to make any misstatement.

Mr. McKELLAR. I think the Senator is in error about one statement. In the case of one transcontinental line which, according to my recollection, ran originally from New York to Cleveland, or perhaps from Boston to Cleveland, and then was continued through Louisville, Ky., and afterwards through Nashville and Memphis and Little Rock and Dallas and on through to Los Angeles, if I remember correctly, the only actual route that was established was the one from New York or Boston to Cleveland, and the remainder of the route was arranged by extensions.

Mr. FESS. Mr. President, the Senator says "by extensions"?

Mr. McKELLAR. Yes; in other words, the contractor who had the beginning of the route from Boston or New York to Cleveland just had the Postmaster General extend it from time to time.

Mr. FESS. I might as well settle that question right here.

Route no. 17, New York to Chicago, was awarded to the National Air Transport by competitive bidding April 2, 1927—

That was under the old law—

by way of Cleveland to Chicago and return.

This route was granted a route certificate October 22, 1930.

That was under the present law, which I had intended to read later on, but I will read it now so that there may be no confusion in the minds of those who are listening to me.

Mr. FLETCHER. Mr. President, may I interrupt the Senator to make an inquiry?

Mr. FESS. Yes.

Mr. FLETCHER. I understood the Senator was reading from what was known as the Kelly Act or the Watres Act. Is that the latest law on the subject?

Mr. FESS. Yes; that is, the Watres law is the last act passed by Congress on the subject.

Mr. President, I think that there may be some confusion over the route certificate under which this company operated. Let me read the provision of the law.

That the Postmaster General may by negotiation with an air-mail contractor who has satisfactorily operated under the authority of this act for a period of 2 years or more, arrange, with the consent of the surety for the contractor and the continuation of the obligation of the surety during the existence or the life of the certificate provided for hereinafter, for the surrender of the contract and the substitution therefor of an air-mail route certificate, which shall be issued by the Postmaster General in the name of such air-mail contractor.

That is the law. Under that law route no. 17, which had been contracted under competitive bidding in 1928, was granted a route certificate October 22, 1930, after the passage of the Watres Act. That route certificate would end April 5, 1936. This route company was taken over by the Boeing Air Transport Co., a division of the United Aircraft & Transport Corporation by purchase during the year 1931. So, route no. 17 was let by competitive bidding.

Route no. 18, Chicago to San Francisco, was awarded to the Boeing Airplane Co. and Edward Hubbard by competitive bidding on January 29, 1927, by way of Iowa City, Des Moines, Omaha, North Platte, Cheyenne, Salt Lake City, Reno, Sacramento to San Francisco, and return. This route no. 18 was let by competitive bidding.

Route no. 19, New York to Atlanta, was awarded to Pitcairn Aviation Co. by competitive bidding March 18, 1927, via Philadelphia, Washington, Richmond, Greensboro, N.C., Atlanta, and return. The name of Pitcairn Aviation was changed to Eastern Air Transport Co. January 18, 1930, after the enactment of the Watres Act.

Route no. 25, Atlanta to Miami, was awarded to the Pitcairn Aviation Co. by competitive bidding by way of Jacksonville, Miami, and return. The name of Pitcairn Aviation Co. was changed to Eastern Air Transport January 18, 1930. A route certificate was granted Eastern Air Transport November 7, 1930, expiring April 5, 1936.

That was in direct compliance with the law of 1928.

All these routes, Mr. President, were authorized before Mr. Brown took charge of the office of Postmaster General.

Route no. 33—this was under Mr. Brown—Atlanta to Los Angeles, was awarded to Robertson Aircraft Co. and Southwest Air Fast Express by competitive bidding October 1, 1930, which was after the Watres Act was passed, this act having been passed in April 1930. This route goes by way of Birmingham, Dallas, Fort Worth, El Paso, and touches points in New Mexico and Arizona. It is designated "American Airways", which became the subcontractor for the route on June 30, 1931.

No. 34, New York to Los Angeles, Calif., was awarded to Western Air Express & Transcontinental Air Transport by competitive bidding October 1, 1930. This route goes by Philadephia, Pittsburgh, Columbus, Indianapolis, St. Louis, Kansas City, Amarillo, Tulsa, Albuquerque, Los Angeles, and return. This route was granted a certificate February 1, 1933, which expires April 5, 1936.

These are the records, and they cannot be disputed verbally merely from memory.

Now, let us see where the authority is to grant a contract without competitive bidding.

Section 6 of the Watres Act provides:

The Postmaster General may, if in his judgment the public interest will be promoted thereby, upon the surrender of any air-mail contract, issue in substitution therefor a route certificate for a period not exceeding 10 years from the date service started under such contract to any contractor or subcontractor who has satisfactorily operated an air-mail route for a period of not less than 2 years, which certificate shall provide that the holder thereof shall have the right, so long as he complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to the advances in the art of flying and passenger transportation, to carry air mail over the route set out in the certificate or any modification thereof at rates of compensation to be fixed from time to time, at least annually, by the Postmaster General, and he shall publish in his annual report his reasons for the continuance or the modification of any rates.

Mr. President, language cannot be made clearer than that. It is specific that the Postmaster General may issue a route certificate to any contractor who is willing to surrender his contract, and that route certificate may remain in effect for a period not exceeding 10 years. That provision of the law does not require competitive bidding; there is no element of competitive bidding about it.

Mr. President, the question is being asked, Why should we not require in all cases competitive bidding? Of course, when the present administration undertakes to act, it will not require competitive bidding. It will see the hopelessness and the foolishness of any such requirement.

I have been amazed at what has been said on the floor of the Senate, and in the committee conducting the investigation, with reference to the question of competitive bidding, as if to avoid such bidding is a corrupt act. Why do we not require competitive bidding in the carrying of the mail by the railroads between New York and Chicago, the two greatest mail centers on the globe? We find the New York Central Line crossing almost the same territory as that covered by the Baltimore & Ohio, crossing almost the same territory as does the Pennsylvania Railroad; and, with only a slight modification, crossing the same territory as does the Nickel Plate route or what is now called the "Van Sweringen system", including the Chesapeake & Ohio.

Who ever thought of suggesting that the Government should ask for bids from transcontinental railroads for carrying the United States mails? The Government fixes the price, whether it be by the pound or by space, and that is the contract rate paid the various railroads to carry the mail. The Senator from Tennessee [Mr. McKELLAR] and I served together in the House and were on the same side of the issue in one of the most terrific fights ever had in the House when we changed the method of dealing with the railroads in the carrying of the mail. We saw that the Government was losing too much money by paying for full space when only part of the space was used. The question of competitive bidding was not involved. It was a question of what the Government could pay and the service the railroads could furnish upon that basis. We fixed the basis by law, and that is the basis today. Yet when we talk about making contracts to carry the mail through the air, a hullabaloo is raised if it is not done by competitive bidding. It is perfectly asinine to suggest such a thing.

On the other hand, in many instances the Government does not resort to competitive bidding. Away back in 1908 there was a law enacted by Congress doing away with competitive bidding in the Ordnance Department, and we have never had competitive bidding there from that day to this. The Aircraft Board recommended that competitive bidding be abolished in the aircraft business. There are plenty of precedents. Competitive bidding is not employed in the Army, nor is it employed in the Navy, for reasons that must be obvious to everyone.

Mr. President, when we want to make use of the skill of research men, when we want to make use of the rare knowledge of the expert inventor, we do not seek for it on the basis of competitive bids in competition with men who merely want to sell stock or to make money out of the business. The Government does not do business in that way. It does not do it that way in the air-mail business, as it should not have done it.

The law provides that where there are transcontinental lines and it is desired to have the mail transported by one of the lines, competitive bids may be asked for if that seems to be wise, but the Government kept the matter open so that the system of competitive bidding did not necessarily fasten upon the carrying of the air mail.

We have, first, the section providing for competitive bidding. Under that section air-mail routes have been established. Secondly, we have the provision for a surrender of a contract and obtaining a route certificate to take the place of the contract. That is not competitive bidding.

I come now to section 7 of the Watres Act. This is the provision that my friend from Tennessee has been assailing. Let me read section 7:

The Postmaster General, when in his judgment the public interest will be promoted thereby, may make any extension or consolidation of routes which are now or may hereafter be established.

That language is as broad as language can be. There is no limit to it except when, in the judgment of the Postmaster General, it is in the public interest. Whether it is in the public interest is not a matter of my judgment, it is not a matter of the judgment of the Senator from Tennessee; but, as the law provides, it is a matter in the judgment of the Postmaster General. If he exercises the authority in a way that I may think is not in the interest of the public, he exercises it because the power is given to him in as plain language as can be written.

Let me read the language again. I have heard in the committee and I have heard from the lips of the senior Senator from Tennessee [Mr. McKELLAR] that the Postmaster General granted extension. Suppose he did? The law authorizes him to do so, and that is what was needed to be done to build up the air-mail map. Let me read the provision again:

The Postmaster General, when in his judgment the public interest will be promoted thereby, may make any extension or consolidation of routes which are now or may hereafter be established.

It is not confined to routes which now exist. It extends to any that may hereafter exist. There is no limitation on that authority. It is true that my good friend from Tennessee has been assailing it, but he was in favor of the extension provision when the bill was before us for consideration. Why he should now, although an advocate of it at that time, assail the Postmaster General for doing the very thing that he then wanted him to do, is a difficult thing for me to understand.

Mr. President, after the Postmaster General had appeared before the committee that was considering the new bill, and had stated categorically what he wanted done, the bill was reported.

The Postmaster General had considerable controversy with some members of the committee in reference to the competitive feature. Mr. KELLY said:

Of course, General, the yardstick idea was never contemplated under the previous system.

That refers to the complaint of the Postmaster General that one part of the bill fixed a rate of $3 a pound and another 86 cents, and so forth.

The yardstick—

Said Mr. Kelly—

was a matter for each individual route, based on competitive bidding, and naturally it was determined by the bidders, just the same as star routes, mail-messenger contracts, and other things of that kind.

Note what Mr. Brown said to the committee in answer to Mr. KELLY's suggestion:

Postmaster General BROWN. Well, competitive bidding in the air-mail business is of doubtful value and is more or less of a myth. In the case of most of the contracts there has been only one bidder, and in other cases I think if we were to throw the whole matter open today to competitive bidding, we would have very few competitive bids. That is to say, we would have very few people come in and bid who knew anything about the business. We would have promoters come in and bid against air-mail operators; we would have people come in who had stock to sell and who hoped to get their stock sold before their losses were so great in carrying on the business that they could not sell the stock.

Before this committee the Postmaster General made it clear why the air-mail map could not be built up under bids limited to competitive bidders; that we would have to have, supplemental to competitive bidding, the power of negotiation and the power of extension.

When this bill was reported to the House Mr. KELLY had this to say (p. 7373, CONGRESSIONAL RECORD, Apr. 21, 1930):

Mr. Speaker—

I digress to say that there is no man in either branch of Congress who is a more persistent, consistent opponent of anything like monopolistic movements than Mr. KELLY. I have known him ever since he entered the House of Representatives, he and I having entered that body together in 1913.

Mr. Speaker, this measure as it now stands is an amendment of the present air-mail law and is a sound and logical step in the progress of air-mail and commercial aviation.

It will do four things. First, it changes the system of payment to air-mail contractors from a poundage to a mileage basis, with proper consideration for the space and weight factors. * * *

Second. It puts air mail and first-class mail on qualified passenger lines. * * *

Third—

Now, note:

Third. It permits the extension and consolidation of routes, so that some present illogical features of the air-mail map may be remedied.

Mr. President, the things for which Mr. Brown is assailed here, and as to which he is charged with fraud, are the things that were not only in the law but were specified in the law by the Member of the House who, above all others, never would yield to anything looking toward monopolistic tendencies through omitting the competitive-bidding feature.

The bill passed the House without opposition. It passed it under suspension of the rules. It was passed by the unanimous vote of that body, with all of the things in it the exercise of which has subjected a great public servant to the infamous charge that he was in collusive and fraudulent transactions.

The bill was presented in this body on April 24, 1930, by the then Senator from Colorado, Mr. Phipps, chairman of the Committee on Post Offices and Post Roads. The ranking member of the Post Office Committee at that time was the Senator from Tennessee, Mr. McKELLAR, the colleague of the present Presiding Officer of this body [Mr. BACHMAN in the chair]. The bill came up by unanimous consent. The Senator from Tennessee could easily have prevented it; but what did he say?

When the bill was presented by the then Senator from Colorado, Mr. Phipps, he asked unanimous consent for its immediate consideration. I read from page 7618 of the CONGRESSIONAL RECORD of April 24, 1930:

The VICE PRESIDENT. Is there objection to the consideration of the bill?

Mr. McKELLAR. Mr. President, I have no objection to its consideration; I want to have the bill passed.

If the Senator had stopped there, I could have believed that probably his objection was not understood then; but he gave as the reason why he desired to have the bill passed the thing he is now assailing. Let me read what the Senator said:

I merely wish to say that it was stated by the Postmaster General and his assistant in charge of the Air Mail Service that new lines are to be constructed, among others one from Nashville, Tenn., to Memphis and Little Rock and Dallas. I hope the bill may be passed.

So said the Senator from Tennessee [Mr. McKELLAR], when this bill was up, containing all the consolidation features and all the powers of extension.

I mention this to indicate that the things of which complaint is now made on the ground that there was no authority were not only in the bill but they were endorsed by the Senator from Tennessee.

Now, I read from the statement of the Postmaster General. I stated the other day that the President was misled. I repeat that statement. There is no man in this body or elsewhere who can induce me to believe that if the President had all the facts before him he would have permitted the deed to be done and the wrong to be committed. He was wrongly advised.

While I cannot exculpate the Postmaster General, because he must be held responsible for what he has done, I do indict an ignorant counselor at law who evidently did not know what the law was. This is what that counselor put in the mouth of the Postmaster General:

At the time of the passage of the Watres Act in 1930 there were many reasonably well-established air transport passenger lines desirous of obtaining air-mail contracts which received no consideration whatever. There were several short, disconnected air-mail lines which were operating under contracts executed during the latter part of 1925 and the early part of 1926.

That is true. Under the old law some of the contracts were ending under limitation of law. They were ending in 1929. Here is the language:

Five of these contracts—

That were issued under the law of 1925 or 1926—

were executed November 7, 1925, and would have expired by operation of law November 7, 1929—

Because the limit of the contract then was 4 years—

except for an order issued on November 6, 1929, by Second Assistant Postmaster W. Irving Glover extending these contracts for a period of 6 months, so as to make them terminate May 7, 1930. I am satisfied that the extension of these contracts for said period of 6 months was illegal.

Mr. President, that is the first statement of the Postmaster General. Now, let us look into the situation. Here is a law which is inadequate to enable the Postmaster General to build an air map. In order that a logical air map may be built, a new law is proposed, with the promise that it would be speedily passed in both Houses of Congress. But before that law could be enacted five contracts would end. As I have said, under the law of 1928 any contract which had run for 2 years could be extended for a period not to exceed 10 years. So the contracts now expiring, if extended under the old law, would be extended for the period permitted by the law and would provide for carriage of the mail under the poundage system, from which the officials were trying to get away.

With the assurance that a new law was in process of enactment and the system of fixing costs was being changed, and that provision was being written into the new law so that the Postmaster General would be required to revise the contracts upon examination, at least annually, would it have been ordinary common sense to have extended the contracts then expiring for any period under the old law? Certainly it would not have been.

Not only that, but many of the contracts, most of them except five, would have extended beyond the period required to enact a new law, and if we had had to wait for these contracts to expire, then we would have had a continuation of the hodge-podge.

There are two things in the law.

One is that a contractor can surrender a contract for a route certificate, and then, upon the route certificate, a contract can be made. If it were possible to hold contracts in abeyance, and not renew them until the new law could be enacted, when the new law had been enacted all the contracts could be made at one time at a uniform rate and under uniform conditions.

Mr. President, that is the situation which faced the Postmaster General. Why did he extend these contracts? Five of them expired under the old law. The Postmaster General made this statement:

Five of these contracts were executed November 7, 1925, and would have expired by operation of law November 7, 1929, except for an order issued on November 6, 1929.

Mr. President, the hearings upon the law about which I am speaking, which the Postmaster General was making an effort to have enacted so that he could build a logical air-mail map, were held in February 1930. During the November before that five contracts had expired. What was he to do? Was he to let those men go out of business? If not, should he renew the contracts? If so, under what law? The only law was the old law, which there was a desire to get rid of. That was unfortunate. What could he do?

Mr. President, I read from the United States Statutes this language:

In all cases of regular contracts the contract may, in the discretion of the Postmaster General, be continued in force beyond its express term for a period not exceeding 6 months.

That statute was passed in 1872. That is the law now and has been the law since 1872.

I read from the rules and regulations of the Post Office Department and, mark you, there is provision in the law giving the power to the Postmaster General to make the rules and regulations necessary to put into force the requirements of the law. Section 18 (a), Postal Laws and Regulations, provides:

Except as otherwise provided by law, no contract for carrying the mail shall be made for a longer term than 4 years.

That is still the law and was enacted years ago.

2. In all cases of regular contracts the contract may, in the discretion of the Postmaster General, be continued in force beyond its express term for a period not exceeding 6 months, until a new contract with the same or other contractors shall be made by the Postmaster General.

Mr. President, let me read the statement of this counselor upon whose advice the Postmaster General acted:

Five of these contracts were executed November 7, 1925, and would have expired by operation of law November 7, 1929, except for an order issued on November 6, 1929, * * * extending these contracts for a period of 6 months, so as to make them terminate May 7, 1930.

That is precisely what the law authorized the Postmaster General to do, and he did it, because the new law changing the poundage basis of the old law for the mileage basis, and giving the power to the Postmaster General annually to reduce the cost, was not yet in force, but the Postmaster General had every assurance that it would be in force, so in November he issued the extension, under this authority, not to run beyond 6 months, so that it would end in 1930. The new law was passed in April 1930 giving the Postmaster General an opportunity, instead of renewing these five contracts for a period not exceeding 10 years, on the old basis, to extend them on the old basis for 6 months, and then afterward make the new contracts under the new law. Yet he is charged with fraud because he did that thing.

This man says, "That, in my judgment, is illegal." If I were the President, I would kick that man out of office before 24 hours had passed.

Mr. LEWIS. Mr. President, will the Senator be kind enough to inform me who this man is? I am interested in the Senator's speech. To whom did the Senator allude when he said "this man"?

Mr. FESS. Let me say to the Senator that I do not care to use names.

Mr. LEWIS. I beg pardon. I thought the Senator was reading from a record.

Mr. FESS. Oh, no. I will tell the Senator in confidence.

Mr. LEWIS. I apologize. I misunderstood the Senator.

Mr. FESS. I do not care to use names.

Let me refer now to another point upon which the Postmaster General relied. The Postmaster General, when he was before the committee, was as frank in the statement of the facts as any one could have been. He stated that of course he could not carry the details of these laws in his mind.

He stated almost like a parrot, because he repeated it over and over, that he took the testimony and the documents and the council of his advisers or the advice of his counselors, whichever way he put it, and upon that he acted.

Here is another of the Postmaster General's statements:

I am convinced that before any of the air-mail contracts were awarded those interested held meetings for the purpose of dividing territory and contracts among themselves. Indeed, certain air-transport operators who had not been invited to attend were refused admission when they attempted to gain entrance. These conferences were held during May and June of 1930. Some of the meetings were held in the Post Office Department and were attended by Postmaster General Brown and Second Assistant W. Irving Glover. Mr. William P. MacCracken, Jr., of the Transcontinental Air Transport (now a part of the North American Aviation Corporation), was named as chairman of these meetings and the minutes prepared by himself list the following as present:

Then he gives the names of the companies. He says further:

These meetings resulted in a division of all air-mail contracts of the United States and the practical elimination of competitive bidding. A written report embodying the recommendations and an agreement for a division of territory was filed with Postmaster General Brown June 4, 1930.

This he pronounces as collusion and fraud.

Mr. President, the meeting that was held on May 19, 1930, was a meeting about which there is no dispute. The pur-

pose of the meeting was perfectly clear. I took time in the early part of my remarks to indicate how Postmaster General Brown had in 1928 called the operators together. He had three meetings with them. Their purpose was to find a common yardstick upon which they could change an erroneous method of mail pay by the Government to a more logical method. Those meetings were called in the open. They were in the interest of the public. There was nothing secret about them. They were justified from every standpoint. The meetings were held in order to find whether, under the present law, an air-mail map could be built. The conclusion was arrived at that it could not be done, and the decision was reached that new legislation would be required.

So the new legislation was presented. It was unanimously adopted in the two Houses. With the new legislation, the very first thing that Mr. Brown did was to call the same operators into a meeting in order to put the law into effect, having respect for the rights and equities of the men who already had the contracts. Had he not done so he would not have been wise. Could the Postmaster General in disregard of the rights of the contractors or in ignorance of the equities, go ahead and demand something without any information from those who could give him the information?

Where is the man free of political prejudice who would find fault with the Postmaster General for talking with the operators before the law was passed? Where is the fair-minded man free of political prejudice who would find fault with the same Postmaster General calling the same contractors into a conference after the law was passed? Mr. President, it is a pitiful charge.

Why did the Postmaster General call the operators in conference? There were 25 companies, some of them operating long routes, some of them short routes, some of them operating prosperous routes, some of them operating routes which never should have been built; some of them operating in thickly settled sections of the country and some of them in sparsely settled sections; most of them, with a few exceptions, operating in the "red." Some of them were operating with mail contracts and no passenger service. Some of them were operating with passenger service who wanted mail contracts. Some of them would inevitably be denied mail contracts. Before the Postmaster General could deny them contracts it would be necessary for him to hear what they had to say as to their rights and their equities as the pioneers in the aviation field.

Mr. President, every city in the country grew anxious to have an airport. The beautiful city of Springfield, Ohio, 9 miles from my home, wanted an airport. It could not be directly on the line between Columbus and Chicago if the line were to go over Dayton. It could not be on the line between Columbus and Chicago unless the direction of that line were changed. Dayton had more recognition in the air business than any city of the world. Dayton is home of the Wrights. Four miles from where I live is the old hangar in which the first plane that ever flew was builded. It stands there as a relic in a museum. I hope the time will come when the pride of the Smithsonian Institution will be sufficiently brushed aside so this first plane that was flown down at Kitty Hawk by the Wright brothers in 1903, may be brought back from England and allowed to rest permanently in Washington. That, Mr. President, is the only common sense thing to do, and I hope it will be done.

Dayton was a center of aviation. Not only did we have the first great field named in honor of Wilbur Wright, the name it still bears, but we have the McCook Field. McCook Field is the center for research in aviation in the United States. The McCook Field was located somewhere within the limits of the outskirts of Dayton, and the field was not large enough to do the work that ought to be done. Consequently the public-spirited people of Dayton, led by a great citizen, donated to the Government of the United States 5,000 acres of ground on the edge of the city, to which to remove McCook Field. There today is a magnificent plant. All the area surrounding my section of the country is air-minded because of the great doings in that center stimulated by the Wright brothers.

Springfield is only a little distance away—24 miles away. It wanted an airport, and went to the expense of building one. It was on the line from Cleveland to Louisville. I did what I could to have it furnished air-mail service. It was not a paying center, and I had to undergo the very bitter criticism of the public-spirited people of Springfield because I could not induce the Postmaster General to continue that as one of the airports. I did not turn about and charge the Postmaster General with fraud or favoritism because he saw fit not to continue the extensions, which action was based largely on the fact that the field did not quite fit the dimensions under the Commerce Department's regulations.

All over the United States airports were built. Airports sprang up virtually overnight. The whole country became air-minded. Cities would get behind a group of aviators, and would have juvenile flyers, and student flyers, and amateur flyers, and it was a problem to know how under these conditions to build a logical air map to serve the country, not only in the matter of mail but in passenger service as well. So under the law the Postmaster General said, "I want every air-mail contractor to equip his planes for passenger service. I have two reasons for that. One is I want aviation to be a success as an industry, and it never will be so if it shall be limited to carrying the mail." Contractors did not want to do it, because carrying passengers is hazardous; it is dangerous; it requires additional equipment. Those lines which were carrying passengers as a venture and did not have any air-mail contracts insisted that they had a right to carry mail, since they were then carrying passengers. The Postmaster General, with the problem of building an aviation industry, had in the background, first, the question, "How can I induce the air-mail contractors to install suitable planes for passenger service, and, second, how can I require passenger routes if they carry mail to carry it upon our terms?" With that object in view, the Postmaster General was willing to recommend that the Government should, in a sense, give some aid to routes that would carry passengers.

Some persons do not like that; they talk about that being a subsidy. My dear, good friend from Tennessee [Mr. McKellar], I think, is going to throw a fit when he reads what it is reported the present Secretary of Commerce is going to recommend should be done in reference to American ships. He is, I understand, going to recommend a direct subsidy. I have no doubt he is correct in his conclusion, but it is the subsidy item that becomes so vicious in the mind of the Senator from Tennessee.

It is true that in the beginning of an industry of this kind it is necessary to accord some favor, and the Government has done that by paying rather a high cost for the carriage of the air mail; but the law under which the Post Office Department is operating requires the Postmaster General to revise, examine, and review the rates once a year. During one year Postmaster General Brown reviewed them twice, with the result that the cost of the air mail has been reduced from $1.09 to 42 cents a mile. The Postmaster General, from the beginning, held that there was no possibility of building an air service to be self-supporting except in the way he inaugurated it. Consequently he proceeded to build the air map.

Mr. President, not every route connecting two cities would justify the expenditure of Government funds for carrying air mail; the volume of mail would not be sufficient. Under the stimulus of the aviation spirit many lines were installed that could not continue to exist and had to be discontinued. All of them wanted mail contracts to help them. The Postmaster General could not give such contracts to them all.

With the problem before him, he proceeded to work it out. I have asked for an air map on which would be shown the various routes—a line, for instance, from San Francisco to New York, portrayed in such a way as to indicate the base line and the extensions made from time to time, so that Senators, in glancing at the map, might see what the route

is, what its original base was, what company owns it, when the extensions were made, when the contract was entered into, and the cost of carrying the mail on the route. Unfortunately the map has not yet reached me.

It is charged that in connection with the extensions that the Postmaster General would favor one company as against another company. I will discuss that charge, but before doing so, I feel I must refer to the meeting which has been denominated collusion. There are many companies, 25 at least, competent and qualified under the law. The law specifies what the qualifications shall be. A company must have pursued a schedule daily for a certain length of time; the route must be no shorter than a certain number of miles, and so forth. Any company which owned a route and which could qualify under the law was admitted to that meeting; in fact, was invited to attend. However, there were organizations which had not even incorporated, but which were ambitious to gather money, buy up a route, and then get a mail contract. The representative of such an organization came to me and wanted me to intercede with the Postmaster General for them. They did not even have a company incorporated, let alone any financial responsibility. Of course the representative of that kind of an organization would not be admitted to the meeting which was held, because those whom he represented were not qualified under the law. So, because Mr. Brown limited the invitations to the companies that could qualify under the law it is charged that there was a closed meeting, an illegal meeting. Such an allegation is perfectly ridiculous.

At that meeting Mr. Brown talked with the representatives of these companies, laid the law before them, and told them what was required. What troubled him, when he came to entering into the mail contracts with the different companies, was to decide which of those who were qualified would have to be denied a contract and which would be given a contract.

Some of them were pioneers. They demanded their rights as pioneers. They had builded routes; they had undergone the expense; they had taken all the risk, and they contended that as pioneers they had equities and they wanted to be considered in the letting of the contracts.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Louisiana?

Mr. FESS. I yield.

Mr. LONG. I am sure the Senator speaks without complete knowledge on that subject, because down in my section of the country a pioneer concern, the Weddell-Williams Co., had developed one of the fastest planes in the United States, and yet they were most grossly discriminated against in the awarding of the contracts. The correspondence shows that they were expecting some kind of litigation to be filed in connection with which they did not feel they had a standing in court.

I am not undertaking to defend anything that happened on either side in this matter, and yet I could not let the Senator's statement pass without calling attention to the fact that not only under the past administration but also under the present one, so far as that is concerned, there was the rankest kind of discrimination against the leading pioneer in this field of late years—the Weddell-Williams Co. Neither one of these administrations considered them at all, but practically left the concern that has done more than any others down there to whatever they might chance to get rather than to have the help of the Government.

Mr. FESS. Mr. President, I think the Senator from Louisiana misunderstood what I said. I did not say that persons who had pioneer rights got them. I was discussing the fact that Mr. Brown called them into conference to hear them discuss their rights as pioneers; I did not say anything at all to the effect that those who had a pioneer right got it, because I do not know anything about that.

Mr. LONG. I think the Senator is right and that the pioneer should have been considered. That is why I am now placing our claims of record here. I say "our claims" because these gentlemen are in our State. In the awarding of the contracts the rankest kind of discrimination has been resorted to against the people of my section of the country who have done as much in modern ways for airplane development as anybody in the business. If this matter terminates now in an effort to leave out those interests, we intend to have a great deal more to bring before the Senate in relation to the subject.

I hope, however, that whatever legislation we may enact will not leave unlimited authority in the hands of the Postmaster General. I do not know what the previous Postmaster General did, but I would hate to trust the one we have in there now if this matter is ever left to him.

Mr. FESS. Mr. President, I want the Senator from Louisiana to understand that what I meant to say is that the Postmaster General called the conference in order that he could hear the claims of the pioneers who wanted their rights and equities preserved. One of the purposes of calling the meeting was that it was obvious that not every one who wanted an airplane contract could get it. There might be competing lines wanting the same thing. One of them would in all probability get it as against the others. The Postmaster General wanted to hear the claims with reference to the pioneer rights.

I wish to invite the attention of the Senator from Louisiana to the provision that Mr. Brown wanted incorporated in the law. By the very provision which he asked to have written in the law, he indicated his desire to have pioneer rights respected. That was in the original bill, but the House struck it out.

Mr. LONG. I have not read the new bill that is now pending. Is it proposed to leave this matter as it was under Postmaster General Brown? Are we to remain under this system that we claim resulted in irregularities and leave the settlement of these questions to this gentleman who got the $20 hat and free grub?

Mr. FESS. I think we must have confidence in the good sense of the Postmaster General.

Mr. LONG. In the good sense of which one—the one we have there now or the last one?

Mr. FESS. Any of them.

Mr. LONG. I think the one who was there before is no worse than the one who is there now, but any man who will accept a free trip and a free hat and free gasoline and a free ride from an outfit that is not even on an air-mail route ought not to be permitted to have anything to do with this matter. We ought to get Jesse James back here and have him write a code for the burglars of the country if we are going to have that kind of business done. If that is what the Senator is seeking, after all this talk, he is evidently going to leave us to the tender mercies of a man who could be taken out for $20, and evidently the Senator is not trying to give us much relief. I had hoped that the Senator would come to the point of submitting some logical means and methods for correcting the situation. We know what we are in for with the man who is there now.

Mr. FESS. I can only repeat what I said. We must lodge the necessary authority somewhere to build from the ground up, as was the case in this particular industry. It is a more or less arbitrary power, but the Postmaster General is better equipped to exercise it than we are, because with 96 men in the Senate and 435 men in the House there is no possibility of unity of decision. We have to lodge the power somewhere.

Mr. LONG. Let me ask one more question: If that is true, then about the best thing I could tell my people to do would be to send Mr. Farley a new hat and an airplane for a free trip so they might be on an equal basis with the crowd that has been riding him around down there. I merely wanted to get the Senator's viewpoint, which apparently is that I should advise the people of Louisiana, who have done so much for aeronautics, that, in order for them to be on an equal basis, they had better send the Postmaster General a hat and give him some free grub and a free trip. In order that they may start out on an even basis, that would seem to be all that is left to us. I just want to find out where we stand, because if we are not now on an equal basis in

this business, then we want to know it and we will try to meet the conditions. We will give him a hat. I will give it to him this evening if the Senator knows his size—I mean the size of his head for a hat and not the size inside of his head, because that is a dimension which I would not ask even the Senator from Ohio to give. [Laughter.]

Mr. FESS. Mr. President, in the Watres bill, as it was submitted by the Postmaster General, this language was included:

> In awarding air-mail contracts the Postmaster General will give proper consideration to the equities of air-mail and other aircraft operators with respect to the routes which they have been operating and the territories which they have been serving.

It was the purpose of the Postmaster General to respect those rights, and he could not know what those rights were unless he had the people before him to get their position as they knew it. That is why the meeting was called. Yet it is said that that was collusion and that fraud was involved. There was no collusion.

In the first place the superintendent of mails was the secretary of the meeting. He kept the minutes and submitted a memorandum. That memorandum sets out the matters that were discussed. There is nothing in it that even mentions discretion or raises the question of discretion. The Postmaster General was dealing with a group of people whose claims were varied, different ones holding different rights that were in confusion, and the Postmaster General, having to come to a decision that would be for or against those men, wanted them not one at a time but wanted them all there together so the various rights could be discussed in the presence of one another.

When they got together on May 19 they considered the problem and came to the conclusion that they could not agree upon what were the individual rights of the several contestants. Therefore, they appointed a subcommittee. The subcommittee was to report to another meeting of the contractors to be called in the future. That meeting was held on June 4, only 2 weeks after the first meeting. The subcommittee submitted its report. There were five plans suggested. It was thought perhaps one of those plans could be adopted. The report was submitted to the Postmaster General. The Postmaster General made the remark, "You have taken all the meat and left only the bones", and added, "Your report is inadequate; it is inequitable", and he refused it and stated that he would be compelled to proceed without their advice.

How could there be collusion when what they agreed upon was rejected and the Postmaster General did not accept it? Instead of their being in agreement, there was hostility, as every fair-minded man will see if he will study the testimony which was given by the witnesses who were called here, adverse witnesses speaking against those who were qualified to make the contracts, charging on the one hand that there was collusion and yet admitting that the plan submitted was rejected by Mr. Brown.

Mr. President, another complaint upon which the mail contracts were canceled is that the right of extension was abused. It is said that that was abused by taking a short line and adding to it a long line. Often I heard in the committee's testimony that it was a case of the tail wagging the dog; that the short line became the base, and the long line, which ought to have been considered the base, was made the tail.

Let us see how that worked.

Here is a line from New York to Chicago, a thousand miles in length, an ideal route for mail. An air-mail route is not of any value if the mail leaving one city at the close of the business day cannot be read in the other city in the morning before business hours. That mail can be carried by train just as well as by air. There is no advantage in an air-mail route in such a case. But the fastest rail line that goes from New York to Chicago will not be able to do that. When a man in Chicago wishes to do business in New York, or vice versa, it means a trip of two nights and a day if he travels by rail. Traveling by air, however, he can take his breakfast at home in Chicago, fly to New York, take his lunch there, have 2 or 3 hours for transacting business, and return and eat his dinner in Chicago.

That is an ideal route. That is a prosperous route—prosperous in mail because New York and Chicago are the two largest cities of America. It goes through an area that has 50 percent of the entire population of the United States. It is a great route in expressage. It would be a great route in passengers. A route established between those two cities would be prosperous, and would have abundant capital back of it. There would be no danger of that route failing.

Here is another route from Chicago to Salt Lake City. That is double the length of the other, if not still longer. That route is not prosperous. It is in the red. It carries few passengers, not much mail, little expressage. That route ought to be a part of the transcontinental route. Would any sane man say that the base of that route is the one that is longer, and the extension should be the shorter route; or would the base be the prosperous route, and the extension the less prosperous one, although it is double the length of the other?

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Maryland?

Mr. FESS. I do.

Mr. TYDINGS. I take it that what the Senator is saying is that some of these routes carry so many passengers that they are self-sustaining from the revenue derived from carrying those passengers.

Mr. FESS. Yes.

Mr. TYDINGS. I wonder, therefore, if it would be necessary to have an air-mail subsidy on those particular routes.

Mr. FESS. It certainly would not be necessary later on. A route of that kind certainly would get to the point where it would be self-supporting.

Mr. TYDINGS. Has the Senator any figures showing how many of the air lines would be abandoned if the Government were permanently to withdraw any air-mail subsidy?

Mr. FESS. No; but I understand there are quite a number. I have not the figures.

Mr. TYDINGS. Let me point out to the Senator that, as I understand, there are six States in the Union where now there is no air-mail service at all; and, so far as I am able to observe, they seem to be a part of the Union, and are no worse off than the States that have the air-mail lines.

Mr. FESS. I agree with the Senator.

Mr. TYDINGS. I am just wondering, therefore, whether the airplane companies, like any other business, should not run on their own. Why should the Government support them in whole or in part?

Mr. FESS. If the Senator will recall, the Aircraft Board recommended that for a time the Government should give assistance until such time as the industry becomes sufficiently self-supporting to enable the Government to withdraw entirely; and it would appear that we are coming to that time. The mail cost in 1929 was $1.09 a mile. It is down to 42 cents a mile now.

Mr. TYDINGS. What the Senator is really saying in effect, however, is this: He has already said that in all probability some of these mail lines now carry sufficient passengers to make them self-supporting.

Mr. FESS. I should think that is true.

Mr. TYDINGS. Why should any air-mail subsidy at all be paid there?

Mr. FESS. I do not think there should be.

Mr. TYDINGS. The Senator also knows that there is a great desire in the country—because this is a gregarious thing—on the part of every State in the Union to have an air-mail line. The Senator knows that the Appropriations Committee—of which I happen to be a member, and I believe the Senator at one time was a member—is continually being asked to appropriate more money to the Post Office Department so that such and such a line can be further extended; and the Senator knows that in the case of some of those

lines it is very doubtful whether they will ever carry sufficient passengers and mail to bring them up to the point where they will be self-supporting without Government subsidy.

Mr. FESS. That is true.

Mr. TYDINGS. I am not taking issue with the Senator. What I am trying to bring out is this——

Mr. FESS. Let me make an observation for the Senator upon that point. Our present law looks to an ultimate condition where we can get clear out from under the subsidy, under the natural process of business. The law under which we are operating requires the Postmaster General to make a review every year, and in one case Mr. Brown made it twice in 1 year, with a view to reducing and ultimately entirely wiping out the subsidy.

Mr. TYDINGS. The point I wish to make is that now, at least from the primary aspect of the thing, there are certain lines in the United States carrying passengers which do not need any subsidy to continue their operations between large cities.

Mr. FESS. I do not know, but I think that is true.

Mr. TYDINGS. If that is true, why should we relet a Government mail contract to a company that does not need it in order to operate and make a fair profit for its stockholders?

Mr. FESS. It is not necessary to do it.

Mr. TYDINGS. And the Senator would not advocate it, would he?

Mr. FESS. No. The Senator would advocate, though, when a mail contract is made, that we proceed under the law which permits us ultimately to reach the point where the subsidy can be withdrawn.

Mr. TYDINGS. But the Senator even now would not advocate letting a mail contract anew to a company which does not need an air-mail contract in order to operate and make a fair profit for its stockholders?

Mr. FESS. Not on the basis of a subsidy. I should be perfectly willing to let the contract on the ordinary basis of compensation.

Mr. TYDINGS. I am talking about compensation along the line of a subsidy. So, assuming that there are such companies, the Senator now takes the position—and I take it, too—that we should not relet contracts on a subsidy basis to companies which do not need it.

Mr. FESS. I agree with the Senator. That is precisely my view.

Mr. TYDINGS. Now, may I ask the Senator about another phase of the matter? There are some lines in the United States which have carried very few passengers, and where the passenger traffic has picked up very little.

Mr. FESS. That is true.

Mr. TYDINGS. Does not the Senator believe, in these emergent times, that it would be better not to relet contracts on those lines if the volume of the service, as demonstrated by actual performance, does not seem to justify the belief that the lines will eventually be self-supporting?

Mr. FESS. Unless the mail service is of such importance that we should do it in the interest of the public, as we carry the rural mail, I should say no; not from the standpoint, at least, of passengers. Up in Alaska, for instance, we might need the Air Mail Service.

If the service is sufficiently important from the public standpoint, I should not say, merely because it costs more than we get from it, that we should deny the people the service. To my mind, it should stand on exactly the same basis as rural mail. The rural delivery does not pay for itself, and yet we do not want to deny the rural people the mail service. There is something in that argument.

Mr. TYDINGS. The Senator would not go so far as to believe that because one section of the country has an air-mail service, every other section of the country is entitled to an air-mail service?

Mr. FESS. No, Mr. President. Let me make just a comment on that suggestion.

The House committee of last year appointed a special committee to make an investigation along the lines of air mail. It reported that the air mail can be viewed in four different ways.

One is the military or national-defense aspect.

Another is the commercial aspect.

There are two others; namely, political and social. The House committee divided the political aspect into two subdivisions. One is where a Senator insists that his section should be served, and frequently induces the Postmaster General to give service. The other is the one referred to by the Senator, that here is a section of the country sparsely settled, but it is a State, and the people of the State say, "We have just as much right to have this air-mail service as some other State that is more populous than ours." We sometimes yield to that argument, and that is a political consideration. There are those two phases of the matter.

Mr. TYDINGS. That is the subject to which I was addressing myself. I may say to the Senator that I am sure he will agree that under congressional pressure, and the pressure from the air lines themselves, we have extended the air service to territories where there is no sound business basis for the extension of the service.

Mr. FESS. I believe that is obvious.

Mr. TYDINGS. Therefore, in reletting contracts, is it the Senator's opinion that only the routes that reasonably justify themselves ought to be reestablished?

Mr. FESS. If we assume that there are no contracts now, and there is no air mail, and therefore it is all a new matter, then if there is not any justification for the establishment of air-mail service either in its returns or in the other phase the Senator and I talked about—the service of people who really ought to have the service, although it does not pay for itself—I think we must take those facts into consideration.

Mr. TYDINGS. According to that argument, we would have to have at least one mail line in every State of the Union, and the State of West Virginia, which is one of the largest industrial States, according to the air-mail map, now has no air-mail line whatsoever. If we are to take the view that the service of the country demands air mail, then Vermont and New Hampshire and Maine, which now have no air-mail service, would be entitled to such service.

Mr. FESS. There is an argument in that behalf; but the service is not economical.

Mr. TYDINGS. If we are not going to give those States air-mail service, if they are to be denied because of one reason or another, why should we not revamp the contracts which are already in existence, when they shall have expired, and not reinstate them if there is not real need back of those contracts? Certainly we cannot deny the mails to Vermont, Rhode Island, Maine, West Virginia, and other States, but give such service to States away out West, in some States where there are even less people to be served than there are in the States I have mentioned. We have gone ahead without any regard to that consideration, and have extended these air-mail routes in certain cases where they cannot be justified on any basis at all.

Mr. FESS. Mr. President, I do not believe I differ at all from the viewpoint which has been expressed by the Senator from Maryland. All that he has said could be brought about under the present law. The present administration addressed a letter to the Comptroller General on the question of the cancelation of contracts under the present law, and the Comptroller General claims that under the power of reducing the returns on the basis of service the Department could reach the point of complete cancelation without a violation of the law. The Comptroller General gave that opinion, and I think it is a sound opinion. That point could be reached. The law was intended to reach it when it was originally enacted.

I agree with the Senator that under the impulse of the moment, when we were under the spell of a sort of air-mindedness, when everybody was thinking of aviation, many lines were established which should never have been established. They had not any right to exist, really, and cannot well exist. Naturally the proprietors of those lines want Government assistance in order to help them live; and if

sufficient pressure is brought to bear from legislative quarters, very likely the experiments will be tried. If they fail absolutely, there is authority to discontinue the contracts.

Mr. President, the Senator from Maryland diverted me from the line of thought upon which I was about to enter at the time of the interruption. I was trying to indicate the logical sequence of the steps the Postmaster General had taken in his effort to build up a very remarkable industry through the aid of the air mail. I was especially concerned about the charge as to the meeting on the 19th of May 1930. That was a meeting similar to the 3 meetings held before the law was passed, and was just as legal in every respect as any of the 3 preceding. Not only that, but when the appropriation had been cut so that activities which had required something like $19,000,000 must be carried on with about $14,000,000, the present Postmaster General called in the same people who had been called in by the Postmaster General preceding him, for the purpose of ascertaining how they could reduce their costs so that $14,000,000 could be spread out to do the work which theretofore nineteen million had done. He could have cut out this line or that line, but he would not want to do that without consulting those interested. Or he could have taken this city or that city off the air-mail route, but he would not want to do that without consulting those who had a right to be consulted. The most natural thing was for him to call in the operators in order to have them work out the problem that was before him.

Mr. President, that is exactly what Mr. Brown did. He did it four times; and while Mr. Brown is charged with collusion on the ground that he made the contracts, the present Postmaster General justifies his act on the ground that he was reducing the costs to the Government. To me that seems to be the most unfair statement of which anybody could be guilty. I am not for a moment suggesting that the meeting held in the Post Office Department last August under Postmaster General Farley had the slightest tint of fraud or illegality. It was called for a perfectly legitimate purpose. It was to deal with a problem the Postmaster General had to meet, and he did not want to do it without consulting the other parties to the contract. It was just as legitimate when Postmaster General Brown called in 25 people who had been in 3 meetings in 1929, before the new law was passed, to work out a common yardstick; and when they finally found it impossible, the Government, under the leadership of the Postmaster General, worked it out, after giving them a hearing. Then when he submitted his plan to Congress, Congress passed on it with remarkable unanimity. It passed the law in April; and in May the Postmaster General re-called these people into a conference to work out their own rights in the light of equities, so as to find what should be done with respect to the contracts without denying rights to the men who claimed under them.

That was collusion, and what the Postmaster General did was fraud, according to his critics, in the face of the fact that the companies submitted him a plan which he rejected on the ground that it was not an equitable plan.

Mr. President, I have stated over and over, again and again, that there was not a scintilla of fraud in those two meetings, as there had not been in the preceding meetings prior to 1929.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. FESS. I yield.

Mr. VANDENBERG. Is not that precisely the formula that is followed by the N.R.A. in writing a code?

Mr. FESS. Precisely. There is another phase of this problem to which I wish to refer. Last year an investigation of the whole Air Mail Service was ordered by the House of Representatives, when the Speaker of the House was our much-beloved and distinguished Vice President, now the Presiding Officer of the Senate. The committee of investigation was authorized by House Resolution No. 226, which was adopted on June 21, 1932.

The committee made a thorough investigation, assembling data upon which it could make its recommendations for changes such as evidently were in the mind of the Senator from Maryland when he was speaking during his interruption of my remarks.

At the hearings on December 12 or 13, 1932, the special investigator of the committee, Prof. John B. Crane, of Harvard University, who made a survey of the industry, and had flown over all the lines during the summer, submitted his report to the committee. Please note that this was a committee appointed by the Democratic House of Representatives to make a thorough investigation of the whole air-mail situation with a view of collecting data upon which any new legislation, if any were necessary, could be based. Their special investigator was a distinguished Harvard professor.

The scope of that investigation was very wide, representing about seven fields, which are set out in the report. In the report adopted by the committee there are a few observations which are pertinent to what we have been saying here.

On page 16 the report of that investigation says:

It is believed that there are certain pioneer operators who have never had an air-mail contract who would be glad to take advantage of a flat pound-mile payment and thus to supplement their present revenues as well as to provide a real postal facility. For instance, there has never been awarded an air-mail contract in Hawaii. The Inter-Island Waterways Co. has been rendering an efficient passenger and express service for several years. It operates out of Honolulu and has a 6-day-a-week service eastward and also a service to the westward.

Dr. Crane states that in general the air-mail map should not be extended; in fact, he thinks it may be subject to the criticism that it is already overdeveloped; but he recommends that there at least should be this extension; and then he also recommends an extension from Mandan, N.Dak., into Montana, a line that Postmaster General Brown recommended should be extended just before he left the office.

The report further says:

It should be provided that those holders of route certificates under the present law, who desire to do so, may exchange such route certificates for an indefinite certificate entitling them to carry air mail over their present routes at the basic pound-mile rate.

There has been much criticism of route certificates, and yet here is the recommendation of the House Committee on the Post Office and Post Roads that the route certificates should be exchanged for indefinite certificates entitling the holders thereof to carry air mail. That is rather a far-reaching recommendation of the committee.

There are certain extensions which have been made which are economically unjustifiable as a postal operation.

I am of the opinion that that statement is in all probability correct, and of course that condition should be remedied.

Questions relating to extensions of routes before and after the Watres Act and the policy to be adopted as to future extensions received our consideration.

That is the very subject that has been the basis of so much complaint—the extensions by the Postmaster General.

In the interest of efficiency and economical operation it is believed there should be embodied in the Air Mail Act a stipulation as to the minimum poundage required to keep extensions or feeder lines in existence. Under such a provision all extensions and feeders then in operation falling below the minimum would be canceled.

I understand from the Comptroller General's letter that he can cancel any contract which, under the requirement of the Postmaster General to review once a year, falls below what in his judgment is a profitable enterprise. That is the opinion of the Comptroller General.

I desire to have everyone within hearing distance of my voice recognize the fact that this committee reported a bill carrying out its views as to what ought to be done in regard to the air mail. I ask those who have been criticizing Postmaster General Brown to listen to the authority given the Postmaster General. I read:

SEC. 4. The Postmaster General is authorized to place air mail on any aircraft operating on a fixed daily schedule, and under authority of the Department of Commerce, at the fixed rate of 2 mills per pound-mile.

Nothing is said there about competitive bidding. Much of the complaint against Mr. Brown is based on the alleged absence of competitive bidding. We now have the new bill which was recommended by the Committee on the Post Office and Post Roads, under the Democratic control of the House in the last session, and which was framed as the result of the investigations of that committee.

I read further:

The Postmaster General, when in his judgment the public interest will be promoted thereby, may make any extensions or consolidations of routes which are now or may hereafter be established, and may authorize the carrying of mail, and issue a route warrant therefor, on any new routes not carrying United States air mail on January 1, 1933, whenever such new-route service does not duplicate service already in existence and performed by a regular operator under a route warrant as provided by this act, and has a letter of authority from the Department of Commerce for the carrying of passengers over said route.

Mr. President, that is a broader authority given to the Postmaster General than is given under the present law. Should the bill become law, Mr. Farley would be given greater authority, more arbitrary authority than Mr. Brown had under the Watres Act, because it fixes a definite date with respect to any new routes not carrying United States air mail on January 1, 1933.

Mr. President, we hear much about subsidies. We hear that there ought not to be any recognition of subsidies. Let me read section 10 of the proposed law, which is to be the improvement on the present act, decided upon after an investigation by the committee of the Democratic House looking to some substitute for the Watres Act.

SEC. 10. The Postmaster General, when in his judgment the public interest will be promoted thereby, and upon application of any carriers who have surrendered their route certificates on or before July 1, 1934, may pay an amount in addition to the above fixed pound-mile rate, which amount shall be determined by the Post Office Department examination of the carriers' accounts as hereinafter provided, and shall be based upon the difference between gross revenues from all sources and expenses prorated on a mileage basis.

Do Senators grasp the significance of that provision? The Postmaster General is permitted to pay an amount in addition to the amount fixed. That is a subsidy. We never went that far in the present Watres Act. I mention this, Mr. President, to show that those who were anxious to correct what they thought were evils submitted the proposal that was introduced in the last Congress in the House containing the very items which are condemned in the committee's report, and the committee's proposal goes far beyond the provision of the present law.

Mr. BLACK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Alabama?

Mr. FESS. I yield.

Mr. BLACK. The Senator himself does not approve a law which contains the two provisions he has just read, does he?

Mr. FESS. I am not so sure about that, Mr. President. I am not an opponent of the idea of the payment of a subsidy in the beginning of an industry. I should not hesitate a moment in voting for the principle of subsidy in the air industry and in the maritime industry. I have always questioned the wisdom of providing a subsidy; but rather than be driven off the sea because of the differences in costs between this country and foreign countries, I would rather pay a subsidy if it could be understood that it merely makes up the difference in cost and goes to labor. I would rather do that much than to lose our merchant marine; and I would do the same thing with regard to the Air Mail Service.

Mr. BLACK. My point is that I am sure the Senator would not want the law to repose such power as that mentioned, in the Postmaster General of any administration; would he?

Mr. FESS. Mr. President, referring to the inquiry of the Senator from Alabama, I think we must place power somewhere in the Executive, especially if the power is administrative in character, rather than retain it in Congress. I do not like the idea, as the Senator from Alabama must know, and I do not think it is a safe plan, to give arbitrary authority to any one head, unless it be in the development of an industry that has not yet been developed. It might be necessary to give such authority in that case. I am not criticizing the authority given by the Watres Act. I think that authority was essential; but the industry has been built up to such dimensions that I do not know whether that authority is now essential or not. I should prefer, however, to give it to someone rather than not to have it exercised at all.

Mr. President, here is a very remarkable statement by this special investigator from Harvard, Dr. John C. Crane. He is discussing in his report to the committee what would be the ideal system of mail service. I do not want anyone to fail to understand that this is the direct statement of the official investigator who had been appointed by the committee to make the survey and then to submit his report. His statement is taken from page 32 of the partial report of the House Committee on the Post Office and Post Roads, which was authorized to conduct an investigation of the postal Air Mail Service in the last Congress.

I quote Dr. Crane as follows:

The ideal status is one of "monopolistic competition" or balanced competition, where a limited number of trunk lines compete evenly with each other in service at all important terminals.

If Mr. Brown's action in undertaking the building-up of the Air Mail Service to give equal opportunities not only to the people who live on the coast but to those who live in the interior does not come within the ideal recommended by this investigator, then I do not know of anything that would.

Mr. Brown, in order to serve all the people, had to run counter to the wishes of some of the companies. We have had a very striking illustration of the contention and enmity that Mr. Brown created because of that action. Let me give one concrete example. The transcontinental route that ran from Atlanta to Los Angeles served the people along that line and the people of the southeastern section generally, but they had no air-mail facilities with the west coast except to Los Angeles. They had none with San Francisco. The northern line ran from New York by way of Chicago, with a terminus at San Francisco. So those living in New York had air-mail connection with San Francisco but not with Los Angeles, as those living in Atlanta and in the southeastern section generally had air-mail facilities with Los Angeles but not with San Francisco. Mr. Brown said to these companies, "I have got to let the people of New York have air-mail facilities with Los Angeles, and I must permit the people living in the southeastern section to have air-mail facilities with San Francisco; as it is, the North is denied such facilities with Los Angeles and the South is denied air-mail facilities with San Francisco." So he asked them to agree that the air-mail route running from Atlanta to New Orleans could go on to San Francisco and the air-mail route running from New York to San Francisco could go on down to Los Angeles. Those were competing companies; they did not want to do it; and after months and months of controversy over that very subject Mr. Brown ordered that the air mail starting from Atlanta to Los Angeles should find an outlet in a line from Los Angeles to San Francisco and the mail starting from New York to San Francisco should find an outlet going down on the same line or on a competing line to Los Angeles. He forced that to be done against tremendous opposition on the part of representatives of companies who have appeared before the committee to complain about the arbitrary methods of Postmaster General Brown.

Mr. Brown had but one thing in mind: He wanted to build an aviation industry. He knew he could not do it unless he could permit the lines carrying passengers also to have mail contracts and unless he could compel those carrying mail to install passenger service. If all the mail carriers would install passenger service and all the passenger lines, where it was justified, could get a mail route, through that method he could so stimulate aviation that it would become one of the great outstanding industries of America. That was his purpose. He had to make an air map to do it; he had to consult men who already had the contracts in

order to know how to do it without interfering with their rights in such contracts.

He proceeded on that basis. What was the result? In 1929 we had a very small aviation industry, but in 1933, when Mr. Brown left the field, it represented an investment of over $300,000,000. More than $90,000,000 were invested in the manufacture of airplanes; more than $160,000,000 were invested in municipal and governmental airports. I know nothing about how much it costs to light the airway and to equip the planes. There are at least a hundred million dollars in allied industries which are supplying the material for the making of airplanes and engines. During the 3 years, from 1929, when the depression came, to 1933, the development of aviation constitutes about the most stupendous achievement of which I have ever known. Yet the man who is largely responsible for it is now faced by the infamous allegation that he acted fraudulently; that what he did was done in collusion, when, as a matter of fact, everything he did was done in the wide open and in the interest of the public. I think it is an unspeakable shame. If men who devote their lives to the service of the public are to be thus treated, for whatever sordid motives, there can be but little incentive for any sensible man ever to want to enter public life.

It is said these contracts are fraudulent. Those making that statement overlook the fact, Mr. President, that we have an officer in the Government who is independent, who cannot be removed except by impeachment, who is responsible to no other authority except the Congress. It is his business to examine every contract and to ascertain when any payment is to be made under the law, whether or not such payment would accord with law or not.

At one time a distinguished Secretary of War, under a former President, complained because this officer of the law refused to allow the payment of an order that had been issued by that Secretary of War. The payment was of interest to a citizen of New Jersey; and a famous Governor of New Jersey, a personal friend of mine, wrote me a personal letter complaining of what he regarded as a most farcical performance, in that a Cabinet officer had allowed the claim of a citizen but an understrapper, as he said, in the Government had refused to allow it to be paid. The understrapper to whom he referred was the Comptroller General of the United States, whose power is next to that of the President. As I have said, he cannot be removed from his office, because he is the man who audits the accounts of the Executive instead of allowing, as heretofore, the Executive to audit its own accounts. I had to state to the Governor of New Jersey that that officer did precisely what the duties of his office required him to do, that if he thought that particular expenditure was not justified under the law, he would not allow it to be paid; and he did not allow it to be paid. Mr. President, every payment which is made by the Government in connection with carrying the air mail must go under the eye of that officer of the law. If there is any fraud, the payment will be denied. Where has there been any denial of any payment in the Air Mail Service for 3 years? That ought to answer the question conclusively.

My concern is with reference to the statement made by the Senator from Arkansas [Mr. ROBINSON], which I know he made in good faith. The statement is an honest one. He said, "So far as my information goes." The difficulty is that people reading the allegations and not having an opportunity to read the full facts in the case naturally come to the conclusion that what was said is true and that there must be fraud. I repeat, Mr. President, there is no fraud and there is no collusion. There is not even a hint of anything wrong in any of these air-mail contracts. What disturbs me is the controversy that has been raging over the cancelation of the contracts. I have complained about striking down of this industry without a hearing. I have complained of it as an un-American thing. I have complained of it as an inhumane thing. I have complained of the wrong committed against American citizens without first giving them a hearing. I have stated that in our system of jurisprudence no criminal is so mean that he does not have his day in court, but their day in court was denied the air-mail contractors in this case.

Every time a Senator rises to defend that indefensible action the statement is made that there was fraud involved and that the President had to act quickly. The President, of course, must take the responsibility for the cancelation of the air-mail contracts. Mr. Farley stated that he laid the matter before the President, and the President advised him what to do. Later on the President made the statement that it was the Postmaster General who did it. I assume the Postmaster General did it, but, of course, the President will have to assume responsibility for what any of his Cabinet officers do.

Then it is stated that the War Department was consulted, and the President was assured that the Army could carry the mail. We were told that the Army planes were not equipped for that purpose. Testimony to that effect comes from all sources. Yesterday there appeared before the Committee on Appropriations a witness who stated that all the planes were equipped. I had intended to read the testimony given before that committee yesterday in which it was stated by General MacArthur that he was not consulted at all. It was also stated by General Foulois that he had been consulted, that he had called into conference two men, and then had gone to his office and later had a second conference in order to be able to make reply, but that before they had concluded the conference he learned from an Associated Press representative that the cancelation order had been issued. That is the testimony given by the officers of the Army.

Now come other witnesses, not denying that testimony but claiming that the planes were equipped. How could they be equipped for carrying the mail when the pilots would be required in the wintertime to fly in open cockpits? It is a pitiable, flimsy effort to reduce the intensity of feeling in America regarding an action that was taken without rhyme or reason and should never have been taken by anyone, let alone the highest in authority in the United States. For that reason there is no way to avoid the responsibility. The responsibility must be placed where it properly belongs.

Mr. President, I recall a statement by the famous Mr. Gladstone in reference to the war in Afghanistan when he said:

> The torch in the hands of a madman in a night's time will burn down an edifice that it took the lavish expenditure of money and the skill and genius of the world to build.

I paraphrase that in a way. Aviation representing the country's newest and most modern industry, is to be stricken down in an hour's time with such haste that even the Army officers' report cannot be waited for, because it would mean a loss of the dramatic effect of the cancelation of the contracts, and delay would not fit into the picture that was being painted. I think the cancelation of the contracts ought not to be condoned. I cannot give my support to any proposal to continue the Army in this service.

Mr. President, I do not care to delay the Senate longer this afternoon. I suspend my remarks for a few days, when I shall undertake to read the testimony of Mr. Crowell as to the legality of the air-mail contracts, and when I shall also read the testimony of Mr. Brown, who under oath gave the facts which form the basis for what I have said.

Mr. SCHALL. Mr. President, the Senator from Ohio [Mr. FESS] in the course of his remarks referred to the Comptroller General and his unusual powers. In that connection I ask permission to have printed in the RECORD an article appearing in this morning's Washington Herald showing that the Comptroller General can be overruled.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Herald of Wednesday, Mar. 14, 1934]

JOHNSON WINS OVER MCCARL IN EAGLE ROW—N.R.A. HEAD APPEALS TO CONGRESS AFTER COMPTROLLER REJECTS $308,000 BILL FOR LABELS

A row between Comptroller General McCarl and the N.R.A.—the most serious of its kind to date—was disclosed last night when it was learned Gen. Hugh S. Johnson has had to go over

McCarl's head to a congressional committee in order to obtain approval of a $308,000 expenditure for printing Blue Eagles.

The developments only intensify the strife between McCarl and the emergency departments which continually are running afoul of his guardianship over public funds, since Johnson has proved for the first time that it is not necessary to obtain the Comptroller's approval of expenditures.

McCarl, who under the law must sanction each Government expense bill and who need answer only to Congress, steadfastly has refused to approve the N.R.A.'s expenditures for printing the Blue Eagles scattered over the land last summer.

He ruled they were illegal because the N.R.A. did not have the printing done at the Government Printing Office, but parceled the job out to 25 firms, and paid the $308,000 expense before he had a chance to pass on its legality.

McCarl's friends report the Comptroller General was astounded because there was a dearth of competitive bidding.

McCarl declared that since 308,000 of Uncle Sam's dollars had been illegally disbursed and the companies would not return them, the N.R.A. Chief Clerk would have to dig into his own pocketbook and refund $308,000 to the Treasury.

G.P.O. NOT EQUIPPED

Bradish Carroll, Jr., the Chief Clerk, draws a comfortable salary, and can afford to live at the Hay-Adams House. But $308,000 was too much.

General Johnson's emissaries came to his aid. They told McCarl the Government Printing Office had not the equipment for handling a rush order for 45,000 "Buy now" posters, 60,000 "Buy now" street-car cards, for 3,370,000 sets of Blue Eagles, including 80,000 consumers' stickers.

Why, they said, the orders had to be filled and delivered to every big city within 48 hours—and if there was no regular advertisement and call for bids, there was competition in that several firms in each of the cities where the N.R.A. wanted the printing done were canvassed by telephone for cheap prices.

M'CARL ADAMANT

But McCarl was adamant. If the eagles had to be distributed so fast, why had not the N.R.A. got to work on them sooner? Anyway, the N.R.A. procedure was contrary to law, and he never would permit the Government to foot the bills.

Finally somebody got the idea of appealing to the Joint Committee on Printing, which is composed of Senators and Representatives, does all the purchasing of paper for the Government, and alone has the authority to allow a department to patronize a private printing establishment.

The chairman, Senator FLETCHER (D.), of Florida, came to Johnson's aid with a retroactive order permitting him to patronize whoever he desired. There was nothing for McCarl to do after that but begin clearing N.R.A. vouchers again.

The VICE PRESIDENT. The question is on the engrossment and third reading of the bill.

Mr. STEIWER. Mr. President——

Mr. McKELLAR. I understood that the Senator from Oregon had an amendment to offer.

Mr. STEIWER. If the Senator will yield to me, I have an amendment.

Mr. McKELLAR. Will the Senator offer it at this time?

Mr. STEIWER. Yes, Mr. President.

Mr. CAREY. Mr. President——

Mr. McKELLAR. May I say to the Senator from Wyoming [Mr. CAREY] that I do not think there is any opposition to this bill, and I hope he will let us vote on it. Then the Senator can do as I am planning to do, make some remarks about it afterward.

Mr. CAREY. I should like to make a few remarks, if the Senator will yield to me for that purpose.

Mr. McKELLAR. Let us act on the amendment at this time, at any rate, and either agree to it or reject it.

Mr. STEIWER. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 3, line 1, beginning with the word "pension", it is proposed to strike out through the period in line 3, and to insert in lieu thereof the following:

Pension at the rate prescribed in part I, veterans' regulation no. 1 (a), and amendments thereto: *Provided*, That in the event of injury of any such officer or enlisted man, the degree of disability resulting therefrom shall be determined pursuant to the rating schedule authorized by veterans' regulation no. 3 (a).

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Oregon.

The amendment was agreed to.

Mr. CAREY obtained the floor.

Mr. COPELAND. Mr. President, is the Senator from Wyoming about to speak?

Mr. CAREY. Yes.

Mr. COPELAND. I was about to suggest, if we cannot have an immediate vote on this bill, that we take up the War Department appropriation bill.

Mr. McKELLAR. I should have to object to that at the present time, because I think this bill can be passed in just a few moments. Does the Senator from Wyoming expect to speak long?

Mr. CAREY. I shall not speak for more than 10 minutes.

Mr. McKELLAR. Very well.

Mr. CAREY. Mr. President, I am not going into a general discussion of the air-mail controversy, although there is much I might say regarding it. I shall confine my remarks to a portion of this bill; namely, that part of the bill which transfers to the Post Office Department the Air Corps of the Army for the purpose of the carrying of the air mail.

This morning I made a motion to have this bill referred to the Committee on Military Affairs. My purpose in making the motion was not a political one, but for the reason that I felt that the Army is not properly equipped to carry the mail at this time.

I have always been a friend of the Army. I have always been willing to vote for any measure which I felt would help make a better Army or a more efficient Military Establishment. I feel that our Army has always done a good job, considering the amount of appropriations it has had and what it has had to work with.

From the testimony brought out before the Appropriations Committee, of which I am a member, I am convinced that when the Army started to carry the mail it was not prepared to do so. Anyone who will read the testimony of General Westover, in which he tells of the difficulties experienced, the lack of proper fields, suitable places at which to repair their planes, lack of proper types of planes, and the difficulties under which they operated, cannot help but be convinced that the Army should not at that time have undertaken to carry the mail; and I do not believe today they are prepared for this duty if it should be assigned to them.

The excuse for the disasters that occurred, for the deaths of 10 men, was that the planes encountered bad weather conditions, which I know is true; but I feel that if the men who lost their lives had had the same training, the same experience that commercial flyers have had, they would not have fallen to their deaths. In their efforts to fill the places of men trained in commercial aviation they gave their lives.

The failure of the Air Corps of the Army has been due largely to lack of appropriations. The program which was provided for by Congress, known as the "5-year plan", has not been carried out. Both the Budget and Congress must assume a part of the responsibility for the failure to provide funds for planes and training. While we have a large number of officers in the Air Corps, these officers, through lack of equipment, have not had the necessary training and have not had the number of hours in the air that they should have had to be properly trained. It would be much better to have fewer officers with more training than so many who spend insufficient time in the air.

A few days ago an article appeared in the Washington Herald by no other than Elliott Roosevelt, a son of the President of the United States. This article is signed by him as aviation editor of the Washington Herald. He states in this article that—

Entirely aside from the merits of the mail-contract cancelation, some of these facts are:

1. The Army failed to "deliver the goods" as a commercial aviation organization because the Army Air Service was undertrained, poorly equipped, and hamstrung with obsolete regulations and ancient red tape.

2. It failed because for years Congress has been starving it in appropriations for gasoline and other necessary expenses to keep Army pilots flying after they were trained.

* * * * * * *

4. And it failed because it was plunged into commercial flying operations without the necessary safety devices essential to bad-weather flying but heretofore not included in military ships.

Mr. Roosevelt also states in this article that—

Army training courses include 10 hours blind flying minimum and 20 hours minimum night flying. During the last fiscal year only 7 percent of the Army's flying was done at night.

It appears that most or some of the men who met their deaths in trying to carry on and carry out orders had comparatively few hours of training as compared to commercial pilots. I cannot give the information regarding all of the 10 officers who were killed in this "noble experiment" but can give the records of part of them.

On February 16, Second Lts. Jean D. Grenier and Edwin D. White, Jr., Air Reserve, were killed while flying between Cheyenne, Wyo., and Salt Lake City, Utah. They were flying over the mail route to familiarize themselves therewith.

Lieutenant Grenier was born at Manchester, N.H., November 24, 1909. He graduated in 1930 from the University of New Hampshire. Appointed flying cadet, Army Air Corps, he commenced flying training at the Primary Flying School, Randolph Field, Tex., July 2, 1932.

Graduated from Primary Flying School February 28, 1933, and from the Advanced Flying School, Kelly Field, Tex., June 29, 1933, specializing as attack pilot. Rated "airplane pilot" and commissioned second lieutenant in the Air Reserve, he was placed on extended active duty with the Third Attack Group at Fort Crockett, Galveston, Tex.

Lt. Edwin D. White, Air Corps Reserve, was born at Petaluma, Calif., February 10, 1910. Graduated from the University of California. Appointed flying cadet, Air Corps, and began flying training at Air Corps Primary Flying School, Randolph Field, Tex., in March 1932, graduating October 15, 1932. Graduated from the Advanced Flying School, Kelly Field, Tex., February 24, 1933, being commissioned second lieutenant in the Air Reserve and rated "airplane pilot." Assigned to extended active duty at March Field, Riverside, Calif. Total flying time as of February 1, 1934, 488 hours.

On the same day, February 16 last, Second Lt. James Y. Eastman, Air Reserve, piloting a bombardment airplane, was killed at about 10:50 p.m., about 7 miles from Jerome, Idaho. He was flying from Salt Lake City to Seattle, Wash., under the same conditions as were Lieutenants Grenier and White—all three were flying over the mail routes to which they were to be assigned in order that they might familiarize themselves with the routes and in spite of the fact that they had not been equipped with the kind of planes that were designed to carry mail.

Second Lieutenant Eastman was born at Huntsville, Tex., March 4, 1911. He graduated from Sam Houston Teachers College with the degree of B.S. in 1931. He attended the University of Texas for 1 year. He was appointed flying cadet, Army Air Corps, and commenced training at the Air Corps Primary Flying School, Randolph Field, Tex., July 2, 1932; graduated February 28, 1933. Graduated from the Advanced Flying School, Kelly Field, Tex., June 29, 1933. Rated "airplane pilot" and commissioned second lieutenant, Air Reserve. Assigned to extended active duty with the Thirty-first Bombardment Squadron at March Field, Riverside, Calif. Total flying time as of February 2, 1934, 419 hours.

MAIL WAS SAVED

Second Lt. Durward O. Lowry, Army Air Corps, was killed on the morning of February 22 near Deshler, Ohio. He was piloting an observation type airplane and was flying between Chicago and Cleveland, having taken off from Chicago at 4 a.m. Lieutenant Lowry was on a regular mail run when killed and was carrying the mail. He apparently had attempted to make an emergency parachute jump, for the rip cord was pulled and the pilot was caught in the tail of the airplane. But the mail was saved.

This officer was born at Chicago, Ill., October 4, 1903. He was educated at Ann Arbor High School from 1919 to 1921; at Northwestern Military and Naval Academy from Lake Geneva, Wis., from 1921 to 1923 and at the University of Michigan from 1923 to 1927. Appointed flying cadet, Army Air Corps, and commenced flying training at Primary Flying School, March Field, Riverside, Calif., February 27, 1928. He graduated October 26, 1928. Graduated from Advanced Flying School, Kelly Field, Tex., February 28, 1928; rated "airplane pilot", commissioned second lieutenant in Air Reserve, and assigned to active duty at Selfridge Field, Mount Clemens, Mich., with the First Pursuit Group. Passed examination for appointment in the Regular Army and commissioned second lieutenant, Air Corps, September 4, 1929. Graduated June 1931 from communications course at the Air Corps Technical School, Chanute Field, Rantoul, Ill., and returned to duty at Selfridge Field. Total flying time, 1,256 hours.

On February 23 last, Second Lt. George E. McDermott, Air Reserve, was lost at sea while en route from Floyd Bennett Field, Brooklyn, N.Y., to Langley Field, Va. Due to motor trouble, the plane made a forced landing on the water. Two other officers flying with him were rescued. This flight was for the purpose of ferrying pilots as fast as possible to air-mail stations to which they had been ordered.

CHERISH MEMORIES

Lieutenant McDermott was born at West Homestead, Pa., August 23, 1904. He was educated at the University of Pittsburgh, 1923 to 1927. Graduated from the Air Corps Primary Flying School, Randolph Field, Tex., February 28, 1933. Graduated from the Advanced Flying School, Kelly Field, Tex., June 29, 1933. Appointed second lieutenant, Air Reserve, June 29, 1933. Rated "airplane pilot and observer."

On March 9, First Lt. Otto Wienecke, Air Corps, was killed near Burton, Ohio, in a snowstorm while flying the mail in an observation plane. He had been in the Air Corps nearly 10 years. This is the War Department tribute to his efficiency: "Lieutenant Wienecke was an excellent officer of broad experience. He held the ratings of airplane pilot, airplane observer, airship pilot, and balloon observer. In addition to these ratings he was an expert radio operator. He had a total of over 1,850 hours in the air as a pilot."

This officer's home was in Patchogue, Long Island, N.Y., where his father and mother live. The flags of that town were ordered at half staff when the word of his sacrifice was received.

On the same day, March 9, Lt. F. L. Howard and Lt. A. R. Kerwin were burned to death near Cheyenne, Wyo., when their plane crashed in taking off on a trial run preparatory to flying the mail. Lieutenant Howard was from Shreveport, La., and Lieutenant Kerwin's home was in California, where his father, a lieutenant colonel in the Army, now lives. Both these officers were graduates of the Army's flying schools. Both had excellent records to their credit.

On the same fatal day, March 9, Pvt. Ernest B. Sell was killed and officers of the Army Air Corps were injured at Daytona Beach, Fla., when their plane carrying the mail to Jacksonville crashed. His home was near Willow Springs, Mo.

Of these flyers who have been sacrificed one of them, Lieutenant Kerwin, attended the high school in Cheyenne before he went to the United States Military Academy at West Point. I quote from an article in the Wyoming State Tribune regarding him:

The boy who left here in 1922 had found a life that suited his temperament perfectly when he became an Army flyer. He was happily married. It filled his immediate cup of cheer fully to sit in familiar Cheyenne homes, between his calls to air-mail duty, and to reminisce with members of his high-school "gang."

But young Kerwin was too familiar with the rugged terrain and the broad, sparsely populated sweeps of the Wyoming sector of his route not to be apprehensive of what might happen to a luckless flyer if anything "went wrong" with his ship "out there."

Here was a flyer who knew the country that he must fly over, yet he was fearful of what might happen to him and to other flyers assigned to flying a section which has required the most competent aviators in the United States. Quoting further from the Wyoming State Tribune regarding young Kerwin:

In what turned out to be one of his last chats with a group of friends here earlier this week, Lieutenant Kerwin said he was fearful there would be several early fatalities among the Army mail carriers during night flights because of their unfamiliarity with the various routes. "It's our duty to go out, though", he added, "and when we know the way better, things will be all right."

General Westover, in his testimony before the Appropriations Committee, told how the planes were left out in the weather for lack of hangars, how it had taken as much as 3 hours to get them warmed up in order that they might fly, and how it was necessary for them to be returned and to be refueled in order that there should be enough gasoline in them for their flight. The account in the Cheyenne paper tells of the condition of the plane in which Kerwin and another man were killed, describing the engine as sounding like a Ford car operating on two cylinders. Probably this plane had stood out all night, and the mechanics had had no opportunity to go over it.

Mr. President, I want to compare the training of these Army fliers with the training of the commercial fliers who were flying on the same line through Cheyenne. I made inquiries of the officials of the United Airlines about what they required of men before they employed them as pilots or copilots.

I find, first, that they will not employ an Army-trained aviator except as a copilot and he must serve as a copilot for at least a year before being given a ship. The officials of this company know that Army flying does not qualify a man for commercial flying. They require that a copilot shall have a minimum of 500 air-hours before he will be employed as a copilot, although there have been cases where they have taken exceptional men with fewer flying hours' experience.

Their copilots must fly for 1 year as copilots and have 1,200 flying hours before they are eligible to become pilots. A pilot must have a minimum of 1,200 certified hours of solo flying within the previous 8 years, 500 of which must have been in cross-country flying and 75 hours of solo flying at night. The average Army flier has 20 hours of night flying and 10 hours of blind flying. Also a copilot must have from 25 to 30 hours' blind flying before he is qualified

for promotion to the rank of pilot. Further than that, he must have at least 5 hours' experience in flying the particular type of plane which he is to take out. When a new pilot is placed on a run, he must be accompanied by the chief pilot of the line for at least two round trips, flying both day and night. The chief pilot makes a final check-up on his qualifications before he is put in charge of a ship.

Each pilot must have a minimum of blind flying of 2 hours per month the first year, and 1 hour per month for each year thereafter. This would amount to 24 hours per year as compared to an average total of 10 hours of blind flying for the Army aviator.

The average number of hours for the pilots of that line for the year 1933 was 852. The pilots employed on this line have an average of over 4,000 flying hours. Of the 10 Army flyers who were killed in the experiment of carrying the air mail, 1 officer in flying for 10 years had had but 1,850 hours in the air. Another had 1,256 hours, while another had flown but 419 hours. Some had been graduated from flying schools less than a year.

Mr. President, I am calling attention to these figures and lack of training in order to show that the Army is not prepared for the kind of a job that is contemplated in the pending bill. I feel that to continue the Army in this line of work before proper preparation has been made will only result in the deaths of more men.

There has been much criticism of the President of the United States for ordering the Army to fly the mail. It is unfortunate that he did not make more careful inquiry as to the ability of the Army to handle the job. While I want to see the air mail continued, and feel that there was no justification for the cancelation of the contracts, I would prefer to have no air mail if it means a further sacrifice of Army flyers, who, while they lack training in flying, have been taught to obey orders. Such men will carry on regardless of the consequences. If the Army must carry the mail, give them the training and equipment necessary to do the job.

The VICE PRESIDENT. If there be no further amendment, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the amendments of the Senate to the bill (H.R. 7808) to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes.

WAR DEPARTMENT APPROPRIATIONS

Mr. COPELAND. Mr. President, I move that the Senate proceed to the consideration of the War Department appropriation bill.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes, which had been reported from the Committee on Military Affairs with amendments.

Mr. COPELAND. Mr. President, I ask that the formal reading of the bill be dispensed with, and that the bill be read for amendment, committee amendments to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the clerk will state the first amendment of the committee.

The first amendment of the Committee on Appropriations was, under the heading "Title I—Military activities and other expenses of the War Department incident thereto—Salaries, War Department", on page 2, line 8, before the word "of", to strike out "two Assistant Secretaries" and insert "Assistant Secretary"; and in line 9, after the word "services", to strike out "$256,611" and insert "$248,511", so as to read:

For compensation for personal services in the District of Columbia, as follows:

Office of Secretary of War: Secretary of War, Assistant Secretary of War, and other personal services, $248,511: *Provided*, That no field-service appropriation shall be available for personal services in the War Department except as may be expressly authorized herein.

The amendment was agreed to.

The next amendment was, on page 3, line 20, after the name "War Department", to strike out "$4,184,380", and insert "$4,176,280", so as to read:

In all, salaries, War Department, $4,176,280.

The amendment was agreed to.

The next amendment was, on page 4, line 10, before the words "of War", to strike out "Secretaries" and insert "Secretary", so as to read:

In expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with the Classification Act of 1923, as amended, with the exception of The Assistant Secretary of War, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, as amended.

The amendment was agreed to.

The next amendment was, under the subhead "Contingent expenses, War Department", on page 5, line 13, after the word "exceed", to strike out "$2,500" and insert "$4,000", and in line 19, after the word "expenses", to strike out "$175,178" and insert "$173,631", so as to read:

For stationery; purchase of professional and scientific books, law books, including their exchange; books of reference, pamphlets, periodicals, newspapers, maps; typewriting and adding machines, and other labor-saving devices, including their repair and exchange; furniture and repairs to same; carpets, linoleum, filing equipment, photo supplies, towels, ice, brooms, soap, sponges; for the purchase of a passenger-carrying automobile for the official use of the Secretary of War at not to exceed $4,000, including the value of a vehicle exchanged; maintenance, repair, and operation of motor trucks and one motor-propelled passenger-carrying vehicle, to be used only for official purposes; freight and express charges; street-car fares, not exceeding $750; postage to Postal Union countries; and other absolutely necessary expenses, $173,631; and it shall not be lawful to expend, unless otherwise specifically provided herein, for any bureau, office, or branch of the War Department or of the Army having or maintaining an office in the War Department proper, at Washington, D.C., any sum out of appropriations contained in this act (or accruing thereto) made for the Military Establishment for any of the purposes mentioned or authorized in this paragraph.

The amendment was agreed to.

The next amendment was, under the subhead "Travel, military and civil personnel", on page 10, line 10, after the word "duty", to strike out "$2,810,074, of which sum $287,177 shall be available exclusively on account of travel in connection with river and harbor and flood-control activities under the Corps of Engineers" and insert "$2,976,678", and in line 20, after the word "camps", to insert "the nonmilitary activities of the Corps of Engineers", so as to read:

For mileage, reimbursement of actual traveling expenses, or per diem allowance in lieu thereof, as authorized by law for official travel on military and nonmilitary duty under the War Department, to commissioned officers (including discharged officers to their homes), warrant officers, contract surgeons, and expert accountant, Inspector General's Department; for transportation of troops, Philippine Scouts, nurses, flying cadets, enlisted men (including discharged enlisted men to their homes or places of enlistment); for transportation of recruits and recruiting parties and of applicants for enlistment between recruiting stations and recruiting depots; and rejected applicants for enlistment; for transportation of dependents of officers, warrant officers, and enlisted men as provided by law; for transportation of general, paroled, escaped, and discharged prisoners and persons discharged from St. Elizabeths Hospital after transfer thereto from the military service to their homes or elsewhere as they may elect, the cost in each case not to be greater than to the place of last enlistment; transportation of cadets and accepted cadets from their homes to the Military Academy and discharged cadets, including reimbursement of traveling expenses; for traveling expenses of civilian witnesses before courts-martial; for traveling expenses of attendants accompanying remains of military personnel and civilian employees; and for traveling expenses of civilian employees and other persons under the War Department authorized by law to travel on departmental, military, and nonmilitary duty, $2,976,678, and no

other appropriation in this act shall be available for any expense for or incident to travel of personnel of the Regular Army or civilian employees under the War Department, except the appropriation "Contingencies of the Army" and the appropriations for the National Guard, the Organized Reserves, the Reserve Officers' Training Corps, citizens' military training camps, the nonmilitary activities of the Corps of Engineers, and the Panama Canal, and except as may be provided for in the appropriation "Air Corps, Army."

The amendment was agreed to.

The next amendment was, on page 10, line 22, after the word "Army", to strike out the semicolon and the following proviso:

Provided, That no appropriation contained in this act shall be available for the payment of passenger transportation at a rate in excess of the lowest rate available to the public at the time of the performance of travel for the class of transportation to which the traveler may be entitled by or in pursuance of law.

And in lieu thereof to insert:

Provided, That no appropriation contained in this act shall be available for the payment of passenger transportation at a rate in excess of the lowest rate available for the type of transportation used.

The amendment was agreed to.

The next amendment was, under the subhead "Finance Department—Pay, Etc., of the Army", on page 11, line 9, after the word "officers", to strike out "$28,617,645, no part of which sum shall be available for the pay of more than 11,750 commissioned officers whose commissions are dated prior to June 1, 1934" and insert "$30,000,000", so as to read:

For pay of not to exceed an average of 12,000 commissioned officers, $30,000,000;

The amendment was agreed to.

The next amendment was, on page 11, line 15, after the word "exceed", to strike out $1,579,110" and insert "$1,776,997", so as to read:

Aviation increase to commissioned and warrant officers of the Army, not to exceed $1,776,997,

The amendment was agreed to.

The next amendment was, on page 11, line 18, after the word "captain", to insert "at a rate in excess of $1,440 per annum", so as to read:

None of which shall be available for increased pay for making aerial flights by nonflying officers above the grade of captain at a rate in excess of $1,440 per annum;

The amendment was agreed to.

The next amendment was, on page 12, line 1, after the words "pay to", to strike out "not to exceed four", and in line 2, after the word "duty", to strike out "$4,620" and insert "$316,140", so as to read:

Increased pay to retired officers on active duty, $316,140;

The amendment was agreed to.

The next amendment was, on page 12, line 3, after the figures "$11,610,000", to insert "increased pay and allowances to retired enlisted men on active duty, $26,750."

The amendment was agreed to.

The next amendment was, on page 12, line 14, after the word "available", to strike out "$5,386,397" and insert "$5,653,077", so as to read:

Rental allowances, including allowances for quarters for enlisted men on duty where public quarters are not available, $5,653,077.

The amendment was agreed to.

The next amendment was, on page 12, line 24, after the word "allowances", to strike out "$5,290,066" and insert "$5,412,786"; on page 13, line 7, after the words "in all", to strike out "$121,758,094" and insert "$124,065,706"; in line 10, after the word "discharges", to strike out "$121,473,094" and insert "$123,780,706", and in line 14, after the word "increased", to insert "by transfer from any other amount therein", so as to make the proviso read:

Provided, That during the fiscal year ending June 30, 1935, no rental allowance shall accrue to any officer of the Government in consequence of the provisions found in section 10, title 37, United States Code, while occupying quarters at his permanent station not under the jurisdiction of the service in which serving but which belong to the Government of the United States, or to a corporation the majority of the stock of which is owned by the United States, in excess of the rental rate charged for such quarters on March 5, 1934; subsistence allowances, $5,412,786; interest on soldiers' deposits, $30,000; payment of exchange by officers serving in foreign countries, and when specially authorized by the Secretary of War, by officers disbursing funds pertaining to the War Department, when serving in Alaska, and all foreign money received shall be charged to and paid out by disbursing officers of the Army at the legal valuation fixed by the Secretary of the Treasury, $100; in all, $124,065,706, less $285,000 to be supplied by the Secretary of War for this purpose from funds received during the fiscal year 1935 from the purchase by enlisted men of the Army of their discharges, $123,780,706; and the money herein appropriated for "Pay, Etc., of the Army" shall be accounted for as one fund except that no amount in this paragraph specifically limited may be increased by transfer from any other amount therein:

The amendment was agreed to.

The next amendment was, under the subhead "Expenses of Courts-Martial", on page 15, line 8, after the word "services" to strike out "(which for the purposes of title II of the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, as amended, shall not be deemed to be personal services)"; so as to read:

For expenses of courts-martial, courts of inquiry, military commissions, retiring boards, and compensation of reporters and witnesses attending same, contract stenographic reporting services, and expenses of taking depositions and securing other evidence for use before the same, $55,000.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster Corps", on page 18, line 13, after the words "in all" to strike out "$15,705,898" and insert "$17,691,828"; so as to read:

Subsistence of the Army: Purchase of subsistence supplies: For issue as rations to troops, including retired enlisted men when ordered to active duty, civil employees when entitled thereto, hospital matrons, applicants for enlistment while held under observation, general prisoners of war (including Indians held by the Army as prisoners, but for whose subsistence appropriation is not otherwise made), Indians employed by the Army as guides and scouts, and general prisoners at posts; for the subsistence of the masters, officers, crews, and employees of the vessels of the Army Transport Service; hot coffee for troops traveling when supplied with cooked or travel rations; meals for recruiting parties and applicants for enlistment while under observation; for sales to officers, including members of the Officers Reserve Corps while on active duty, and enlisted men of the Army. For payments: Of the regulation allowances of commutation in lieu of rations to enlisted men on furlough, enlisted men when stationed at places where rations in kind cannot be economically issued, including retired enlisted men when ordered to active duty and when traveling on detached duty where it is impracticable to carry rations of any kind, enlisted men selected to contest for places or prizes in department and Army rifle competitions when traveling to and from places of contest, applicants for enlistment, and general prisoners while traveling under orders. For payment of the regulation allowances of commutation in lieu of rations for enlisted men, applicants for enlistment while held under observation, civilian employees who are entitled to subsistence at public expense, and general prisoners while sick in hospitals, to be paid to the surgeon in charge; advertising; for providing prizes to be established by the Secretary of War for enlisted men of the Army who graduate from the Army schools for bakers and cooks, the total amount of such prizes at the various schools not to exceed $900 per annum; and for other necessary expenses incident to the purchase, testing, care, preservation, issue, sale, and accounting for subsistence supplies for the Army; in all, $17,691,828:

The amendment was agreed to.

The next amendment was, on page 20, at the end of line 9, to increase the appropriation for regular supplies of the Army under the Quartermaster Corps from 2,576,880 to $3,092,663.

The amendment was agreed to.

The next amendment was, on page 21, line 18, to increase the appropriation for clothing and equipage for the Army from $4,207,112 to $5,502,824.

The amendment was agreed to.

The next amendment was, on page 23, line 13, after the word "exceed", to strike out "$461,812" and insert "$562,065", and in line 22, after the words "in all", to strike out "$7,192,211" and insert "$8,655,005", so as to read:

Army transportation: For transportation of Army supplies; of authorized baggage, including packing and crating; of horse equipment; and of funds for the Army; for the purchase or construction, not to exceed $10,000, alteration, operation, and repair

of boats and other vessels; for wharfage, tolls, and ferriage; for drayage and cartage; for the purchase, manufacture (including both material and labor), maintenance, hire, and repair of pack saddles and harness; for the purchase, hire, operation, maintenance, and repair of wagons, carts, drays, other vehicles, and horse-drawn and motor-propelled passenger-carrying vehicles required for the transportation of troops and supplies and for official military and garrison purposes, maintenance and repair expenditures on motor-propelled vehicles not to exceed $562,065, exclusive of labor; for hire of draft and pack animals; for travel allowances to officers of National Guard on discharge from Federal service as prescribed in the act of March 2, 1901 (U.S.C., title 10, sec. 751), and to enlisted men of National Guard on discharge from Federal service, as prescribed in amendatory act of September 22, 1922 (U.S.C., title 10, sec. 752), and to members of the National Guard who have been mustered into Federal service and discharged on account of physical disability; in all, $8,655,005, of which amount not exceeding $250,000 shall be available immediately for the procurement and transportation of fuel for the service of the fiscal year 1935.

The amendment was agreed to.

The next amendment was, on page 24, line 14, before the word "no", to insert "effective January 1, 1935"; and in line 18, after the word "tractors", to insert "tanks and their carriers, ambulances, fire trucks, rebuilt trucks, vehicles in use by Reserve Officers' Training Corps units, and such other vehicles as can be operated economically"; so as to make the additional proviso read:

Provided further, That, effective January 1, 1935, no appropriation contained in this act shall be available for any expense of any character, other than as may be incident to salvaging or scrapping, on account of any motor-propelled vehicle procured prior to January 1, 1920, except tractors, tanks and their carriers, ambulances, fire trucks, rebuilt trucks, vehicles in use by Reserve Officers' Training Corps units, and such other vehicles as can be operated economically:

The amendment was agreed to.

The next amendment was, on page 25, line 3, after the figures "1932", to strike out the colon and the following additional proviso:

Provided further, That no appropriation contained in this act shall be available for any expense incident to the operation of the Fort Benning railroad.

The amendment was agreed to.

The next amendment was, under the subhead "Horses, draft and pack animals", on page 25, at the end of line 24, to strike out "$144,789" and insert "$294,789", so as to read:

For the purchase of draft and pack animals and horses within limits as to age, sex, and size to be prescribed by the Secretary of War for remounts for officers entitled to public mounts, for the United States Military Academy, and for such organizations and members of the military service as may be required to be mounted, and for all expenses incident to such purchases (including $69,789 for encouragement of the breeding of riding horses suitable for the Army, in cooperation with the Bureau of Animal Industry, Department of Agriculture, including the purchase of animals for breeding purposes and their maintenance), $294,789.

The amendment was agreed to.

The next amendment was, under the subhead, "Barracks and quarters and other buildings and utilities", on page 27, line 13, after the word "posts", to strike out "$9,015,902" and insert "$9,155,695", so as to read:

For all expenses incident to the construction, installation, operation, and maintenance of buildings, utilities, appurtenances, and accessories necessary for the shelter, protection, and accommodation of the Army and its personnel and property, where not specifically provided for in other appropriations, including personal services, purchase and repair of furniture for quarters for officers, warrant officers, and noncommissioned officers, and officers' messes, and wall lockers and refrigerators for Government-owned buildings as may be approved by the Secretary of War, care and improvement of grounds, flooring and framing for tents, rental of buildings, including not to exceed $900 in the District of Columbia, provided space is not available in Government-owned buildings, and grounds for military purposes and lodgings for recruits and applicants for enlistments, water supply, sewer and fire-alarm systems, fire apparatus, roads, walks, wharves, drainage, dredging channels, purchase of water, disposal of sewage, shooting galleries, ranges for small-arms target practice, field, mobile, and railway artillery practice, including flour for paste for marking targets, such ranges and galleries to be open as far as practicable to the National Guard and organized rifle clubs under regulations to be prescribed by the Secretary of War, for furnishing heat and light for the authorized allowance of quarters for officers, enlisted men, and warrant officers, including retired enlisted men when ordered to active duty, contract surgeons when stationed at and occupying public quarters at military posts, officers of the National Guard attending service and garrison schools, and for recruits, guards, hospitals, storehouses, offices, the buildings erected at private cost, in the operation of the act approved May 31, 1902 (U.S.C., title 10, sec. 1346), and buildings for a similar purpose on military reservations authorized by War Department regulations; for sale of fuel to officers; fuel and engine supplies required in the operation of modern batteries at established posts, $9,155,695, and $2,500,000 of this appropriation shall be available immediately for the procurement and transportation of fuel for the service of the fiscal year 1935:

The amendment was agreed to.

The next amendment was, under the subhead "Corps of Engineers—engineer service, Army", on page 39, at the end of line 15, to strike out "$332,988" and insert "$344,509", so as to read:

For the design, development, procurement, maintenance, alteration, repair, installation, storage, and issue of engineer equipment, instruments, appliances, supplies, materials, tools, and machinery required in the equipment and training of troops and in military operations, including military surveys and the Engineer School; for the operation and maintenance of the Engineer School, including (a) compensation of civilian lecturers and (b) purchase and binding of scientific and professional books, pamphlets, papers, and periodicals; for the procurement, preparation, and reproduction of maps and similar data for military purposes; for expenses incident to the engineer service in military operations, including military surveys and including (a) research and development of improved methods in such operations, (b) the rental of storehouses and grounds within and outside of the District of Columbia, and (c) repair and alteration of buildings; for heat, light, power, water, and communication service, not otherwise provided for; and for the compensation of employees required in these activities, $344,509.

The amendment was agreed to.

The next amendment was, under the subhead "National Guard—arming, equipping, and training the National Guard", on page 47, line 26, to strike out "$10,302,949" and insert "$11,756,221", so as to read:

For pay of National Guard (armory drills), $11,756,221.

The amendment was agreed to.

The next amendment was, on page 48, line 4, before the word "drills", to strike out "42" and insert "48", so as to make the proviso read:

Provided, That the appropriations contained in the Naval Appropriation Act for the fiscal year 1935 for drills for members of the Naval and Marine Corps Reserve forces shall be available for the conduct of 48 drills for each of such forces.

The amendment was agreed to.

The next amendment was, under the heading "Citizens' military training—Reserve Officers' Training Corps", on page 55, line 21, after the word "injury", to insert "or contract disease", and on page 56, line 11, after the word "vehicles", to strike out "$3,108,701" and insert "$4,467,461", so as to read:

For the procurement, maintenance, and issue, under such regulations as may be prescribed by the Secretary of War, to institutions at which one or more units of the Reserve Officers' Training Corps are maintained, of such public animals, means of transportation, supplies, tentage, equipment, and uniforms as he may deem necessary, including cleaning and laundering of uniforms and clothing at camps; and to forage, at the expense of the United States, public animals so issued, and to pay commutation in lieu of uniforms at a rate to be fixed annually by the Secretary of War; for transporting said animals and other authorized supplies and equipment from place of issue to the several institutions and training camps and return of same to place of issue when necessary; for purchase of training manuals, including Government publications and blank forms; for the establishment and maintenance of camps for the further practical instruction of the members of the Reserve Officers' Training Corps, and for transporting members of such corps to and from such camps, and to subsist them while traveling to and from such camps and while remaining therein so far as appropriations will permit, or, in lieu of transporting them to and from such camps and subsisting them while en route, to pay them travel allowance at the rate of 5 cents per mile for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the camp and for the return travel thereto, and to pay the return travel pay in advance of the actual performance of the travel; for expenses incident to the use, including upkeep and depreciation costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the War Department; for pay for students attending advanced camps at the rate prescribed for soldiers of the seventh grade of the Regular Army; for the payment of commutation of subsistence to members of the senior division of the Reserve Officers' Training Corps, at a rate not exceeding the cost of the garrison ration prescribed for the Army,

as authorized in the act approved June 3, 1916, as amended by the act approved June 4, 1920 (U.S.C., title 10, sec. 387); for medical and hospital treatment until return to their homes and further medical treatment after arrival at their homes, subsistence during hospitalization and until furnished transportation to their homes, and transportation when fit for travel to their homes of members of the Reserve Officers' Training Corps who suffer personal injury or contract disease in line of duty while en route to or from and while at camps of instruction under the provisions of section 47a of the National Defense Act approved June 3, 1916 (U.S.C., title 10, sec. 441), as amended; and for the cost of preparation and transportation to their homes and burial expenses of the remains of members of the Reserve Officers' Training Corps who die while attending camps of instruction, as provided in the act approved April 26, 1928 (U.S.C., supp. VI, title 10, sec. 455); for mileage, traveling expenses, or transportation, for transportation of dependents, and for packing and transportation of baggage, as authorized by law, for officers, warrant officers, and enlisted men of the Regular Army traveling on duty pertaining to or on detail to or relief from duty with the Reserve Officers' Training Corps; for the maintenance, repair, and operation of motor vehicles, $4,467,461, of which $400,000 shall be available immediately.

The amendment was agreed to.

The next amendment was, on page 57, line 10, before the word "units", to strike out the comma and "Medical Corps, Dental Corps, or Veterinary", so as to make the additional proviso read:

Provided further, That none of the funds appropriated in this act shall be available for any expense on account of any student in Air Corps units not a member of such unit on May 5, 1932, but such stoppage of further enrollments shall not interfere with the maintenance of existing units.

The amendment was agreed to.

The next amendment was, under the subhead "Citizens' Military Training Camps", on page 59, line 7, after the word "injury", to insert "or disease contracted", and in line 12, after the words "in all", to strike out "$987,213" and insert "$2,687,213", so as to read:

For furnishing, at the expense of the United States, to warrant officers, enlisted men, and civilians attending training camps maintained under the provisions of section 47d of the National Defense Act of June 3, 1916, as amended (U.S.C., title 10, sec. 442), uniforms, including altering, fitting, washing, and cleaning when necessary, subsistence, or subsistence allowances and transportation, or transportation allowances, as prescribed in said section 47d, as amended; for such expenditures as are authorized by said section 47d as may be necessary for the establishment and maintenance of said camps, including recruiting and advertising therefor, and the cost of maintenance, repair, and operation of passenger-carrying vehicles; for expenses incident to the use, including upkeep and depreciation costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the War Department; for gymnasium and athletic supplies (not exceeding $20,000); for mileage, reimbursement of traveling expenses, or allowance in lieu thereof as authorized by law, for officers of the Regular Army and Organized Reserves, and for the travel expenses of enlisted men of the Regular Army, traveling on duty in connection with citizens' military training camps; for purchase of training manuals, including Government publications and blank forms; for medical and hospital treatment, subsistence, and transportation, in case of injury or disease contracted in line of duty, of members of the citizens' military training camps and for transportation and burial of remains of any such members who die while undergoing training or hospital treatment, as provided in the act of April 26, 1928 (U.S.C., supp. VI, title 10, secs. 454, 455); in all, $2,687,213.

The amendment was agreed to.

The next amendment was, on page 61, line 4, to strike out "$15,631" and insert "$17,178", so as to read:

NATIONAL BOARD FOR PROMOTION OF RIFLE PRACTICE, ARMY

QUARTERMASTER SUPPLIES AND SERVICES FOR RIFLE RANGES FOR CIVILIAN INSTRUCTION

To establish and maintain indoor and outdoor rifle ranges for the use of all able-bodied males capable of bearing arms, under reasonable regulations to be prescribed by the National Board for the Promotion of Rifle Practice and approved by the Secretary of War; for the employment of labor in connection with the establishment of outdoor and indoor rifle ranges, including labor in operating targets; for the employment of instructors; for clerical services, including not exceeding $15,000 in the District of Columbia; for badges and other insignia; for the purchase of materials, supplies, and services; and for expenses incidental to instruction of citizens of the United States in marksmanship and their participation in national and international matches, to be expended under the direction of the Secretary of War, $17,178.

The amendment was agreed to.

The next amendment was, under the heading "Title II—Nonmilitary Activities of the War Department—Corps of Engineers, Rivers and Harbors", on page 65, line 24, after the word "law", to strike out "$23,702,645, of which sum $25,000 shall be available for conducting a survey of Governors Island, N.Y., to determine its usefulness and adaptability as an airport and the cost of accomplishing all work incidental to effecting the change", and insert "$23,966,645", so as to read:

To be immediately available and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers:

For the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for survey of northern and northwestern lakes, and other boundary and connecting waters as heretofore authorized, including the preparation, correction, printing, and issuing of charts and bulletins and the investigation of lake levels; for prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City; for the expenses of the California Débris Commission in carrying on the work authorized by the act approved March 1, 1893 (U.S.C., title 33, sec. 661); for examinations, surveys, and contingencies of rivers and harbors; and for printing, including illustrations, as may be authorized by the Committee on Printing of the House of Representatives, either during a recess or session of Congress, of surveys under House Document No. 308, Sixty-ninth Congress, first session, and section 10 of the Flood Control Act, approved May 15, 1928 (U.S.C., supp. VI, title 33, sec. 702j), and such surveys as may be printed during a recess of Congress shall be printed as documents of the next succeeding session of Congress, and for the purchase of motor-propelled passenger-carrying vehicles and motor boats, for official use, not to exceed $122,417: *Provided*, That no funds shall be expended for any preliminary examination, survey, project, or estimate not authorized by law, $23,966,645.

The amendment was agreed to.

The next amendment was, on page 66, after line 13, to insert:

Flood control, Mississippi River and tributaries: For prosecuting work of flood control in accordance with the provisions of the Flood Control Act, approved May 15, 1928 (U.S.C., supp. VI, title 33, sec. 702a), $50,000,000: *Provided*, That this sum shall be reduced by an amount equal to any amount that may hereafter be allotted for the purposes named herein from any Federal relief or other Federal emergency appropriations.

The amendment was agreed to.

The next amendment was, on page 67, line 3, to strike out "$318,114" and insert "$341,291", so as to read:

Emergency fund for flood control on tributaries of Mississippi River: For rescue work and for repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood, in accordance with section 7 of Flood Control Act, approved May 15, 1928 (U.S.C., supp. VI, title 33, sec. 702g), $341,291.

The amendment was agreed to.

Mr. COPELAND. Mr. President, I have one further amendment to offer on behalf of the committee, which I send to the desk.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 36, after line 5, it is proposed to insert the following:

For an additional amount for the Air Corps, Army, to be expended in the discretion and under the direction of the President, for improvement, development, and augmentation of military aviation matériel, and for training of military aviation personnel, including the purchase and/or construction of buildings and other necessary military aviation facilities, and employment of civilian personnel, notwithstanding the limitations contained in any appropriations for Air Corps, Army, fiscal year 1935, to be immediately available, $10,000,000.

The amendment was agreed to.

Mr. SHEPPARD. I move to amend on page 52, line 7, after the word "all", by striking out "$3,986,859", and inserting in lieu thereof "$6,500,000." My amendment would insert the figures originally requested by the War Department.

Mr. President, if the present figures stand, it means that Reserve officers will train only once every 6 years, whereas the amount originally requested by the War Department would enable them to train once every 3 years. This is the training under which a Reserve officer can maintain his efficiency for active duty.

The War Department has for its ideal the training every year of every combat Reserve officer

It is easily seen that training only once in 6 years represents practically no training at all. The War Department feels that it can maintain a substantial degree of efficiency by training the officers once every 3 years.

Mr. COPELAND. I have no objection to the amendment.

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. DICKINSON subsequently said: Mr. President, it is my understanding that the War Department appropriation bill was passed a little while ago and that there was presented from the floor of the Senate an amendment involving $10,000,000 in the following language:

For an additional amount for the Air Corps, Army, to be expended in the discretion and under the direction of the President, for improvement, development, and augmentation of military aviation matériel, and for training of military aviation personnel, including the purchase and/or construction of buildings and other necessary military aviation facilities, and employment of civilian personnel, notwithstanding the limitations contained in any appropriations for Air Corps, Army, fiscal year 1935, to be immediately available, $10,000,000.

I call attention to the fact that this is just a continuation of the centralization of power in the Executive to which I have been objecting from the beginning. It means that we have given to the President of the United States, to do with as he pleases, $10,000,000 more to be played with in the aviation field. I called attention to this item in the committee. It was there held out of order. Now it has been presented from the floor as an amendment and has been adopted. I was necessarily absent from the Chamber at the time of the adoption of the amendment and therefore I could not make this statement at that time.

Mr. President, for many years we have been developing an air corps in the Army. There is no reason why this $10,000,000 should not have been added to the regular appropriation for the Army if we want to increase the air facilities of the Army; but instead of that the amendment is offered in such form as to constitute a special jack-pot fund in the hands of the President to do with as he pleases.

I think this is merely another step along a line which I believe to be in the wrong direction. We have facilities for the development of the aircraft in the Army and if we want to appropriate additional money for that purpose it should have been granted in the regular way.

Instead of doing that we are continuing the policy that has been in vogue ever since this administration came into power, of putting other funds into the hands of the President to do with as he pleases. I think it is a vicious type of legislation. I think we ought not to submit to it. I think we ought to call especial attention to it every time such legislation is presented. In the end I believe we ought to come back to the old practice of permitting the business of government to run in the usual channel, permitting the appropriations to be handled by the usual authorities, and that we ought to pursue that course in the future for such extensions as we want to make in the different bureaus and departments of the Government.

CARRIAGE OF AIR MAIL BY THE ARMY

Mr. McNARY. Mr. President, a desire has been expressed for a record vote on the measure known as the "McKellar bill", the bill providing for the carriage of the air mail by the Army. I therefore ask unanimous consent that the vote by which the bill was passed be reconsidered.

The PRESIDING OFFICER (Mr. COPELAND in the chair). Is there objection? The Chair hears none, and the vote is reconsidered.

Mr. ROBINSON of Arkansas. Mr. President, I have no objection to the request. I understand that the Senator is ready to have a vote taken on the bill. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Bailey	Barkley	Brown
Austin	Bankhead	Black	Bulkley
Bachman	Barbour	Bone	Bulow
Byrd	Gibson	Lonergan	Russell
Byrnes	Goldsborough	Long	Schall
Capper	Gore	McGill	Sheppard
Carey	Hale	McKellar	Shipstead
Clark	Harrison	McNary	Smith
Connally	Hastings	Metcalf	Steiwer
Copeland	Hatch	Neely	Thomas, Utah
Costigan	Hatfield	Norris	Thompson
Couzens	Hayden	O'Mahoney	Townsend
Davis	Hebert	Overton	Trammell
Dickinson	Johnson	Pittman	Tydings
Dieterich	Kean	Pope	Vandenberg
Dill	Keyes	Reed	Van Nuys
Fess	King	Reynolds	Walcott
Frazier	La Follette	Robinson, Ark.	Walsh
George	Logan	Robinson, Ind.	Wheeler

The PRESIDING OFFICER. Seventy-six Senators having answered to their names, a quorum is present.

The question is, Shall the bill pass?

Mr. ROBINSON of Arkansas. I ask for the yeas and nays.

Mr. REED. Mr. President——

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. REED. I will ask recognition after the roll call.

The yeas and nays were ordered, and the Chief Clerk called the roll.

Mr. HATFIELD. I have a general pair with the senior Senator from Florida [Mr. FLETCHER]. I understand that, if he were present, he would vote "yea." If I were at liberty to vote, I should vote "nay." I withhold my vote.

Mr. FESS (after having voted in the negative). I have a pair with the senior Senator from Virginia [Mr. GLASS]. I transfer that pair to the junior Senator from Maine [Mr. WHITE], and will let my vote stand.

Mr. WALCOTT. I have a general pair with the junior Senator from California [Mr. McADOO]. I thought he was in the Chamber, but find he is not. I therefore withhold my vote. If at liberty to vote, I should vote "nay."

Mr. WALSH. My colleague [Mr. COOLIDGE] is unavoidably absent. If present, he would vote "yea."

Mr. ROBINSON of Indiana (after having voted in the negative). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. Has that Senator voted?

The VICE PRESIDENT. He has not voted.

Mr. ROBINSON of Indiana. Then, Mr. President, in his absence, I am forced to withdraw my vote.

Mr. HEBERT. I desire to announce that the senior Senator from Missouri [Mr. PATTERSON] is paired with the junior Senator from New York [Mr. WAGNER]. The Senator from Missouri [Mr. PATTERSON] would vote "nay" if present. I am advised that the junior Senator from New York [Mr. WAGNER] would, if present, vote "yea."

Mr. ROBINSON of Arkansas. I desire to announce that the Senator from Arizona [Mr. ASHURST], the Senator from Wisconsin [Mr. DUFFY], the Senator from Montana [Mr. ERICKSON], the Senator from Florida [Mr. FLETCHER], the Senator from Illinois [Mr. LEWIS], the Senator from California [Mr. McADOO], the Senator from Nevada [Mr. McCARRAN], the Senator from Mississippi [Mr. STEPHENS], the Senator from Oklahoma [Mr. THOMAS], and the Senator from New York [Mr. WAGNER] are necessarily detained from the Senate on official business.

I regret to announce that the Senator from Iowa [Mr. MURPHY] is detained from the Senate on account of a severe cold, and that the Senator from Virginia [Mr. GLASS] is detained by illness.

Mr. HEBERT. I desire to announce that the Senator from Idaho [Mr. BORAH], the Senator from North Dakota [Mr. NYE], the Senator from New Mexico [Mr. CUTTING], the Senator from South Dakota [Mr. NORBECK], the Senator from Missouri [Mr. PATTERSON], and the Senator from Maine [Mr. WHITE] are necessarily absent.

The result was announced—yeas 51, nays 22, as follows:

YEAS—51

Adams	Brown	Copeland	Gore
Bachman	Bulkley	Costigan	Harrison
Bailey	Bulow	Couzens	Hatch
Bankhead	Byrd	Dieterich	Hayden
Barkley	Byrnes	Dill	Johnson
Black	Clark	Frazier	King
Bone	Connally	George	La Follette

Logan	O'Mahoney	Russell	Trammell
Lonergan	Overton	Sheppard	Tydings
McGill	Pittman	Shipstead	Van Nuys
McKellar	Pope	Smith	Walsh
Neely	Reynolds	Thomas, Utah	Wheeler
Norris	Robinson, Ark.	Thompson	

NAYS—22

Austin	Fess	Kean	Schall
Barbour	Gibson	Keyes	Steiwer
Capper	Goldsborough	Long	Townsend
Carey	Hale	McNary	Vandenberg
Davis	Hastings	Metcalf	
Dickinson	Hebert	Reed	

NOT VOTING—23

Ashurst	Erickson	McCarran	Stephens
Borah	Fletcher	Murphy	Thomas, Okla.
Caraway	Glass	Norbeck	Wagner
Coolidge	Hatfield	Nye	Walcott
Cutting	Lewis	Patterson	White
Duffy	McAdoo	Robinson, Ind.	

So the bill was passed.

AGREEMENT TO CONSIDER CALENDAR TOMORROW

Mr. ROBINSON of Arkansas. Mr. President, I ask unanimous consent that tomorrow, after the morning business shall have been concluded, the Senate proceed to the consideration of unobjected bills on the calendar.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

BONDS OF HOME OWNERS' LOAN CORPORATION

Mr. BULKLEY. Mr. President, I move that the Senate proceed to the consideration of the bill (S. 2999) to guarantee the bonds of the Home Owners' Loan Corporation, to amend the Home Owners' Loan Act of 1933, and for other purposes.

Mr. ROBINSON of Arkansas. Mr. President, I will state that if the bill the Senator from Ohio has in mind is made the unfinished business, it is my purpose to move an adjournment of the Senate this evening.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Ohio.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 2999) to guarantee the bonds of the Home Owners' Loan Corporation, to amend the Home Owners' Loan Act of 1933, and for other purposes, which had been reported from the Committee on Banking and Currency without amendment.

Mr. ROBINSON of Indiana. Mr. President, because of the unusual confusion in the Chamber I was unable to hear the Senator from Ohio. May I inquire of anyone who may be able to supply the information what was the motion of the Senator from Ohio [Mr. BULKLEY]?

The VICE PRESIDENT. The motion was that the Senate proceed to the consideration of the Home Owners' Loan bill. That motion has been agreed to.

Mr. ROBINSON of Arkansas. And the Vice President has laid the bill before the Senate and it now is the unfinished business of the Senate.

The VICE PRESIDENT. That is correct.

ADJOURNMENT

Mr. ROBINSON of Arkansas. I move that the Senate adjourn until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 5 o'clock and 7 minutes p.m.) the Senate adjourned until tomorrow, Thursday, March 15, 1934, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 14 (legislative day of Feb. 28), 1934

POSTMASTERS

ARKANSAS

William Edgar Bradley, Alma.
Ralph A. Dickey, Altheimer.
Mary H. Morgan, Ashdown.
John R. Harkness, Belleville.
Robert D. Reagan, Danville.
Walter R. Dunn, Foreman.
Lillie Q. Lowe, Gillett.
Robert Roy Millwee, Nashville.
Myrt Walrond, Pocahontas.
Guy M. Veazey, Sheridan.
Fred W. Knickerbocker, Sparkman.

CONNECTICUT

Daniel J. Kelley, Deep River.

GEORGIA

John H. Sheram, Tennille.

IDAHO

Lowell H. Merriam, Grace.

IOWA

Hilda Blau, Alexander.
Nels A. Christensen, Alta.
Thomas B. O'Donnell, Anthon.
Celia Boom, Aplington.
John S. Vifquain, Belle Plaine.
Wilbur H. Fishman, Cherokee.
Herbert A. Lowenberg, Donnellson.
Clifford J. Hayes, Dunkerton.
Harry R. Merchant, Garrison.
Martin C. Ennor, George.
Howard C. Shafer, Hampton.
William J. Lindaman, Little Rock.
Asa Earl Boyer, Maquoketa.
Walter R. Meier, Readlyn.
George Ritz, Rockwell City.
Justin Foley, Sanborn.
Henry M. Michaelson, Sergeant Bluff.
William J. Hollander, Sheldon.
Lewis E. Mease, Truro.
John S. Cullen, Whittemore.
Paul Max Clark, Woodbine.
H. Clyde Calonkey, Woodward.

KANSAS

Walter J. Barnum, Barnard.
Charles E. Mansfield, McCune.

John W. Sheridan, Paola.

KENTUCKY

Arthur E. Smith, Fordsville.
Frank W. Mimms, Trenton.

MARYLAND

Taylor R. Biles, Rising Sun.

MICHIGAN

George W. Hackney, Mount Morris.
James O. McCarthy, Thompsonville.

NEW YORK

Jacob C. Kopperger, Stottville.

OHIO

Carroll S. Irvin, Adena.
Ira A. Foglesong, Barnesville.
Abner C. Barnhouse, Caldwell.
Owen W. Gray, Convoy.
James J. Zerla, Dillonvale.
Ralph L. Jacobs, Gates Mills.
Clifford Carlile, McClure.
Frank J. McCauley, Marietta.
Roland E. Jackson, Neffs.
Philip B. Mason, Pickerington.
Florence J. Hunter, Rayland.
Lesta C. Murphy, Rogers.
Ida L. Flenniken, Smithfield.
George Wiest, Uhrichsville.
William E. Passmore, Washington Courthouse.
Robert Wilson, Westerville.

PENNSYLVANIA

Joseph C. McCormick, Marion Center.
Thomas J. Devon, Moylan.
Esther F. Rivers, Ogontz School.

TENNESSEE

Kleber D. Dunklin, Gallatin.

VIRGINIA

Harry B. Jordan, Bedford.
Alfred C. Darden, Fortress Monroe.
Eddie L. Southard, Standardsville.

WASHINGTON

Curtis M. Wormell, Asotin.
Roy E. Carey, Hartline.
Bertha W. Welsh, Prescott.
Wilson Howe, Tenino.
Louis O. Cochrane, Yelm.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MARCH 14, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

Blessed Lord and only Savior, we rejoice that Thou art back of human appeal and human response. Thou dost crown the path where once we failed; Thou dost brighten the day where once we wandered; Thou dost bless the labor where once we fainted; and Thou dost complete the journey where once we halted. Glory be unto Thy name, O Lord, Most High. We praise Thee, our Heavenly Father, that when heart and flesh have been weary with the heat and burden of the day, Thou hast been the haven of comfort and rest. Do Thou bestow blessings of happiness and peace upon all humanity, and may it be guided and administered by men of truth, honor, and unselfishness. Heavenly Father, make us all increasingly better and wiser, and each day may we strive toward an expanding estate of a newer manhood. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had appointed Mr. WALSH and Mr. BORAH members of the joint select committee on the part of the Senate as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments", for the disposition of useless papers in the Department of Labor.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7513) entitled "An act making appropriations for the Departments of State and Justice and for the Judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1935, and for other purposes", requests a conference with the House thereon, and appoints Mr. MCKELLAR, Mr. RUSSELL, Mr. PITTMAN, Mr. HALE, and Mr. NYE to be conferees on the part of the Senate.

CONTESTED ELECTION—ANNE E. FELIX *v.* MICHAEL J. MULDOWNEY

The SPEAKER laid before the House the following communication from the Clerk of the House, which was read, and, together with the accompanying papers, referred to the Committee on Elections No. 2, and ordered printed:

HOUSE OF REPRESENTATIVES,
CLERK'S OFFICE,
Washington, D.C., March 13, 1934.

The SPEAKER,
House of Representatives, Washington, D.C.

SIR: I have the honor to lay before the House of Representatives the contest for a seat in the House of Representatives for the Seventy-third Congress of the United States for the Thirty-second Congressional District of the State of Pennsylvania, *Anne E. Felix* v. *Michael J. Muldowney*, notice of which has been filed in the office of the Clerk of the House; and also transmit herewith original testimony, papers, and documents relating thereto.

In compliance with the act approved March 2, 1887, entitled "An act relating to contested-election cases", the Clerk has opened and printed the testimony in the above case, and such portions of the testimony as the parties in interest agreed upon or as seemed proper to the Clerk, after giving the requisite notices, have been printed and indexed together with the notices of contest, and the answers thereto and original papers and exhibits have been sealed up and are ready to be laid before the Committee on Elections.

Two copies of the printed testimony in the aforesaid case have been mailed to the contestant and the same number to the contestee, which, together with the briefs of the parties, will be laid before the Committee on Elections to which the case shall be referred.

Yours respectfully,

SOUTH TRIMBLE,
Clerk of the House of Representatives.

PAY OF OFFICERS AND EMPLOYEES IN FOREIGN SERVICE

Mr. McREYNOLDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 7808, to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes, with Senate amendments, and concur in the Senate amendments. The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, after "officers", insert ", enlisted men."
Page 2, line 6, after "officers", insert ", enlisted men."
Page 2, lines 9 and 10, strike out "except the Comptroller General of the United States."
Page 2, line 11, after "officers", insert ", enlisted men."

The SPEAKER. Is there objection to the request of the gentleman from Tennessee [Mr. MCREYNOLDS]?

Mr. BRITTEN. Mr. Speaker, reserving the right to object, is this the bill which raises the salaries of Foreign Service officers 50 percent?

Mr. McREYNOLDS. I do not agree that that is provided for in this bill. That is what the gentleman calls it.

Mr. BRITTEN. The Foreign Service officers' bill?

Mr. McREYNOLDS. Yes.

Mr. BRITTEN. I should like to say that on the day when the committee became very unruly on that Foreign Service officers' bill, I had an amendment which was sent to the Clerk's desk, but which, because of the noise, could not be heard nor understood, but was voted down, principally by the Democratic side of the House, which provided for the inclusion of the enlisted men in that pay increase. We took care of all the officers; we took care of all the highly paid men and women, but we ignored the enlisted men at that time. I am very glad to see that the Senate has amended the bill properly.

Mr. FISH. I want to substantiate what the gentleman has said.

Mr. BLANTON. Mr. Speaker, I reserve the right to object, so that we may get some information about one very important amendment, the one relating to the Comptroller General of the United States. When Congress created this office nearly a dozen years ago, it made the Comptroller General responsible only to the Congress of the United States. He has saved multiplied millions of dollars of the people's tax money, by holding departments in check and making them track the law and in refusing to allow them to spend public money in ways not authorized by law. I quote the following from today's Washington Herald:

JOHNSON WINS OVER MCCARL IN EAGLE ROW—N.R.A. HEAD APPEALS TO CONGRESS AFTER COMPTROLLER REJECTS $308,000 BILL FOR LABELS

A row between Comptroller General McCarl and the N.R.A.—the most serious of its kind to date—was disclosed last night when it was learned Gen. Hugh S. Johnson has had to go over McCarl's head to a congressional committee in order to obtain approval of a $308,000 expenditure for printing Blue Eagles.

The developments only intensify the strife between McCarl and the emergency departments which continually are running afoul of his guardianship over public funds, since Johnson has proved for the first time that it is not necessary to obtain the Comptroller's approval of expenditures.

McCarl, who under the law must sanction each Government expense bill and who need answer only to Congress, steadfastly has refused to approve the N.R.A.'s expenditures for printing the Blue Eagles scattered over the land last summer.

He ruled they were illegal because the N.R.A. did not have the printing done at the Government Printing Office, but parceled the job out to 25 firms and paid the $308,000 expense before he had a chance to pass on its legality.

McCarl's friends report the Comptroller General was astounded because there was a dearth of competitive bidding.

Finally somebody got the idea of appealing to the Joint Committee on Printing, which is composed of Senators and Representatives, does all the purchasing of paper for the Government, and alone has the authority to allow a department to patronize a private printing establishment.

The chairman, Senator FLETCHER (D.), of Florida, came to Johnson's aid with a retroactive order permitting him to patronize whomever he desired. There was nothing for McCarl to do after that but begin clearing N.R.A. vouchers again.

Of course, to anyone who is posted the above statements are ridiculous. Since the Comptroller General is by law responsible only to Congress, neither the Joint Committee on Printing, nor any Senator, nor any chairman in either body, could go over the head of the Comptroller General. Only Congress itself could do it. He answers to no one but Congress. His authority is supreme.

I want to ask the gentleman from Tennessee some questions. The last amendment made by the Senate strikes out the words "the Comptroller General of the United States." Just what effect, generally, on his authority does that have in this bill? Does that permit all expenditures under it to be made without the audit and authority of the Comptroller General of the United States? If it does, then we ought to strike that amendment from the bill.

Mr. McREYNOLDS. It is simply this: The rates of exchange in the different countries are not uniform, and it is absolutely impossible for the Comptroller General to figure these different propositions at different times, with any regularity.

Mr. BLANTON. If it involves only exchange rates, that is unimportant. Then the only thing that is taken away from the authority of the Comptroller General of the United States by this amendment, as I understand the gentleman, is the right to figure the exchange?

Mr. McREYNOLDS. That is what I understand.

Mr. BLANTON. Is that the only thing it changes?

Mr. McREYNOLDS. That is the only thing, as I understand it.

Mr. BLANTON. If that is so, then I shall not object. But the article in the Herald this morning has made me apprehensive. Ever since we established this position of Comptroller General, and required him to audit all expenditures, and to see that none were made by any department without due authority of law, attempt after attempt has been made, year after year, by department after department, seeking to override his authority. But he, being the creature of Congress, and he, being accountable only to Congress, we have always backed his efforts to keep expenditures within the law. And departments might just as well realize, now and at all times, that they cannot run roughshod over the Comptroller General, and they cannot override him, and they cannot ignore him, but they must respond to his orders, when he catches them spending money unlawfully. We clothed him with his authority, for the express purpose of watching them, and checking up on them, and stopping them, when they exceed their lawful authority.

There is no committee of this Congress that has authority to override the power and authority of the Comptroller General of the United States. Only the Congress of the Nation can override him, and it can do it only by passing a law that repeals the authority he now possesses. It requires a law and not action by a committee. I am a little watchful for these amendments which "strike out the Comptroller General" of the United States.

Mr. McREYNOLDS. I am thoroughly in sympathy with what the gentleman has stated.

Mr. KELLER. Reserving the right to object, I should like to have that section read again, to be sure about that, because I agree with the gentleman from Texas.

Mr. McREYNOLDS. I can assure the gentleman it is all right.

Mr. KELLER. Mr. Speaker, I withdraw my request.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee [Mr. McREYNOLDS]?

There was no objection.

The Senate amendments were agreed to.

PERMISSION TO ADDRESS THE HOUSE

Mr. GRAY. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes on the public character of Oscar Underwood and the World War soldiers of the South.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. BLANTON. Mr. Speaker, we have important business to come before the House; and while I am as good a friend as the gentleman from Indiana has here, and I was a good friend and great admirer of Oscar Underwood, and I have proved my friendship for the World War soldiers of the South, however I must object. We have unusually important business to attend to today both for veterans and farmers. I object.

INDEPENDENT OFFICES APPROPRIATION BILL, FISCAL YEAR 1935

Mr. O'CONNOR. Mr. Speaker, I call up House Resolution 299.

The Clerk read as follows:

House Resolution 299

Resolved, That immediately upon the adoption of this resolution the Committee of the Whole House on the state of the Union be, and it is hereby, discharged from the further consideration of the bill H.R. 6663 and the Senate amendments thereto; that the said Senate amendments be, and hereby are, disagreed to by the House; that the conference requested by the Senate on the disagreeing votes of the two Houses on the said bill be, and hereby is, agreed to by the House; that the Speaker shall immediately appoint the conferees without intervening motion; and that the conferees on the part of the House are hereby given specific authority to agree, with or without amendment, or disagree to any amendment of the Senate to the bill H.R. 6663 notwithstanding the provisions of clause 2 of rule XX.

Mr. O'CONNOR. Mr. Speaker, I yield 30 minutes to the gentleman from Pennsylvania [Mr. RANSLEY].

Mr. Speaker, as probably everybody knows, the purpose of this Resolution 299 is to send the independent offices appropriation bill to conference. The rule, if adopted, sends the bill to conference and gives the conferees on the part of the House power to agree to any of the Senate amendments, with or without amendment offered by our own conferees, or to disagree to any of the Senate amendments.

The resolution also contains, in the last two lines, a waiver of the provisions of clause 2 of rule XX.

Clause 2 of rule XX provides—

No amendment of the Senate to a general appropriation bill which would be in violation of the provision of clause 2 of rule XXI, if said amendment had originated in the House, nor any amendment of the Senate providing for an appropriation upon any bill other than a general appropriation bill, shall be agreed to by the managers on the part of the House unless specific authority to agree to such amendment shall be first given by the House by a separate vote on every such amendment.

Clause 2 of rule XXI referred to in the foregoing quotation provides:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill: *Provided*, That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law or the House Members of any such commission having jurisdiction of the subject matter of such amendment, which amendment being germane to the subject matter of the bill shall retrench expenditures.

Under the terms of this resolution before us, the foregoing provisions are waived, and, as I understand, for convenience and expedition.

There has been a great deal of misunderstanding about the procedure in reference to this bill. When a bill originating in the House is amended in the Senate, under the regular rules of the House, the Speaker is obliged to refer the Senate amendments to the committee which had jurisdiction over the bill to consider those amendments. For reason of expedition, however, this rule is usually, and almost invariably, obviated by the unanimous consent of the House sending the bill to conference.

The rule can also be obviated by a special order, or by suspension of the rules. In this particular instance it was

apparent to all and undeniable that unanimous consent to send the bill to conference would not be given, that the request to send the bill to conference would be objected to; so the Speaker sent the bill to the Appropriations Committee in the regular way.

The bill should have been sent to conference, and to send it to conference now, in my opinion, deprives no Member of either body, deprives no person who might benefit by these amendments of any of his rights. When our conferees and the Senate conferees sit down with this measure and consider these Senate amendments, they will bring a report back to the House. That report can be voted up or voted down. If the report is not satisfactory to a majority of the Members of this body, then the report can be voted down and the amendments considered and voted on separately, or they can be amended, as the Membership of this House see fit. In other words, this House can always function by a majority of its Members, and no individual here, and no committee or group here, can ever prevent a majority of the Members functioning as it sees fit. We pride ourselves on this feature of our rules which does not obtain in some other bodies.

Mr. BRITTEN. Mr. Speaker, will the gentleman yield?

Mr. O'CONNOR. I yield for a brief question.

Mr. BRITTEN. When the report comes back, will it be possible for the House to vote on any separate item in the report?

Mr. O'CONNOR. Not without voting down the report.

Now, I fully realize the responsibility placed on all of us today. I am willing to accept mine. Let me say in good faith that I hope that action on the resolution will not resolve into a partisan issue. If it is true, as reported, that the Republicans will unanimously oppose this resolution, the responsibility for the consequences will be theirs, because, Mr. Speaker, it is my opinion that the net result of a defeat of this resolution will be that the veterans of our wars will not obtain any relief whatsoever in those cases of which they have been complaining. That is going to be the unfortunate result if this bill does not go to conference. Let us face the situation fairly and squarely. It has already been stated on the Republican side of the House, I think by the gentleman from New York [Mr. TABER], that if this bill does not go to conference, or if some agreement is not worked out as to these Senate amendments, and the bill is vetoed, we shall have no legislation in reference to these matters contained in this bill, with the unfair and disastrous result that the veterans will get no relief whatsoever while the Federal employees will have restored to them their entire 15 percent pay cut. The reason for this is, of course, because veterans' compensation, and so forth, is permanent law while the pay cuts expire June 30.

If I were compelled to choose between the interests of the veterans of our wars and the interests of our Federal employees, there is only one choice I could conscientiously make. I would take my stand with the veterans. [Applause.] At the same time I am most anxious to do something for the Federal employees as I am especially anxious to do something for the veterans; but unless this matter is worked out satisfactorily, the veterans of this country are going to be the only losers. Do you want that to happen? Do you want to face your own constituents and answer that by reason of what you did here today you increased your own present salary by $1,500 and at the same time accomplished nothing for the veterans?

Mr. MOTT. Mr. Speaker, will the gentleman yield?

Mr. O'CONNOR. I yield for a brief question.

Mr. MOTT. Is the gentleman undertaking to tell us that unless we agree to do something that the President approves of in advance that the President will veto this legislation and that the veterans will get nothing?

Mr. O'CONNOR. Is that the gentleman's question?

Mr. MOTT. That is the gentleman's question.

Mr. O'CONNOR. I have not said that, and nobody else has said any such thing. It is conjured in the gentleman's mind. All I am asking is that this bill be handled in this House in the usual way, that it be sent to conference where the conferees of both Houses may consider it. If they do not succeed in working out some agreement, they can come back to us and the matter is still in our control; that ends it as far as the conference committee is concerned. Then nobody but a majority of this House can defeat the control of the House over this bill or its adoption or amendment in any way desired.

Mrs. KAHN. Mr. Speaker, will the gentleman yield?

Mr. O'CONNOR. I yield.

Mrs. KAHN. Does the gentleman mean to say that if the Republicans vote against this bill, they will be responsible for its defeat? Does not the gentleman realize that we have not enough votes on this side to defeat a rule; that if it is defeated it can only be done by Democratic votes? [Applause.]

Mr. O'CONNOR. No; I do not realize anything of the kind. If the Republicans—or even 40 or 50 of them—would support this resolution, it would be adopted; and I may say this, further, that if the information I gather out of the atmosphere here is correct, and I predict just such unity of action, that the Republican group in this House does vote as a unit against this resolution, let it be recorded in the permanent RECORD that if the veterans lose anything, the Republican Party alone is responsible.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. O'CONNOR. I yield.

Mr. BLANTON. The truth of the matter is that the Democratic administration leaders headed by the distinguished gentleman from Tennessee [Mr. BYRNS], whom we Democrats elected as our Democratic floor leader, and the Rules Committee, are sponsoring this rule in the interest of the veterans and the employees and the Democratic Party. If this rule is adopted, and this bill is allowed to go to conference, it is quite likely that an agreement can be reached, that will grant justice to employees, and justice to all veterans of all wars, and at the same time meet with the approval of the President, and become law. Whereas if the rule is voted down, and we should not be able to send this bill to conference, we may not be able to secure any benefits for veterans. Just as the minority leader Mr. SNELL and the Republican leaders of this House voted against the Patman bill the other day, and against paying the adjusted-service certificates, they are now organizing to cast a solid Republican vote against this rule. Are we Democrats going to be led off by Leader SNELL and his Republicans?

Mr. GOSS. Mr. Speaker, will the gentleman yield for a question?

Mr. O'CONNOR. For a brief question.

Mr. GOSS. If this bill goes to conference without the conferees being instructed, and if the conferees on the part of the Senate should withdraw, then the House bill would become law; is that correct?

Mr. O'CONNOR. That is undoubtedly true, but it takes a far-fetched imagination to vision any such result happening.

Mr. GOSS. Of course, if the conferees withdrew, then the House bill would pass.

Mr. O'CONNOR. There is another consideration that faces us. I am sure that all the Members of this House have an equal interest in the affairs of all the veterans of all our wars. They surely feel that there is no reason to favor the veterans of one war over the veterans of another war. Propaganda has reached my desk this morning from someone claiming to represent the veterans of one small war, demanding that this resolution be defeated and the bill not sent to conference. This morning, also, all Members received a two-page letter from the American Legion signed by the vice chairman of its legislative committee, in which there appears no opposition to sending this bill to conference. The American Legion requests that three of the amendments adopted by the Senate be finally adopted in the bill. Of course, this may and can be the result if the bill is sent to conference, and the sending of the bill to conference will not in the slightest way interfere with the final adoption of the program of the American Legion, nor will such a procedure interfere at all with the complete restora-

tion of allowances to Spanish War veterans, nor will such a procedure interfere one iota with the complete restoration of the pay of the Federal employees.

We should, of course, treat all our veterans alike. If they served our country, whether they served in one war or any other war, a big war or a little war, we should make no distinction among them. Mr. Speaker, I earnestly hope, in behalf of the veterans and our Federal employees that the problem before us will be solved in the usual, customary way and that this resolution will be adopted, sending the bill to conference, so that it may be brought back to us, when the responsibility will be placed upon us in the final action we take after every effort has been made to work out in conference the differences between the two Houses. [Applause.]

Mr. RANSLEY. Mr. Speaker, I yield 8 minutes to the gentleman from New York [Mr. SNELL], the Republican floor leader.

Mr. SNELL. Mr. Speaker, I am not at all surprised at this rule. It is the regular Democratic rule. As far as I remember, since they have been in control of the House of Representatives during the last 2½ years, they have used every effort possible to deprive the individual Member of his rights as a Member in expressing himself on the legislation before the House. If I remember correctly—and I think I do—I do not recall a single piece of important controversial legislation that has been allowed to come before the House under the general rules of the House where the individual Member of the House had the right to express himself and had the right of debate and the right to vote the dictates of his own conscience in regard to the legislation carried in the act.

Mr. DOXEY. Will the gentleman yield?

Mr. SNELL. Not now.

Mr. DOXEY. What about the Bankhead bill?

Mr. SNELL. From the very beginning you have run absolutely opposite to the professed and proclaimed desire on the part of the Democratic Party during the 12 years the Republicans were in control of this House. I cannot help but think of the number of times that nearly every one of you older Members has taken the floor and proclaimed to the world, "When we get control of the House we will give the individual Members an opportunity to express themselves and to vote their convictions on every measure before the House." You have never done this in a single instance. [Applause.]

Mr. KELLER. Will the gentleman yield?

Mr. SNELL. Not at the present time. As a matter of fact, several statements made by the distinguished gentleman from New York [Mr. O'CONNOR] are not worthy of comment, because they are so far from the facts in the case; but there are one or two to which I desire to call attention.

The gentleman said, "When you adopt this rule it does not deprive a single Member of the House of one of his rights." I know the gentleman from New York [Mr. O'CONNOR] did not mean that statement. This rule absolutely deprives you of every single right in connection with any one of the individual items carried in this appropriation bill and the legislation that was put on in the other body. The only thing left for you to do if this rule is adopted is to vote up or down a conference report. When the gentleman made the further statement that this was the usual way, all I may say in reply is I have been here nearly 20 years and it has never been done before since I have been a Member of this House; and if my friend from New York can mention one single instance where it has ever been done, I will yield for that purpose.

Mr. O'CONNOR. What I intended to say in that respect was sending the bill to conference was the usual way.

Mr. SNELL. That is not the way the gentleman used it in his argument and he knows it. That was not the impression you intended to leave with the Members.

Mr. O'CONNOR. Yes; it was.

Mr. SNELL. No; it was not. I will leave that to the House.

When the gentleman says that the veterans will not get any legislation unless we send the bill to conference in this way, I dispute the statement, for every intelligent Member knows it is not so, and we will prove it to you before the day is over.

Mr. KVALE. Will the gentleman yield?

Mr. SNELL. No; I am not going to yield at the present time.

When he gives credit to the minority party for controlling the House, and we have 115 against 315, he pays us a great compliment and does not speak very complimentary of his own side and his own organization. [Applause.]

Mr. Speaker, the House is entitled to consider this legislation in detail and on its merits. Over in the Senate they have added to an appropriation bill an entirely new legislative bill, so to speak, that affects the policy of this Government in one of its most important branches, and I maintain that the Members of the House have the right to express themselves on each individual item of this important legislation. As far as I am personally concerned, I do not intend to vote for every one of the Senate amendments, but I have the right as a Member of this House to express myself on each one of them whether I am for or against them. I think it is a pretty sad commentary on a party that has a 200 majority in this House to say to the world that you have not confidence in the intelligence and the understanding of your own Members, or else you have not faith enough in the merits of the legislation you are sponsoring, to allow it to come up for free and open discussion on the floor of the House.

It seems to me you are trying to do here just what the administration is trying to do in every other department of this Government. You are trying to make the House of Representatives a collective, socialistic state, where only two or three of you speak for the rest of us. When we consider your whole action in the last 2 years since you have been in control—if you will excuse me for making the remark—in my judgment, in trying to make a new deal you have made a 100-percent misdeal. [Applause.]

Mr. Speaker, I yield back the balance of my time.

Mr. O'CONNOR. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. BULWINKLE].

Mr. BULWINKLE. Mr. Speaker, it is rather surprising to hear the minority leader [Mr. SNELL] protest against rules on veterans' legislation. During the time since I first came to Congress, beginning in the Sixty-seventh Congress, on down through the Seventieth Congress and later on, when the Republicans were in control of this House, not a single piece of veterans' legislation has been brought up on the floor of this House in a way that the Membership could vote on the legislation. [Applause.] It always came up under suspension of the rules or under a rule.

I was on the Veterans' Committee part of that time, and during those years we attempted to have legislation brought up on the floor for free and full consideration by everyone. But no; there is something eating the gentleman from New York [Mr. SNELL] this morning, and it is not the veterans——

Mr. BLANTON. Politics.

Mr. BULWINKLE. Because yesterday the only question asked the gentleman from Virginia that mostly concerned the gentleman from New York was whether or not the House could pass upon the raise in pay for Government employees. The question of veterans' legislation did not apparently concern the gentleman.

Mr. Speaker, I am as much interested in the welfare of the veterans as any man in this House. I do not yield to anyone in that respect; but we all know full well that this bill has to be sent to conference in order that Senate amendment no. 22 may be considered, and this amendment takes in all the legislation for the veterans.

Presumptives? Yes; I am interested in them, and I want to see many of these presumptive cases put back upon the compensation rolls, as they should be.

Mr. HOEPPEL. Will the gentleman yield?

Mr. BULWINKLE. Not now.

Mr. HOEPPEL. I should like to bring out a question about the Democratic platform with reference to veterans.

Mr. BULWINKLE. I would rather not yield just now.

We would all want a great many of them on the rolls, and this can be arranged in conference. This can be arranged by the gentlemen representing the House on the conference committee, both on the Democratic and Republican sides, who will bring back a fair proposition for the House to consider.

Spanish-American War veterans? Yes; but from what I have heard on the floor here there are very few of you who favor the emergency officers.

There are provisions in this bill which you do not want included in the Senate amendment. The gentlewoman from California [Mrs. KAHN] was frank enough to ask the question and to state what you would do on that side, stating that you would vote against this rule and then run out on it.

Mrs. KAHN. I did not say anybody would vote against this rule. I said if we voted against the rule we could not defeat it, because we would need Democratic votes to do that.

Mr. BULWINKLE. If the gentlewoman please, it seems it would, from her inquiry, be the policy of the minority to vote against the rule for political purposes, but the responsibility rests upon you on that side with respect to these veterans just as it does upon our side of the House. [Applause.]

Mr. RANSLEY. Mr. Speaker, I yield myself 2 minutes.

I am opposed to the rule, because it prevents a vote upon the merits of the pay-cut legislation.

Surely, the Members who voted for the bonus, to be consistent, must vote this gag rule down, so as to return to the Spanish War veterans, their widows and orphans, all the benefits denied them by the so-called "Economy Act."

Owing to the increased cost of living, business is told it must pay higher wages to labor. What argument, therefore, have you that the Federal employees should not receive the 15 percent picked from their pockets by the so-called "Economy Act"? You have found money for everything and everybody but the Spanish War veterans, the World War veterans, and the Federal employees.

I sincerely hope that you vote this rule down. [Applause.]

Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Speaker, as Al Smith says, "Let us look at the record." The record is that the independent offices bill came to this House a month or so ago under the most obnoxious, vicious, and revolutionary rule that any measure has ever been introduced under before.

Now it is proposed under a drastic gag rule to again regag the individual Members of the House so that they cannot express their opinion on this legislation. Politics makes strange bedfellows. Only a few days ago I was alined with, if not actually leading the fight for, the administration against the bonus; and this afternoon I am allied with the opposition to the President's program in relation to the restoration of the full pay for Federal employees and, likewise, full restoration of the compensation and benefits to the veterans of the World War with service-connected disabilities and the Spanish War veterans.

The devaluation of the dollar to 59 cents by act of Congress and the increased cost of living, also as a result of congressional action, requires immediate adoption of the proposed legislation to correct obvious injustices. However, there is a far more important issue involved in the pending gag rule than the pay cut, far more important than the restoration of the compensation for the disabled soldiers, and that is the restoration of representative government in the House of Representatives.

You Democrats who come here after having promised your constituents back home that you would vote to liberalize the rules, and vote today to regag yourselves, must forever remain silent on the question of liberalizing the rules of the House.

The other day we passed the bonus bill. The American Legion never asked for the bonus bill, it never approved the bonus bill; the American Legion, however, specifically denounced inflation in their last annual convention. The bonus bill carries inflationary proposals for fiat money, greenbackism, and printing-press methods which are inconsistent with the action of the Legion convention.

The American Legion, however, is squarely behind the bill that is before us with the Senate amendments. The American Legion, Veterans of Foreign Wars, and the Disabled American Veterans are asking for this legislation, whereas the Legion did not ask for the bonus bill.

This bill is merely doing justice to the disabled veterans and to the Federal employees who have been crucified on a cross of inflation and economy. As one who voted for the economy bill, this is the only way of righting the wrong that resulted from the passage of the Economy Act. [Applause.]

Mr. O'CONNOR. Mr. Speaker, I yield 4 minutes to the gentleman from Texas [Mr. PATMAN].

HOW DIFFERENCES CAN BE SETTLED

Mr. PATMAN. Mr. Speaker, there are differences between the House and the Senate on this bill. I do not know of any other way to settle those differences except we have a conference committee, unless we are in favor of what the Senate has done.

WEAPON IN HANDS OF ENEMIES

If I thought any improper amendment was put on by the Senate and I was unobligated, I would vote against the rule, but I think the best way to solve the situation is to send the bill to a conference committee. I do not think we can afford to vote for the amendments. I think it will place, as far as the veterans are concerned, the same club, the same weapon, back into the hands of the enemies of the veterans that they had before the passage of the Economy Act.

If you are in favor of the Senate amendments, you are in favor of putting back on the pension roll those who did not serve during the war, and you are in favor of putting back on the roll remarried widows of veterans and leaving off the widows of veterans who collected 100 percent service-connected pay at the time of their death, and because they did not die of particular injury their dependents have not received any compensation, although they waited on their veteran husbands 10 or 15 years after the war.

The bill does not do anything for them, but it puts remarried widows of Spanish-American War veterans back on the rolls and puts the widows of non-service-connected veterans back on the rolls at $30 a month.

RETIRED EMERGENCY OFFICERS

There is another feature of the bill that you cannot defend. There is a difference of opinion among Members of the House as to the wisdom of this legislation. I recognize the views of my colleagues. I do not impugn their motives. They have as much right to their opinion on this as I have to mine, but the retired emergency officers loaded down the pension rolls at one time and brought the veterans in this country into disrepute.

Mr. HOEPPEL. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I cannot yield. If we vote for these amendments we vote to put the retired emergency officers back on the rolls, several thousands of them, and let them receive from $105 to $416 a month each retired pay for disability, the same disability that an enlisted man by his side receives only $30 a month for. You will let these officers, although they are rich, remain on the rolls, and you fix it so in the Senate amendments that they will draw this money regardless of their wealth and income, and you will fix it so that the Spanish-American War veterans, although they work for the Government and get a large salary each month, will not have to take the reduction to $6 a month that other veterans do. It is full of discriminations and you cannot justify them.

There is only one way that I know of to correct this situation, and that is to send the bill to conference and let these differences be ironed out, if possible, and then let the conferees submit the bill back to this House. Then if we are in favor of it, we will adopt the conference report; if we are against it, we will reject it. [Applause.]

Mr. RANSLEY. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey [Mr. LEHLBACH].

Mr. LEHLBACH. Mr. Speaker, these gentlemen who have spoken in favor of this rule seem to take the position that if this rule in its present shape is not adopted, the bill cannot go to conference. That is nonsense. Furthermore, the gentleman who has just spoken takes the position that unless this rule be adopted in its present form we have to accept the Senate amendments in toto. That is also nonsense.

This rule provides two things which are not usual in rules sending bills to conference. One is contained in the language of the rule, which reads as follows:

That the Speaker shall immediately appoint the conferees without intervening motion.

That means that this House is deprived of the right to instruct its conferees. Next, at the end of the resolution we find the following language:

To agree, with or without amendment, or disagree to any amendment of the Senate to the bill H.R. 6663, notwithstanding the provisions of clause 2 of rule XX.

That means that the House can vote only when the conferees report upon the bill—shall they kill the appropriation bill, or shall they accept, without an opportunity to vote on any individual proposition, the work of the conferees?

If you vote down this rule, what will happen? We will have an opportunity to vote on a straight rule to send the bill to conference, under which we can debate these amendments when it comes time to instruct the conferees, and give them such instructions as we see fit; but if we wish to send the bill to conference without instructions, then when it comes back, and we see what the conferees have done, we can take up provision after provision and vote them up or down without defeating the entire appropriation bill.

Consequently, you cannot escape your responsibility either to the veterans or the employees; you cannot evade the promises that you have made by hiding yourselves behind this rule, by which you are gagging yourselves, when everybody in the country knows that you are purposely gagging yourselves in order to get out of those promises.

Mr. O'CONNOR. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Mr. Speaker, I have read somewhere the caution, "Beware of Greeks bearing gifts." I have been sitting in the front row here, and I saw the distinguished minority leader take the floor and shed crocodile tears, claiming the Members of the majority were being gagged. I am overwhelmed with grief when I consider the solicitude the gentlemen on the Republican side have for us. It has been said by some newspaper writers that the leader of the minority, the distinguished gentleman from New York [Mr. SNELL], lacks a sense of humor. I deny that statement most emphatically, after the statement he made here this morning—he, the father of the worst gag rules that were ever brought into this House. Yet he stood here with a placid countenance, although upon close scrutiny I thought I detected behind his calm demeanor the glimmer of a faint smile—I think he had his fingers crossed—when he bemoaned the fate of the Democrats who are in power in the House, and who have the responsibility in this House, telling them you are gagged, you are gagged, you are gagged. Therefore, I repeat, let no one again charge our minority leader with lacking a sense of humor. Everyone who spoke on the minority side has used the word "gagged", and the last man who spoke used it three times. They all want to pull the wool over your eyes and say that the majority is gagged. I deny it, and the best refutation is what happened here 2 days ago. When, under Republican rule, could 145 Members discharge a committee? Never in the 12 years that I have been here could it be done. During that period every amendment to the Veterans' Act brought in was passed under a stringent gag rule or passed under suspension of the rules.

Mr. MARTIN of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. BOYLAN. I exceedingly regret my inability to yield. I have not the time. I want to bring home only one thing, and that is this: I have consistently been a friend of the Federal employees and of the veterans during the 12 years that I have been here. The RECORD will show that; and I am still their friend. But I really want to do something for them. I do not want to give lip service on the floor of this House; I do not want to give a mere vote; these things will not pay their bills. I want to give them something substantial, and I warn you, my friends, whom I honor and respect and whom I want to see returned to this House, to watch what you do today, because if you will analyze the situation you must realize that the only way that the veterans can be helped—and I know you want to help them, and I want to help them—is by adopting this rule. Do not be carried away by this word "gag", which our dear friends on the Republican side have used because they are utterly insincere. They seek to divide our party. The responsibility is ours, and the very liberalization of the rules brought about by this Democratic leadership gave you the opportunity that you exercised this week.

I ask and implore you, therefore, to remember your duty not only to the veterans and to the Federal employees but the duty that you owe to the Democratic Party and to responsible Democratic government now in power in this Nation. The only way to do that is to support this rule. [Applause.]

The SPEAKER. The time of the gentleman from New York [Mr. BOYLAN] has expired.

Mr. RANSLEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Speaker, this vote today is going to determine the future political destiny of many Members on the floor of this House now on both sides of the aisle. A vote in favor of this rule, my friends, will be construed at home as a vote of cowardice. You are afraid to take action yourselves, and so you delegate your authority and your power to three or five conferees named by the Speaker. Tools! That is all they are. Tools of a political cause that will wreck the Democrat who thinks he can fool the war veteran and the Federal employee. A vote for this gag rule indicates that you are afraid to stand up and take your medicine; afraid to vote your sincere convictions; afraid you may lose a Federal job or two. I ask you to vote down this rule today and determine for yourselves what should go in the bill.

Mr. Speaker, the time has now arrived to take the Federal Government out of the realm of inconsistency and to do for it what it would have others do for themselves.

No Member of this body, and particularly those on the other side of the aisle, can longer refuse to listen to the voice and appeal of the President of the United States for the raising of salaries and the lowering of hours of work in each week. Nor can we disregard the words of his National Recovery Administrator, Gen. Hugh S. Johnson, while addressing some 5,000 code representatives of all of the industries in the country, when he requested them to reduce by 10 percent their weekly work hours and to increase by 10 percent the hourly wages of their employees.

Both the President and General Johnson laid great stress upon improving the purchasing power of the consumer, particularly the man of small wages. This in turn would benefit production in every walk of life, and that in turn would provide for employment. The wage earner, the storekeeper, the salesman, the distributor, the wholesaler, the transporter, the manufacturer, and, finally, the tiller of the earth would be benefited alike. Each would get his share of the fleet-footed dollar, and this is the true basis for the national recovery hopes.

Failure to promote salaries that will permit living on American standards will defeat the entire plan for recovery.

When President Roosevelt, on March 5 in a national broadcast hook-up, called upon everyone within the hearing of his voice to raise salaries in the interest of the great consuming public, and when he was followed on March 6 by Gen. Hugh Johnson, who reiterated the President's appeal for shorter hours and more money, but in much stronger language, I naturally assumed that these distinguished leaders of the Government could not be talking to

all of America exclusive of Congress and exclusive of Federal executive officers. Congress is the paymaster for every Federal officer, employee, and enlisted man, and as such is bound to do its duty as we see it toward the vast number of Federal employees scattered throughout the United States, who are compelled to eat and live and contribute their part to the national recovery that is expected of every other wage earner.

Mr. Speaker, President Roosevelt has been in office just 1 year, and since that time the cost of living has gone up, while he with his so-called "Economy Act" has reduced all Federal salaries 15 percent and in addition has prescribed mandatory furloughs and lay-offs without pay, so that in many instances the Federal employee is at his wits' end as to just how to keep the wolf from the door, while at the same time trying to properly educate and clothe his children. Surely the President cannot intend that everyone in America should benefit by his recovery program except the Federal employee and those dependent upon him. I cannot believe this to be so.

Congress should today return the entire 15 percent, retroactive as of February 1, 1934, and in doing this we would be doing our duty in strict accord with the language of President Roosevelt and Gen. Hugh Johnson as applied to the American wage earner in every walk of life.

The only agency that has the power to direct the biggest employer in the United States to restore its salaries to pre-Roosevelt time is the United States Congress. If we are to follow the dictates of our leader, the chosen leader of the people, then we will today refuse to pass a gag rule which takes from Congress and places in the hands of a few conferees the entire responsibility for properly caring for the Nation's wards. They cannot go on strike nor march upon the Capitol with banners objecting to unfair treatment, they cannot call mass meetings in protest to the niggardly action of their Government. They are more or less powerless to help themselves, and that is why it is all important that Congress should do so. We should not delegate our power to three or five House conferees who will be swayed by their political affiliations or obligations to a machine.

The fact of the matter is the great humane democracy, of which we have heard so much, is definitely and unalterably opposed to the restoration of salaries for Federal employees, although it continually cracks down on the industries of the country for failure to increase salaries and reduce working hours at the same time. It is truly hard to understand the inconsistency of so enlightened a government. It would appear that the man or woman who works for the Federal Government is not entitled to the same fair and square treatment as is the man or woman who works in the mill, in the mine, in the factory, or in the store.

Mr. Speaker, the time has come to say that there shall no longer be a national recovery administration for private industry and a national destruction administration for the Federal Government. General Johnson should no longer be permitted to hold up the private employer to ridicule and contempt for not doing something which the Government itself refuses to do.

When President Roosevelt and General Johnson last week challenged the 5,000 industrial code representatives to reduce working hours and increase wages, their words fell upon many deaf ears for the very reason that the Government did not practice what it preaches. It was demanding increased industrial wages at a time when the Government was actually reducing monthly pay. The insincerity of the proposal is the greatest weakness in the national recovery movement. Uncle Sam should lead the way, rather than refuse to follow.

Every argument against the restoration of salaries was knocked into a cocked hat by the address of the President to the N.R.A. code authorities. Surely no Member will arise in his place and say that he is concerned about the balancing of the Budget this year. Surely no Member will dare to say that this restoration of salaries is not in accord with the President's financial policy. The President himself told us that the national deficit would be $7,000,000,000 this year and probably $2,000,000,000 more next year. Any talk of balancing the Budget is pure bunk, and any reference to the President's financial policy as being in conflict with salary restoration would be the rankest kind of evasion because no one, not even the President himself, knows what his financial policy is to be from day to day. It is constantly changing. Millions, actually billions, are being expended for public works, private works, power plants, road sweeping, fence painting, tree planting, ditch digging, and in a thousand other directions, with a view to stimulating the movement of currency through the wage earner and the consumer. These expenditures are not confined to the United States, for we are now setting up a series of banks to lend money to Russia, to Cuba, and elsewhere in the world. A million-dollar gift to the Virgin Islands, where the bay leaf makes the finest bay rum in the world, appears to be but a drop from our golden bucket. The rum business is important to the Virgin Islanders. They are citizens of the United States. The underpaid substitute postal clerk and carrier, the underpaid Federal employee generally, is also a citizen of the United States. He cannot enter into the manufacture of rum nor anything else for that matter; his principal duty is to wait upon Uncle Sam and his people. While jumping all over the world with our golden investments, let us not put the Federal employee in a class with the forgotten man.

Mr. Speaker, I sincerely hope that the House will vote down this gag rule and then take upon itself the duty of immediate passage of the independent offices bill, with its various controversial amendments. If certain Senate amendments are undesirable, it is the duty of the House to change them. If certain Senate amendments are in line with public thought and principle, then they should be accepted by the House, irrespective of what our political leaders might think about it. We owe this duty to ourselves and to our constituency. To do otherwise would but charge the House with being a rubber stamp, and this no Member would enjoy.

Mr. Speaker, all war veterans were frightfully shocked by the results of the President's Economy Act. No one could have foretold its hardships. No one could reasonably have presumed that the Presidential knife would cut so deeply. Today we have an opportunity to right this terrible wrong. The House will do its duty if it votes down this un-American gag rule. [Applause.]

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. RANSLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. CONNERY].

Mr. CONNERY. Mr. Speaker, I hope that this rule will be voted down, in order that we may have a chance on the floor of this House to recede and concur with the Senate amendments. The Senate amendments comprise three of the four-point American Legion plan. These amendments are favored by the American Legion, by the Veterans of Foreign Wars, by the Disabled American Veterans of the country. They want the Senate amendments agreed to, and I would like to see this House have an opportunity by motions to recede and concur with the Senate amendments, thus to get a proper bill. The gentleman from Texas [Mr. PATMAN] spoke about the disabled emergency officers. I do not agree with the gentleman on that. I fought to put that bill in the law.

The Army, the Navy, and the Marine Corps regular emergency officers were already on the rolls, and the National Guard and the National Army officers were discriminated against, and that is why they are in the law today; but if you do not like that, vote them out by a motion to recede and concur with an amendment. Vote against the Borah amendment, which would make it impossible, eventually, for a poor man to go to Congress. They tell you you are voting for your own salary if you vote against the Borah amendment. Well, voting for a decent living salary is better than having a group of dollar-a-year men in the Congress of the United States doing what they are told to do by big business, instead of men and women who are trying faith-

fully to represent the great mass of the American people. [Applause.]

I hope that this rule will not pass and that we will take up the Senate amendments with motions to recede and concur with amendments, and thereby give an opportunity to this House to vote on every proposition, which can go to the Senate and be passed. [Applause.]

The SPEAKER. The time of the gentleman from Massachusetts [Mr. CONNERY] has expired.

Mr. RANSLEY. Mr. Speaker, I yield 1 minute to the lady from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Chairman, I have told the Members before what I thought of their gag rules. I tell you now what I think of your blunder rule. For this is a blunder rule. Tennyson said:

Not though the soldiers knew
Someone had blundered;
Theirs not to reason why;
Theirs but to do and die.

That is the spirit our Army air pilots showed. They knew that someone had blundered. Their action showed, "We who are about to die, salute you."

You know, the administration, time after time, has had to admit its blunders. It admitted them when it had to restore some of the cuts it made so unjustly to our service-connected disabled veterans. You are going to pay for the blunder you made when you would not increase the appropriation for more training for Army pilots. You are going to blunder again if you do not kill this rule. The administration blunders and then it admits its blunders and it pays, but it pays too late—for the men are dead. While the codes of the N.R.A. were being written, the C.O.D., or the Code of Death, for the Army pilots was made. During the Wilson administration of 1916, John Jacob Rogers, in speaking of the death of Lt. Henry Adair, killed at Carrizal, Chihuahua, by an American bullet in an American gun, quoted:

The funeral honors are done, Adair,
And under the earth your body lies;
Thrilling and sweet on the vibrant air
That last long wail of the bugle dies.
Well was your duty done, Adair,
And duty to us alone may call;
And the blood you shed, how red, how red!
Cries like a bugle from Carrizal.

[Applause.]

The SPEAKER. The lady from Massachusetts has consumed 1 minute.

Mr. RANSLEY. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr JENKINS].

Mr. JENKINS of Ohio. Mr. Speaker, there can be no doubt but that a majority of this House is in favor of a vote on these four amendments. That being true, we ought to have such a vote. If we cannot have such a vote, it is because a rule has been interposed. Consequently we should vote against the rule.

Let me call your attention to what the leader of the Spanish-American War veterans sends out this morning in a telegram:

The real purpose of the rule proposed by the Rules Committee is to prevent justice being accorded Spanish-American War veterans and their dependents. To send the independent offices bill to conference under that rule will result in the Spanish War veterans' amendment being annihilated.

Mr. PATMAN. Will the gentleman yield for a question?

Mr. JENKINS of Ohio. I do not yield.

The SPEAKER. The time of the gentleman from Ohio [Mr. JENKINS] has expired.

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

Mr. BLANTON. Mr. Speaker, I reserve the right to object to call the gentleman's attention to the fact that the author of that telegram he read, Gen. Rice W. Means, has been drawing $240 a month retired pay from the Government of the United States until we cut him off last year because his disability is not service connected, and the Senate amendment puts him back on the pay roll.

The regular order was demanded.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. JENKINS of Ohio. Under leave given me, I wish to say that the gratuitous remarks by the gentleman from Texas cannot blot the record of the gentleman to whom he refers, for that gentleman enjoys the distinction of having served with distinction in the Spanish-American War. He served in many a conflict in the Philippines, and his record is one of which any soldier might well be proud. He was a colonel in the World War and his regiment under his direct command saw much service in the muddy trenches and under severe enemy fire. His efforts in behalf of the soldiers of all wars has given him a reputation with the veterans that no one can tarnish. He was largely responsible for securing a hearing for the claims of the veterans in the Senate, which adopted the amendments that we have under consideration now. The House was prevented from considering the same by the interposition of the now famous gag rule, which was advanced by Democratic leaders with the approval of the administration.

Nothing can be gained by the veterans by reference of this matter to a conference committee, but much might be lost. Until now nobody has came forward to state with authority what the President will recommend. We were misled about a year ago with those honeyed words of promise. Now is the time for honest action. Every man here knows what he wants to do, so why not proceed to do it.

Mr. O'CONNOR. Mr. Speaker, I yield one half minute to the gentleman from Texas [Mr. PATMAN].

TWO HUNDRED AND FORTY DOLLARS A MONTH

Mr. PATMAN. Mr. Speaker, I want to state in answer to the telegram which the gentleman from Ohio just read that this bill as amended by the Senate will put some Spanish-American War veterans back on the pay roll and some World War veterans, which I am in favor of. It is also putting back on the roll the author of that telegram for $240 a month retired emergency officer pay, regardless of his income. [Applause.]

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. ELTSE].

Mr. ELTSE of California. Mr. Speaker, I am opposed to this rule because its adoption will be equivalent to an instruction to the conferees to reject the Senate amendments. It is equivalent to such an instruction; and you will find it out. If you will read the unanimous consent request made by the gentleman from Virginia yesterday you will see that this rule goes far beyond the purport and intent revealed in that request. Adoption of this rule will be equivalent to a rejection of the Senate amendments. That is the purpose of the rule, otherwise there would be no reason for its adoption.

We all know of the inequities and injustices that have been worked on the veterans under Public, No. 2 and Public, No. 78; and today we are to have an opportunity to iron out the inequities and injustices which have occurred under Public, No. 2 and Public, No. 78 by agreeing to these Senate amendments.

Your vote on the bonus bill was not so much because of sympathy for the veterans as it was sympathy for yourselves as you face the coming election, but your vote on this rule will be a test of whether you are for the veteran or against him.

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut [Mr. GOSS].

Mr. GOSS. Mr. Speaker, as a member of the subcommittee handling this bill, I call attention to the fact that in the last session when the independent offices bill came back from another body containing the Steiwer-Cutting amendment, and the bill was sent to conference, the conferees on the part of the Senate withdrew, and therefore the House bill passed. Mr. Speaker, if the pending rule is adopted I very seriously doubt if the House will ever have

another chance to pass upon these two questions, for if the conferees on the part of the other body act as they did last year then the House will have no other opportunity to again act.

This is a very serious matter. I think the Membership of the House would welcome an opportunity to express themselves one way or another; and as one of those who may possibly be a conferee, let me say that I would like to be instructed, if I am to be on that conference committee, to vote for the Senate amendments in reference to the veterans and also to vote for the restoration of the 15 percent pay cut. [Applause.]

This is not the time to debate the arguments pro and con on these two subjects, but let me remind you again before I sit down that if this rule is not adopted then the bill will come before the Committee of the Whole House on the state of the Union and will be open to amendment, or the House will have the opportunity to instruct conferees at its will.

If the rule is adopted, let me predict, Mr. Speaker, that the House will not have the opportunity to vote on either of these questions.

[Here the gavel fell.]

Mr. O'CONNOR. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma [Mr. McKEOWN].

Mr. McKEOWN. Mr. Speaker, we ought to approach this thing with some sort of common sense. Now, it is just as much the duty of every man within this House to protect the Government of the United States, to keep the Budget balanced, no matter whether he is on the Republican side or on the Democratic side; but a lot of politics is being made out of this thing.

I voted against the economy bill because I thought it would raise trouble from Hoboken to San Francisco, and do great injustice, and it has done that very thing.

When you voted for the bonus you were not voting to disturb the Budget; but when you say you are going to vote out each of these amendments, let me suggest that there is another great group of people in this country who are hungry, who want work, and to whom the man in the White House is trying to give employment. You will hold up his program simply for the sake of going on record for certain groups of citizens. No man in this House has stood by the veterans of the World War and the Spanish-American War more faithfully than I have, and I am not deserting them now. I am standing by them so that they can get some reasonable compensation, and am voting to send these amendments to conference where they will ultimately go.

[Here the gavel fell.]

Mr. O'CONNOR. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their own remarks on this resolution.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RANSLEY. Mr. Speaker, I yield to the gentleman from Oregon [Mr. MOTT] 1 minute.

Mr. MOTT. Mr. Speaker, on the 2d of March, in reply to my protest against sending the independent offices bill as amended by the Senate to the Appropriations Committee, the majority leader used these words. I am now reading from the RECORD. He said, pointing his finger across the aisle, to me:

> The gentleman implies that it was done for the purpose of depriving the Members of the House from voting on the several questions. The Members will have full opportunity when the bill is reported back to the House to vote on every amendment.

In reply to that I reiterated my statement that the purpose of referring this bill to the Appropriations Committee was to kill or emasculate the Senate amendments and to prevent the House from voting on them. Again the majority leader said, and again I am reading from the RECORD:

> I want to say to the gentleman as emphatically as he says it was the purpose to deny the House a vote that the House will be given an opportunity to vote on every amendment when the bill is reported back.

Now today, on March 14, the Appropriations Committee has reported in the bill and the amendments under one of the most vicious gag rules ever sent to the House. The rule provides that the amendments shall be sent to conference without instructions. We are to be allowed to debate for 1 hour under this rule. We are not to debate the question whether we shall adopt the Senate amendments. We are to debate simply the question of whether we will send the amendments to conference.

Now every gentleman here knows what will happen if we send the amendments to conference under this rule. If we adopt this rule it means that no Member of the House will be allowed either to vote upon, or even to express his views in debate upon a single one of the Senate amendments. That is the purpose of the rule. That is its only purpose.

And now, Mr. Speaker, in view of that and in view of the majority leader's direct statement to the contrary, publicly given on March 2, I ask you what confidence can be placed in any assurance given us by the Democratic leadership of this House? [Applause.]

Unless we can defeat this rule and vote upon the amendments it means that no veteran, either of the World War or the Spanish War, will get any relief except what the President is willing to give him under the Economy Act. As a representative body we have the right to vote on every one of these amendments. If we succeed in defeating this rule I intend to vote in favor of each of them. I have already expressed my views on all of the veteran amendments, and everyone here knows what they are. Those who do not agree with me—those who wish to vote against them and those who wish to amend them, should also have that privilege, and they should have the opportunity to express their views and exercise their right as Representatives in this regard when the bill comes onto the floor of the House. [Applause.]

Mr. Speaker, I cannot believe that this rule will be adopted. I cannot believe that Members of the House are willing to gag and stultify themselves to the extent their leaders demand—to the extent of depriving themselves of the right to exercise the very function they were sent here to exercise. In the name of parliamentary government, in the name of our disabled veterans now calling to us for justice, in the name of decency itself, I ask you to vote down this rule. [Applause.]

Mr. RANSLEY. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN of Massachusetts. Mr. Speaker, there has been some discussion here relative to the Republican attitude on this rule. First, let me call attention to the way the bill has been handled. The Democratic leadership promised the Democratic caucus that after the conferees had acted upon the measure they would bring the agreement back to the Democratic caucus for review.

No Republican has been given any such consideration. It is an unfair discrimination. May I also speak of the threats which have been issued that if the House does not vote for this rule the veterans and the Federal employees will not get any concessions. I doubt this. I do not believe the leadership of this House or the administration itself would dare let Congress adjourn without legislation. If we vote the rule down and the measure comes before the House, we can then take up these items in dispute separately. The judgment of the House will be secured on every item and we will get a much more satisfactory bill than we would from the conferees. If the President disapproves the bill—and I question this—then a new bill would be brought out which would give some justice to the veterans and Federal employees.

What do you do when you vote for this rule? First, you are going to positively deprive thousands of disabled and needy veterans, who received their disabilities due to war origin, from receiving justice, which every fair-minded American wants them to have. A vote for this rule is positively a vote that will deprive the Spanish-American War veterans from getting more than 75 percent of what they have enjoyed in the past. Everybody knows they have been

unjustly discriminated against. A vote for this rule is a certainty the Federal employees will not get the 15 percent which they need because of the increased cost of living. The administration has gone to private industry and said, "You must raise your employees, you must expand your forces", and yet they are adopting a contrary attitude as far as the classified service of this country is concerned. The post-office employees have been particularly badly treated. The 15-percent pay cut and the furlough have reduced their income some 27 percent, far larger than other employees. The postal substitutes have not been given enough to obtain a respectable living. Would you believe that at the Newport torpedo station there are men who are getting only $10 a week, and yet we are going to deny them a wage restoration. The Government should practice what it preaches. So, I say, vote down this rule; then let us take it up in the regular way, and we will pass a bill which I think will be fair to the people who are concerned. [Applause.]

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield the remainder of my time to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Briefly, of course, the adoption of this rule means that the Members of the House of Representatives will not have an opportunity to express themselves upon any of the Senate amendments to this appropriation bill. It means that the House of Representatives will not express itself upon the Senate amendment to take care of the Spanish-American War veteran and his dependents. It means that it will not have an opportunity to express itself upon the three-point program of the American Legion. It means that it will not have an opportunity to express itself upon the restoration of pay of the Federal employees, and, as the gentleman from California [Mr. ELTSE] has so forcefully pointed out, it not only means the House of Representatives will not have an opportunity to express itself upon these questions, but it means, under the circumstances, under the condition with which we are confronted, that the House of Representatives disagrees to these amendments and does not want to see them or any of them adopted. The purpose of the rule is to enable the conferees to bring in a complete conference report and to make the House vote upon the question of whether it will adopt the conference report as a whole or reject it as a whole and to avoid a separate vote on any individual amendment.

What does it mean if the resolution is voted down? It does not mean that the House of Representatives swallows en bloc the amendments of the Senate. It means simply that they, being on the Union Calendar, will be considered by the House of Representatives in the Committee of the Whole House on the state of the Union under the general rules of the House. It means that the House of Representatives will have an opportunity to pass upon every individual Senate amendment and dispose of it as it sees fit. It may adopt, amend, or reject any one or all of them, as it sees fit to do after full consideration and debate. It means simply that the House of Representatives will be permitted to perform its legislative duty in an orderly and deliberative manner.

Mr. KVALE. Will the gentleman yield?

Mr. MAPES. Mr. Speaker, it happens that every bill that has been considered by the House of Representatives during this session of Congress under the general rules of the House has been perfected and improved in the House of Representatives. Every bill that has not been so considered has gone through here with a lot of imperfections in it.

I yield to the gentleman from Minnesota.

Mr. KVALE. In the light of what has transpired here this morning, what is the gentleman's opinion of the methods of the majority leaders who originally brought this bill in a month ago and barely succeeded in shoving it through by adopting a gag rule as the result of specific statements on their part that interests of the veterans were not affected in any detail whatsoever thereby?

Mr. MAPES. I have the same opinion about that as the gentleman from Minnesota. I desire to emphasize the fact that the rejection of this rule simply means that the Senate amendments are going to be considered by the House of Representatives in the Committee of the Whole and may be amended, adopted, or rejected at that time. [Applause.]

[Here the gavel fell.]

Mr. O'CONNOR. My Speaker, I yield the remainder of my time to the gentleman from Virginia [Mr. WOODRUM].

Mr. WOODRUM. Mr. Speaker, I regret that in the discussion of this rule something of a partisan note has been sounded, though, of course, I must recall that when this bill was considered in another body, there were very decided and emphatic evidences of partisan action, and this accounts for some of our difficulties. I wish right now that we might lay aside partisan consideration and consider just a question of practical procedure. I wish that we might for the moment cease to be partisans of the American Legion or partisans of the Spanish-American War veterans or partisans of the employees or even candidates for reelection, as all of us are. I wish we might simply consider a pure question of practical procedure.

Nothing is happening here today that deprives the majority in this House of doing anything it wants. If a majority of the Members of this House want to take this bill and pick it to pieces, loading it down again as it was loaded down in another legislative body, to result in a certain veto, we can do that. There will be no difficulty in doing this. I believe, as I said yesterday, that a majority of the Members of this House want to afford some substantial relief to Spanish-American War veterans, some substantial relief to World War veterans, especially the presumptive cases, and some measure of relief to Federal employees. If the assumption is true that a majority of the Membership want to do these things, the adoption of this rule will not deprive them of such opportunity, because if the conferees should bring in a report that does not effectuate your wishes in this regard, you have simply to vote it down and then the bill comes up on the Senate amendments.

Mr. Speaker, all important legislation is arrived at by a compromise of ideas, and I submit in the interest of the veterans, in the interest of the employees, in the interest of the Government, and in the interest of the public, these differences between the two legislative bodies and the Chief Executive should be settled around a conference table where our ideas can be pooled and where we can arrive at some equitable and just consideration of these matters. [Applause.]

To my friends who are feeling the press and the urge of some commitments they may have made to veterans or to employees, may I say it seems to me it would be a very unreasonable constituency that would say to a Member of Congress, "I demand from you that you hold out to the bitter end for a certain result. If, in your own good judgment, you find there must be a compromise of ideas whereby you perhaps will get a little less for me than you would like to get, notwithstanding that fact, I demand you hold out to the bitter end."

This would be a very unreasonable attitude for any constituency to take; and I have the idea they would rather have you come back home to them with some substantial concessions for Spanish-American War veterans and World War veterans and employees than have you send them, after adjournment, an eloquent speech which you made upon the floor of the House defending their rights, although you failed to get any benefits.

I believe we had better get some substantial concessions, something tangible that we can hold in our hands and our constituents put in their teeth than go back and send them an eloquent speech we made in their defense upon the floor of the House of Representatives. [Applause.]

I want to express the very earnest hope you will give your conferees, who will be the members of the subcommittee, a chance to go to conference on these matters. [Applause.]

[Here the gavel fell.]

Mr. O'CONNOR. Mr. Speaker, I move the previous question on the adoption of the resolution.

Mr. BLANTON. Mr. Speaker, a parliamentary inquiry. Is not the main issue that is to be decided by the vote on this rule the question of whether Democrats are going to follow the Republican minority leader, Mr. SNELL, and his bunch of Republicans, or whether they are going to follow their own chosen Democratic leader, Mr. BYRNES, who is the majority floor leader of this House, and thus carry out the mandate of their Democratic caucus, passed by more than a two-thirds majority? Is not that the main issue?

The SPEAKER. The gentleman does not state a parliamentary inquiry.

Mr. BLANTON. But now is the time for all good Democrats to come to the aid of their party.

Mr. PETTENGILL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PETTENGILL. Mr. Speaker, the gentleman from Michigan [Mr. MAPES] has stated that if this rule is voted down, the bill will then come up in the Committee of the Whole House on the state of the Union. Is that statement of the parliamentary situation correct?

The SPEAKER. The bill may then be called up by direction of the Committee on Appropriations.

Mr. MAPES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MAPES. As I understand it, the Committee on Appropriations has reported the bill back to the House and the measure is now on the Union Calendar?

The SPEAKER. That is correct.

Mr. MAPES. I do not want to have any uncertainty about the correctness of my statement, and I was not quite sure the House understood the Speaker.

Mr. PETTENGILL. Will the gentleman restate his position?

Mr. BLANTON. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is on ordering the previous question.

Mr. MAPES. Mr. Speaker, I desire to propound a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MAPES. If the rule is voted down, is it not a proper statement to say that the Senate amendments will be considered in the Committee of the Whole House on the state of the Union under the rules?

The SPEAKER. If the Committee on Appropriations authorizes that motion and makes it and the House votes in favor of it, they will then be considered.

Mr. SABATH. Subject to all amendments.

Mr. BLANTON. Mr. Speaker, I demand the regular order.

Mr. WOLCOTT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WOLCOTT. Mr. Speaker, does that part of the resolution which provides that the conferees on the part of the House are hereby given specific authority to agree, with or without amendment, or disagree to any amendment of the Senate to the bill prevent the House from voting on the conference report when it comes back to the House?

The SPEAKER. The House is always required to vote on a conference report, either up or down.

The question is, Shall the previous question be ordered?

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

Mr. SNELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 169, nays 247, not voting 16, as follows:

[Roll No. 103]

YEAS—169

Abernethy	Berlin	Brown, Ky.	Caldwell

NOT VOTING—16

Buckbee	Crump	Kennedy, Md.	Smith, W.Va.
Busby	Deen	Norton	Stokes
Carley, N.Y.	Green	Reid, Ill.	Underwood
Crowther	Hamilton	Romjue	Williams

So the House refused to agree to the resolution.

The Clerk announced the following pairs:

Until further notice:

Mr. Carley with Mr. Buckbee.
Mr. Underwood with Mr. Crowther.
Mr. Crump with Mr. Reid of Illinois.
Mr. Busby with Mr. Stokes.
Mrs. Norton with Mr. Deen.
Mr. Green with Mr. Romjue.
Mr. Smith of West Virginia with Mr. Kennedy of Maryland.
Mr. Hamilton with Mr. Williams.

Mr. BLANTON. Mr. Speaker, I want to make a preferential motion; and if a point of order is not made against it, it will be in order. Every posted man in this House knows that if the Senate amendments, which have added $354,432,124 additional appropriations to this bill, and which establish precedents that will eventually cost this Government an extra $1,000,000,000 per annum, are agreed to by this House, the President will undoubtedly veto this bill, and we may be here 6 months trying to pass a new measure. So, unless Members are willing to compromise, and try to reach an agreement that the President will sign, we are wasting time and doing futile things. I, therefore, move that the House concur in all of the Senate amendments, and we will thus send the bill to the White House today, and the President will promptly veto it, and then maybe Members will feel more like passing a measure that the President will approve of and let become law.

Mr. SNELL. Mr. Speaker, a point of order. That motion is not in order now.

Mr. BLANTON. Let the President veto it and send it back today, and then we will have time to pass a proper bill that he will not veto.

The SPEAKER. The point of order is sustained.

Mr. WOODRUM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H.R. 6663, with the following Senate amendments:

Page 3, after line 21, insert:

"No claim shall be filed with the Alien Property Custodian or allowed by him or by the President of the United States, nor shall any suit be instituted or maintained against the Alien Property Custodian or the Treasurer of the United States, or the United States, under any provisions of law, by any person who was an enemy or ally of enemy as defined in the Trading with the Enemy Act, as amended, and no allowance of any such claim now pending shall be made, nor judgment entered in any such suit heretofore or hereafter instituted, for the recovery of any deduction or deductions, heretofore or hereafter made by the Alien Property Custodian from money or properties, or income therefrom, held by him or by the Treasurer of the United States hereunder, to pay any and all expenses of the office of the Alien Property Custodian heretofore or hereafter incurred by him or by any depository for him as such expenses and deductions have been heretofore or shall be hereafter determined by said Alien Property Custodian."

Page 4, line 13, after "Columbia", insert: ", including the sum of $4,250, which shall be immediately available and shall be paid in equal portions to the following-named persons, heirs at law of Frank P. Glass, late a member of the board, who served without compensation as such member from July 14, 1933, to January 10, 1934, the date of his death: Frank P. Glass, Jr., J. Purnell Glass, Christine Glass, Louise Glass Marzoni, Evelyn Byrd Glass McCoy, and H. Boyson Glass."

Page 7, line 8, strike out "$1,421,000" and insert "$1,467,816."

Page 8, line 6, strike out "$1,476,000" and insert "$1,522,816."

Page 11, line 24, strike out "$1,208,730" and insert "$1,708,730, of which $150,000 shall be immediately available."

Page 12, line 3, strike out "$1,242,730" and insert "$1,742,730."

Page 19, lines 4 and 5, strike out "incident to the refinancing of old loans and collecting of loans."

Page 23, line 23, strike out "$76,649,907: *Provided*", and insert "$86,740,099: *Provided*, That when found to be to the best interest of the United States, not to exceed $500,000 of this amount may be used for payments to State institutions caring for and maintaining veterans suffering from neuropsychiatric ailments, who are in such institutions on the date of the enactment of this act: *Provided further*."

Page 26, line 7, after "homes", insert ": *Provided further*, That the appropriations herein made for medical and hospital services under the jurisdiction of the Veterans' Administration shall be available, not to exceed $10,000, for experimental purposes to determine the value of certain types of treatment."

Page 27, line 20, strike out "$284,789,984" and insert "$296,291,997."

Page 28, line 20, strike out "$525,155,891" and insert "$546,748,096."

Page 29, line 4, strike out "$546,005,891" and insert "$567,598,096."

Page 29, line 8, strike out "$566,435,693" and insert "$588,001,548."

Page 30, strike out all after line 6, down to and including line 9, page 33, and insert:

"SEC. 21. (a) Section 3(b) of title II of the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, is amended by inserting before the period at the end thereof a comma and the following: 'except that such percentage shall not exceed 10 percent during the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934.'

"(b) In the application of section 105(a) (relating to the salaries of the Vice President, the Speaker of the House, Senators, Representatives, Delegates, and Resident Commissioners) of the legislative appropriation act, fiscal year 1933, and sections 12 (relating to compensation reductions of officers and employees of insular possessions) and 13 (relating to the retired pay of certain judges) of the independent offices appropriation act, 1934, with respect to the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934, the percentage of reduction shall be the percentage applicable to officers and employees of the Federal Government generally.

"SEC. 22. There is hereby appropriated so much as may be necessary for the payment of sums due, and payable out of the Treasury of the United States, by reason of the diminution under this title in the percentage of reduction of compensation, and other amendments to existing laws made hereby; and limitations on amounts for personal services are hereby respectively increased in proportion to the increase in appropriations for personal services made in this section. In the case of officers and employees of the municipal government of the District of Columbia, such sums shall be paid out of the revenues of the District of Columbia and the Treasury of the United States in the manner prescribed by the District of Columbia appropriation acts for the respective fiscal years."

Page 33, after line 9, insert:

"SEC. 23. The weekly compensation, minus any general percentage reduction which may be prescribed by act of Congress, for the several trades and occupations, which is set by wage boards or other wage-fixing authorities, shall be reestablished and maintained at rates not lower than necessary to restore the full weekly earnings of such employees in accordance with the full-time weekly earnings under the respective wage schedules in effect on June 1, 1932: *Provided*, That the regular hours of labor shall not be more than 40 per week; and all overtime shall be compensated for at the rate of not less than time and one half."

Page 33, line 10, strike out "22" and insert "24."

Page 34, line 4, after "promotions)", insert: ": *Provided*, That adjustments of charges for quarters, subsistence, or laundry, or other similar charges, shall not be interpreted as constituting administrative promotions."

Page 34, line 35, strike out "amendment" and insert "amendments."

Page 35, strike out lines 1 to 18, inclusive, and insert:

"(1) Section 201 (suspending automatic increases in compensation) of part II of the Legislative Appropriation Act, fiscal year 1933, is amended by inserting at the end thereof the following: 'This section shall not apply during the fiscal year ending June 30, 1935, except to the extent that it suspends the longevity increases provided for in the tenth paragraph of section 1 of the Pay Adjustment Act of 1922. This amendment shall not authorize the payment of back compensation.'"

Page 35, after line 18, insert:

"(2) Section 7 (prohibiting administrative promotions) of the Treasury-Post Office Appropriation Act, fiscal year 1934, is amended by adding after the first proviso thereof a colon and the following: '*Provided further*, That administrative promotions may be made during the fiscal year 1935 to the extent that funds are available therefor, on an annual basis, from savings made in the amounts apportioned for personal services from the applicable appropriations for the fiscal year 1935.'"

Page 36, line 9, strike out "23" and insert "25."

Page 36, after line 12, insert:

"SEC. 26. Notwithstanding any provision of law to the contrary, in no event shall the compensation being paid on March 19, 1933, under subsections (3) and (5) of section 202 of the World War Veterans' Act, 1924, as amended, to veterans for the loss of the use of both eyes, where such veterans were, except by fraud, mistake, or misrepresentation, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, pertaining to hospitalized cases.

"TITLE III—VETERANS' PROVISIONS

"SEC. 27. Where service connection for a disease, injury, or disability was on March 19, 1933, established in accordance with section 200 of the World War Veterans' Act, 1924, as amended, and such connection has been severed through the application of, or regulations or instructions promulgated under Public Law No. 2, Seventy-third Congress, or Public Law No. 78, Seventy-third Congress, service connection is hereby reestablished and as to such cases the provisions of the first paragraph of section 200 of the World War Veterans' Act, 1924, as amended, are hereby reenacted: *Provided*, That the provisions of this section shall not apply (1) to persons entering the active military or naval service subsequent to the date of November 11, 1918, (2) to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service, (3) to persons as to whose cases service connection was established by fraud, clear

or unmistakable error as to conclusions of fact or law, or misrepresentation of material facts; and as to all such cases enumerated in this proviso, all reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government.

"SEC. 28. The fourth paragraph of section 20, Public Law No. 78, Seventy-third Congress, is hereby amended to read as follows:

"'Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, in no event shall the compensation being paid on March 19, 1933, for service-connected disabilities to those veterans who entered the active military or naval service on or before November 11, 1918, and whose disabilities are not the result of their own misconduct, where they were, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service; and in any review of the case of any veteran to whom compensation was being paid on March 19, 1933, for service-connected disability, reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government: *Provided further*, That notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, any veteran whose disease, injury, or disability was established on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, shall be entitled to receive compensation in accordance with the provisions of such act, as amended, and the rating schedule in effect on March 19, 1933: *Provided further*, That whenever there is a change in the degree of disability of any such veteran the amount of compensation to be paid shall be determined pursuant to the provisions of the World War Veterans' Act, 1924, as amended, and the rating schedule in effect on March 19, 1933, and such amount shall not be reduced or discontinued. In no event shall death compensation being paid, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, to widows, children, and dependent parents of deceased World War veterans under the World War Veterans' Act, 1924, as amended, on March 19, 1933, be reduced or discontinued, whether the death of the veteran on whose account compensation is being paid was directly or presumptively connected with service. In any case where a World War veteran dies or has died from disease or injury, and service connection for such disease or injury has been reestablished on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, or which would have been established under such section 200 had the veteran been living on March 19, 1933, and reestablished on or after the date this paragraph as amended takes effect, the surviving widow, child, or children and/or dependent parents shall be entitled to receive compensation at the rates prescribed in Veterans' Regulation No. 1 (a), part I, paragraph IV, and amendments thereto.'

"SEC. 29. Section 6 of Public Law No. 2, Seventy-third Congress, as amended by Public Law No. 78, Seventy-third Congress, is hereby amended by adding thereto the following proviso: '*Provided*, That any veteran of any war who was not dishonorably discharged, suffering from disability, disease, or defect, who is in need of hospitalization or domiciliary care, and is unable to defray the necessary expenses therefor (including transportation to and from the Veterans' Administration facility), shall be furnished necessary hospitalization or domiciliary care (including transportation) in any Veterans' Administration facility, within the limitations existing in such facilities, irrespective of whether the disability, disease, or defect was due to service. The statement under oath of the applicant on such form as may be prescribed by the Administrator of Veterans' Affairs shall be accepted as sufficient evidence of inability to defray necessary expenses.'

"SEC. 30. Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, no pension being paid on March 19, 1933, to any veteran of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, or to the widow and/or dependents of any such veteran, shall be reduced by more than 10 percent, except in accordance with the regulations issued pursuant to Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply (1) to persons to whom payments were being made on March 19, 1933, through fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of a material fact, except that decisions as to degree of disability rendered prior to March 20, 1933, shall be conclusive, or (2) to any person during any year following a year for which such person was not entitled to exemption from the payment of a Federal income tax.

"All laws in effect on March 19, 1933, granting monetary benefits to veterans of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, are hereby reenacted in their entirety, and such laws shall be effective from and after the effective date of this act, subject to the limitations of this section and to such reduction in pensions as may be made hereunder.

"SEC. 31. Section 10 of Public Law No. 2, Seventy-third Congress, approved March 20, 1933, is amended to read as follows:

"'Notwithstanding the provisions of section 2 of this title, any person who served as an officer of the Army, Navy, or Marine Corps of the United States during the World War, other than as an officer of the Regular Army, Navy, or Marine Corps, and who (1) entered the active service between April 6, 1917, and November 11, 1918, (2) was honorably discharged therefrom, (3) made valid application for retirement under the provisions of the Emergency Officers' Retirement Act of May 24, 1928 (U.S.C., supp. VI, title 38, secs. 581 and 582), and (4) prior to March 20, 1933, was granted retirement with pay, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, shall be entitled to continue to receive retirement pay at the monthly rate being paid him on March 19, 1933, if the disability for which he was retired directly resulted from the performance of military or naval duty; except that retirement pay under this section shall not be denied to any person who was receiving on March 19, 1933, retirement pay under such act of May 24, 1928, on account of disease or injury incurred or aggravated in line of duty, and whose disease or injury or aggravation of disease or injury was at any time during his service made a matter of record by competent military or naval authorities, if such person is otherwise qualified under clauses 1 to 4, both inclusive, of this section: *Provided*, That nothing in this section as amended shall be construed so as to prejudice or destroy any rights of appeal, or any monetary benefits payable because of any such appeal, heretofore conferred upon retired emergency officers by this act and regulations issued pursuant thereto.'

"SEC. 32. Where any veteran suffers or has suffered an injury, or an aggravation of any existing injury, as the result of training, hospitalization, or medical or surgical treatment, awarded him under any of the laws granting monetary or other benefits to World War veterans, or as the result of having submitted to examination under authority of the War Risk Insurance Act or the World War Veterans' Act, 1924, as amended, and not the result of his misconduct, and such injury or aggravation results in additional disability to or the death of such veteran, the benefits of Public Law No. 2, of Public Law No. 78, and of this title shall be awarded in the same manner as if such disability, aggravation, or death were service connected within the meaning of such laws; except that no benefits under this section shall be awarded unless application be made therefor within 2 years after such injury or aggravation was suffered, or such death occurred, or after the passage of this act, whichever is the later date. The benefits of this section shall be in lieu of the benefits under the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes', approved September 7, 1916, as amended.

"SEC. 33. The last sentence of section 9 of Public Law No. 2, Seventy-third Congress, is hereby repealed.

"SEC. 34. Service-connected money benefits payable to World War veterans under this title and Public Law No. 2, Seventy-third Congress, shall be entitled 'compensation' and not 'pension.'

"SEC. 35. This title shall take effect on the date of enactment of this act, and no payments of any benefits conferred under the provisions of this title shall be made for any period prior to such date.

"SEC. 36. Notwithstanding the provisions of any law or regulation issued pursuant to authority of law, in any case where a veteran of the World War has been adjudged for insurance purposes by any court of competent jurisdiction to be totally and permanently disabled as the result of disease or injury, or the aggravation of a disease or injury, incurred in the active military or naval service, such veteran shall be rated for the purpose of payment of pension, compensation, or retirement pay not less than totally and permanently disabled.

"SEC. 37. That notwithstanding the provisions of section 17 of title I of an act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, and section 20 of an act entitled 'An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes', approved June 16, 1933, any claim for yearly renewable term insurance under the provisions of laws repealed by said section 17, wherein claim was duly filed prior to March 20, 1933, and on which maturity of the insurance contract had been determined by the Veterans' Administration prior to March 20, 1933, and where payments could not be made because of the provisions of the act of March 20, 1933, or under the provisions of the act of June 16, 1933, may be adjudicated by the Veterans' Administration, and any person found entitled to yearly renewable term insurance benefits claimed shall be paid such benefits in accordance with and in the amounts provided by such prior laws.

"SEC. 38. In the case of widows and dependents of officers and enlisted men of the Army, Navy, or Marine Corps, who served on the airships *Shenandoah*, *Akron*, and *J-3*, and who died in the accidents resulting in the destruction of such airships in April 1933, the amount of pension allowed shall be double that authorized by law or regulation of the President to be paid in cases where death results from an injury received or disease contracted in line of duty not the result of an aviation accident.

"SEC. 39. That no part of the appropriation carried in this act, or any other general appropriation bill for the fiscal year ending June 30, 1935, shall be used in payment, in excess of 85 percent of any salary or compensation of any officer or employee of the Government (except judicial officers) where such salary or compensation is in excess of $6,000."

Page 36, line 13, strike out "24" and insert "40."

And pending that motion, I should like to propose a unanimous-consent request that I believe will greatly expedite and simplify the consideration of the bill.

There are 23 amendments to the bill, but only 2 of them are practically controversial. That is to say, amendment 14, affecting the restoration of the Federal salaries, and amendment 22, which comprises all of the veterans' amendments. I ask unanimous consent that all Senate amendments, with the exception of Senate amendment 14 and Senate amendment 22, be disagreed to and the conference asked by the Senate agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. DOWELL. Reserving the right to object, that gives us permission to vote on all Senate amendments relative to Federal pay and the veterans?

Mr. WOODRUM. On Senate amendments 14 and 22.

Mr. RANKIN. Reserving the right to object, there are objections to other amendments.

Mr. WOODRUM. They will be adjusted in conference.

Mr. CONNERY. Reserving the right to object, Senate amendment 15, I think, the conferees will accept.

Mr. KVALE. Would the gentleman include in amendment no. 5, relating to the funds for the Federal Trade Commission?

Mr. WOODRUM. No; I think all those amendments should go to conference.

Mr. CELLER. When will the Committee take up the amendments 14 and 22?

Mr. WOODRUM. Immediately, if I get this consent.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. DE PRIEST. Reserving the right to object, I should like to ask the gentleman what about the Borah amendment?

Mr. WOODRUM. That particular amendment is to be taken up.

Mr. BRITTEN. Reserving the right to object, the gentleman will recollect that when the bill was on the floor of the House I suggested that an injustice was being done to the Army and Navy officers, particularly the naval officers, in connection with their salaries. The gentleman from Virginia said at the time that he did not care to go into that because he was not qualified to go into the pay of naval officers. The Senate inserted an amendment to do that. I should like to call that to the particular attention of the gentleman from Virginia.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. CONNERY. Mr. Speaker, reserving the right to object, does the gentleman intend to ask for a little debate when we go into the Committee of the Whole House on the state of the Union?

Mr. WOODRUM. I am going to take that up when we get this unanimous-consent request.

The SPEAKER. Is there objection?

Mr. KVALE. Mr. Speaker, I should like to have the request stated again.

The SPEAKER. That the House disagree to all Senate amendments, except amendment 14 and amendment 22, and agree to the conference asked by the Senate.

Mr. KVALE. All amendments from amendment numbered 14 to amendment numbered 22, inclusive, are in the title which affects the Economy Act amendment, and I think it only proper that the gentleman's request should state that amendments should include amendments 14 to 22, inclusive.

Mr. WOODRUM. Oh, the gentleman is mistaken about that.

Mr. KVALE. I am not mistaken. I have a copy of the bill in my hand, and the gentleman can verify it himself.

Mr. WOODRUM. Amendment numbered 14 is the amendment to be taken up in the Committee.

Mr. KVALE. Correct, and amendment numbered 15 also?

Mr. WOODRUM. No; I think that is a controversial amendment that ought to be disagreed to, and we should let it go to conference. Mr. Speaker, I ask for the regular order on my request.

The SPEAKER. Is there objection?

There was no objection.

Mr. WOODRUM. Mr. Speaker, pending the motion to go into the Committee of the Whole House on the state of the Union, I propound a parliamentary inquiry, and that is as to whether it is necessary before going into the Committee to have some understanding as to the time for debate upon these amendments.

The SPEAKER. It would be very convenient if an arrangement could be so made.

Mr. WOODRUM. Then, Mr. Speaker, I ask unanimous consent that debate upon amendment no. 14 be limited to 1 hour, one half to be controlled by the gentleman from Massachusetts [Mr. WIGGLESWORTH] and the other half by myself.

The SPEAKER. Is there objection to the request of the gentleman from Virginia.

Mr. RANKIN. Mr. Speaker, I reserve the right to object, to ask the gentleman from Virginia a question. There are several different elements in this amendment, and I want to know if we will be permitted to vote in particular in each amendment?

Mr. WOODRUM. When we go into the Committee of the Whole House on the state of the Union, the amendment is before the Committee for agreement or modification, and then we will go back into the House and vote on what has been done in the Committee.

Mr. CARPENTER of Kansas. Mr. Speaker, reserving the right to object, will the gentleman yield me about 2 minutes while in Committee?

Mr. WOODRUM. I shall endeavor to accommodate the gentleman.

Mr. SNELL. As I understand it, when this amendment is under consideration, it is subject to amendment, and debate on amendments to the amendment.

Mr. WOODRUM. Certainly.

Mr. WEIDEMAN. I presume it is the gentleman's idea to distribute the time somewhat among the Members of the House on this side.

Mr. WOODRUM. I shall try to take care of everybody that I can.

Mr. O'MALLEY. As I understand it, when the amendment is taken up in the Committee of the Whole House on the state of the Union, amendments to the amendment under the 5-minute rule will be in order?

Mr. WOODRUM. My unanimous consent, Mr. Speaker, is that there be 1 hour of debate on amendment no. 14, during which time amendments may be offered and debated, and that at the end of 1 hour the vote shall be taken on the amendment and all amendments thereto.

Mr. SNELL. Oh, that was not the request as I understood the gentleman to put it.

Mr. WOODRUM. That is what I meant.

Mr. SNELL. I understood that general debate was to be had for 1 hour and then an opportunity given to offer amendments and that we should have debate on the amendments also.

Mr. WOODRUM. It seems to me that is a whole lot of unnecessary time.

Mr. SNELL. The gentleman can move to close debate, but I think we should have some debate on some of the amendments that will probably be offered.

Mr. BLANTON. This request is only as to amendment no. 14?

Mr. WOODRUM. Yes.

Mr. BLANTON. It does not apply to no. 22?

Mr. WOODRUM. This applies to no. 14, the pay-cut amendment.

Mr. BLANTON. Then we will have another agreement as to amendment no. 22?

Mr. WOODRUM. Exactly.

Mr. SNELL. We could not agree to the last request.

Mr. WOODRUM. Does not the gentleman think that 1 hour of debate with the right to offer amendments is sufficient?

Mr. SNELL. But gentlemen want to debate some of the special amendments that will be offered. I think the hour for general debate is plenty.

Mr. WOODRUM. Would the gentleman agree to make it 30 minutes of general debate and then take up the amendments to the amendment under the 5-minute rule?

Mr. SNELL. Oh, some gentlemen here are complaining because I agreed to 30 minutes on a side.

Mr. WOODRUM. Mr. Speaker, I modify my unanimous-consent request to make it 1 hour of general debate and then to consider amendment no. 14, under the 5-minute rule.

The SPEAKER. Is there objection to the request of 1 hour of debate on amendment no. 14, and that then the amendment be taken up for consideration under the 5-minute rule?

Mr. TABER. And would not the gentleman amend that so that debate shall be confined to the amendment?

Mr. WOODRUM. Yes.

The SPEAKER. Debate to be confined to the amendment. Is there objection to the request of the gentleman from Virginia? [After a pause.] The Chair hears none.

Mr. WOODRUM. Mr. Speaker, I now make the same request with reference to amendment numbered 22.

Mr. BLANTON. Mr. Speaker, I think we ought to have more time on that amendment, as it embraces numerous important unrelated legislative subjects embracing an aggregate of nearly $300,000,000.

The SPEAKER. Is there objection?

Mr. BLANTON. I insist, Mr. Speaker, that there ought to be more time for general debate on amendment numbered 22, which embraces so many vital propositions, and we should have at least 1 hour to the side.

Mr. SNELL. I think we should have at least an hour on a side, and then consider it under the 5-minute rule the same as on the other amendment.

Mr. WOODRUM. Then I make the request that general debate be had for 2 hours on amendment numbered 22, and then it be taken up under the 5-minute rule.

Mr. TABER. Reserving the right to object, would not the gentleman incorporate in his request a division of the time between himself and the gentleman from Massachusetts?

Mr. WOODRUM. That is understood in both instances, that the time be equally divided between the gentleman from Massachusetts [Mr. WIGGLESWORTH] and myself, and the debate to be confined to the amendment.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Virginia [Mr. WOODRUM].

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 6663) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1935, and for other purposes, with Senate amendments, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. The Clerk will report Senate amendment no. 14.

The Clerk read as follows:

On page 32 of the printed bill strike out all of section 21 and insert the following:

"SEC. 21. (a) Section 3 (b) of title II of the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, is amended by inserting before the period at the end thereof a comma and the following: 'except that such percentage shall not exceed 10 percent during the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934.'

"(b) In the application of section 105 (a) (relating to the salaries of the Vice President, the Speaker of the House, Senators, Representatives, Delegates, and Resident Commissioners) of the Legislative Appropriation Act, fiscal year 1933, and sections 12 (relating to compensation reductions of officers and employees of insular possessions) and 13 (relating to the retired pay of certain judges) of the Independent Offices Appropriation Act, 1934, with respect to the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934, the percentage of reduction shall be the percentage applicable to officers and employees of the Federal Government generally.

"SEC. 22. There is hereby appropriated so much as may be necessary for the payment of sums due, and payable out of the Treasury of the United States, by reason of the diminution under this title in the percentage of reduction of compensation, and other amendments to existing laws made hereby; and limitations on amounts for personal services are hereby respectively increased in proportion to the increase in appropriations for personal services made in this section. In the case of officers and employees of the municipal government of the District of Columbia, such sums shall be paid out of the revenues of the District of Columbia and the Treasury of the United States in the manner prescribed by the District of Columbia appropriation acts for the respective fiscal years."

Mr. WOODRUM. Mr. Chairman, I move to disagree to the Senate amendment and agree to the conference asked for by the Senate.

Mr. DOWELL. Mr. Chairman, I move to recede and concur in the Senate amendment.

The CHAIRMAN. The gentleman from Virginia [Mr. WOODRUM is recognized for 30 minutes.

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas [Mr. CARPENTER].

Mr. CARPENTER of Kansas. Mr. Chairman, we are all in the same boat in this depression, and the war veterans and their friends never did and do not now object to reasonable cuts in compensation to assist this country in balancing its Budget, and are willing to make the same patriotic sacrifices now for our country that they did during the wars in which they were engaged.

The Government, since the time the economy bill was passed, has seen fit to spend billions of dollars in an earnest endeavor to help its citizens out of this terrible depression; therefore, I wish to state that I am very much in favor of the Senate amendments to the independent offices bill in behalf of the veterans, especially including the World War and Spanish-American War veterans, which rectifies the injustices created in the economy bill.

I am, however, opposed to returning to the Federal employees at this time their full 15-percent cut, restoring them to their full status before the economy bill was passed and leaving the whole burden of the economy upon the veteran.

As has been suggested to me I hardly believe it is the spirit of this Congress that the restoration of benefits to the disabled veteran is a raid on the Treasury while restoration of pay to the Federal employee is a patriotic duty.

There is a great deal of misinformation going out over the country to the effect that the increase in veteran benefits is going to wreck the economy program of the Government and cost the Government $334,246,824, when the truth of the matter is that the total veteran benefit included in these amendments will only amount to $118,253,700, whereas the cost of restoring Federal employees their 15 percent will be $215,993,124. The people in my district, and I know this to be true all over the United States, are in the terrible economic situation they are in because of the depression. Governmental expenses have been cut to the core, courthouse officials who do three times as much work as most of the Federal employees get from $60 to $80 a month, and the girls who work in their offices, $40 a month. School teachers in rural schools, where they can get a job at all, $40 a month, and we even find those with master's degrees teaching in our rural schools for salaries of not over $60 a month. In addition to this we have thousands of people who are very happy to get a few hours' work a week at 30 to 40 cents an hour under the C.W.A.

Federal employees in my district are not yelping for increase in salaries, they are very happy they have their jobs, and are graciously accepting their cuts, which is very small in comparison with the cut in cost of governmental services performed for the State and local governments, and the people in general who are paying the bill and doing all the suffering are not in favor of keeping this office-holding aristocracy up in the style in which it has been accustomed. I would not be in favor of cutting anyone's salary that was $1,000 or less a year, and would be in favor of restoring

Federal employees salaries when prosperity has been returned to the rest of the country. It is just merely the application of judgment and fairness to all concerned.

And the worst of all would be the increase of the Congressmen's salaries. I cannot conceive how any Congressman can go out and face the veterans and the people in his district, telling them how necessary it was to cut them down with one hand, whereas with the other he increased his own salary; therefore, I am supporting the Borah amendment prohibiting the increase at this time of all governmental salaries over $6,000 per year. As a matter of fact I think the Congressmen's salaries should be reduced under existing conditions and until prosperity has again been returned to their country, and this was the first bill I introduced in Congress last year, and which was introduced prior to our voting on the economy bill. For my part I do not believe that the cut in compensation to the disabled service-connected veteran should be any greater percentage than the percentage of cut to the Federal employee.

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio [Mr. COOPER].

Mr. COOPER of Ohio. Mr. Chairman, I hope the Membership of the House will approve the Senate amendments which restores to the Government employees the 15-percent salary reduction and also the restoration of compensation to World War veterans whose disability is of service or presumptive origin, and also the restoration of pensions to thousands of Spanish-American war veterans who were deprived of pensions by the Economy Act of 1933.

VETERANS' COMPENSATION AND PENSIONS

What a reflection it is on our Government to discontinue pensions to thousands of Spanish-American war veterans who rallied to the flag in 1898. And now, when most of them are past the age where they can secure employment and at a time when the sunset of life is fast casting its shadows over their brow, the patriotic service and devotion they rendered to flag and country is forgotten, and the small pension they did receive is now taken away from them.

Again, many thousands of World War veterans who carried our flag to a foreign soil—and they brought it back to us in a blaze of glory, without a stain upon its folds—many of them gave their blood, their bodies, their all for country. Today we find thousands of World War veterans crippled and disabled who have had their disability allowance reduced to what I believe is a shameful degree. There is no service we can render, no compensation we can pay that will fully compensate the service-connected disabled World War veteran for the loss he suffered and the sacrifice he made.

RESTORATION OF SALARIES TO GOVERNMENT EMPLOYEES

I am for the restoration of the full 15-percent salary cut to all Government employees, and in this respect I am following the policy so strongly advocated at this time by the President for an increased purchasing power of the American working classes.

On March 5, 1934, President Roosevelt called to Washington thousands of industrialists, business men, and employers of labor to discuss with them the progress and program of national recovery.

At the opening of the conference President Roosevelt addressed the gathering and called for the active cooperation of all citizens and the coordinated effort of all industry to promote the greatest happiness and well-being of the American people. I desire at this time to quote two short paragraphs from the President's address:

> Therefore, I give to industry today this challenge: It is the immediate task of industry to employ more people at purchasing wages and to do it now. Only thus can we continue recovery and restore the balance we seek.

Again quoting from the same address, he said:

> Every examination I make and all the information I receive lead me to the inescapable conclusion that we must now consider immediate cooperation to secure increase in wages and shortening of hours.

The two high spots in this challenge of President Roosevelt to industry are: First. Employ more people now. Second. Increased wages and shorter hours. I give my wholehearted support to this program. But, however, I want this policy to apply to Government employment as well as private employment, which the President was addressing himself to.

I have here the Postal Bulletin, of the date of March 3, 1934, signed by Postmaster General Farley, and sent to all postmasters. I now quote from the Bulletin.

> All Presidential postmasters, officials, and employees in the field service * * * will be furloughed without pay for 4 days during the remainder of the fiscal year. Railway-mail clerks will be furloughed for 3½ days during the remainder of the fiscal year.
>
> Deliveries by carriers in the city-delivery service may be limited to one a day in strictly residential territory, not more than two a day in mixed business and residential territory, and not more than three a day in strictly business territory.
>
> Rural carriers will not be furloughed.

I am informed, however, that the Postmaster General has requested Congress to pass legisilation providing for drastic reduction in the salary of rural carriers, and if this is not carried out, he will consolidate rural routes and discharge several thousand rural carriers.

Now for the two pictures: On the one hand the President is challenging industry to employ more people now at increased wages and shorter hours. This is a fine picture and will meet with the approval of the great masses of our people.

Now let us gaze on the other picture. We find the Postmaster General, Mr. Farley, the biggest single employer of labor in our country, under the direct control of President Roosevelt, reducing employment in the post-office service, at the sacrifice of wages to postal employees and efficient postal service to the American people.

The Postmaster General states that this action is imperative in order to balance the Budget of the Post Office Department. Balance the Budget! Yes; I should like to see the Government balance the Budget. I am not, however, in favor of balancing the Budget, if we are to do so by cutting the wages and salaries of Federal employees and reducing disability compensation to deserving World War veterans and depriving Spanish-American War veterans of a fair and just pension, which I believe they are entitled to.

When President Roosevelt threw the challenge to industry and business to employ more workers and increase wages, he said nothing about them balancing their budgets. There are many industries in our country today that are operating at great loss in attempting to keep their plants working and give employment to American workers. Oh, you say the President is ready to grant an increase of 5 percent in salaries to Federal employees, effective February 1 to June 30, the end of this fiscal year.

Granting this increase to Federal employees, let us not be fooled. The President grants an increase of 5 percent in the salary of Federal post-office employees, and the Postmaster General then takes it away from them by furloughing them without pay. More than 50 percent of the 5-percent increase granted by the President will be taken away from the Postal employees by the furlough order of the Postmaster General, Mr. Farley.

Congress has no right to insist that private industry employ more workers, increase wages, unless we are willing to have the same principle apply to Federal employees. Let us approve of the Senate amendments, and by so doing we will be upholding the policy of the President in his challenge to industry and business.

Mr. DOWELL. Mr. Chairman, I offer an amendment to my motion.

The CHAIRMAN. The Clerk will report the amendment.

Mr. BANKHEAD. Well, Mr. Chairman, is it being reported for the information of the committee?

Mr. DOWELL. No. It is offered as a part of the motion.

Mr. BANKHEAD. As I understand, we are still under general debate.

The CHAIRMAN. The Chair so understood.

Mr. DOWELL. It is on the motion, and I am just offering an amendment to the motion.

Mr. WOODRUM. Mr. Chairman, I have no objection to the gentleman's amendment being read.

The CHAIRMAN. The Clerk will report the amendment for the information of the House.

The Clerk read as follows:

Amendment proposed by Mr. DOWELL: On page 35, after line 22, insert the following as subsection (c):

"That no part of the appropriation carried in this act, or any other general appropriation bill for the fiscal year ending June 30, 1935, shall be used in payment in excess of 85 percent of any salary or compensation of any officer or employee of the Government (except judicial officers) where such salary or compensation is in excess of $6,000."

Mr. WOODRUM. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. WOODRUM. Mr. Chairman, it is legislation on an appropriation bill. It is not responsive to anything in the Senate amendments. It not only places a limitation to this appropriation but it applies to all appropriations, and it is inconsistent with the gentleman's motion to recede and concur in the Senate amendment, which restores all basic salaries. The gentleman has already made a motion to concur in the Senate amendment which restores all basic salaries at 100 percent. Now he undertakes to place a limitation on those basic salaries of 15 percent.

Mr. DOWELL. Yes; and this is a limitation on this appropriation bill, and it certainly is in order. I offer it as an amendment.

The CHAIRMAN. Will the gentleman from Virginia [Mr. WOODRUM] kindly say whether the Senate amendment affects all salaries in all appropriation bills?

Mr. WOODRUM. Senate amendment no. 14, to which is directed the motion of the gentleman from Iowa that the House recede and concur, restores all Federal salaries to 100 percent of the basic rate from July 1.

Mr. DOWELL. And, therefore, all salaries being affected by this provision, this amendment is a limitation upon expenditures, as the gentleman from Virginia has specifically stated.

The CHAIRMAN. The Chair overrules the point of order.

Mr. CHRISTIANSON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CHRISTIANSON. If the amendment offered by the gentleman from Iowa is in order, is an amendment to his amendment in order at this time?

The CHAIRMAN. If no one objects.

Mr. CHRISTIANSON. Then, Mr. Chairman, I move to amend the amendment by striking out "$6,000" and inserting in lieu thereof "$1,800."

Mr. WOODRUM. I think if the gentleman will withhold his amendment until we consider the Senate amendment under the 5-minute rule, he will then have ample time to offer it. The amendment of the gentleman from Iowa was presented for the information of the committee.

Mr. CHRISTIANSON. Will my amendment to the amendment of the gentleman from Iowa be considered on the same basis as the amendment just offered?

Mr. WOODRUM. Mr. Chairman, I make a point of order against the offering of the amendment during general debate.

The CHAIRMAN. The Chair sustains the point of order.

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Chairman, I trust you will grant me just a bit of latitude in order that I may touch on section 40 along with section 14; and this is as far as I will transgress on the good will of the Committee.

My position as regards the welfare of all Government employees and ex-service men, irrespective of in what branch of the service they serve this Government and without regard to where they served the flag, is beyond question.

I am proud of the fact that I very early signed the petition which resulted in the Patman bonus bill being brought out on the floor for the consideration to which it was entitled. The unfortunate part, however, Mr. Chairman, was that the bill was trotted out at a time when I found it impossible to be present. I hastened my return to the floor only to find that the vote had already been taken. I feel that the overwhelming vote of approval which carried the bill through the House was the direct result of, and made possible by, the assistance which I, as one, assured it by my signature.

Mr. Chairman, at this time I want to voice my complete accord with the intents and purposes of the Senate amendments as they pertain to Federal employees and to the war veterans. It is manifestly clear that certain injustices have been done to both these classes of our citizens, and I, personally, am willing to acknowledge that now is the time to correct them.

With regard to the Federal employees, I hold and contend that what is good enough for private industry is good enough for the Government. If increased salaries, high wages, and short hours are good for the manufacturer, for the merchant, and for the business man, the very first places where the example should be set and the principle applied are the governmental agencies, offices, and bureaus. Particularly is this true when applied to the little fellow who is receiving the lesser wage rate. I feel this is only the just and proper thing to do because of the principle involved. We should bring back the salary of Government employees to the full basic rate and set the example for the manufacturers, the merchants, and the business men of this Nation. I do not believe there is any division on this point between the Members on either side of the House. The restoration of purchasing power is necessary, and an important factor in the realization of this desired event is the restoration of Government salaries. The administration and the President have repeatedly asked the business interests of the Nation to restore basic salaries; yet, in the final analysis, we find this great Government the first to withhold what it demands of its citizenry.

It has been brought to my attention that a system of furloughs has been inaugurated in the Postal Service which will modify any and all benefits that might be derived through the pay restoration. While I am on my feet, Mr. Chairman, I want to take a direct slap against any individual, group, or element that would attempt to nullify the intent and the purpose which Congress has in mind when restoring the pay of Federal employees. It seems inconceivable that any administrative officer of any department would undertake to go so far.

I have seen a great deal and have read considerably of the injustices and the inequalities of the Economy Act. These would be corrected by the Senate amendments. At the same time, I want to voice my positive opinion that the Senate amendments will go a great distance toward the alleviation of certain conditions among the war veterans. I am very anxious to do my small part to correct these injustices, to eliminate these inequalities. I am not here at this moment to cite any particular set of figures, because, in the first instance, figures invariably can be manipulated to suit individual convenience and purpose. I think it is generally conceded, however, that certain provisions of the Economy Act should be changed and others abolished. I think the Senate has gone a great distance in the right direction. The House should follow.

The vote today on the gag rule reflects the attitude of the House of Representatives. While I was unavoidably absent when the gag rule was considered on January 11, I most assuredly would have voted against it had I been present. It is a matter of record that I voted to recommit the bill.

In spite of the entreaties that the bill be passed with the greatest possible dispatch without amendment, the Senate took the necessary time to deliberately amend the House bill and it was not until 1 month and 18 days later, or thereabout, that the bill reentered our hands. We were again urged to swallow the gag but, inasmuch as the welfare of the disabled war veterans, the Spanish War veterans, the

Federal employees, and others who are in need was involved, I decided definitely for noncompliance.

I want to say to you, my friends, that my constituency expects me to use my best judgment in any and all matters pertaining to the welfare of the people, and I propose to avail myself of the good old American privilege of deciding on the merits of the case. I have grown weary of rendering assistance to the bankers, to the railroads, to the insurance companies, to the casualty companies, and every other element which you might class legitimately among the big interests, and I have reached that point when I can no longer aid and assist the big corporations unless and until I can bring about a measure of relief to the common man—to him who was mentioned so many times and for whom primarily the new deal was designed.

I am only too anxious to do my small part to bring about the greatest possible and the most immediate restoration. I have always advocated high wages in private industry as a means of assured and general prosperity. I believe that the place to inaugurate firmly and definitely such a policy is with the Government itself. I believe that the example set will have more real effect in bringing about a revitalized purchasing power, and therefore prosperity, than anything else which we, in this House, could possibly do. We cannot deny that it is ridiculous and inexcusable for our Government to fight against complete restoration, and more so because the complete restoration seems to hinge on a mere 5 percent. The need in this country and the need of the Government, which is involved in this instance, must either be great enough to fulfill the 15 percent or no need of any kind exists which would be satisfied with a mere 5 percent. Assistance was given every other element excepting that great and speechless element, the workingman. So far as I am concerned, Mr. Chairman, we shall not consider them as mendicants and untouchables. I stand uncompromisingly for the Senate amendments. [Applause.]

[Here the gavel fell.]

Mr. BRITTEN. Mr. Chairman, I desire to offer a preferential motion.

Mr. TABER. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. TABER. I make the point of order that, there having been an agreement there should be 1 hour of general debate upon Senate amendment no. 14, it is not now in order to make any motion or to offer any amendment until the general debate is concluded.

The CHAIRMAN. The Chair sustains the point of order.

The amendment of the gentleman from Iowa was read for the information of the Committee by unanimous consent.

The gentleman from Illinois will withhold his amendment until the conclusion of the general debate. During consideration of the Senate amendment under the 5-minute rule the Chair will recognize the gentleman from Illinois to submit his motion.

Mr. VINSON of Georgia. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. VINSON of Georgia. Then there is no motion pending before the Committee at this time?

The CHAIRMAN. The motion of the gentleman from Iowa [Mr. DOWELL] is pending, and, being a motion to concur in the Senate amendment, will be a preferential motion.

Mr. GOSS. Mr. Chairman, I understood that the motion of the gentleman from Iowa [Mr. DOWELL] was to concur in the Senate amendment.

Mr. DOWELL. With an amendment.

Mr. GOSS. And subsequent to that time the gentleman asked permission to have read for the information of the House an amendment to his motion which was preferential.

Now, do we understand that the Dowell motion to concur is the motion before the House, or is the motion before the House a motion to concur with an amendment?

The CHAIRMAN. All the motions will be before the Committee. The general debate will now proceed.

Mr. DOWELL. Mr. Chairman——

The CHAIRMAN. If the gentleman has a parliamentary inquiry, the Chair will hear him; but the Chair does not recognize the gentleman for any other purpose.

Mr. DOWELL. May I state the purpose?

The CHAIRMAN. No. The general debate on the amendment will proceed.

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, I think I understand the situation that confronts us. I know I understand what can happen. The amendment which we will shortly vote upon deals solely with Government employees' salaries.

I cannot speak for the President, and so far as I know no one here can speak for the President, as to how far he will go in this respect. We do not know what part of the Government employees' salaries the President is willing to restore. How can you find out? The only way that you can find out the President's views is to agree to the motion of the gentleman from Virginia that this amendment go to conference or concur with an amendment that will keep the question open. Let the conferees wait on the President and see what kind of a compromise can be secured.

Here is the situation that confronts the gentlemen who voted against the rule today. Suppose we agree to the Senate amendments as provided by the motion of the gentleman from Iowa [Mr. DOWELL]. Suppose likewise the House agrees to the amendment affecting veterans and the bill is sent to the President, who, we are told, will veto the bill in such form. This is what happens: You have restored the salaries of the Government employees; you have restored the full 15 percent, but what have you done for the veterans? You have not given the veterans one penny more than they are receiving today nor changed hospital provisions.

The Senate amendment provides for the restoration in part of pensions of Spanish War veterans and their widows. If the President vetoes this bill, and it contains this Senate amendment, and we are forced in the end to pass a resolution continuing the present appropriation for the independent establishments, the Spanish War veteran gets absolutely nothing more than he is getting today. You are placed in the position of going back to face your veterans, who will say to you: "You gave the Government employees their full salary, you took your own full salary and accepted it, but what did you do for us? What did you do for the presumptive cases? You did nothing for the presumptive cases. What did you do for the Spanish-American War veterans? You did nothing for them."

No one can deny that will result in the event of a veto.

The Government employees are friends of the veterans. I cannot conceive they want to benefit at the veterans' expense. They want justice extended to all.

Mr. Chairman, whenever there is an argument, whether it be in business or in the Government, there is only one thing to do and that is to get together and agree on a compromise. We do not know what the President is willing to do for the Government employees, the Spanish-American War veterans, or the World War veterans. We might find out when the conferees go to the White House and the President considers the situation that exists, that he would be willing to restore a certain percent of the pension that the Spanish-American War veterans were getting a year ago, extend additional benefits to World War veterans, and make hospitalization provisions more liberal. I do not know what that percent might be, nor do I know if he would be willing to restore any of the pension. The only way you are going to get anything is to send the amendment to conference, let the conferees go up to the White House, and agree with the man who must sign this bill. [Applause.]

Personally I would like to see this bill go to the Senate carrying the amendment of Senator BYRNES, of South Carolina, who was looked upon as being the President's spokesman in the Senate. If you will recall, his amendment provided for restoration of 5 percent of the salaries as of

February 1, 5 percent as of July 1, and the balance whenever the President issued an Executive order. This amendment was defeated in the Senate by 1 vote.

It is hard for us to explain the situation to our constituents, who are directly interested. It is hard for them to understand the situation that confronts us. Why do something that down in our hearts, at least those who understand what can happen, know might ultimately result in no increase of any kind for veterans or, for that matter, no restoration of pay of any kind for Government employees? Let us face this issue fairly and squarely both as to the Government employees as well as the veterans and do the very best we can for them. Let us not attempt to do something we know we cannot accomplish.

Why should we, thinking only of our political future, place the burden or, to be plain, pass the buck to the President? He certainly has enough now to shoulder without the Congress piling more upon him.

If this country comes back, as we all pray to the good Lord it will, there will be no delay in restoring the full pay of the Government employee.

My heart goes out to those underpaid employees, those in the lower brackets, who have been forced to stand a reduction in salary. Men with children earning barely enough to exist. I am thinking of them, and I would rather see them get at least a half loaf instead of nothing.

They will accept your explanation when you face them and tell them just what confronted you. Do not do something now that you will regret at a later date. Your conferees can be trusted. Think this matter over carefully.

The Government employees have always been my friends, the same as they have been yours. I hope they have confidence in me at this time.

Mr. Chairman, we have a duty to perform to the Government employees, to the veterans, and to those who must foot the bill. As I see it, we can only perform that duty by voting today so that our conferees will have something to work on in an effort to effect a compromise. [Applause.]

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, when I sent my amendment to the Clerk's desk a few moments ago I did so for the information of the House. The object of the motion is to concur in Senate amendment no. 14 with a view to restoring 100 percent of all salaries on July 1 of this year. I do this with a view of taking Uncle Sam out of the realm of inconsistency, which he now occupies.

As a Member of Congress, I regard myself and every other Member of this House as the paymaster for every employee in the United States Government. We, first of all, are the positive paymasters of the employees of the Government. When President Roosevelt, in a Nation-wide broadcast, announces to the paymasters of the country that the hours of labor per week should be shortened and that the wages per hour should be increased, I assume that he is talking to me. I certainly could not assume that he was talking to every other paymaster in the United States excepting myself as a Member of Congress. That would not be consistent. I conclude, and every Member of this House should conclude, that when Gen. Hugh Johnson, the National Recovery Administrator, cracks down on industry for an increase in wages, and when the President challenges industry for an increase in wages and shorter hours, that it would be silly for the paymaster of the biggest employer in the United States to disregard these requests. The paymaster is sitting here. He holds the purse strings of every Federal employee. He holds the destiny of these employees in the palm of his hand. These employees cannot march on the White House, they cannot promote parades, they cannot come down and object to their hours of labor or their pay, because if they do so they will lose their jobs.

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman 1 additional minute.

Mr. BRITTEN. Mr. Chairman, seriously, I maintain that when the administration is challenging the industries and challenging the paymasters of the country to meet this situation with a view to improving unemployment and in the interest of recovery, this House, the paymaster of the greatest employer in the United States, cannot sit idly by and refuse to listen. The Senate amendment should be concurred in, and I hope you will approve my amendment in that direction.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 3 minutes to the gentleman from Indiana [Mr. GRAY].

Mr. GRAY. Mr. Chairman, it has been one of the sad tragedies in the course and policy of nations that the unfortunate soldiers of the South, who fought believing in the "lost cause", have been barred from the pension bounties long paid to the northern soldiers, who fought alike believing in the Union cause. But this could not be otherwise. Under the law of loyalty and allegiance there can be no policy of government under which to reward the soldiers who fight against the flag and colors with those who defended the colors and the flag. Under the law of allegiance, barring pensions to her own soldiers, the South has bowed in meek humility, becoming in the fortunes of war, and has borne the burdens of government with loyalty and self-sacrificing denial. [Applause.]

For almost 70 long years in duration, while their own soldiers in the South were left neglected in their advancing years, left in the infirmities of old age, left in hunger, shivering and shelterless, left to suffer privation, poverty, and want, the people of the Southern States have patiently, heroically, and patriotically borne the burdens of tariff and excise taxes with Christian fortitude and endurace, all to pay pensions to the northern soldiers. [Applause.]

I can see that nobleman of the South, the lamented Oscar Underwood [applause], standing upon the floor of this Chamber, counseling, entreating his brother Members here, to vote for pensions to the northern soldiers, promising them their time would come, all while their own fathers and brothers—honest, confiding soldiers of the Southland, soldiers serving with like loyalty and allegiance, soldiers serving in the lost cause—remained suffering in poverty and want, hovering over the cold ashes of old age, in the winter evening of life. [Applause.] Oscar Underwood [applause] was broad enough to realize, know, and understand that while the policy of nations would forbid pensions to Confederate soldiers, the same policy made pensions to Union soldiers a binding, subsisting obligation upon the Nation and upon the people of every State and section of the Union, upon the people of the South as well as the North. [Applause.]

But as time lowers the mountain range, as time raises the valleys of the sea, as time lifts the depressions in the earth and brings all to an even, common level, so time has brought the sons of the South up and the sons of the North down to stand equal on a common level together under the folds of the Stars and Stripes today, to share the Nation's bounties and blessings, as well as to share its burdens and fight its battles. The soldiers of the Spanish War and the soldiers of the World War have come up from the South to share with the soldiers of the North in just, equal part and portion the Federal measures of relief provided for its soldier defenders.

But no sooner has the South come into its own, an equal place and position, to claim pension benefits and relief for their sons, their soldier and sailor boys, from the taxes they have long been paying, than a sudden change of policy is declared, with so-called "economy" the watchword of the hour, to drive stricken, suffering soldiers from the hospitals and to strike them from the pension rolls like wounded sailors clinging to a raft at sea. And the orders come directing pensions to be reduced, or commanding pensions and allowance be discontinued, to make up to the exhausted Treasury for what Morgan, Mellon, and the war profiteers had rebated, defaulted, and failed to pay.

Mr. Chairman, if I were a Member of Congress from south of the Mason and Dixon's line, from the great Southern States, as I am a Member of Congress from north of that

line, from the great States of the North, and if I had been a Member coming here, or my Representatives had been coming here, during all these long trying years and voting pensions to northern soldiers to be paid for by taxes collected from my people, the people of the South, paid faithfully, patriotically, and well, I would meet the so-called "Economy League" on the threshold of the exhausted Treasury. [Applause.] I would challenge the plea and pretext for economy over and above the debt and obligation to my soldiers. I would defy the party or leadership standing in the way of justice and right to the soldier boys of the South. And in vindication of the patience and forebearance of the people and taxpayers of the South, who for almost threescore years and ten have been paying pensions to the soldiers of the North, I would renounce the leadership counseling and advising the surrender. [Applause.]

And, if I failed to uphold and claim full pensions now coming to my soldiers, long paid to the soldiers of the North from tariffs and impost taxes collected from the people of the South. I would never try to explain my cowardice to the brave soldier boys of the South, who stormed San Juan Hill in Cuba in the face of shot, shrapnel, and shell to free the Cubans from the rule of Weyler and from the iron heel of Spain. I would never go back to my soldiers, who trained in the Miasma army camps, who defied the treacherous submarine seas, who fought at the Marne and Chateau Thierry, who charged through the Argonne Woods, who faced shrapnel shell and cannon at Verdun and on the battle fronts of Europe.

I would never go back to my soldiers, who stopped and stayed the tide of the German on-rushing army hordes led by Hindenberg, Ludendorff, and Moltke, directing an avalanche of fire and steel in a cloud of death-dealing fumes and gas following in the wake of havoc and destruction, driving, surging on to the gates of Paris to conquer France and the allied world. I would never go back to my soldiers and try to explain or qualify to them why I did not possess the courage to meet Morgan, Mellon, and the war profiteers and the tools and puppets of the Economy League. I would never try to explain to my soldiers why I voted to surrender their pensions, or, voting in error, why I failed to change my vote when the true facts were discovered and before me and the operations of the law were revealed as a system, means, and artifice for the relief of the financiers from the payment of their taxes, and when it was apparent and realized that this Congress and administration were taking from salaries, wages, and pension to make up to the exhausted Treasury for the income and corporation taxes which the last Congress and administration had failed and neglected to collect from Morgan, Mellon, and the war profiteers. [Applause.]

I come from antislavery, Union-cause people. My father was an antislavery and a Union man. My grandfather was an antislavery and a Union defender, and was mobbed in the great State of Indiana, in 1856, when he held an antislavery meeting and spoke against human bondage, declaring that slavery was the sum of all villanies. But the great Civil War is over, the issue of slavery decided by conflict of arms and has been confirmed by the judgment of time. The people of the North and the South are happy and contented living together with interchange of commerce, trade, and travel. And held in the bonds of a common interest and a common cause, they stand out before the world as one people forever united for progress, achievement, and advancement, and invincible as a power in the world. For these reasons and because of these facts, I stand in a good faith, considerate position to speak for the brave soldier boys of the South and to commend the people of the Southern States for their good faith, submissive spirit, and their patriotism and loyalty as citizens of this great Union of States.

Mr. Chairman, when Congress was called to convene last March in special session to consider farm and industrial relief, members were shown an empty Treasury or a Treasury fast nearing exhaustion, without funds available or in anticipation, for the payment of salaries, wages, and soldier pensions. And Members, arising to the emergency of the hour in a realization of high patriotic duty to maintain the credit of the Government, and to save the people from insolvency and bankruptcy, voted to reduce their own salaries 15 percent and voted to reduce public wages 15 percent. And, under solemn pledge and promise that soldiers' pensions would be readjusted with care, fairness, and humane consideration, to reduce pensions too high and to raise pensions too low, voted, believing to reduce pensions in like amount and the economy bill was passed by Congress. And here I want to commend and compliment many Republican Members and soldier friends, who listened to the appeal for economy, heeded the call for retrenchment in expenditures, and, rising above petty partisan spirit, voted with the majority for the Economy Act.

But when the Members voted for the Economy Act they did not know that J. P. Morgan was not and had not been paying his income taxes. Members did not know that 500 Morgan partners were not and had not been paying their income taxes. Members did not know that 89 Morgan bank syndicates were not and had not been paying their income and corporation taxes.

Members did not know that Andrew Mellon, former Secretary of the Treasury, was not and had not been paying his income taxes. Members did not know that 37 Mellon banks and trust companies were not and had not been paying their income and corporation taxes.

Members did not know that the certain special few men—the great manipulating financiers of the country, holding 90 percent of the wealth of the country—were evading and had been evading the payment of their taxes. Members did not know that myriad millions of taxes had been and were being evaded and defaulted, and more than enough to pay all salaries, wages, and soldier pensions.

Members of Congress did not know until after the new Senate committee, appointed to investigate tax frauds and evasions, had investigated and reported back that Morgan, Mellon, and the war profiteers were not paying and had not been paying their income and corporation taxes. Members of Congress did not understand or realize that the enactment of the economy bill, under the true facts finally found, was practically in effect an order to take from salaries, wages, and soldiers' pensions enough to make up to the Treasury for the loss in income-tax collections which the last Congress and administration had allowed, evaded and defaulted in serviant obedience to the war profiteers. And confronted with an empty Treasury, with national insolvency and bankruptcy imminent, and with assurance that pensions would be reduced fairly and tempered with justice to the soldiers and in equalization of soldiers' pensions, Members were actuated on good faith and patriotic motive and were justified in voting for the economy bill.

But when the Senate committee had found the facts and reported showing the failure, defaults, and evasions of Morgan, Mellon, and their war-profiteer associates, their failure to pay income and corporation taxes; and when the law was carried into force under the Hines rules and regulations, reducing pensions 50 and 75 percent and more and striking soldiers ruthlessly from the rolls, then, and not until then, did Members know or realize the facts. But when the committee had reported and the facts were known the Members were chargeable with knowledge of the facts, and from and since such discovery of the facts Members have stood responsible with knowledge of the facts and with knowledge of this inhumane course and brutal treatment of the soldiers.

When I learned these facts in May, learned of Morgan's and Mellon's tax evasions, learned that Administrator Hines would be held in office in violation of the so-called "new deal" pledge, learned of his rules and regulations promulgated and his cruel and brutal course toward the soldiers, I filed a bill (H.R. 5908) to repeal the Economy Act, to reinstate the soldiers upon the rolls, to reenact the pension laws repealed, and to reduce pension payments by 15 percent, the same as salaries and wages provided. And as soon as 30 legislative days had expired, I filed my petition upon the

Speaker's desk to discharge the committee to which referred, to bring the bill before the House for hearing, consideration, and passage. And members of former administrations under which these tax evasions were permitted and concealed, and who have disclaimed knowledge of these rebates, evasions, and defaults but who are now chargeable with actual knowledge of the facts, may now maintain good faith in fact, may now exonerate themselves and maintain good faith with the soldiers by promptly acting upon this knowledge and by signing my petition on the Speaker's desk and by joining with me on the floor to repeal the act and restore the pension laws.

And members of this administration, from whom the facts were covered and concealed, to maintain their good faith with the soldiers, should now sign my petition on the Speaker's desk, help me bring this bill out upon the floor, and join with me to secure its passage. Both those who voted for the economy bill and those who voted against the economy bill, to maintain a consistent course and good faith toward the soldiers who fought our battles, should sign my petition on the Speaker's desk and help repeal the Economy Act.

Let no Member waiver or hesitate in fear or apprehension of changing his vote on learning the truth and the facts. Let him realize and be assured that a wise man freely changes his mind, but only a fool pursueth the same course forever. I try to keep my mind open to the truth and new facts. I try to hold myself ready to change at all times and reverse myself when facts and conditions change. I try to know more today than yesterday, and I hope to know more tomorrow than today. I have faith in the policy to do right. I take courage and resolution in being right. I take solace and consolation in the right. And in the last and final analysis of life my one and sole ambition is to do right toward my confiding fellow men.

The President has now turned back, realizing the error and injustice of the Economy Act, more than $150,000,000 to the soldiers taken from them by the Economy Act, and has taken just credit for this return before the soldiers. I am glad that he has taken this credit. I am anxious for him to take and claim the credit. He deserves to take and claim such credit. And I want him to take and claim more credit, more credit for restoring more pensions back to the soldiers. But he has turned back taking credit for what Members of Congress here voted to take away from the soldiers and for what they are still chargeable, and for what they stand responsible, and for which Members themselves are entitled to take equal credit and can take equal and just credit by signing my petition and voting for my bill.

Suits for the prosecution of Morgan and Mellon and the war profiteers and for the collection of evaded and defaulted taxes have been filed and are now pending. But pensions should not be withheld from soldiers awaiting the conviction of these tax violators and the collection of these back taxes. Now that the facts are known to Congress, now that the truth is found and admitted, now that the cause of the empty Treasury is explained, and as the failure to collect income taxes is not the fault of the soldiers themselves, the soldiers' pensions should be paid promptly without delay. The soldiers have performed the service. Their pensions are long past overdue. They should not be made to wait in suffering and suspense for the suits filed to be tried, awaiting the law's long and tedious delays, nor for the collection of these defaulted taxes for which they have in no way contributed and are in no way responsible or chargeable.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 4 minutes to the gentleman from Kansas [Mr. McGUGIN].

Mr. McGUGIN. Mr. Chairman, it seems to me that legislative wisdom, as well as the merits of the question, requires that we should send section 21 or Senate amendment no. 14 to conference.

Restoring the complete pay of public employees and officers on July 1 of this year is a program which is not parallel with the N.R.A. program of increasing wages. The wages that President Roosevelt and General Johnson are talking about are industrial wages, which during 3 years of the depression had already been driven down to unreasonably low levels. When we are talking about the salaries and wages of public employees we are talking about 1928 wages with a 15-percent reduction, and General Johnson and President Roosevelt, in their fondest dreams, have no idea that they are going to be able at an early date to restore industrial wages to 85 percent of the 1928 level. To take the position that we should join in this amendment simply because the National Industrial Recovery Administration is trying to raise industrial wages to a living level is taking an unfair advantage of the situation, doing no good for the industrial employees and only trying to cash in at their expense. [Applause.]

As a matter of practical legislation, if we concur in this Senate amendment and then concur in the Senate amendment on veterans' legislation, which I hope we will do, we have tied a millstone around the neck of the veterans.

The claim of the Spanish War veterans and the World War veterans is a claim that should be permitted to stand upon its own feet and upon its own merits. If in the end we can present such a legislative position, I do not believe the President of the United States can fly into the teeth of the righteous public sentiment in favor of the Spanish War veterans and the World War veterans, as provided in the veterans' amendment. However, if we tie them together, then the President is in a position where he must veto the veterans' benefits in order to reach the public-salaries matter.

Now, mind you, the Economy Act as to public employees provides for a 15-percent reduction with an obligation upon the President to restore the salaries whenever the cost of living goes back to the 1928 level.

I am quite frank to concede that in the administration of the furlough and in some of the administrative acts there has been an inhuman injustice done to certain classes of low-salaried public employees, such as postal substitutes, but we cannot reach them and them alone by concurring in this amendment.

Again, I doubt if this amendment was seriously enacted in another legislative body. I think it was politically enacted. The vote was 40 to 41.

Veterans' legislation is entirely different. I think we are justified in concurring in the Senate amendment that pertains to veterans' legislation, but we should not concur in this Senate amendment, but rather we should send it to conference so that a salary arrangement may be reached which the President will accept. That will give the veterans a running chance on their own merits and at the same time do more for the employees than will be obtained from a vetoed bill. At any rate, we should modify the provisions for public employees in line with the Byrnes amendment in the Senate. That amendment may be accepted, and if so, will restore public salaries with a 5 percent reduction after July 1, 1934. That will give public employees and officers a far better position than the great body of people will enjoy.

Mr. WOODRUM. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. HOEPPEL].

Mr. HOEPPEL. Mr. Chairman, I believe in supporting the administration on this bill. I also believe in supporting and standing behind the Democratic platform declaration which states:

> We advocate the spread of employment by a substantial reduction in the hours of labor, the encouragement of the shorter week by applying that principle in Government service.

We are not applying the principle of the N.R.A. in Government, and I think we ought to do that.

I stand behind the administration as I read a short sentence from a declaration made by the Honorable Postmaster General of the United States, who, in speaking of this depression in New York City on March 8 this year, said—

> No money should be spared in fighting this depression.

I agree with him; we should spare no money in fighting this depression and not only should we take care of our Federal employees, but we should enact sufficient and proper

legislation to take care of the millions and millions of unemployed citizens of our country.

We must legislate for the Federal employees, but as yet we have not effectively and properly legislated for the unemployed of our country.

I wish to speak also in reference to an item published in the Union Postal Clerk magazine for the current month, quoting Mrs. Franklin D. Roosevelt—

> No business can be called really successful which has at the bottom workers who are not able to live decently and happily.

I say our Federal employees in the lower-pay categories are not able to live decently and happily with the wage scale they are receiving today.

Mr. BRITTEN. Will the gentleman yield very briefly?

Mr. HOEPPEL. I yield.

Mr. BRITTEN. I would suggest to the gentleman that the 1928 Democratic platform said that Federal employees at that time were underpaid.

Mr. HOEPPEL. I thank you, but I have not the time to elaborate on that. I am in favor of the principles of the N.R.A. Our Government, which is asking the private business man to live up to the principles of the N.R.A., should be true to its implied trust. I have here a letter stating that the Post Office Department is trying to scale down the fees of an architect now engaged in designing a post-office building in my district. I have another letter with respect to civil-service employees, stating that the Government is economizing on these individuals. Our Government authorities have discharged first-grade mechanics receiving $42 a week, and a few days later the same Government authorities have reemployed them at a salary of $25 per week, taking them back in lower civil-service ratings.

We are not doing the fair and square thing for our Federal employees. We should restore their entire pay. I am in full accord with our President's statement that we should raise salaries 10 percent and reduce hours 10 percent. It is the question that is involved in this amendment. I am in favor of the amendment, and I hope it will be adopted. [Applause.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. KELLY of Pennsylvania. Mr. Chairman, the action already taken this afternoon ought to be heartening assurance of the determination of this House to pursue the true course of national recovery.

If this voting-down of the gag rule is followed by concurrence in the Senate amendments, it will be proof positive that both Houses of Congress are following faithfully the philosophy embodied in the National Industrial Recovery Act.

The immediate matter before us is a motion to concur in the Senate amendment, with an amendment. If that should be adopted, the whole question will be sent to conference, and there will be continued juggling with this vital issue. If that motion is voted down, there will be offered a motion to concur with the Senate amendment exactly as it stands. That motion, if adopted, will settle the controversy. It will be a declaration of the policy Congress has adopted after long consideration. It will mean the restoration of 5 percent of the wages of Federal employees as of February 1, and the remaining 10 percent on July 1.

With that action taken, the fiscal year 1935 will see the regular wage schedules reestablished, and the Government of the United States will be in line with the recovery program of the President.

Mr. Chairman, the basis of the N.I.R.A. is that increased purchasing power in the hands of American workers will create orders for the products of farms and factories. With fair prices secured by frank and open cooperation, it is believed that prosperity can be secured.

Let us not deceive ourselves. There is no way out of the depression except through increased buying power for 30,000,000 American families. That is the only weapon to slay the national enemy which threatens our destruction.

Every possible means must be used to put this power in the hands of Americans. Private industry must do its part by increasing wages and shortening hours, but the situation has reached such a stage that private industry cannot alone perform the mighty task.

I listened to the remarks of the gentleman from Kansas [Mr. MCGUGIN]. He tried to justify the reduction of the wages of the employees of the United States on the ground that private employers had cut still deeper into the wages of workers.

That argument is without any foundation. The individual employer, faced by competition, may be compelled to cut wages to an inhuman level in order to remain in business. He must make a profit or give up the fight. If his costs, including labor, are higher than the price he can secure for his product, he is soon destroyed.

When the President of the United States calls upon private employers to increase wages, he should help create the increased business which will justify such increase. That increase in business can only come through new purchasing power, and that is exactly what we are trying to provide by the restoration of this 15-percent wage cut.

The Government is under no compulsion to show a profit. It is a great corporate enterprise built solely to advance the common welfare and the public happiness. It can take the measures needed to encourage private business and put real foundations under their desire to help in bringing prosperity.

Two thirds of all the purchasing power in this country in normal times is in the hands of Americans who have an income of $2,000 or less. It is in that group that the Government personnel comes, in view of the fact that the average pay for all Government workers in 1929 was $1,440. The 15-percent wage reduction brought that figure down, and every dollar of the restored pay will immediately go into circulation in the channels of business.

This acceptance of Senate amendment 14 will help immensely that unfortunate group of postal substitutes and special-delivery messengers who have been trying to support their families on incomes which should not be tolerated for any workers. Yesterday I received in my mail the pay check of one of the substitutes. It covered a 2-week period and was drawn on the Treasury for the amount of 59 cents.

The Post Office committee and the House has already taken action to remedy this humiliating situation by passing the Mead substitute bill providing a minimum pay, below which the compensation of substitutes shall not fall. It is all the more vital, since within the last 2 weeks, the Postmaster General has issued an order, furloughing all postal workers for 4 days, without pay, before July 1.

Mr. Chairman, Senate amendment 14 should be concurred in. It is the right thing to do under the circumstances which now confront us.

Just as earnestly, I contend for the same action as to Senate amendment 22. By doing justice to the soldiers of the United States, we may at the same time advance national recovery.

This amendment restores benefits to the presumptive service-connected cases of World War veterans. Every Member here, like myself, has had personal experience as to the cruelties and injustices brought about by the so-called "Economy Act." My files will show a great many cases where by every principle of right judgment disabilities are shown to be due to the service. Yet they have been ruthlessly deprived of all benefits and left to seek charity in a time when the springs of charity have run dry. There is no logic or reason in the way the boards have acted on these presumptive service-connected cases. In the Burlington, Vt., area the board turned down 76 percent of the claims which had previously been granted. In Charlotte, N.C., the board turned down only 25 percent.

Then the Senate amendment restores 90 percent of the benefits which were granted to Spanish War veterans before the passage of the Economy Act. Under the provisions of the Economy Act, as administered, almost every Spanish War veteran has been deprived of the greater part of his compensation. Thousands of them have been cut off the list entirely and left without any income in this time of dis-

tress. Thousands more have been turned out of the soldiers' homes and hospitals and left to become objects of charity.

These veterans, reaching the age when they can secure no jobs in modern industry, ought to have restored to them every dollar they were receiving before the enactment of the Economy Act. Surely there ought to be no hesitation in restoring what is provided in the Senate amendment.

Mr. Chairman, these are important votes today. They deal with the economic welfare of several million American families. They concern the increase of public purchasing power and the lifting of the standard of living. Nothing can do the President more harm than to nullify his sound recovery program through measures which decrease buying power instead of increasing it. For myself, I will not help to wreck and undermine what I believe to be a worthy program, no matter who asks that it be done. I believe that the human way is the only way out of this economic jungle and that by helping Federal employees and the soldiers of the United States right now we can best help America. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. WEIDEMAN].

Mr. WEIDEMAN. Mr. Chairman, the gentleman from Missouri [Mr. COCHRAN] remarked that if we followed the course that this House is apparently going to follow, the Spanish-American War veterans would get nothing and at the same time we would have restored our own salaries. There is no truth in that. In the first place, I think gentlemen who are going to vote to concur in the Senate amendment will be found to be about the same gentlemen who voted against these drastic salary reductions a year ago. We are just a little bit consistent. I should like to have about half an hour some day to talk on a subject I think would be very amusing, and that is the subject of legislative acrobats. We have gentlemen on this side and on that side of the House who get up, day in and day out, and shed crocodile tears in the face of a bill and who say they are going to vote for it without moving a muscle or batting an eye, whom, when the roll is called, we find voting on the other side. I have seen the lady from Massachusetts [Mrs. ROGERS] cry crocodile tears over the aviators and the mail carriers and the veterans.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. WEIDEMAN. I am sorry; but I do not have the time.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield? I am not the least ashamed of shedding real tears for and helping the aviators, the 10 Army aviator mail carriers who were killed; and I am ashamed that the gentleman and his side do not cry for the aviators or help them.

Mr. WEIDEMAN. I cry for the men who served overseas, and I fought for the bonus, and I fought to put money in circulation. Not only did I talk for the payment of the adjusted-service certificates, I voted for it.

I would not have voted to take 15 percent away from the Federal employees and then continually cry for them. The gentleman from Missouri [Mr. COCHRAN] is shedding all these crocodile tears about taking away money from the Spanish-American War veterans. There is not a chairman of any committee in this House, and there never was, who would adjourn and let the matter of the pension compensation and the Federal employees' salary and pay be left up in the air, and I think there are a few here who will stay until we do get that thing settled.

Then there is the matter of the furlough. We appropriated $716,000,000 to take care of the Post Office Department, but the Director of the Budget says that we can only spend $619,000,000. I read the following from a letter which I received about the postal employees and the substitutes from Mr. R. M. Fox, secretary of the National Association of Letter Carriers, at Detroit:

> The substitutes, until this order, received very little work, but now they are completely out of work for the next 4 months. These subs cannot get C.W.A., P.W.A., or welfare work, which makes their situation acute. Administering the furlough in this manner deprives the employees of a full day off and imposes additional work on them through doubling up routes.

I am reminded by the gentleman from Illinois about the 1928 Democratic platform, which said that the Federal employees were underpaid. That was because at that time the average yearly income of the farmer was $525, of the skilled laborer $1,200, and of the unskilled labor $1,000.

Mr. SIROVICH. Mr. Chairman, will the gentleman yield?

Mr. WEIDEMAN. Yes.

Mr. SIROVICH. The distinguished gentleman from Michigan has made a brilliant record as a liberal and progressive legislator, and has justly earned the respect and consideration of the House. Does the gentleman realize that in 1929 the Department of Labor said it was necessary to have $1,800 a year to protect and take care of a father, mother, and three children with the bare necessaries of life?

Mr. WEIDEMAN. That is true, and the Democratic Party, having knowledge of that, is trying to bring that up now, and the majority party is going to do that now. We will hold up the hand of the President, and I will hold up the right hand of that famous soldier, General Johnson. I will vote this money back to increase our wages. I will not embarrass my good friend from Virginia. I am going to vote to raise these salaries back where they should be; and while all these gentlemen are talking about economy, I want to read you some of the salaries of the presidents of the steel corporation and other big institutions during these lean years.

Let us see what salaries these big business men got during the years they were continually trying to reduce the workers' salaries.

In 1928 the chairman of the board of the Bethlehem Steel Corporation got $150,000 a year. In 1929 he got $150,000 a year, and in 1930, after the depression started, he got $250,000 a year, and in 1931 and 1932 and 1933 still got the $250,000 a year. Let us go now to the United Aircraft, which seems to be the popular thing just at present. In 1929 the president got $420,665. In 1930 he got $248,712, and in 1931, $246,755, and in 1932 he got more than $1,000,000.

Now, what are the salaries that some of these other executives received during these years? These figures are from the report of the Federal Trade Commission.

The United States Steel Corporation, the salary of the chairman of the finance committee is as follows:

1928	$172,000
1929	209,000
1930	297,000
1931	241,000
1932	197,000
1933	162,000

The President of United States Steel received:

1928	$222,728
1929	260,000
1930	248,000
1931	194,000
1932	156,638
1933	100,000

The American Tobacco Co. record is as follows:

For the president:

1928	$355,000
1929	605,000
1930	1,566,072

And I presume this includes his bonus:

1931	$1,051,630
1932	825,607
1933 (for salary only)	120,000

In 1929 one of the vice presidents of this company received a total compensation of $345,000, approximately.

While the Anaconda Copper Co. could not pay dividends, it could pay the chairman of the board $423,000 in salary in 1928. In 1929 he received $302,000; 1930, $302,000; 1931, $279,000; 1932, $217,000.

Now, these salaries are only a sample of the salaries of the executives of big corporations generally. There was no sign of depression here. No wonder during the Hoover administration there was a constant drive to reduce the wages of the worker, who created all the wealth, so the banker-operators of industry could continue to milk the public and the workers of profits which by all moral right belonged to them.

This system of false economy based upon the reduction of salaries must stop.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. WEIDEMAN was granted leave to extend his remarks in the RECORD and to include certain letters and telegrams and figures referred to.)

Mr. WEIDEMAN. Under leave of the House, I insert the following telegram:

CARL M. WEIDEMAN,
Member of Congress, Washington, D.C.:
The membership of Postal Employees of the National Legislative Council of Greater Detroit urge you and your colleagues to make a strenuous protest against Postmaster General Farley's 4-day payless furlough, together with our 15-percent salary cut. This policy unwarranted with increasing postal business and inconsistent with President Roosevelt's appeal to business for higher wages to rank and file in industry.

EDWARD J. LYNCH,
President Branch 16, United National Association of Post Office Clerks.

If industry is to raise salaries, the National Government should lead the way and restore the 15-percent pay cut now.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. CONNERY].

Mr. CONNERY. Mr. Chairman, in this pay-cut discussion I do not think it has been brought out that it is not merely a 15-percent cut that the Government employees have been taking since the passage of the economy bill. It is really a 26-percent cut, with payless furloughs and the like and the average pay today is far less than it is supposed to be. The average pay of the Government employee is about $1,224 a year.

I am in favor of the motion which I understand the gentleman from Illinois [Mr. BRITTEN] is going to make, to concur in the Senate amendment no. 14, which gives back the full pay to the Government employees. [Applause.] The gentleman from Iowa [Mr. DOWELL] is going to offer a motion to recede and concur in the amendment with an amendment, which will be the first vote taken. I hope that will be voted down. Then we will come to the Britten amendment which is to concur in the Senate amendment and thereby give back to the Federal employees all of their pay. I hope you will vote for that amendment.

Now, when we come to amendment no. 22 we are going to meet a peculiar situation. Amendment no. 22 includes the Borah amendment cutting Congressmen's and Senators' pay. I am against the Borah amendment, as I stated once before today. I do not believe a Congressman's pay should be cut. The Lord knows it is hard enough to live on your present pay, if you can live on it. Nevertheless, we are up against a peculiar parliamentary situation. I had prepared a motion, which I expected to offer, to recede and concur with an amendment striking out the Borah amendment, but I find if that motion should pass, when the bill goes over to the Senate if Senator BORAH or some other Senator should get up and move to disagree with the House amendment and ask for a conference, it would go back to conference, and all of the veterans' legislation in that amendment no. 22 could be taken up again and the veterans could be cut down again by the conferees. So when we come to section 22 I am going to move to concur in the entire amendment no. 22, thereby cutting our pay, but giving the veteran back his compensation.

Mr. GOSS. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. GOSS. I want to call the gentleman's attention to the fact that if we concur in the Senate amendment it raises the amount of the bill only $63,000,000, inasmuch as the President has given way to another body. It is not $189,000,000, as many people have stated.

Mr. CONNERY. Does the gentleman mean the veterans?

Mr. GOSS. No; I am talking about the restoration of the 15 percent.

Mr. CONNERY. Yes; my friend from Connecticut is correct, as I mentioned before. I thought I would be able to take a crack at, or, as General Johnson would say, "crack down on" the Borah amendment. I feel deeply on this matter. It is not simply because I want my salary back or you want your salary, but I have said time and time again on the floor of this House that this is the representative body of the American people. There are forces in this country which would like to see this forum of the people destroyed. It is not now a body of multimillionaires, but if they cut your salaries down low enough, you will soon have a body of multimillionaires as Members of this House—men who will be subservient to all of the big interests of the United States. For this reason I am sorry that this amendment comes up in this fashion, so that in order to do justice to the disabled veteran we have to cut our own pay. I think it was put in there at that particular spot in the bill in the hope of and for the purpose of tying the hands of the Members and preventing a discussion of the veterans' case and the Members' salaries case on their own individual merits. I hope the maneuver will not succeed. I hope you will vote to give the veterans their just dues, even though it means that in doing so you will be forced to sacrifice pay which is sadly needed by most of the Members of this House.

Mr. DUNN. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. DUNN. Did I understand the gentleman to say he was going to take a crack at Senator BORAH's amendment?

Mr. CONNERY. I had hoped to do so, but I find under the parliamentary situation that if I offer such an amendment it may eventuate in the bill going to conference, and possibly the veterans may lose some of their compensation, so I am going to make a motion to concur in amendment no. 22, which will cut our pay, but will give all that the Senate gave to the veterans.

Mr. DUNN. I agree with the gentleman.

Mr. CONNERY. I yield to my friend the gentleman from Texas, the distinguished Chairman of the Committee on Appropriations.

Mr. BUCHANAN. Does the gentleman understand that the Borah amendment does not decrease anybody's salary?

Mr. CONNERY. I understand that Congressmen cannot go back to the $10,000 salary where they were before.

Mr. BUCHANAN. The Borah amendment simply says that the money in this bill shall not be available to pay 15 percent of the salaries over $6,000, but it does not decrease anybody's salary. Everybody can collect his full salary next year or the year after next.

Mr. CONNERY. I do not understand the gentleman. Is the gentleman trying to make us believe that beginning on July 1, under the Borah amendment, a Congressman's salary can go back to $10,000?

Mr. BUCHANAN. A Congressman's salary is $10,000, and the Borah amendment does not decrease it. Fifteen percent of it has not been appropriated for. That is all.

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman from Massachusetts [Mr. CONNERY] 1 additional minute.

Mr. CONNERY. I want to get this clear. We are getting $8,500 now. If we put back the 15-percent pay cut to all Government employees, they get back their pay. Under the Borah amendment it provides that a Congressman or Senator may not get his pay.

Mr. BUCHANAN. It only prevents the use of 15 percent of the appropriation in this bill for use to pay salaries over $6,000. The statutory salary remains the same, and a Congressman next year can sue and get judgment for it, as every other employee who gets over $6,000 can do.

Mr. CONNERY. In other words, the gentleman means that in the far-distant future there is hope that we will get our former $10,000 salary.

Mr. BUCHANAN. No; the gentleman will not get it back, because he will not sue or ask for an appropriation, but other employees will.

Mr. CONNERY. I thank my friend. He is correct. I will not sue. [Laughter.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey [Mr. KENNEY].

Mr. KENNEY. Mr. Chairman, I want to see restored to the veterans and their dependents all of the benefits which came to them under the Senate amendments. Yes; I would give back to them every benefit they had before the passage of the Economy Act. The low-salaried employees of the Federal Government are entitled also to a restoration of their former pay. There is suffering amongst them all, and I would alleviate it. The veterans' cuts have hurt. The under-paid postal worker is undergoing hardships. The furlough accentuates it.

I enter a public protest here and now against the furlough system in the Post Office Department. [Applause.] I hope we can take some action today by which furloughs will be discontinued. [Applause.] And I look for greater liberality for all veterans and their dependents.

We can accomplish all of the foregoing without impairing the credit of the United States and the confidence it now enjoys. We need not throw the Budget out of balance. We do not even have to go to the taxpayer, and when we do nowadays it is like wringing blood from a stone. There is a way by which all these benefits can be restored without resorting to taxes, and that is along the lines of bill H.R. 7316. We are coming to it. Let us not delay. Early action will allow us to deal more generously with the veteran and the Government worker and liberally, too, with the taxpayer. And, now, Mr. Chairman, I ask unanimous consent to incorporate in my remarks the provisions of that bill, together with the comment thereon of the well-known Boake Carter.

The CHAIRMAN. Without objection, the request is granted.

There was no objection.

The matter referred to follows:

EXCERPT FROM BOAKE CARTER'S RADIO BROADCAST, WEDNESDAY, MARCH 7, 1934

* * * For to kick a flock of speculators out of one place and expect no more speculation is to believe that Utopia will be here tomorrow. But maybe it is that another New Jerseyman points to at least something in the nature of a safety valve. Congressman EDWARD A. KENNEY has sponsored a bill in the House of Representatives suggesting the creation of a Government supervised and conducted billion-dollar lottery. Five years ago that might have sounded crazy, although actually it wouldn't have been, in view of the magnificent lottery which was being conducted on the exchange day by day from the office boy to the bank president. But today, hardly. It has a lot more common horse sense behind it than a great many of the strange things that have happened in the last 12 months. Out of it the sponsor proposes to take a lump sum and turn it over to veterans who have had their pensions, disability allowances cut, and Federal employees who are still underpaid. It is patently obvious that the Budget balance would be knocked out of whack and credit endangered if veterans' money were taken out of the Treasury now. So here is a proposal which not only would return at least some of the money to veterans and Federal employees without endangering national credit, but provides a safety valve for those speculators who might be kicked out of the market by stiff margin requirements; provides a Government-supervised source of speculation for those who toss their money anyhow now through back-alley number games and illegal baseball pools, and provide an inducement to millions of other people who annually send hundreds of thousands of dollars out of the country into the Irish sweepstakes or other foreign lotteries—money which could be used at home here. It isn't often a Congressman steps up with a bill that knocks off 4 birds with 1 stone. Congress has passed many strange measures in the last 12 months, but it would be a strange height of irony if it didn't recognize the horse sense in the Kenney lottery measure and allowed it to mildew in a pigeonhole.

THE BILL

A bill (H.R. 7316) to authorize the raising of funds by lottery for the purpose of providing additional means of defraying the cost of government, including expenditures authorized for veterans and their dependents, and for other purposes

Be it enacted, etc., That for the purpose of providing additional means of defraying the expenses of the Government, including expenditures now or hereafter authorized for veterans and their dependents, and for other public purposes authorized by law, the Veterans' Administration, with the approval of the President, is hereby authorized to conduct a lottery or lotteries to raise funds not exceeding $1,000,000,000 in any one year, which shall be covered into the Treasury of the United States as a miscellaneous receipt.

SEC. 2. The Administrator of Veterans' Affairs, subject to the approval of the Secretary of the Treasury, is hereby authorized to prepare and issue rules and regulations under which said lottery or lotteries shall be conducted and managed; and the said Administrator shall have the power and authority to appoint, employ, and fix the compensation of such officers, employees, attorneys, and agents as may be necessary to carry out the purposes of this act: *Provided, however*, That no salary or compensation in excess of the sum of $8,000 per annum shall be paid to any person employed under the provisions of this section.

SEC. 3. The Postmaster General is hereby authorized, upon request of the Administrator of Veterans' Affairs, to make available to him the services and facilities of the Post Office Department and of the Postal Service to aid in administering the provisions of this act. The employees of the Post Office Department and of the Postal Service shall perform all services under this act without compensation.

SEC. 4. All funds received by the Veterans' Administration and all accounts, vouchers, and records in connection with such lottery or lotteries shall be subject to audit by the Comptroller General.

SEC. 5. If any person, partnership, association, or corporation shall forge or counterfeit any ticket or tickets to be made for the purposes of said lottery or lotteries under the provisions of this act or alter any of the numbers thereof or offer for sale or sell any forged or counterfeited ticket or tickets or any ticket or tickets whereof the number is altered, knowing them to be such, or bring the same to any of the persons engaged in administering this act with intent to defraud the United States of America or any adventurer in the said lottery or lotteries, every such person, partnership, association, or corporation shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than 5 years, or both.

SEC. 6. Section 213 of the Criminal Code (U.S.C., title 18, sec. 336) is hereby amended by adding at the end thereof the following paragraph:

"Nothing in this section or in any other act of Congress shall be construed to prohibit the use of the mails in any manner for the purpose of carrying into effect any lottery or lotteries authorized by any act of Congress."

SEC. 7. All acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

SEC. 8. If any part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid as to any person, locality, or circumstance, such judgment shall not affect, impair, or invalidate the remainder of this act or the application of any part thereof to other persons, localities, or circumstances.

SEC. 9. The right to amend, alter, or repeal this act is hereby expressly reserved.

SEC. 10. All pensions, allowances, and other benefits accruing to veterans and their dependents, which existed prior to the 20th day of March 1933, shall be restored immediately upon the enactment of this act.

Mr. WIGGLESWORTH. Mr. Chairman, I yield the balance of my time to the gentleman from New York [Mr. MEAD].

Mr. MEAD. Mr. Chairman, I rise merely to explain the parliamentary situation as I see it to the Members of the House, and to call their attention to the differences between the House and the Senate bills as they affect postal and Federal employees.

As I understand it, a vote to concur in the Senate provision is the vote which will restore the Federal pay cut. A vote to concur with an amendment will send the bill back to conference; that motion will, of course, be preferential. If we vote down such a motion and accept a motion to concur, then we will have settled the question as it is determined in the Senate bill. Another point to remember is that this particular vote has nothing to do with the Borah amendment. The Borah amendment is contained in a later provision of the bill.

The difference between the two bills is as follows:

The House bill provides for the restoration of 5 percent of the pay cut on July 1. The Senate bill provides for the restoration of 5 percent of the pay cut as of February 1 and the remaining 10 percent on July 1.

Both House and Senate bills continue the rotative or administrative furloughs that have been discussed this afternoon; and both measures continue the reduced travel allowance for those employees who are away from their homes.

The only change in the Senate bill from existing economy provisions with the exception of the pay cut is that the Senate bill restores the automatic promotions and likewise restores administrative promotions.

So, the Senate bill restores 5 percent of the pay cut as of February 1, and 10 percent on the 1st of July; it restores automatic promotion on July 1; and it also restores administrative promotions on July 1. To vote for the Senate bill one should vote to concur rather than to vote for the amendment which I understand will be offered by the

gentleman from Iowa [Mr. DOWELL] to concur with an amendment, that throws the entire matter back into conference again.

I am sorry we have not a comprehensive plan by which members of all committees concerned with Federal employees and veterans might be called in at the beginning of a session in order to eliminate injustices resulting from lack of knowledge on the part of those who drafted the original economy bill. We have in some instances starved postal-substitute employees by the most brutal treatment, yet we are not permitted, even if we vote for the more liberal Senate provisions, to remedy these conditions. So I say, Mr. Chairman, it is an unfortunate situation that men who are directly concerned with the working conditions, the salaries, the very lives of the Federal employees, have no other opportunity than to stand up, when a matter like this comes before the House, and give expression to their dissatisfaction.

Now, my friends, it is unfortunate that we cannot do something for the lowest-paid Federal employees. And, mind you, no matter what we may say about the 1928 salaries, the average salary for Federal employees, from the highest to the lowest, before we reduced them, was only $1,440; and the reductions in some instances are almost 40 percent.

I regret we cannot have the advice of members of the several legislative committees concerned with veterans, postal and other civil-service employees in the preparation of a bill of this kind.

[Here the gavel fell.]

The CHAIRMAN. All time has expired.

Without objection, the Clerk will again read the Senate amendment for the information of the Committee.

There was no objection.

The Clerk again reported the Senate amendment.

Mr. DOWELL. Mr. Chairman, in order to clarify the parliamentary situation, I ask unanimous consent to withdraw my first motion and to move to concur with an amendment which is at the Clerk's desk.

Mr. GOSS. Mr. Chairman, I am constrained to object to the gentleman withdrawing his first motion, because, if that is withdrawn, the motion to concur with an amendment takes precedence. So I would have to object to the gentleman's withdrawing the motion to concur in the Senate amendment.

The CHAIRMAN. The Clerk will report the motion offered by the gentleman from Iowa [Mr. DOWELL].

The Clerk read as follows:

Mr. DOWELL moves that the House concur in Senate amendment no. 14.

Mr. DOWELL. With the amendment which I offered and which the Chair held was in order.

I am offering this as a motion to concur with an amendment. This is in order.

Mr. KVALE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KVALE. Is it not true that the gentleman from Iowa [Mr. DOWELL] has two motions upon the Clerk's desk, one to recede and concur, and one to recede and concur with an amendment?

The CHAIRMAN. The gentleman now offers a motion to concur with an amendment. The Clerk will report the gentleman's amendment.

Mr. TABER. Mr. Chairman, a point of order. Is it not a fact that the gentleman from Virginia offered a motion, which should be reported first?

The CHAIRMAN. The motion to concur is a preferential motion over a motion to disagree and go to conference.

Mr. GOSS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GOSS. I understand the motion of the gentleman from Virginia [Mr. WOODRUM] is to disagree with the Senate amendment and agree to the conference asked for by the Senate.

The CHAIRMAN. That is correct.

Mr. GOSS. Then there is also a substitute amendment offered by the gentleman from Iowa, which is also pending.

The CHAIRMAN. It is not a substitute.

Mr. GOSS. What is it?

The CHAIRMAN. It is a preferential motion.

Mr. GOSS. Mr. Chairman, I objected to the withdrawal of the other motion. That was not a preferential motion.

Mr. DOWELL. This one is preferential.

Mr. GOSS. Mr. Chairman, I understand there are three motions pending, the motion of the gentleman from Virginia, the original motion of the gentleman from Iowa to concur in the Senate amendment, and now the substitute.

Mr. DOWELL. A preferential motion.

The CHAIRMAN. The gentleman now offers a preferential motion.

Mr. GOSS. Mr. Chairman, if it is in order to offer this preferential motion, would that not be a motion in the third degree?

The CHAIRMAN. It would not be.

Mr. RANKIN. Mr. Chairman, I make the point of order that the entire amendment has not been read.

The CHAIRMAN. The Chair has instructed the Clerk to read the motion.

Mr. RANKIN. The amendment in which the gentleman moves to concur has not been read.

The CHAIRMAN. The amendment has been read. The Clerk will report the motion of the gentleman from Iowa.

The Clerk read as follows:

Mr. DOWELL moves to concur in Senate amendment no. 14 with an amendment as follows: After line 22, page 35, insert the following as subsection (c): "That no part of the appropriation carried in this act or any other general appropriation bill for the fiscal year ending June 30, 1935, shall be used in payment in excess of 85 percent of the salary or compensation of any officer or employee of the Government (except judicial officers) where such salary or compensation is in excess of $6,000."

The CHAIRMAN. The question is on the motion of the gentleman from Iowa.

The question was taken; and on a division (demanded by Mr. DOWELL) there were—ayes 21, noes 124.

So the motion was rejected.

Mr. BRITTEN. Mr. Chairman, I have a privileged motion pending.

The CHAIRMAN. The Clerk will report the motion of the gentleman from Illinois.

The Clerk read as follows:

Amendment offered by Mr. BRITTEN: Page 35, line 3, Mr. BRITTEN moves to concur in Senate amendment no. 14.

Mr. VINSON of Georgia. Mr. Chairman, I offer a preferential motion, which I send to the desk. This is a long amendment. It is the Byrnes amendment that was offered in the Senate.

The CHAIRMAN. The Clerk will report the motion.

The Clerk read as follows:

Mr. VINSON of Georgia moves to concur in Senate amendment no. 14 with the following amendment: In lieu of the matter inserted by the Senate amendment insert the following:

"SEC. 21. (a) Title II of the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, is amended as follows:

"'(1) Section 2 is amended by inserting after "1934" the following: "and the fiscal year ending June 30, 1935"; and

"'(2) Section 3 (b) is amended by striking out "15 percent" and inserting in lieu thereof the following: "10 percent during the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934, and shall not exceed 5 percent during the fiscal year ending June 30, 1935."'

"(b) Section 105 (relating to the salaries of the Vice President, Speaker of the House, Senators, Representatives, Delegates, Resident Commissioners, and persons on the rolls of the Senate or House of Representatives) of the Legislative Appropriation Act, fiscal year 1933 (except subsections (d) and (e) thereof), as continued and amended by section 4 of title II of such act of March 20, 1933, is hereby continued in full force and effect for the fiscal year ending June 30, 1935, and for the purpose of continuing such section, in the application of such section with respect to the fiscal year ending June 30, 1935, the figures '1933' shall be read as '1935'; except that in the application of such section with respect to the fiscal year ending June 30, 1935, subsection (a) is amended by striking out '15 percent' wherever it appears and inserting in lieu thereof 'the percentage of reduction applicable to officers and employees of the Federal Government generally.' In the application of such section with respect to the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934, the percentage of reduction shall be

the percentage applicable to officers and employees of the Federal Government generally.

"(c) Section 107 (except paragraph (5) of subsection (a) thereof and subsection (b) thereof) of part II of the Legislative Appropriation Act, fiscal year 1933 (relating to certain special salary reductions); section 12 (relating to compensation reductions of officers and employees of Insular Possessions), section 13 (relating to the retired pay of certain judges), section 14 (relating to reduction in compensation benefits to certain civilian employees), and section 15 (relating to reductions in certain private pensions) of the Independent Offices Appropriation Act, 1934; and section 18 (relating to pensions for military service prior to the Spanish-American War) of title I of such act of March 20, 1933, are hereby continued in full force and effect for the fiscal year ending June 30, 1935, and for the purpose of continuing such sections with respect to the fiscal year ending June 30, 1935, the figures '1933' (except in such sections 13, 14, and 15) shall be read as '1935' and the figures '1934' shall be read as '1935'; except that in the application of such sections 12, 13, and 18 with respect to the fiscal year ending June 30, 1935, the percentage of reduction shall be the percentage applicable to officers and employees of the Federal Government generally. In the application of such sections 12, 13, and 18 with respect to the portion of the fiscal year 1934 beginning February 1, 1934, and ending June 30, 1934, the percentage of reduction shall be the percentage applicable to officers and employees of the Federal Government generally.

"(d) Notwithstanding the provisions of the antideficiency acts, deficiencies in their respective appropriations made during the second session of the Seventy-third Congress and available for obligation during the fiscal year ending June 30, 1935, may be incurred during such fiscal year by any executive department or independent establishment and the municipal government of the District of Columbia, upon written order of the President specifying the amount of the deficiency which may be incurred, and by the legislative branch of the Government and the agencies customarily considered a part of such branch; but such deficiencies may be incurred only to the extent necessary to enable the payment to officers and employees of such activities of sums for which the available appropriation is inadequate by reason of a diminution in the percentage of reduction of compensation in pursuance of action of the President under the provisions of section 3 of title II of such act of March 20, 1933, as continued for the fiscal year 1935.

"(e) There is hereby appropriated so much as may be necessary for the payment of sums due, and payable out of the Treasury of the United States, by reason of the diminution under this title in the percentage of reduction of compensation, and other amendments to existing laws made hereby; and limitations on amounts for personal services are hereby respectively increased in proportion to the increase in appropriations for personal services made in this subsection. In the case of officers and employees of the municipal government of the District of Columbia, such sums shall be paid out of the revenues of the District of Columbia and the Treasury of the United States in the manner prescribed by the District of Columbia appropriation acts for the respective fiscal years."

Mr. SNELL (interrupting the reading of the motion). Mr. Chairman, I ask unanimous consent that the further reading of the amendment be dispensed with and the amendment printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GOSS. Mr. Chairman, I reserve a point of order to ask the gentleman a question. May I ask the gentleman if this is the same amendment that was in the House bill?

Mr. VINSON of Georgia. I may state to the gentleman that the amendment I sent to the desk is what was reported by the Senate Appropriations Committee, known as the "Byrnes amendment."

Mr. GOSS. I am trying to get some information from the gentleman under my reservation of a point of order. I want to ask the gentleman if it is not word for word the amendment in the bill as it left the House?

Mr. VINSON of Georgia. The gentleman is in error.

Mr. GOSS. Will the gentleman point out wherein it differs?

Mr. VINSON of Georgia. This is a Senate amendment submitted by the Senate Appropriations Committee to the Senate, which was rejected by a vote of 41 to 40. The only difference between this amendment and the Senate amendment, which is now before the Committee, is the difference between full restoration of pay and 5 percent in February—retroactive—and an additional 5 percent on the first of July.

Mr. GOSS. Is not the gentleman's amendment identical with the language in the House bill, except that the House bill provided for 5 percent and the gentleman's amendment provides for 5 percent and 10 percent.

Mr. VINSON of Georgia. There is no difference in phraseology with respect to any of these provisions except the amount of restoration of pay.

Mr. GOSS. Mr. Chairman, I now make the point of order that the amendment carries more than was in the original amendment by adding another matter that the House has not passed on. It does not seem to me to be germane to the amendment in that it carries legislation that the House has not voted upon. As I heard the amendment read, it provides for Spanish War veterans, and so forth, and would not be germane.

Mr. VINSON of Georgia. Mr. Chairman, the amendment is certainly germane as it deals with the identical subject matter of the Senate amendment.

The CHAIRMAN (Mr. OLIVER of New York). The Chair so holds and overrules the point of order, and the gentleman from Georgia is recognized for 5 minutes.

Mr. VINSON of Georgia. Mr. Chairman, let me call the committee's attention to the difference between the two propositions. In the Senate amendment before us now, on the 1st of July or at the beginning of the fiscal year, there will be a complete restoration of the 15 percent that was cut from everyone's salary by the Economy Act. The amendment I have offered restores 5 percent, retroactive to February 1, and on the 1st day of July, or at the end of this fiscal year, it restores an additional 5 percent, and the Economy Act permits the President to restore the remaining 5 percent when the cost of living justifies him in doing so. The issue before you is clean-cut as to whether or not we desire to restore the 15 percent effective July 1 or whether we desire to restore 10 percent and leave the restoration of the additional 5 percent up to the President. This is the whole controversy involved in this entire matter, as brought up by my amendment. The amendment is identical with the amendment that was put in the appropriation bill in the Senate and was rejected in the Senate by a vote of 41 to 40.

Mr. CONNERY. Mr. Chairman, I rise in opposition to the amendment.

Mr. WOODRUM. Mr. Chairman, will the gentleman yield in order that I may ask unanimous consent that all debate on this amendment close in 10 minutes?

Mr. CONNERY. I yield to the gentleman.

Mr. RANKIN. Mr. Chairman, I object.

Mr. WOODRUM. Mr. Chairman, I move that all debate on this amendment close in 10 minutes.

Mr. RANKIN. Mr. Chairman, I move to amend that motion and make it 20 minutes. We want to find out what is in this amendment and what the effect of it will be.

The CHAIRMAN. The Chair will state the motion. The motion is that all debate on this amendment close in 10 minutes.

The question was taken, and the motion was agreed to.

Mr. CONNERY. Mr. Chairman, all I want to say to the House is this. Any change at all, even of one word, in either this amendment 14 or amendment 22, will serve to send the matter to conference. If you want the Senate amendment, you will vote down this amendment of the gentleman from Georgia and vote for the motion of the gentleman from Illinois [Mr. BRITTEN], to concur in the Senate amendment; and when we reach amendment 22 vote down all amendments and vote for the motion which I will offer to recede and concur. If you change the Senate amendments in any manner, when it goes over to the Senate, any Senator can demand a disagreement and ask that it go to conference, and the whole question is then opened up again in conference.

I hope you will vote down the amendment of the gentleman from Georgia and vote to concur in the Senate amendments.

Mr. BRITTEN. Mr. Chairman, I shall only detain the Committee a moment. My thought is that the country has had one disastrous experience with a 5-and-10 law, and we do not want another. [Laughter.]

The suggestion about the cost of living shall be determined by the President before the Federal employee shall get his last 5 percent is absurd on the face of it. The Economy Act

went into effect about 1 year ago and it is not necessary to go back to 1928 or 1926 or 1922 to determine the cost of living. If you take the cost of living at the date the Economy Act went into effect and compare it with the cost today, you will find it is immeasurably higher.

This amendment should be roundly and instantly defeated.

Mr. DIRKSEN. Mr. Chairman, I rise in opposition to the pro forma amendment. Mr. Chairman and members of the Committee, when two million and odd soldiers landed in France during 1917 and 1918, the first word they learned in the French language was "combien", which means "how much?" I think that is the entire question in issue today in this amendment. How much shall we restore to the Federal employees? Shall they have 5 percent from the 1st of February and another 5 percent on the 1st of July, and then the other 5 at some subsequent period, or shall they have all of the 15 percent restored on or before the 1st of July?

I fancy that we may get into much difficulty and bother with a great many of these motions of all kinds that have been made and which may confuse this body. It is a good deal like the old fellow who asked his son if he was married, and the son said, "What if I is and what if I aint?" And the old gentleman said, "Ah aint asking yo' is you aint, ah's asking yo' ain't yo' is?" All this parliamentary procedure seems confusing, but I know that if we concur in the Senate amendments 15 percent will be restored to the Federal employees. [Applause.]

Let me suggest that at a later date this body and the other body may adopt the 30-hour week on the new theory of wages proposed by General Johnson, namely, to decrease hours of labor by 10 percent and permit wages to remain as under the original code. In substance that amounts to a 10 percent increase of wages. You know full well that the Federal employees would have a difficult time in securing any more legislation, now or in the immediate future, from this body calling for an increase of wage in the future.

The President has indicated that he rather expects such a seasonable recovery as we approach the summer, as to carry the Nation to a semblance of normalcy. That, of course, implies a normalcy in prices, in purchasing power, in employment, and in all other attributes of recovery. Now, I submit that in proportion as we have confidence in the movement toward and in the prophecies of recovery, which means the wage level of 1928, we might confess that confidence today. If you restore the full 15 percent to Federal employees you are in effect saying that you feel that by July 1, which is the effective date of full restoration, there will be a more or less normal condition in the Nation.

I highly recommend to the attention of the Members an article appearing in the magazine Today, edited by Mr. Moley, former Assistant Secretary of State. The article by Henry Kittredge Norton advances the theory that recovery can only be effected by an increase in the consumption of so-called "consumers' goods."

What does he mean? Simply this. It means that there must be a greater purchase generally of consumers' goods such as foodstuffs, and ordinary household supplies so that the wheels of industry might be set in motion. It means that the average citizen must buy more. But corollary to that the average citizen must be able to buy more. He must have the money with which to purchase consumers' goods. This pay restoration goes to the very heart of the matter. It scatters an additional two hundred million or more into every corner of the Nation and increases purchasing power, thereby giving momentum to the recovery movement and to carry us to a semblance of normalcy by July 1 when this pay restoration becomes effective. It seems to me that if you have confidence in the hopes and desires of the President, you will vote to concur in the Senate amendments as now set forth in the bill.

The CHAIRMAN. The question is on the adoption of the amendment of the gentleman from Georgia [Mr. VINSON].

The question was taken; and on a division (demanded by Mr. DIRKSEN) there were—ayes 133, noes 123.

Mr. CONNERY. Mr. Chairman, I demand tellers.

Tellers were ordered, and Mr. VINSON of Georgia and Mr. DIRKSEN were appointed to act as tellers.

The Committee again divided; and the tellers reported—ayes 157, noes 139.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will report Senate amendment numbered 22.

The Clerk read as follows:

Page 40, after line 21, insert:

"TITLE III—VETERANS' PROVISIONS

"SEC. 26. Notwithstanding any provision of law to the contrary, in no event shall the compensation being paid on March 19, 1933, under subsections (3) and (5) of section 202 of the World War Veterans' Act, 1924, as amended, to veterans for the loss of the use of both eyes, where such veterans were, except by fraud, mistake, or misrepresentation, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, pertaining to hospitalized cases.

"SEC. 27. Where service connection for a disease, injury, or disability was on March 19, 1933, established in accordance with section 200 of the World War Veterans' Act, 1924, as amended, and such connection has been severed through the application of, or regulations or instructions promulgated under Public Law No. 2, Seventy-third Congress, or Public Law No. 78, Seventy-third Congress, service connection is hereby reestablished and as to such cases the provisions of the first paragraph of section 200 of the World War Veterans' Act, 1924, as amended, are hereby reenacted: *Provided*, That the provisions of this section shall not apply (1) to persons entering the active military or naval service subsequent to the date of November 11, 1918, (2) to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service, (3) to persons as to whose cases service connection was established by fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of material facts; and as to all such cases enumerated in this proviso, all reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government.

"SEC. 28. The fourth paragraph of section 20, Public Law No. 78, Seventy-third Congress, is hereby amended to read as follows:

"'Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, in no event shall the compensation being paid on March 19, 1933, for service-connected disabilities to those veterans who entered the active military or naval service on or before November 11, 1918, and whose disabilities are not the result of their own misconduct, where they were, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service; and in any review of the case of any veteran to whom compensation was being paid on March 19, 1933, for service-connected disability, reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government: *Provided further*, That notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, any veteran whose disease, injury, or disability was established on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, shall be entitled to receive compensation in accordance with the provisions of such act, as amended, and the rating schedule in effect on March 19, 1933: *Provided further*, That whenever there is a change in the degree of disability of any such veteran the amount of compensation to be paid shall be determined pursuant to the provisions of the World War Veterans' Act, 1924, as amended, and the rating schedule in effect on March 19, 1933, and such amount shall not be reduced or discontinued. In no event shall death compensation being paid, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, to widows, children, and dependent parents or deceased World War veterans under the World War Veterans' Act, 1924, as amended, on March 19, 1933, be reduced or discontinued, whether the death of the veteran on whose account compensation is being paid was directly or presumptively connected with service. In any case where a World War veteran dies or has died from disease or injury, and service connection for such disease or injury has been reestablished on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, or which would have been established under such section 200 had the veteran been living on March 19, 1933, and reestablished on or after the date this paragraph as amended takes effect, the surviving widow, child, or children and/or dependent parents shall be entitled to receive compensation at the

rates prescribed in Veterans' Regulation No. 1 (a), part I, paragraph IV, and amendments thereto.'

"SEC. 29. Section 6 of Public Law No. 2, Seventy-third Congress, as amended by Public Law No. 78, Seventy-third Congress, is hereby amended by adding thereto the following proviso: 'Provided, That any veteran of any war who was not dishonorably discharged, suffering from disability, disease, or defect, who is in need of hospitalization or domiciliary care, and is unable to defray the necessary expenses therefor (including transportation to and from the Veterans' Administration facility), shall be furnished necessary hospitalization or domiciliary care (including transportation) in any Veterans' Administration facility, within the limitations existing in such facilities, irrespective of whether the disability, disease, or defect was due to service. The statement under oath of the applicant on such form as may be prescribed by the Administrator of Veterans' Affairs shall be accepted as sufficient evidence of inability to defray necessary expenses.'

"SEC. 30. Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, no pension being paid on March 19, 1933, to any veteran of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, or to the widow and/or dependents of any such veteran, shall be reduced by more than 10 percent, except in accordance with the regulations issued pursuant to Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply (1) to persons to whom payments were being made on March 19, 1933, through fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of a material fact, except that decisions as to degree of disability rendered prior to March 20, 1933, shall be conclusive, or (2) to any person during any year following a year for which such person was not entitled to exemption from the payment of a Federal income tax.

"All laws in effect on March 19, 1933, granting monetary benefits to veterans of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, are hereby reenacted in their entirety, and such laws shall be effective from and after the effective date of this act, subject to the limitations of this section and to such reduction in pensions as may be made hereunder.

"SEC. 31. Section 10 of Public Law No. 2, Seventy-third Congress, approved March 20, 1933, is amended to read as follows:

"'Notwithstanding the provisions of section 2 of this title, any person who served as an officer of the Army, Navy, or Marine Corps of the United States during the World War, other than as an officer of the Regular Army, Navy, or Marine Corps, and who (1) entered the active service between April 6, 1917, and November 11, 1918, (2) was honorably discharged therefrom, (3) made valid application for retirement under the provisions of the Emergency Officers' Retirement Act of May 24, 1928 (U.S.C., supp. VI, title 38, secs. 581 and 582), and (4) prior to March 20, 1933, was granted retirement with pay, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusion of fact or law, shall be entitled to continue to receive retirement pay at the monthly rate being paid him on March 19, 1933, if the disability for which he was retired directly resulted from the performance of military or naval duty; except that retirement pay under this section shall not be denied to any person who was receiving on March 19, 1933, retirement pay under such act of May 24, 1928, on account of disease or injury incurred or aggravated in line of duty, and whose disease or injury or aggravation of disease or injury was at any time during his service made a matter of record by competent military or naval authorities, if such person is otherwise qualified under clauses 1 to 4, both inclusive, of this section: *Provided*, That nothing in this section as amended shall be construed so as to prejudice or destroy any rights of appeal, or any monetary benefits payable because of any such appeal, heretofore conferred upon retired emergency officers by this act and regulations issued pursuant thereto.'

"SEC. 32. Where any veteran suffers or has suffered an injury, or an aggravation of any existing injury, as the result of training, hospitalization, or medical or surgical treatment, awarded him under any of the laws granting monetary or other benefits to World War veterans, or as the result of having submitted to examination under authority of the War Risk Insurance Act or the World War Veterans' Act, 1924, as amended, and not the result of his misconduct, and such injury or aggravation results in additional disability to or the death of such veteran, the benefits of Public Law No. 2, of Public Law. No. 78, and of this title shall be awarded in the same manner as if such disability, aggravation, or death were service connected within the meaning of such laws; except that no benefits under this section shall be awarded unless application be made therefor within 2 years after such injury or aggravation was suffered, or such death occurred, or after the passage of this act, whichever is the later date. The benefits of this section shall be in lieu of the benefits under the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes', approved September 7, 1916, as amended.

"SEC. 33. The last sentence of section 9 of Public Law No. 2, Seventy-third Congress, is hereby repealed.

"SEC. 34. Service-connected money benefits payable to World War veterans under this title and Public Law No. 2, Seventy-third Congress, shall be entitled 'compensation' and not 'pension.'

"SEC. 35. This title shall take effect on the date of enactment of this act, and no payments of any benefits conferred under the provisions of this title shall be made for any period prior to such date.

"SEC. 36. Notwithstanding the provisions of any law or regulation issued pursuant to authority of law, in any case where a veteran of the World War has been adjudged for insurance purposes by any court of competent jurisdiction to be totally and permanently disabled as the result of disease or injury, or the aggravation of a disease or injury, incurred in the active military or naval service, such veteran shall be rated for the purpose of payment of pension, compensation, or retirement pay not less than totally and permanently disabled.

"SEC. 37. That notwithstanding the provisions of section 17 of title I of an act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, and section 20 of an act entitled 'An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes', approved June 16, 1933, any claim for yearly renewable term insurance under the provisions of laws repealed by said section 17, wherein claim was duly filed prior to March 20, 1933, and on which maturity of the insurance contract had been determined by the Veterans' Administration prior to March 20, 1933, and where payments could not be made because of the provisions of the act of March 20, 1933, or under the provisions of the act of June 16, 1933, may be adjudicated by the Veterans' Administration, and any person found entitled to yearly renewable term insurance benefits claimed shall be paid such benefits in accordance with and in the amounts provided by such prior laws.

"SEC. 38. In the case of widows and dependents of officers and enlisted men of the Army, Navy, or Marine Corps, who served on the airships *Shenandoah*, *Akron*, and *J–3*, and who died in the accidents resulting in the destruction of such airships in April 1933, the amount of pension allowed shall be double that authorized by law or regulation of the President to be paid in cases where death results from an injury received or disease contracted in line of duty not the result of an aviation accident.

"SEC. 39. That no part of the appropriation carried in this act, or any other general appropriation bill for the fiscal year ending June 30, 1935, shall be used in payment, in excess of 85 percent of any salary or compensation of any officer or employee of the Government (except judicial officers) where such salary or compensation is in excess of $6,000."

Mr. WOODRUM. Mr. Chairman, I am wondering whether or not it is possible to curtail the time for debate upon this amendment. I have no requests here for time to amount to anything.

Mr. SNELL. I think we may be able to curtail it at a later time. Does the gentleman intend to conclude the consideration of the bill tonight?

Mr. WOODRUM. Yes; if the House will stay here. I yield 5 minutes to the gentleman from Pennsylvania [Mr. FADDIS].

Mr. FADDIS. Mr. Chairman, there are some provisions in this amendment to which I object and some provisions to which we all object. For that reason I for one should like to have seen the matter sent to conference so that these objections might be removed there. In hopes that this might be accomplished, I cast my vote for the rule on this matter. Since the House has not seen fit to send the bill to conference, we shall have to take these matters up in Committee of the Whole House. Some of us who are here this afternoon attempting to take care of the interest of the veterans realize that some of these objectionable features in this amendment must be removed or the veterans of the United States will be placed in the same position in which they were a year ago; and so that some of these particularly objectionable features may not again in the future arise to be used as a club over the veteran as they were a year ago, it is necessary that we see to it that they are eradicated now. The undeserving must be stricken out in order that we may secure justice for the deserving. Therefore, we must take up this amendment and see if we cannot bring something out of it that will be acceptable to the veterans themselves, that will not harm them, and their case in the future, something which will save this legislation from a veto that will be acceptable to this body in general. Let us remember that in the end all legislation is a matter of compromise.

I ask you this afternoon to consider the case of the Spanish-American War veterans, the veterans of the Philippine insurrection, and of the Boxer rebillion. These men were all volunteers. They voluntarily and freely offered their services to their country in time of war. They were taken from the climate of the United States, a salubrious climate, and without any period of hardening or training, taken into the dank and fever-infested Tropics, and there

thrown into active service. Did they then, in the flower of their youth and the strength of their young manhood, question the motives of their country when it asked for their services? Not one word. They are today upward of 60 years of age. They are pretty well past the employment age as it is established in American industry. I am personally acquainted with great numbers of the veterans of the Spanish-American War who saw active service in the Philippine Islands during that war and in the Philippine insurrection which followed. No reasonable man can deny that to take a man from a salubrious climate like that of Pennsylvania, Illinois, or Kentucky, and without a period of hardening or training throw him into active service in the Tropics, with improper clothing and ill-fed, is bound to interfere with his health and result in seriously curtailing his ability to earn a livelihood. They were subjected to a rank injustice under the provisions of the Economy Act of last March. In spite of the promises, battle casualties were unjustly cut. It is our duty as Members of this House to see that these injustices are corrected. Therefore I ask of you consideration for these veterans today.

We have also in this piece of legislation provisions which will make hospitalization possible for those veterans who are needy, for those veterans who are unable to bear their own hospital expenses; and if they are to be properly cared for, as is consistent with the policies of this Government in caring for veterans of wars, they will have to be taken care of under this amendment. We must look to their interests. Our first consideration must be to those actually disabled and in need and the widows and orphans.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. FADDIS. Gladly, to my friend from Oklahoma.

Mr. JOHNSON of Oklahoma. I am very much interested in the discussion of the gentleman from Pennsylvania and think he has made some valuable suggestions. Would the gentleman yield for a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. FADDIS. May I have additional time in order to yield to my friend from Oklahoma?

Mr. WOODRUM. I yield the gentleman 2 additional minutes, Mr. Chairman.

Mr. JOHNSON of Oklahoma. As I understand the Senate amendment, one provision would place back on the pension rolls all remarried widows of Spanish War veterans, and at the same time unmarried widows of disabled World War veterans are not taken care of. Does not the gentleman think that is very inconsistent and unfair?

Mr. FADDIS. I do, and I had hoped to reach that point in my remarks. I am heartily in favor of legislation making it possible for us to properly care for the widows of World War veterans. I hope some of the other speakers will take that up. It deserves attention. At the same time I hope that a limit will be fixed upon the time of marriage of those who may receive these pensions. We must not load this Nation with pensions beyond a reasonable limit.

Mr. HOEPPEL. Will the gentleman yield?

Mr. FADDIS. I yield to the gentleman from California.

Mr. HOEPPEL. I should like to correct the last speaker. Every widow of a veteran who died of service-connected disability in the World War is entitled to a pension. There are only 1,720 remarried widows of Spanish War veterans in the entire United States. Why quibble with that amount for those old and aged widows? Some of them are 80 and 90 years of age. It is petty, and it is preposterous.

Mr. FADDIS. I think the gentleman is mistaken. His voice is ever being raised in the House in favor of increased appropriations for any purpose.

Mr. HOEPPEL. I know my position. I know the figures.

Mr. FADDIS. The gentleman is the best-informed man on this legislation in the House. He admits it himself. [Laughter.]

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. FADDIS] has again expired.

Mr. GOSS. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. SHOEMAKER].

Mr. SHOEMAKER. Mr. Chairman, I rise at this time to call attention to just a little of the personal experiences I have had with regard to the results of the so-called "Economy Act." Probably some of the Members of this House have gone through similar experiences with regard to veterans.

Upon my arrival at Minnesota after the last session, I drove out one day to the veterans' hospital at Fort Snelling. As we came through the gate, I met a little old gray-haired, stooped-over mother who had just gotten off a street car. She had five or six blocks to walk to the hospital, so I picked her up. I said, "Mother, can I be of service to you?" She said, "Yes." I put her in the car and drove up, and I asked her where she was from. She told me her sad story. She was a mother from the State of Oregon. She had received a telegram that her son was about to die of tuberculosis, and that if she wanted to see her son alive she would have to hurry. She had no money, so the neighbors of her community got together and took up a collection and bought her a railroad ticket to St. Paul and return, that she might see her son alive. I was familiar with the hospital, so I took this little mother into the tuberculosis ward, where her son was suffering with tuberculosis, and I took her where her son was. I want to say to you Members of this House that I saw one of the most heart-rending scenes I have ever experienced in my life.

This mother told me on the way to the hospital she had only been eating one meal a day on her trip, because she had no money to pay for her food. The employees at the hospital took up a collection to feed this poor little old lady. When we went to the ward where this boy lay, it almost seemed the work of Providence, for when that mother stepped across the threshold that young man, who had been in a semiconscious state of mind for some days, opened his eyes; a smile came over his face as that mother walked up to that bed. In his weakened condition, with his last feeble physical effort he attempted to raise his arms and enfold that dear old mother, but his weakened condition caused him to fall back upon that bed. She fell over him and fell down upon her knees by that bedside and offered up such a prayer as I have never heard in my lifetime.

Four hours after she saw her son, he passed over the Great Divide into the unknown land. Then came the sad part of it. The interne, in the presence of officials of the veterans' hospital, and in my presence, went through the pockets of that man, that soldier, that patriot, and there they found $3. The burial benefits had been cut from $100 to $75. Even the size of the flag that was to be used at a military funeral had been cut. Not only that but, under the provisions of Public, No. 2, if there was any money on the body of a veteran, that money was to be deducted from the $75 funeral allowance that was to be allowed toward the burial of that patriot.

Oh, my friends, we did a great injustice in this economy bill. We made a rule whereby Uncle Sam could reach down into the pockets of the dead, lifeless corpse, a patriot, a man who had fought for his country, and pilfer his pocket to the tune of $3 before the very eyes of the little, old, stoop-shouldered, withered mother. I want to say that the responsibility for these conditions rests upon the shoulders of the Congress of the United States, and it is our duty today to right some of those wrongs.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, I am sending to the Clerk's desk an amendment which I will offer at the proper time.

Mr. Chairman, this amendment is the amendment offered by Senator JAMES BYRNES, of South Carolina, in the Senate. The general feeling is that the President will not accept the Senate amendment to this bill as it applies to veterans. Therefore, if we are going to get anything at all for the veterans it will be necessary to effect a compromise.

Senator BYRNES was recognized as the administration spokesman on veterans' legislation when this measure was pending in the Senate. Whether or not he had any agreement with the President I do not know. So far as I know he did not so state on the floor of the Senate. But the fact that he offered an amendment restoring Spanish War veterans and their widows to the rolls giving them 75 percent of the amount they were receiving a year ago clearly indicates to me that he had a feeling that the President would accept that amendment.

Now, gentlemen, if you are not going to be able to get 90 percent for the Spanish War veterans, are you going to sacrifice everything? When the Spanish War veteran finds that the President will not agree to the Senate amendment to this bill, will he not be willing to take 75 percent in lieu of nothing? That is the issue. If my amendment is adopted, the conferees can go only so far, they cannot go below 75 percent and they cannot go above 90 percent in restoring the pensions of the Spanish War veterans.

I want to do something for the Spanish War veterans. For 21 years I have been fighting their battles in the Government departments. I have secured pensions for hundreds and hundreds of them; but hundreds of them lost those pensions last March. I think I know the Spanish War veteran. I know he is dissatisfied with the treatment he has received; but I feel that when this matter is placed before him, he will be willing to accept 75 percent if he knows he cannot get more. Why, therefore, should we for political purposes or otherwise here today vote for an amendment to which we know the President will not agree?

I am anxious to do something for the Spanish War veterans. I do not want some of my friends to go back home and have the Spanish War and the World War veteran say, "You did everything for the Government employee, but gave us nothing." That is not going to help you one bit, but that is what many Members will be confronted with. Let us try and get as much as we can. Do not sacrifice everything. Down in my heart I fear you are doing that if you do not adopt my amendment. We know the President will not agree to the Senate amendments.

I am giving an opportunity today through my amendment to do something for the Spanish War and World War veterans, and I hope you will consider this. You have 2 hours to consider it, and I hope you will do so before I offer the amendment. [Applause.]

[Here the gavel fell.]

Mr. GOSS. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. DIRKSEN].

Mr. DIRKSEN. Mr. Chairman, I am rather surprised at the statement of the distinguished gentleman from Missouri who would have us feel that if there is a veto impending upon whatever we may do by way of liberalization of veterans' benefits today, the fact of the impending veto ought to be the moving force to influence us toward a compromise.

A principle is involved here. Would he have us compromise principle because the gentleman in the White House has promised he would veto something we might do? It seems to me it involves a matter of principle and that we, upon whom rests intelligent decision of the problems involved in Senate amendment no. 22, should ask ourselves what this amendment will do for the veterans. I shall not indulge in any window-dressing here this afternoon, but shall simply point out as concisely as I can what I, after a perusal of the bill, believe it will do for the veterans of our various wars.

Let us take the least important of the provisions which relates to the restoration of certain benefits to those who are beneficiaries of the World War Act in relation to their employment in the Veterans' Bureau. If I read section 33 correctly, it provides that those receiving benefits under this act may participate in a determination or decision of a claim with reference to the benefits of this act. This means nothing more than that somebody who is receiving a benefit under existing veterans' legislation will have the right to sit upon one of these boards of review or determination, which now exists.

Secondly, with respect to hospitalization the provision is simply that within the limit of existing facilities World War veterans be allowed free hospitalization if they will state on affidavits that they are in need of medical or hospital treatment and do not have the money with which to pay for it. Let me emphasize the fact that it provides for this only within the limits of existing hospital facilities. We do not ask a dollar for new hospital construction. We have some 5,000 or 6,000 vacant beds in the hospitals at the present time. All we want is to utilize these empty beds, giving idigent veterans free hospitalization who need it and have no money.

With respect to emergency officers, section 31 provides that those who served actively and applied for the benefit of the Emergency Officers' Retirement Act shall be entitled to pay at the monthly rate as of the 19th of March 1933. In other words, they are to be restored to the same pay they were getting before the enactment of Public Law No. 2, the Economy Act, if their disabilities resulted directly from the performance of military or naval duty. It also applies where disabilities are aggravated by reason of service and such disability has been made a matter of record by competent authorities during the service.

That is what it provides so far as these emergency officers are concerned.

Mr. WADSWORTH. Will the gentleman yield?

Mr. DIRKSEN. I yield to the gentleman from New York.

Mr. WADSWORTH. The gentleman appeared to emphasize the word "actively" as he read from his memorandum.

Mr. DIRKSEN. Perhaps unconsciously so.

Mr. WADSWORTH. What is meant by the phrase "serving actively"?

Mr. DIRKSEN. I take it that it does not mean someone who was not a part of the combatant troops.

Mr. WADSWORTH. I wonder if that is the definition that would hold.

Mr. DIRKSEN. Maybe not.

Mr. WADSWORTH. Active service is service day after day in the military forces, whether it is contact with troops, the enemy, or not.

Mr. DIRKSEN. Subject, of course, to the fact that such person actually enrolled in the Army would be subject to combatant service and could be sent into active combatant service at any time. What is the gentleman's interpretation? I should be glad to know.

Mr. WADSWORTH. I have none. I never heard the phrase used before.

[Here the gavel fell.]

Mr. GOSS. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. McFARLANE. The word "active" is not in there.

Mr. MARTIN of Oregon. I think the gentleman from New York will agree with me that the word "active" is a weasel word.

Mr. DIRKSEN. It has been a weasel word with the Veterans' Bureau.

Mr. MARTIN of Oregon. The gentleman is familiar with Army phrases. That simply means "service" and that is all it means.

Mr. DIRKSEN. That is entirely possible, and I stand corrected if that is the case. It has been subjected to much interpretation by the Bureau.

Mr. PATMAN. Will the gentleman yield?

Mr. DIRKSEN. I yield to the gentleman from Texas.

Mr. PATMAN. Will the gentleman tell us the page and line where the word "active" appears?

Mr. DIRKSEN. I am not sure.

Mr. LANZETTA. Page 46, line 19.

Mr. PATMAN. The exception changes that entirely. Under present law it must be active service, but here the exception commencing on page 5 changes that.

Mr. DIRKSEN. I am glad to be corrected.

Mr. PATMAN. It does not require active service.

Mr. DIRKSEN. Permit me to proceed. May I say that so far as Spanish War veterans are concerned it restores 90 percent of all the benefits that were existent on the 19th of

March 1933. I heard on the floor of the House in the special session some discussion of the fact that there were Spanish War veterans holding high official positions, such as judgeships and otherwise, who were getting the benefits of this act. The exception that has not been included in the amendment provides that where a man who receives the benefits under the act as a Spanish War veteran in any one year is not exempt from income-tax payments the benefits are not payable to him. It seems to me that this would cure much of the objection that has been registered against the act heretofore. It simply takes those off of the rolls of the United States who because of their official position or otherwise have a sufficient income with which to take care of their own and their family needs.

Getting back to the World War veteran, this provides, first of all, for reinstatement of the service connection that was broken as a result of Public, No. 2. There were a great number of veterans whom we always considered battle casualties and who, under the review provisions of Public, No. 2, had that service connection broken. This simply reinstates them upon the rolls as of March 19, 1933. In addition to that it will restore some 23,000 presumptives, of which I should say 90 percent are either insane or tubercular. It makes this exception, however, with reference to those who are to be restored to a service-connected disability condition: It takes out, first of all, those who enlisted in the Army after the 11th of November 1918. It takes out all of those who got on the rolls through fraud or misrepresentation or those where it was clearly demonstrated beyond a peradventure of doubt that their disability was incurred before they entered the service or after they entered the service or after they were discharged from the service.

As a result of these provisions, so far as World War veterans are concerned, they can be briefly summarized by saying, first of all, we want some of these empty hospital beds to be used by the indigent veterans who are needy and do not have money. It restores service-connection disabilities where they have been broken. It restores 23,000 presumptives, mostly tubercular or insane, who were taken off of the rolls by the review board.

There is, of course, some difference of opinion as to precisely what the cost is going to be. The distinguished gentleman who presides over the destinies of the Veterans' Bureau and other gentlemen who have been guiding the destinies of the American Legion, and, I might say, have been directing them honestly, capably, and sincerely, are in disagreement as to precisely what the cost will be.

With respect to hospitalization, I think General Hines is the authority for the statement that it was going to cost $16,000,000. How could it cost $16,000,000 when the difference between the cost in 1933, when we had unrestricted benefits for veterans, and 1934, when the benefits were restricted, was only something like $4,900,000? We are not asking for any additional hospital facilities. How does the distinguished general down at the Veterans' Bureau arrive at the figures that we are wanting $16,000,000 for hospitalization? As nearly as we have been able to determine this cost, we believe that it will take perhaps $1,000,000 for hospitalization, and no more.

[Here the gavel fell.]

Mr. GOSS. Mr. Chairman, I yield 3 additional minutes to the gentleman.

Mr. DIRKSEN. Mr. Chairman, there is also a controversy between the Veterans' Bureau and American Legion officials as to precisely what it is going to cost to reinstate the service-connected cases and these presumptive cases to the roll. I think General Hines said it would cost $44,000,000. We insist it will cost $29,000,000. I have yet to see any conclusive figures that can be properly supported by the general in charge of the Veterans' Bureau to show that he is right and that we of the American Legion are wrong.

Mr. O'MALLEY. Will the gentleman yield?

Mr. DIRKSEN. I yield.

Mr. O'MALLEY. Did not General Hines state that the Economy Act would save $450,000,000—and how much did it actually save?

Mr. DIRKSEN. The gentleman does not refer to the saving but the additional expenditure.

Mr. O'MALLEY. General Hines said the Economy Act would bring about a saving of about $450,000,000 and was about $200,000,000 wrong on those figures.

Mr. BAILEY. Will the gentleman yield?

Mr. DIRKSEN. I yield.

Mr. BAILEY. Did I understand the gentleman to say that the exemption of persons paying an income tax among the Spanish-American War veterans would take off the rolls these judges and other high officials?

Mr. DIRKSEN. It takes from them these benefits but does not mean, necessarily, that they cannot go back on the rolls.

Mr. BAILEY. If the gentleman will read the amendment, he will find that it exempts him if he pays a Federal income tax, and State salaries are exempt from payment of Federal income taxes.

Mr. DIRKSEN. Then let us take judges out of the category and apply the principle to any other case where a man may be earning $3,000 or $4,000 a year, or even $1,000 in the case of a single man. If I said "judges", I did not mean to limit it to judges alone, because as constitutional or judicial officers they are probably exempt where no one else would be exempt. This also would apply to Members of Congress.

As I see this picture, so far as the benefits to the Spanish-American War veterans and to the World War veterans are concerned, the hospitalization program and the emergency officers' program, it occurs to me that the sensible thing for the Committee to do would be to concur in the Senate amendments to restore all these people to the condition, substantially, they were in on the 19th of March 1933, before the Economy Act fell upon their necks and reduced so many of them to the very slough of anguish and misery and despair in this country.

For one, I am only too glad to lift my voice in behalf of this program and concur in the Senate amendment and restore this help to the needy soldiers for the patriotic service they rendered in 1917 and 1918. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield myself 1 minute for the purpose of making a brief statement.

Originally there was 2 hours of general debate allotted, but I think it ought to be said for the information of the House, in order that the cloakrooms may communicate with the Members if it is so desired, that in all likelihood we will not consume more than one half of the time from present indications.

I now yield 5 minutes to the gentleman from Texas [Mr. PATMAN].

RETIRED EMERGENCY OFFICERS

Mr. PATMAN. Mr. Chairman, the gentleman from Illinois referred to the retired emergency officers a few minutes ago. I invite your attention to section 31, commencing with line 14, down to and including the word "duty" on page 47, line 5, which is the present law and the present regulation. The only change is from the word "except" on page 47, down to the word "thereto", in line 19, or the remainder of that section. In other words, the active service part has been changed, except where there was any notation of a disability in service. Regardless of where the service was or under what conditions, if the retired emergency officer had become 30-percent permanently disabled, prior to May 28, 1928, such officer is entitled to be retired on three-fourths pay, which, in the case of a second lieutenant, amounts to about $106 a month, and in the case of a general, $416 a month.

STRICKEN FROM ROLL

In the Economy Act, 4,500 of the 6,007 retired emergency officers were stricken from that roll. I do not think the principle of allowing a retired emergency officer these great benefits is sound. I am not in favor of it, but I am willing for the 1,500 who are now on the rolls to remain on the rolls, because they are battle casualties. This is the only

reason. I still say the principle is not sound, and I am not upholding the principle, but I am willing to permit the 1,500 to remain on the rolls.

CAMEL'S NOSE

This is another effort to let the camel's nose get under the tent so that 2,900 more can get in, and then as soon as they get in there will be another amendment brought in here to let the others in, and then, as soon as that is done, they will want you to give it to their wives and dependents after they are dead and gone and in this way carry rank beyond the grave like they tried to do a few years ago.

Mr. HOEPPEL. Will the gentleman yield?

Mr. PATMAN. I am sorry, but I cannot yield.

Mr. HOEPPEL. I would like to answer that question, because it is very important.

Mr. PATMAN. I yield briefly.

Mr. MOTT. The number is not 2,900, but 1,900.

Mr. PATMAN. I am just taking the figures of the Bureau.

Mr. HOEPPEL. I would like to call the gentleman's attention to the Democratic platform of 1932 which does not differentiate between service-connected emergency officers.

Mr. PATMAN. It does not differentiate in their favor, either. It does not say anything about them. The gentleman cannot read something into the platform that is not there and I do not think the gentleman is in position to lecture me about the Democratic platform. [Applause.]

Mr. HOEPPEL. I am following the Democratic platform in reference to the veterans.

Mr. PATMAN. With reference to the retired emergency officer, I say the principle is not sound that when two men, who may be brothers, go into the Army for an emergency and are injured in exactly the same way and have a 30-percent permanent disability, one of them, because he is a lieutenant colonel, draws $250 a month for the remainder of his life, while his brother, who is an enlisted man, will only draw $30 a month for the remainder of his life. Of course, I know they claim that where this lieutenant colonel is serving beside a Regular Army officer, if the Regular Army officer were injured in the same way he would receive $250 a month or, if a general, $416 a month, and therefore the emergency officer should receive the same consideration as the Regular Army officer.

I say this is not sound, because when you attempt to remove that discrimination you create a discrimination that is 100 times as bad between the emergency officer and the emergency enlisted man, and this should not be allowed.

Mr. CONNERY. Will the gentleman yield?

Mr. PATMAN. I will yield to the gentleman from Massachusetts.

Mr. CONNERY. The gentleman talks about the lieutenant colonel and his brother in the Regular Army. What about the emergency officer in the Army or in the Navy——

Mr. PATMAN. The gentleman has asked me a question that should be answered, and I am glad to discuss it. The Regular Army officer or an officer in the Marine Corps or the Navy takes up that work as a life work. They are trained for that and nothing else. Then when a war comes and they go into the Army, if disabled in active service or any other way 30 percent, they are examined by a board of naval officers—not a political board—if they are 30-percent disabled they are disabled for their life work.

But if there is another war the regular officer can be called back into the service.

If the retired emergency officer is disabled 30 percent it may or may not disable him for his life work. The same principle is not involved. A lawyer, a doctor, or a merchant disabled 30 percent is not disabled for his life work.

Mr. RANKIN. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. RANKIN. I want to correct the gentleman in one of his propositions. He said a while ago that if a lieutenant colonel was disabled 30 percent he would get $250 a month for life.

Mr. PATMAN. That is true.

Mr. RANKIN. But the buck private would get $30 a month for life. That is a mistake. The buck private will only get $30 a month as long as he can prove that he is disabled 30 percent.

Mr. HOEPPEL. Will the gentleman allow me to answer that question? I want to explain that for the benefit of the House.

Mr. PATMAN. The gentleman can do that in his own time. Section 21 in the bill will restore all emergency officers. I object to putting any more on the roll.

Mr. MOTT. Will the gentleman yield? I want to correct the gentleman in one particular.

Mr. PATMAN. What is it?

Mr. MOTT. The gentleman said the enactment of this amendment would restore the emergency officers to the number of 2,900. The number is 1,900.

Mr. PATMAN. There is a difference as to the number, but when the retired emergency officers' bill was on the floor it was said that there would be from nine to fifteen hundred, and they put 6,000 on the rolls. There is a difference as to the number. The gentleman says 1,900, and I say 2,600.

In my opinion you should strike section 21 out of the bill. If you do not, you recognize the injustice of paying $416 a month to an officer and only $30 for an enlisted man. If such an enlisted man goes to a hospital, he will get $15 and his wife $15. If a general goes to the hospital, he will get hospitalization and his relatives and wife and dependents will get $400 a month. And besides that, I do not care how rich he is or what his income is, you still give him the $416 a month. Can you justify that?

Mr. BROWN of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield for a question along this line.

Mr. BROWN of Kentucky. I put in the RECORD last week the case of Dr. Joe Ferguson, of Lexington, Ky. He saw 7 days' service as a captain in the Medical Corps, and if this section remains in the bill, in addition to a $6,500 salary from the Veterans' Bureau, he will be put back on the rolls.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WOODRUM. Mr. Chairman, I yield the gentleman 2 minutes more.

Mr. PATMAN. It is true that some of the leaders of these veterans' organizations are interested in the veterans. All of them are, I suppose, but some of them are also interested in getting back on the rolls themselves. It happens that one leader, whose telegram was read here this morning, represents a large veterans' organization. He is interested in getting them back on the rolls, but incidentally he was cut off last year himself, and since that time he has failed to receive $240 a month, which he wants to receive from now on, and if you pass this bill he will be restored back to his $240 a month. Incidentally, there is another veterans' organization who has a legislative representative here, who was getting $150 a month until the Economy Act passed. He was then cut off, and he is asking you to put these poor veterans, these privates and enlisted men, back on, but incidentally he himself will get back on for $150 a month. So you see there is something else involved in this sometimes.

I do not impugn the motives of these gentlemen, and I am sure they are working for the right thing for these veterans, but at the same time they have a little direct interest in getting this provision, section 31, inserted into this bill. When this comes up I am going to move to strike this out in some way and take these retired emergency officers out of the bill. They are a bad example; they have helped bring the veterans into disrepute. It is said of them, "There is a man getting three or four hundred dollars a month, and he is rich; he is riding around in a Cadillac automobile, and he has a $10,000 a year practice." He is the man who brings the veterans of this country into disrepute, and as long as you keep him there on the pay roll, you hurt the veterans. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. MARTIN of Colorado. Mr. Chairman, I ask the gentleman from Virginia to yield the gentleman 2 minutes, so that I may ask him a question.

Mr. WOODRUM. I yield the gentleman 2 minutes more.

Mr. MARTIN of Colorado. I wanted to ask the gentleman if the retired emergency officers of any prior war in American history were ever given this preferential classification?

Mr. PATMAN. I never heard of it. I do not know; I am not informed. But I do not care whether they were or not; these officers went in for the emergency, just like the men, and it is not right to give them this preference.

Mr. RANKIN. The Civil War veterans, the Federal soldiers of the Civil War, defeated and kept down a measure of this kind so long as they lived, and prevented a single Federal soldier in Congress from ever introducing it until the last one who was here, who was General Sherwood.

Mr. MARTIN of Colorado. It is my understanding that this preference was never before given.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, I do not always agree with what the gentleman from Texas [Mr. PATMAN] says, but in this particular I find myself almost in entire agreement with him. I think that we should adopt an amendment to this bill wiping out section 31. When the opportunity comes, if I am able to procure recognition, I propose to offer an amendment to title II of the bill and I propose to leave in section 26, which provides that those who are totally blind shall receive $150. I propose to leave in section 27 with this amendment: After the word "disability" in line 10, insert the words "not caused by his own misconduct".

Mr. VINSON of Georgia. On what page is that?

Mr. TABER. Page 41—and leave section 28 in because in that the misconduct proposition is already covered.

Mr. VINSON of Georgia. What is the gentleman's thought with reference to reducing the Spanish-American War veterans' 75 percent?

Mr. TABER. I will get to that in a moment.

Mr. RANKIN. As I understand the gentleman, it is his intention to leave the presumptive cases on the rolls.

Mr. TABER. Leave the presumptive cases on, with the exception that none can stay on where the disability is the result of his own misconduct.

Mr. RANKIN. Where the disabilities were caused by their own misconduct.

Mr. VINSON of Georgia. What about the 75 percent?

Mr. TABER. I shall come to that in a moment. Section 29, page 44, I propose to leave in, although I think that is probably covered by the veterans' regulation, so the Veterans' Bureau says:

In section 30 I propose to increase the figure in line 16 from 10 to 25 percent. That is the Spanish-American War proposition. Then I propose, after the word "cases", in line 19, to insert the words "and except where his disability is the result of his own misconduct."

Mr. VINSON of Georgia. Will the gentleman yield?

Mr. TABER. Yes; I yield.

Mr. VINSON of Georgia. If the House accepts the gentleman's amendment with reference to 75 percent instead of 90, the result will be that the House conferees cannot go under 75 percent, and the only thing that will be considered will be the rate between 75 percent and 90 percent, as fixed in the Senate amendment?

Mr. TABER. That would be the case as far as the conferees are concerned. If the bill were brought back to the House as it is now, I do not understand that limitation would apply. I think here we can go beyond the scope of the difference, but the conferees would have no jurisdiction to go beyond the matters in difference.

Mr. VINSON of Georgia. But the House conferees could not go under 75 percent?

Mr. TABER. I think that is correct.

Mr. VINSON of Georgia. That is right. So we have an assurance if 75 percent is agreed to now, that is the largest reduction that can be made with reference to Spanish-American War veterans, without a further vote in the House?

Mr. TABER. Without a further vote in the House; that is correct.

Mr. PETTENGILL. Will the gentleman yield?

Mr. TABER. I yield.

Mr. PETTENGILL. The gentleman is offering the amendment with respect to 10 and 25 because he thinks 25 is all that is practically possible to secure for the Spanish-American veteran?

Mr. TABER. I will say that what I propose to offer is not just exactly what I would put in if I were doing the job to start with, but I think what I propose to offer is as far as we can go, and perhaps in some instances might be farther than I might personally want to go, but I think that is as far as there is any chance of anybody going, and I want to see something adopted that will meet with Executive approval and become a law and help to straighten out this jumble we are in.

Mr. PATMAN. Will the gentleman yield?

Mr. TABER. I yield.

Mr. PATMAN. Under the gentleman's amendment, a Spanish-American War veteran 100 percent disabled will receive $45 a month?

Mr. TABER. Provided it is not service connected.

Mr. PATMAN. Is the gentleman willing to give a Spanish-American War veteran $45 a month for a total permanent disability, and a World War veteran of the same age with the same disability only $30?

Mr. TABER. I appreciate that there is a distinction there. At the same time we are in this situation: We did grant the Spanish-American War veteran a larger pension for non-service-connected disability, and we have to get away from it somehow and get by with the situation we are in. It is not exactly a question of doing just exactly what might be right, but it is doing the best we can with the tools we have got to work with.

Mr. PATMAN. Does not the gentleman think we should put an age limit in here and give for the same age and the same disability the same pay, regardless of which war it was?

Mr. TABER. I do not think we ought to attempt in this bill to go into that question, and I do not think we ought to enlarge. There are upward of 3,000,000 World War veterans. We have now provided that in case they are totally disabled they can receive $30 per month. If we provided $45 a month for them, and there happened to be many at the age of total disability in that group—and we are practically at the age of total disability for the Spanish War group, I think, service connected or otherwise—but if we should have 3,000,000 come into that age, we would have $2,000,000,000 a year at $45 a month approximately. Those figures are not exact, but they are practically so. I do not think this country is in a position where it can stand the gaff. That is the reason I would not like to go into that situation.

Mr. PATMAN. Does the gentleman not think that the principle is larger than the money in this case? Why should we give a Spanish War veteran total-disability pay of $45 and a World War veteran of the same age and the same disability only $30 a month?

Mr. TABER. We have never voted a $45-a-month pension for the World War veteran for total disability. We have done so for the Spanish War veteran, but we established a practice there that the country is not able to support, with the condition that has resulted from the number of veterans of the World War. That is the situation we are up against. I think we ought to go along with it as best we can and save a little of the Treasury.

Mr. PATMAN. In other words, the gentleman would exclude them by reason of their numbers and not by reason of the principle?

Mr. TABER. I would exclude them because I do not think we dare go into it.

Mr. PATMAN. One other question about another matter on this same section. Other veterans, if they are working for the Government and receiving more than a certain

amount, cannot receive over $6 a month. If this section is passed as it is now, it will not cause those veterans to reduce their pension checks down to $6 a month.

Mr. TABER. That provision should continue.

Mr. PATMAN. The gentleman should consider that along with the other.

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman from New York [Mr. TABER] 5 additional minutes.

Mr. BLANCHARD. Will the gentleman yield?

Mr. TABER. I yield.

Mr. BLANCHARD. In connection with the Spanish-American War veteran, the sum of $45 a month was mentioned as the amount which a veteran totally disabled would receive. Would that be the amount a Spanish War veteran would receive in the event the amendment which the gentleman suggests is adopted?

Mr. TABER. It would be.

Mr. VINSON of Georgia. Will the gentleman yield?

Mr. TABER. I yield.

Mr. VINSON of Georgia. As the gentleman is informing the House as to what amendments he proposes to offer, has he given any thought to section 38, for the widows of the *Akron*, the *Shenandoah*, and the *J–3?* Does not the gentleman think that should be stricken out?

Mr. TABER. I am inclined to believe it should be stricken out.

Mr. VINSON of Georgia. I am glad to hear the gentleman make that statement, because I propose to offer an amendment striking out that section; and, of course, the gentleman is perfectly willing to strike out section 39, the Borah amendment, in view of the attitude of the House.

Mr. TABER. If the House has courage enough to vote to cut the salaries of the Members, it can do it in the legislative appropriation bill. I do not believe the Borah amendment effects a cut in salaries. It prevents the payment of more than 85 percent of the salary, but it does not effect a cut; and the individual officeholder would have a claim against the Government for it in the Court of Claims at any time.

Mr. VINSON of Georgia. Then, in view of the gentleman's statement he is thoroughly in accord with striking out that section?

Mr. TABER. I think for this purpose we ought to cut it out, and then the House can pass on the question in the legislative appropriation bill.

Mr. VINSON of Georgia. Will the gentleman inform the House of any other amendment he proposes to offer for consideration?

Mr. TABER. I think I have covered practically all of them.

I do not propose to interfere with section 33. I am inclined to believe that it is not a very bad thing to let the veteran go into court if he has a legitimate claim.

I do not see any reason why we should not adopt the amendment that has been suggested by the Legion, of calling the emoluments compensation and not pension.

I think we ought to continue section 35, which prevents emoluments accruing for any period prior to the date of the approval of the act.

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. TABER. Yes; for a question.

Mr. HOEPPEL. In the matter of widows, the gentleman is going to reduce the pensions of widows of the officers and men who lost their lives on the *Akron;* yet the other day we voted to increase the pension to the widows and dependents of the Army officers killed in the air-mail accidents. We are not consistent.

Mr. TABER. Well, I probably am never consistent.

Mr. BLANCHARD. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield.

Mr. BLANCHARD. What would be the amount of money involved in the striking out of section 31?

Mr. TABER. I propose to strike out section 31. This section relates to emergency officers. Frankly, I never have favored the emergency-officer proposition. I do not think the House can afford to take a stand for that at this time. I think that would be enough to force a veto of the entire bill.

Mr. BLANCHARD. How much money is involved?

Mr. TABER. Something over $2,000,000.

Mr. WIGGLESWORTH. $2,900,000.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield.

Mr. DOWELL. The gentleman would not favor cutting the compensation or retirement pay of Regular Army officers, would he?

Mr. TABER. I should not propose that at this time, nor should I propose at this time adding any more to the roll of emergency officers because I do not want to get this bill through in such shape that it is due for a certain veto. I want to see the bill passed in such shape that it stands a chance of getting through. That is my only object. A lot of these things are not things that I would do were I doing it myself, but it seems to me I am suggesting things that ought to be adopted because I think they are things we may possibly hope to put through. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. PETERSON].

Mr. PETERSON. Mr. Chairman, ladies, and gentlemen, the gentleman from Illinois, who spoke a few moments ago, said we should not take into consideration the fact that certain measures might be included in this bill which would cause its veto; that we should not surrender principles. I feel that we should be practical and try to bring out of this session today some kind of legislation that will meet the approval of the Chief Executive. I had hoped the bill might be sent to conference, feeling that the conferees might be able to contact the Chief Executive and learn what he would approve, and that that would be written into the law.

I want to do something to help the veterans of the War with Spain, the Philippine insurrection, and the Boxer rebellion. I should like to see the service-connected and the presumptive cases restored. It is necessary that we write into the bill either here or in conference, depending on the turn things may take, provisions that will meet the approval of the Chief Executive in order that we may help the veterans. If we pass a bill merely for the purpose of recording votes, we will finally awake to the fact that the veterans have not been assisted.

Someone voiced the thought that maybe the time would come when we would be in the position of having our own salaries restored in full by having to pass a resolution continuing the appropriations of last year and leave the veterans out; and this is a practical fact we may have to look in the face and may happen if we do not get together, because last year we carried into the provisions of the Economy Act the 1933 legislative appropriation bill as an amendment by striking out the figures "1933 and 1934" and inserting "1934 and 1935", moving it up, so to speak; and the 15-percent cut is by reason of the verbiage in that act. The salaries are fixed by Federal statute, and that appropriation act was temporary; but unfortunately, if we should get into a wrangle and not pass legislation that will meet the approval of the Chief Executive, the resolution continuing the appropriations of last year to carry forward the work of these departments will be passed, yet those veterans who need assistance will be left without aid. I am frank in stating that having seen the problem of the veterans of the War with Spain, having seen many of the service-connected cases and some of the presumptive cases growing out of the World War, I feel and urge that they should be taken care of. We must bear these men in mind and work out provisions that we know will be approved. You may have your idea and I may have my idea as to whether 75 percent of the amount is acceptable. I should like to take care in full, if possible, of the Spanish War veterans and the deserving cases of other disabled veterans, but I would rather be sure of 75 percent instead of continued uncertainty.

The Spanish War veterans of my State would be glad to get 75 percent if they knew they were going to get it now.

Today they stand in a state of uncertainty while we discuss the matter of trying to get something we know the Chief Executive will not approve. You talk about voting this whole amendment up or down. This does not get practical results. The veterans' amendment includes emergency retired officers, it includes the Borah amendment, it includes the amendment giving double pay to the survivors of those who were killed in the *Akron*. I do not see why that is in here, but I have no particular objection, except these things are all included when you vote up or down. You have controversial matters in here.

I wish the matter could have gone to conference because I believe it could have been worked out. I hope on the floor of this House that some concessions will be made for the purpose of bringing out something definite that the Chief Executive will approve and that we can get direct results for those who need it. I want to bring about a practical solution of the matter. It is all right to believe in principles. I believe in principles, and I believe in talking about principles, but I have won some large verdicts and have voluntarily remitted some of them because I believed the Supreme Court would order the remittance. We want something that will meet with the approval of the Chief Executive and help veterans now, and I hope this will come out of the deliberations this afternoon. Let us be sensible and practical and do something to help the worthy veterans instead of just voting on something we know will not become a law.

Mr. WIGGLESWORTH. I yield 10 minutes to the gentleman from Massachusetts [Mr. CONNERY].

Mr. CONNERY. Mr. Chairman, I listened with interest to my friend from Texas [Mr. PATMAN] talk about disabled emergency officers and going back to the time that we had the disabled emergency officers' bill before the House. I remember that I spoke in favor of that bill. I was a private in the Army and afterwards became color sergeant of my regiment, so there was nothing in that bill so far as I was concerned that would prejudice me in favor of the officers' side of the case. Many Members of Congress came to me that day, knowing I had been an enlisted man and said, "Why are you in favor of this bill?" I told them that I was in favor of it because the Regular Army, Navy, and Marine Corps emergency officers were retired under law, and the only ones that the law discriminated against were the National Guard and the National Army officers; in other words, the men who led us over the top in France.

I pointed out the fact that a man could fall from his horse over at Fort Myer and be retired as a disabled emergency officer, who never saw France, but the man who went over the top in France and led his troops into battle could not obtain retirement as an emergency officer simply because he was in the National Guard or in the National Army. I have been in consultation with some of the veterans' organizations since the gentleman from Texas [Mr. PATMAN] made his remarks today, and I am informed that a careful perusal of the Senate amendments will show that the emergency officers' amendment in the Senate amendments definitely excludes from retirement privileges, first, all presumptives previously retired. There are about a thousand of them. Second, it excludes all retired on affidavit evidence, about 1,500. It excludes all these men. Third, it excludes all those commissioned after being disabled, about 200. It allows retirement only to those who are directly service connected in line of duty, where official evidence proves the disability for which retirement was granted was noted in service; in other words, in their hospital record.

What is wrong with these Senate amendments? Nothing. They are just and fair amendments for the disabled veterans and should be agreed to.

Mr. KVALE. Will the gentleman yield?

Mr. CONNERY. I yield to the gentleman from Minnesota.

Mr. KVALE. They have to have a 30-percent directly service-connected disability, supported by the actual evidence in the official files?

Mr. CONNERY. That is so. I voted for the disabled emergency officers' bill originally for the reason I previously stated. If we had not had the Regular Army, Navy, and Marine Corps emergency officers on the roll, I would not have voted for it; but why discriminate in favor of men who stay at home in some cases and men who went over the top in France? They were officers. We had nothing against them because they were officers; in fact, able, courageous officers who were loved and respected by the men of their commands. The fact is that I wanted to see them receive equal justice with those officers already on the rolls who certainly were not as much entitled to be retired as these men who had actually fought in battle.

Mr. PATMAN. The gentleman will recognize the fact that if he had a 1-percent disability at the time of discharge, and that was noted on the record, regardless of what it was, and was 30 percent by 1928, he could still be retired under this because it says "any disease or injury incurred in active service."

Mr. CONNERY. I may say to the gentleman from Texas that theories are theories and facts are facts. Lt. Jack Gillespie, who was first a private, then a sergeant in my company, A Company of the One Hundred and First Infantry, became an officer in that regiment. He went over with B Company of the same regiment. There was an attack on A Company by the Germans one night at Humbert plantation in the Toul sector and the fourth platoon of A Company was cut off by a barrage. Gillespie, with his men of B Company, tried to go to the aid of the fourth platoon. Gillespie, who had been physically perfect in every way, was picked up by shell concussion and tossed over on the side. Overnight from a normal man in perfect physical condition he became a complete wreck, nerves shattered, and never has recovered his former self from that day to this. That man is about 98-percent disabled, and he is not receiving a nickel as a disabled emergency officer, so the gentleman from Texas can realize that it is not so easy for these men to get retired.

Mr. PATMAN. Under the present law, which I do not object to, he can get on the retired officers' roll if it is possible. This will neither help him nor retard him.

Mr. CONNERY. These things are not as easy as the gentleman thinks. He has tried to get on the retired list, I have fought his case, and he is not on the roll yet. And there is a man who fought on the battle line.

Mr. PATMAN. I believe the gentleman made a misleading statement. He said the presumptives would not come under this law as such. The gentleman is right, but if it is tuberculosis, mental trouble, or anything where the theory of presumption applies, if they had a 1-percent disability at the time of discharge and a 30-percent disability in 1928, they will come back by reason of the fact that they are disabled.

Mr. CONNERY. There was no opportunity for the presumptives to get on at all if the Attorney General had not made the ruling he did make. In the Senate amendments we are right back to the legislation which Congress intended when we passed the disabled emergency officers' bill.

We are now facing this proposition. Gentlemen have been offering amendments here, and we are again back to the proposition which I stated before, that if you change one word in Senate amendment no. 22, this bill is going to go to conference, and those who do not want the Spanish War veterans taken care of up to 90 percent and those who do not want the World War veterans to get what the Senate amendments call for, are trying their best to get this bill to conference.

When this matter comes up for a vote, I am going to offer a motion to concur in Senate amendment no. 22 without any change. This is going to cut our salaries, because the Borah amendment is in amendment no. 22. We are not going to get our $10,000 per annum; we are going to get $8,500; but when it comes to a question of our salaries or taking care of disabled World War veterans or the poor, old Spanish War veterans, for whom it took 25 years to get any sort of pension law through the Congress, I am going to vote for them, and I hope you will vote that way.

The veterans do not like you to lose your pay which you so sorely need. They are sorry that this provision came in here under this parliamentary maneuver. I think they

knew what they were doing over in another body when they tied the Borah amendment on to the veterans' provision and did not have it stand on its own merits.

I hope you will vote to concur in the Senate amendment when I offer the motion and not mind your salary for the time being, but vote to take care of these veterans.

I also want to say that as soon as we get back in the House I am going to ask for a separate vote on the Vinson amendment, which was passed a short time ago, so that those of us who favor full restoration of the Government employees' pay may vote on roll call to give these employees their full pay. I am going to make that request as soon as we get back in the House.

I now yield to the gentleman from Wisconsin.

Mr. BOILEAU. We have already amended Senate amendment no. 14. If we now amend Senate amendment no. 22, this will put us back in just the same position we would have been in if the gag rule had prevailed today.

Mr. CONNERY. Yes. They will go to conference and the veterans will be out the window.

Mr. BOILEAU. It will all go to conference, will it not?

Mr. CONNERY. Yes.

Mr. WEIDEMAN. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. WEIDEMAN. In other words, to get this clear, if we want to support our position against the rule this morning, when we get back into the House it is necessary to vote against the amendment of the gentleman from Illinois and all other amendments; and while we are sacrificing our salary a bit—and I am no salary cutter—the only way we can give the veterans and the Federal employees these benefits is to vote against every Senate amendment and vote to concur in all the Senate amendments.

Mr. CONNERY. Vote down every amendment that is offered here except a motion to concur in the Senate amendments.

Mr. TABER. Will the gentleman yield?

Mr. CONNERY. I yield to the gentleman from New York.

Mr. TABER. My understanding of the parliamentry situation is that the House, instead of sending amendments 14 and 22 to conference, took amendments 14 and 22 up in Committee of the Whole. We have adopted in Committee an amendment to amendment no. 14. Amendments will be proposed to amendment no. 22. Those amendments will not go to conference unless the House asks further to send them to conference, but will go over to the Senate to be accepted or rejected by the Senate.

Mr. CONNERY. They will go over to the Senate, and the Senate will ask for a conference, and then they will go to conference. That is just where I do not want them to go.

Mr. BROWN of Kentucky. Will the gentleman yield?

Mr. CONNERY. Before I yield to my distinguished friend from Kentucky, may I say that when the gentleman spoke here a short time ago he mentioned a man in the Veterans' Bureau getting $6,500 and also receiving disabled emergency officer's retirement pay. I want to call his attention to the fact that there is a law on the statute books today that provides that any man receiving $3,000 or over and working for the Government cannot receive any retirement pay. I now yield to the gentleman.

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. BROWN of Kentucky. I recall that the gentleman said to the Democratic majority yesterday that we want to bring these amendments in and vote on them upon their merits. Today, the gentleman is asking us to forget all about the merit of any amendment offered and not to dot an "i" or cross a "t." I want to ask the gentleman if this is consistent with his stand thus far in opposing gag rule and if he is not today gagging us just as much as if we had voted for the rule. [Applause.]

Mr. CONNERY. I am not gagging the gentleman. I will say to my friend from Kentucky I appreciate his observation, because I think it is the first time in 11 years in the House that anyone ever accused me of favoring any gag rule.

Mr. BROWN of Kentucky. Does not the gentleman see that he is gagging us?

Mr. CONNERY. No; I do not. The gentleman had his opportunity when he voted on the roll call today to accept the rule or turn down the rule, and we defeated the gag rule today.

Mr. BROWN of Kentucky. And now you are gagging us.

Mr. CONNERY. No; I am not gagging you, because you can vote any way you want, and that is all I ask—that we all be given a chance to vote.

Mr. BRITTEN. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. BRITTEN. I want to agree with what the gentleman from Kentucky [Mr. BROWN] said a moment ago. The gentleman from Kentucky is 100 percent right in what he has said to the gentleman from Massachusetts, because the gentleman from Massachusetts is suggesting to the House that no matter how good an amendment may be, or no matter how bad the Senate amendment may be, we must accept the Senate amendments just as they are, because otherwise something of a parliamentary nature will occur between the conferees.

Mr. CONNERY. I may say to the gentleman from Illinois that the Senate amendments are grand amendments and really give the veterans something, and that is why I am in favor of them. [Applause.]

Mr. FISH. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. FISH. I want to ask the gentleman from Massachusetts this one question: Why can we not concur in the Senate amendment with an amendment striking out the Borah amendment, if the Committee wants to do that? If this were done, we would be in exactly the position the gentleman wants us to be.

Mr. CONNERY. Oh, no; the matter would go over to the Senate, and one of the Senators would rise and ask for a disagreement, and they would go to conference, and your whole veterans' situation would have to come up again. I make this statement because I have discussed this very question thoroughly with our intellectual Parlimentarian, Mr. Deschler. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, what is known as the "Borah amendment" is a joker in this bill pure and simple. It must have been hurriedly drawn by its author, for it does not do what all of us at first thought it did. It does not decrease congressional salaries. The basic salary of a Senator and Congressman remains just the same whether the Borah amendment is passed or not. So far as decreasing congressional salaries, it is just so many futile words, accomplishing nothing in that direction.

Congressional salaries are fixed by law. Unless provisions in an appropriation bill are begun with the word "hereafter", such provision does not become permanent law. And it takes an express provision, changing or repealing existing law, before such existing law can be changed.

Congressional salaries are now fixed by legislative enactment. They remain just what they now are until they are changed by legislative enactment. This Borah amendment does not legislatively provide any decrease whatever in such salaries as they now exist.

If we should pass this Borah amendment, any Senator or any Representative in Congress would have a valid claim against this Government for the full basic salary now provided for him by law.

Hence, if we can reach some kind of an agreement that will send this bill to conference, such as the Taber amendment we are to vote on, that will maintain the salary cuts that the President has indicated he will require and will secure just benefits for both our Spanish-American and World War veterans, that will be approved by the President,

then none of us need let the Borah amendment stand in our way in accomplishing that end, because it is a joker and does not decrease congressional salaries.

Erroneous statements have appeared in the press to the effect that any Member voting against the Borah amendment would be voting to raise his own salary. That is not true. Attempts have been made here today by the gentleman from Minnesota [Mr. SHOEMAKER], and others, to get the assertion in the RECORD indicating that a vote against the Borah amendment would be a vote to raise Members' salaries. That is a mistaken idea. That is an incorrect position. That is not the fact. So, if otherwise, the Taber amendment is the best that we can get for the veterans and the country, we can support it notwithstanding it strikes out the Borah amendment, because no basic congressional salary would be decreased by the Borah amendment.

Now, I want to discuss the Senate amendment that restores retired pay for life to emergency officers who have been declared to possess no service-connected disability.

Every emergency retired officer who was disabled as much as 30 percent in the service has been put back on the retired roll and is now drawing retired pay. There are 1,518 of such officers drawing retired pay this very moment.

When they first came here in 1928 and asked our friend from Massachusetts [Mr. CONNERY] to pass that bill for them—and he did—they said there were only 900 of them who would come within the provisions of that law. Later they got up as high as 1,500. Our good friend from Massachusetts in his earnest way, and he is always earnest, passed their bill for them putting them on the roll, and instead of there being 900 of them, or 1,500 as are now back on the roll, there were 6,300 of them who got retired through scratching each other's backs, and drew several thousand dollars each before we passed a law that dropped 4,800 of them from the pay roll.

Dr. Jo Marvin Ferguson got his $150 retired pay per month plus his $6,500 salary, and a big colonel in South Boston draws $281.25 per month, and General Wilson in Nobleton draws $375 per month, and Mr. Greeley, of East Milton, draws $471.96 a month. There is a big Dr. Lloyd E. Dyer down in Greenville, Tenn., on the retired list at $566.67 a month, and they are among the 4,800 who have been dropped and who were not disabled from service.

General Hines in his testimony before the Military Affairs Committee said several thousand were frauds and ought to be put off the roll. Under the act we passed known as "Public Act No. 2", over 4,800 of them were dropped from the roll. We must kill this Senate amendment which seeks to put them back on the pay roll for life at big monthly pay.

We proved by General Hines that some of them were drawing four different payments. Some of them were getting salaries of $6,500, even $7,500, and up to $8,000 a year. Then they were getting retired pay of about $250 or $300 more. Then they got another pay, for active service when these emergency officers were sent to camp.

In addition, there was doctor after doctor who, in addition to their monthly retired pay and salary and pay for active service, after office hours had an office down town and a rich clientele coming to them, for whom he prescribed and received extra remuneration in medical fees.

We stopped that. This Senate amendment ought to go out of the bill.

Among our emergency officers are some of the finest men in the service; brave officers, who led their men in battle. They never demanded much from the Government. But many of these officers we have dropped never smelt gunpowder; they never heard gunfire. Some never saw a German enemy. It is these men who are clamoring the most to get back on the pay roll.

Mr. CONNERY. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CONNERY. The gentleman referred to Dr. Ferguson, who got $6,500 salary a year, and he cannot get back on the roll.

Mr. BLANTON. Oh, the gentleman does not know the ingenuity of these men.

Mr. CONNERY. If he can get by he is a corker.

Mr. BLANTON. He can get by if we pass this Senate amendment. Let us keep them off. [Applause.]

[Here the gavel fell.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota [Mr. KVALE].

Mr. KVALE. Mr. Chairman, I think the RECORD should show that all of us—and certainly I am personally—are deeply grateful to the gentleman from Texas [Mr. BLANTON] for doing the constructive work he has done in reducing this list of undeserving retired officers on the pension rolls, but I think this RECORD should show that many deserving cases have been stricken from the rolls.

I say deliberately that I can show the gentleman from Texas name after name of deserving officers who have been stricken from these rolls because of that causative provision which is written into the regulations, which is inconsistent with the law, drastic as it was, which passed Congress.

I can show the gentleman from Texas, for instance, an officer who has been denied retirement for total deafness, because he could not show which particular concussion of which certain shell caused the deafness which resulted in his disability at the present time. I wish I had an hour to talk on this subject instead of 1 minute.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WOODRUM. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. HOEPPEL].

Mr. HOEPPEL. Mr. Chairman, during the World War there were three classes of emergency officers, Army, Navy, and Marine Corps. The emergency Marine Corps and the temporary Navy officers, regardless of their disability, and regardless of how their disabilities were incurred, if incurred in the line of their duty, were retired in 1920 and are still on the retired list. The Army emergency officers were not placed on the retired list until 1928, notwithstanding that a large number of them are totally disabled with tuberculosis. Others have been removed from the emergency officers' list, because they cannot prove the causative factor. The Senate amendment pertaining to emergency officers should be retained in this bill, otherwise you are discriminating against worthy emergency Army officers, as compared with the temporary officers of the Navy and the Marine Corps.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. DOWELL].

Mr. DOWELL. Mr. Chairman, I am in favor of the Senate amendment as it came from the Senate. We have heard suggested a number of amendments to be offered. These amendments have for their purpose the reducing of the pensions and compensation of Spanish-American War veterans and World War veterans. I listened for some time to the gentleman from New York [Mr. TABER], who has a number of amendments here, to reduce the compensation and pensions. I hope the House will vote against all these amendments and accept the Senate amendment just as it came to the House.

The veterans are entitled to these benefits and many of these veterans are greatly in need of assistance at this time, and are looking to Congress to restore a part, at least, of the benefits taken away from them by the Economy Act, and I am hoping Congress will not fail them today.

In this debate, reference has been made to the Borah amendment. This amendment is a part of and is included in the Senate amendment under consideration. This amendment restores the pay of Government employees receiving a salary of not to exceed $6,000 per annum, and does not restore the pay to employees receiving $6,000 or more, and therefore does not return the pay to Members of Congress. Some have suggested that this amendment should be stricken out.

In striking this out you would be returning the pay of all Government employees drawing a salary of over $6,000, and, therefore, in effect would be restoring the pay to Members of Congress. This should not be done. This amendment

should remain in the bill. It seems to me that the gentlemen cannot argue that we should cut the compensation from the World War veterans, cut the pension from the Spanish-American War veterans, and in the same vote in effect raise the salaries of Members of Congress. I trust this will not be done.

While the Senate amendment carries a number of sections, it is, in fact, one amendment. I want to emphasize, if I can, the statement made by the gentleman from Massachusetts [Mr. CONNERY], who so ably pleaded for the return of the veterans' benefits by the concurrence in the Senate amendment, and who urged that this amendment should be accepted as it came from the Senate and not in any way amended. May I add that if the House makes any changes in the Senate amendment it will throw the entire matter into conference. Therefore, I want to urge that all Members of the House who want to restore these benefits to the Spanish War veterans and the World War veterans to vote down all these amendments and adopt the Senate amendment as it came to the House.

I hope the House will concur in the Senate amendment and restore these benefits to all these veterans and their dependents, to which they are justly entitled and which they so greatly need.

Mr. WOODRUM. Mr. Chairman, will the gentleman yield?

Mr. DOWELL. My time has expired.

Mr. WOODRUM. Mr. Chairman, I yield 1 minute to the gentleman from Oregon [Mr. MARTIN].

Mr. MARTIN of Oregon. Mr. Chairman, I voted to send this bill to conference where I think it belongs, and where I think many of the objectionable features in the bill would have been taken out. It is my opinion that the conferees in connection with the advice of the President would bring us back a bill here that he would approve and that would go through this House. You have seen fit to do otherwise, to legislate on the floor, and I have to take all of the objectionable stuff—and there is much objectionable stuff—in the bill—along with the good. I am going to be consistent. I am going to vote straight yeas all the way down the line. I am not going to make any exceptions. I am not going to fuss around here even about increasing our own salaries—which I think we should not do.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. BLANCHARD].

Mr. BLANCHARD. Mr. Chairman, I desire to direct a question to the gentleman from Virginia [Mr. WOODRUM] in order that we may clear up, if possible, the parliamentary situation with reference to this bill, in the event we adopt some amendments in the House. Ordinarily I do not have any difficulty in determining how I should vote, but a suggestion has been made which leaves me in doubt. I would like to ask the gentleman from Virginia [Mr. WOODRUM], in the event we adopt an amendment to the section pertaining to veterans' benefits, and the bill then goes back to the Senate, and then to conference, if the House conferees would not consider the vote in the House as tantamount to an instruction?

Mr. WOODRUM. I will say to the gentleman, if an amendment is adopted to section 22 and it goes back to the Senate and the Senate agrees to that amendment, of course that is the end of it.

Mr. BLANCHARD. What happens in the event the Senate disagrees?

Mr. WOODRUM. In the event the Senate disagrees, it throws the whole thing back into conference.

Mr. FISH. Will the gentleman yield?

Mr. BLANCHARD. I yield.

Mr. FISH. But would not the gentleman from Virginia, as a conferee, take that as a mandate of this House, as an expression of the opinion of the House, at least, and stand by the House against the Senate?

Mr. WOODRUM. I will say to the gentleman from New York [Mr. FISH], when the House is laboring as it is laboring now, in such an unintelligent fashion, under an unintelligent, unworkable gag rule as we are imposing upon ourselves now, I do not believe it would be possible for anybody to get an intelligent instruction out of what is going on here.

Mr. BLANCHARD. I do not care to yield any further. Let me make this statement, that certainly if I were a member of the conference committee, dealing with a question that had been passed upon by this House, I would consider a vote as tantamount to an instruction, and if it be interpreted by the members of the committee who may be serving as conferees that they would not be bound by a vote in this House, in the event we were to amend this amendment, then I want to say that I know how I am going to vote. I am going down the line so that there may be no mistake about what will happen when this bill goes back to the Senate. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield 2 minutes to the gentlewoman from Arizona [Mrs. GREENWAY].

Mrs. GREENWAY. Mr. Chairman, I do not anticipate being very constructive, but I would like to say what I think a good many people on both sides of the House feel today. I think we want to do the right thing, and I do not think anything was ever said less true than that it is easy to see the way of right.

Some of us know the condition of the Spanish War veterans. Much that has been said has been just and has only proved further the difficulty of finding the right line; but many of the Spanish War veterans are old and infirm through age and have builded their lives on what they have received these many years and are today trying to live on $6 a month in their old age. The presumptive cases that have not been taken back are ill and suffering.

Our own salaries should not be mixed up in this bill, but I have voted against sending this to conference because I mistrust a conference, in face of the need and suffering that now exists. [Applause.] I have long ago abandoned in this week the faintest hope of a vote on my part that I might be proud of. I feel we are faced with a maze of complications, and I think our complications have only begun. I shall vote to help those that I know are suffering, and I would like to say that if this week of agitation comes to naught, I, for one, am ready to start in at the bottom once again in behalf of the veteran. [Applause.]

Mr. WIGGLESWORTH. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Chairman, the gentleman from Massachusetts yielded to me that I might ask a question of the gentleman from Virginia [Mr. WOODRUM]. I have the highest regard, personally and politically, and I think everybody has, for the gentleman from Virginia. The gentleman will be a conferee. No matter whether he is for or against these gag rules, that is something of the past. We are trying to legislate in an orderly way. I am confident the gentleman, knowing the gentleman as I do, will carry out the will of this House when it is registered on any amendment it votes upon, in conference. I ask the gentleman if that is not a correct statement, coming from this side and from a friend of the gentleman from Virginia?

Mr. WOODRUM. Now, Mr. Chairman, the gentleman is a little belated in showing his vast confidence in the gentleman from Virginia as a conferee. [Laughter.] I have begged and pleaded with the gentleman and with my other colleagues to let the bill go to conference, that the conferees might work order out of chaos, and I think the gentleman from New York [Mr. FISH] today voted against the rule to permit us to do that.

Mr. FISH. Oh, I did.

Mr. WOODRUM. Now, we will cross the bridge when we get to it, I will say to the gentleman.

Mr. FISH. I am asking the gentleman. I have the floor and I am asking the gentleman if he will not carry out the will of the House. It is his duty to do so. I am confident he will, in spite of himself.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. BOILEAU].

Mr. BOILEAU. Mr. Chairman, it seems very clear from the statement of the gentleman from Virginia that if we were to amend Senate amendment 14 or 22, that the gentleman from Virginia, as one of the conferees, would not consider himself bound by the action of the House. In my opinion, if we were to put any amendment whatsoever onto either Senate amendment 14 or 22, it would have the effect with reference to these two subject matters of throwing them wide open in conference. The gentleman from Virginia has made this very clear.

If we are to be consistent in our action, we must vote down all amendments to Senate amendments 14 and 22 in order to be consistent with the vote earlier this afternoon. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. MCFARLANE].

Mr. McFARLANE. Mr. Chairman, the Members who have listened earnestly to the debate pro and con on these questions today know that about everything that could be said on it has been said. Let me review a little for you the different parts of that discussion.

In the beginning let me call attention to the fact that you will not find in the Democratic platform any provision calling for any cut of any kind for the veterans of the World War. The only economy plank in the platform states that governmental expenses shall be cut—

> By abolishing useless commissions and offices, consolidating departments and bureaus, and eliminating extravagance to accomplish a saving of not less than 25 percent * * *—

in the different governmental bureaus. Not a speaker in the last campaign was allowed to take the platform anywhere and say that the veterans of any war would be cut any amount.

We voted this afternoon on the Federal pay cut. We voted to restore it on a 5-5 basis, recognizing the proposition that 10 percent return is fair and reasonable. If it is fair, and just, and reasonable for the Federal employees, why should not the same principle and policy apply to the Spanish-American War veterans? Why should not the same policy apply to veterans of other wars? Can we go back to our districts and justify a greater cut?

We have heard the argument made that a 25-percent cut ought to be made upon the Spanish War veterans. There is not a Member here who does not know that many thousand service-connected cases have been cut off the rolls completely under the provisions of the so-called "Economy Act of March 20, 1933." The Senate amendments do not place many thousands of these veterans back on the rolls; and as the gentleman from Massachusetts [Mr. CONNERY] has well said, it seems that the principal point of the argument is based upon the emergency officers' amendment. It is good politics, perhaps, to attack at the weakest link, and that has been done, but let me say again that I believe the arguments advanced in support of Mr. CONNERY's amendment are unrefuted and unanswerable. As contained in the bill the emergency officers' amendment is fair. It says that the emergency officers who suffered service-connected disabilities, or diseases incurred or aggravated in line of duty, and whose disease or injury or aggravation of disease or injury was at any time during his service made a matter of record by competent military or naval authorities, should be treated on the same basis as the veterans of any other war; yet the argument is made that they must be stricken off the rolls. It seems as though some gentlemen are allowing their prejudices to run away with them. Look into your own hearts and see if you are being fair to those men who offered their all for their country and who led their companies during the war. They were not officers for any other reason in the world than bravery and intelligence; and they were not educated at Government expense.

Mr. TAYLOR of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. McFARLANE. I yield.

Mr. TAYLOR of South Carolina. Can the gentleman assign any possible reason why there should be any difference in the treatment of a private and an emergency officer for injuries sustained during the war?

Mr. McFARLANE. Yes; for the reasons just given; and the principal reason that is being given here this afternoon by many is that there are fewer voters among the emergency officers than there are among the privates.

Mr. KVALE. Mr. Chairman, will the gentleman yield?

Mr. McFARLANE. I yield.

Mr. KVALE. As long as we have a system whereby officers retired for disability or age are paid at a higher rate than enlisted men, is it fair to compare one class of officers with enlisted men and not all the other classes of officers with enlisted men?

Mr. McFARLANE. No, sir; we should treat all alike. I thank the gentleman for his contribution.

Mr. Chairman, we cannot get away from the proposition that it is unfair discrimination against the emergency officers of the Regular Army when we have already given this relief to emergency officers in the Marine Corps and in the Navy. Why can we not be fair about it?

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. McFARLANE. Certainly.

Mr. BLANTON. My colleague was not here during the war, when we made a similar fight on this floor to allow the widow of a private the same $10,000 war-risk insurance that the widow of a high officer received.

Mr. McFARLANE. No; I was in the service during the World War, and fully realize the great sacrifices and hardships these men suffered. I entered the service as a buck private.

Mr. BLANTON. I admire and commend my colleague for being in the service. I would have been there with him, had not the President of the United States, who was our Commander in Chief, directed me to help him here. To show that I had such orders, I quote the following:

> WASHINGTON, D.C., *May 22, 1917.*
>
> To the PRESIDENT OF THE UNITED STATES.
>
> MY DEAR MR. PRESIDENT: If I can be used at the front, I stand ready to serve my country. When the question was before the House I voted to increase the maximum age limit to 45, so that I would be included. I likewise voted to subject Members of Congress to the selective draft, in order that I would not be excluded. I am willing to waive my age and position.
>
> My father enlisted as a Confederate soldier at the age of 16. My great-grandfather, William Walker, of Cumberland County, Va., had the privilege of fighting for his country in the Revolution. My mother's uncle, James Monroe Hill, was a veteran of San Jacinto. My oldest son is not 17, but will be ready to respond when the call of his country makes it necessary.
>
> I stand ready to obey your orders, should my services be needed and you should see fit to call on me.
>
> With much respect, I remain, very sincerely yours,
>
> THOMAS L. BLANTON.

I received the following reply:

> THE WHITE HOUSE,
> *Washington, May 23, 1917.*
>
> Hon. THOMAS L. BLANTON,
> *House of Representatives.*
>
> MY DEAR MR. BLANTON: Your letter of May 22 does you great honor. I do not wonder that you feel as you do, and yet I want very earnestly to remind you that we are now engaged not merely in creating an army but also in mobilizing a nation to perform all its functions at the highest pitch of efficiency. Surely in such circumstances it is just as much a man's duty to stay at a post such as you have been assigned to by your constituents as it is for a man to volunteer for an army. I take that view of it with the greatest confidence.
>
> Cordially and sincerely yours,
>
> WOODROW WILSON.

While I labored here 16 hours per day helping my commander in mobilizing a nation to perform all of its functions at the highest pitch of efficiency, I want to say to my friend from Texas [Mr. MCFARLANE] that I then protected him as a buck private.

Mr. McFARLANE. I entered the service as a buck private.

Mr. BLANTON. They tried at that time in a bill drawn by officers to give to the widow of a buck private $1,500 insurance but to the widow of a high officer as much as $17,500; and I was one of those who helped to equalize them and pay them all alike, $10,000.

Mr. McFARLANE. The gentleman did right. I want to carry that same principle forward into this bill, I may

say to the gentleman from Texas, because it is right. I should like to see this Congress give more consideration to human rights. We have continued to authorize the issuance of tax-exempt securities that has caused the interest on the public debt to grow more than $1,000,000,000 annually, which benefits principally Wall Street. Last week we extended the law allowing the Federal Reserve banks to continue to use the Government credit at less than one half of 1 percent interest when no one else is given that right. All through our statutes are special privileged laws for the benefit of wealth. We have favored property rights too much; in this measure we have an opportunity to do justice to human rights. Will we do it? [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. JOHNSON], such time as he may desire.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I have been very much interested in all this discussion, as veterans' legislation is very near and dear to my heart. Particularly was I interested in the discussion of the able gentleman from Texas [Mr. MCFARLANE] and his statement that he wanted to treat all veterans alike. I agree with him as to that. But am just wondering if the gentleman feels that it would be fair to pay a general or colonel, for example, who never smelled powder during any war anywhere, but sat in a swivel chair here in Washington only 13 days, $300 to $400 a month and pay a buck private $30 a month? How does my friend from Texas reconcile that with his statement that all veterans should be treated alike?

Mr. MCFARLANE. If the gentleman yields, I will answer him.

Mr. JOHNSON of Oklahoma. I yield to the gentleman from Texas if he will answer my question.

Mr. MCFARLANE. There are a lot more buck privates voting. I grant you that is true.

Mr. JOHNSON of Oklahoma. Well, I will say to my genial friend from Texas, who evaded my question, that if there is any Member of this House who can smell votes any further than he can I confess I do not know who he could be. [Laughter.] But, seriously speaking, I feel sure than an overwhelming majority of the Members on both sides of this aisle have a sincere desire to see this Congress do something worthwhile for the disabled veterans, whether they be those of the Spanish War or World War veterans. I am not one of those who feel that any who disagree with me must be wrong, or that they are moved by selfish or insincere motives. The question in my mind at this moment is, What is the right thing to do and what would be fair and equitable to the disabled veterans of the Spanish War, as well as those of the World War? [Applause.]

Another question that faces Members here today is what is the practical thing to do. Certainly the House must make some changes in the Senate amendments if we are to receive any consideration whatever for our many needy and deserving veterans. Positive word comes from the White House that the bill will be vetoed in its present form. I do not believe the rank and file of our war veterans want a veto, and I am very hopeful that this bill can be worked out on this floor and in conference whereby it will be reasonably satisfactory to our disabled veterans and their dependents and at the same time escape a Presidential veto. In that respect I agree whole-heartedly in the suggestions made by the distinguished and able gentleman from Florida [Mr. PETERSON], who reminded us that most legislation is a matter of compromise. As a practical proposition, we are not doing the veterans any service to demand that the Senate amendments must not be changed by the dotting of an "i" or the crossing of a "t", when we know positively that they are objectionable in their present form to the President.

My distinguished and able friend from Massachusetts [Mr. CONNERY], with whom I usually agree, especially on veterans' legislation, speaks with much feeling and enthusiasm against gag rule, but in demanding that we accept the Senate amendments without any change whatever he would invoke the gag rule himself. Why not discuss these amendments on their merits and vote for or against them on their merits alone? The gentleman from Massachusetts a while ago gave us some statistics concerning the number of emergency officers that would come in under the Senate amendment. He quoted some so-called "leaders" of certain organizations as authority for his figures.

If my memory serves me correctly, some of these same gentlemen who gave out such alleged authentic statistics were here lobbying for the Emergency Officers' Retirement Act that passed Congress several years ago, just as they are back here now lobbying for the Senate amendments without any changes in order to get themselves back on a fat governmental pay roll. You may recall that we were assured by the same authority that no more than 700 or 800 emergency officers could possibly take advantage of the original Emergency Officers' Act, but the camel got its neck under the tent and the first thing we knew about 7,100 emergency officers had in some manner of back-slapping or back-scratching process, gotten themselves retired.

We saw the sorry spectacle of former officers who had never posed as being disabled prior to the passage of that act take advantage of it and get on the Government pay roll at from $100 to $400 a month. We saw some swivel chair heroes who never smelled powder nor saw the smoke of battle, but who sat at mahogany desks in Washington with as little as 13 days' service, manage to get themselves retired at from $200 to $400 a month. We saw generals who never had led an army, nor fired a gun, nor who ever were within 3,000 miles of the front lines get themselves retired at $416 a month. If you vote for the Senate amendment, you vote to place a large number of the generals, colonels, majors, and captains back on the pay roll. There seems to be some disagreement as to the number but that is not the question. Those of us who want to do something for the disabled veterans of both wars, who are really in need, do not wish to be hog tied to that provision of the Senate amendment which would put back on the pay roll emergency officers, many of whom are not in need and who should not, in my judgment, have any more consideration than is given the buck private who might have the same disabilities. [Applause.]

As I stated on the floor of this House last Monday, I am fully convinced that the American Legion's four-point bill is a sane, sensible program and ought to be passed by this Congress. But do not confuse the Senate amendments that we are considering today with the Legion's program. It is not the program of the American Legion. True, it contains part of the program and I am for that part of the Senate amendments. But neither the American Legion nor any other veterans' organization with which I am familiar is pledged to place back generals on the payroll at fabulous salaries, while the buck privates and their dependents are being practically ignored.

Another group of veterans that I am very anxious to see adequately cared for are the twenty-odd thousand presumptives. Especially am I interested in the tuberculars. Many of them are helpless and in dire distress; practically all of them are of service origin; but because they are in the class of presumptives they were cruelly and cold-bloodedly cut off under the harsh and unreasonable rules inaugurated by the Director of the Budget and the Veterans' Administration.

In closing, let me say I expect to vote to eliminate the emergency officers' provision; also, to vote for the amendment to restore 75 percent of the pay to Spanish War veterans. I feel that our Spanish War veterans would much prefer knowing they were sure to receive 75 percent of their former pay before the passage of the Economy Act than to have 90 or even 100 percent restored when they know it would face a Presidential veto.

This Congress must not adjourn without giving relief to our disabled war veterans. Let us not quibble over mere technicalities. Let us not wrangle over fanciful theories when we are face to face with terrible realities. As these men pressed forward for us when the zero hour came, let us show our appreciation here today. Let us do our solemn

duty now toward our disabled and needy veterans, just as they performed their duty so heroically when the dark clouds of war hung heavily over this land. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Mr. Chairman, we are all anxious to do something for the Federal employees and for the veterans, but I feel that our zeal has taken possession of our better judgment. I do not believe there is a single gentlewoman or gentleman in this House who is not anxious to do something for the men whom I mentioned. Let us examine what has transpired here today. You will remember for the last few days many of us wanted this bill sent to conference. We were told: "No; do not send it to conference, you will gag this House; you will not get a chance to vote on the amendments. We want a full and free discussion." That was the cry. Today when we have the bill before us and we can discuss it freely we are told: "Do not cross a 't' and do not dot an 'i' or you will defeat the bill." That is supposed to be full and free discussion.

Anyone who has had any experience at all in legislative matters knows that all legislation is the result of compromise. There is not a law on the statute books of this country today but what was the result of long and serious conferences and concessions yielded by one to the other. If you are going to take the stand "I am positively right, you cannot make me concede anything; no matter what you say, I am right", no progress can be made, nothing can be accomplished. Are you going to give these veterans and employees a lot of lip service? Are you going to tell them, "I made a wonderful speech for you, I voted for you, and I put it over on them, but I could not bring home the bacon"? This course will not satisfy them.

The only way you are going to get results is by agreeing to concede, yield, and to compromise; otherwise you will not be able to bring home a nickel to a veteran in your district and you will not be able to get a dollar increase in salary for a single Federal employee. Are you going to give them lip service, or are you going to deliver to them the much-needed relief that they seek? It must be one or the other. [Applause.]

The CHAIRMAN. All time has expired. The Clerk will report the amendment.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with and that it be printed in full in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The Senate amendment is as follows:

SEC. 26. Notwithstanding any provision of law to the contrary, in no event shall the compensation being paid on March 19, 1933, under subsections (3) and (5) of section 202 of the World War Veterans' Act, 1924, as amended, to veterans for the loss of the use of both eyes, where such veterans were, except by fraud, mistake, or misrepresentation, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under the act entitled "An act to maintain the credit of the United States Government", approved March 20, 1933, pertaining to hospitalized cases.

SEC. 27. Where service connection for a disease, injury, or disability was on March 19, 1933, established in accordance with section 200 of the World War Veterans' Act, 1924, as amended, and such connection has been severed through the application of, or regulations or instructions promulgated under Public Law No. 2, Seventy-third Congress, or Public Law No. 78, Seventy-third Congress, service connection is hereby reestablished and as to such cases the provisions of the first paragraph of section 200 of the World War Veterans' Act, 1924, as amended, are hereby reenacted: *Provided*, That the provisions of this section shall not apply (1) to persons entering the active military or naval service subsequent to the date of November 11, 1918, (2) to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service, (3) to persons as to whose cases service connection was established by fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of material facts; and as to all such cases enumerated in this proviso, all reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government.

SEC. 28. The fourth paragraph of section 20, Public Law No. 78, Seventy-third Congress, is hereby amended to read as follows:

"Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, in no event shall the compensation being paid on March 19, 1933, for service-connected disabilities to those veterans who entered the active military or naval service on or before November 11, 1918, and whose disabilities are not the result of their own misconduct, where they were, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service; and in any review of the case of any veteran to whom compensation was being paid on March 19, 1933, for service-connected disability, reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government: *Provided further*, That notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, any veteran whose disease, injury, or disability was established on or after the date this paragraph as amended takes effect as service-connected under section 200 of the World War Veterans' Act, 1924, as amended, shall be entitled to receive compensation in accordance with the provisions of such act, as amended, and the rating schedule in effect on March 19, 1933: *Provided further*, That whenever there is a change in the degree of disability of any such veteran the amount of compensation to be paid shall be determined pursuant to the provisions of the World War Veterans' Act, 1924, as amended, and the rating schedule in effect on March 19, 1933, and such amount shall not be reduced or discontinued. In no event shall death compensation being paid, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, to widows, children, and dependent parents of deceased World War veterans under the World War Veterans' Act, 1924, as amended, on March 19, 1933, be reduced or discontinued, whether the death of the veteran on whose account compensation is being paid was directly or presumptively connected with service. In any case where a World War veteran dies or has died from disease or injury, and service connection for such disease or injury has been reestablished on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, or which would have been established under such section 200 had the veteran been living on March 19, 1933, and reestablished on or after the date this paragraph as amended takes effect, the surviving widow, child, or children and/or dependent parents shall be entitled to receive compensation at the rates prescribed in Veterans' Regulation No. 1 (a), part I, paragraph IV, and amendments thereto."

SEC. 29. Section 6 of Public Law No. 2, Seventy-third Congress, as amended by Public Law No. 78, Seventy-third Congress, is hereby amended by adding thereto the following proviso: "*Provided*, That any veteran of any war who was not dishonorably discharged, suffering from disability, disease, or defect, who is in need of hospitalization or domiciliary care, and is unable to defray the necessary expenses therefor (including transportation to and from the Veterans' Administration facility), shall be furnished necessary hospitalization or domiciliary care (including transportation) in any Veterans' Administration facility, within the limitations existing in such facilities, irrespective of whether the disability, disease, or defect was due to service. The statement under oath of the applicant on such form as may be prescribed by the Administrator of Veterans' Affairs shall be accepted as sufficient evidence of inability to defray necessary expenses."

SEC. 30. Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, no pension being paid on March 19, 1933, to any veteran of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, or to the widow and/or dependents of any such veteran, shall be reduced by more than 10 percent, except in accordance with the regulations issued pursuant to Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply (1) to persons to whom payments were being made on March 19, 1933, through fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of a material fact, except that decisions as to degree of disability rendered prior to March 20, 1933, shall be conclusive, or (2) to any person during any year following a year for which such person was not entitled to exemption from the payment of a Federal income tax.

All laws in effect on March 19, 1933, granting monetary benefits to veterans of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, are hereby reenacted in their entirety, and such laws shall be effective from and after the effective date of this act, subject to the limitations of this section and to such reduction in pensions as may be made hereunder.

SEC. 31. Section 10 of Public Law No. 2, Seventy-third Congress, approved March 20, 1933, is amended to read as follows:

"Notwithstanding the provisions of section 2 of this title, any person who served as an officer of the Army, Navy, or Marine Corps of the United States during the World War, other than as an officer of the Regular Army, Navy, or Marine Corps, and who (1) entered the active service between April 6, 1917, and November 11, 1918, (2) was honorably discharged therefrom, (3) made

valid application for retirement under the provisions of the Emergency Officers' Retirement Act of May 24, 1928 (U.S.C., supp. VI, title 38, secs. 581 and 582), and (4) prior to March 20, 1933, was granted retirement with pay, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, shall be entitled to continue to receive retirement pay at the monthly rate being paid him on March 19, 1933, if the disability for which he was retired directly resulted from the performance of military or naval duty; except that retirement pay under this section shall not be denied to any person who was receiving on March 19, 1933, retirement pay under such act of May 24, 1928, on account of disease or injury incurred or aggravated in line of duty, and whose disease or injury or aggravation of disease or injury was at any time during his service made a matter of record by competent military or naval authorities, if such person is otherwise qualified under clauses 1 to 4, both inclusive, of this section: *Provided*, That nothing in this section as amended shall be construed so as to prejudice or destroy any rights of appeal, or any monetary benefits payable because of any such appeal, heretofore conferred upon retired emergency officers by this act and regulations issued pursuant thereto."

SEC. 32. Where any veteran suffers or has suffered an injury, or an aggravation of any existing injury, as the result of training, hospitalization, or medical or surgical treatment, awarded him under any of the laws granting monetary or other benefits to World War veterans, or as the result of having submitted to examination under authority of the War Risk Insurance Act or the World War Veterans' Act, 1924, as amended, and not the result of his misconduct, and such injury or aggravation results in additional disability to or the death of such veteran, the benefits of Public Law No. 2, of Public Law No. 78, and of this title shall be awarded in the same manner as if such disability, aggravation, or death were service connected within the meaning of such laws; except that no benefits under this section shall be awarded unless application be made therefor within two years after such injury or aggravation was suffered, or such death occurred, or after the passage of this act, whichever is the later date. The benefits of this section shall be in lieu of the benefits under the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes", approved September 7, 1916, as amended.

SEC. 33. The last sentence of section 9 of Public Law No. 2, Seventy-third Congress, is hereby repealed.

SEC. 34. Service-connected money benefits payable to World War veterans under this title and Public Law No. 2, Seventy-third Congress, shall be entitled "compensation" and not "pension."

SEC. 35. This title shall take effect on the date of enactment of this act, and no payments of any benefits conferred under the provisions of this title shall be made for any period prior to such date.

SEC. 36. Notwithstanding the provisions of any law or regulation issued pursuant to authority of law, in any case where a veteran of the World War has been adjudged for insurance purposes by any court of competent jurisdiction to be totally and permanently disabled as the result of disease or injury, or the aggravation of a disease or injury, incurred in the active military or naval service, such veteran shall be rated for the purpose of payment of pension, compensation, or retirement pay not less than totally and permanently disabled.

SEC. 37. That notwithstanding the provisions of section 17 of title I of an act entitled "An act to maintain the credit of the United States Government", approved March 20, 1933, and section 20 of an act entitled "An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes", approved June 16, 1933, any claim for yearly renewable term insurance under the provisions of laws repealed by said section 17, wherein claim was duly filed prior to March 20, 1933, and on which maturity of the insurance contract had been determined by the Veterans' Administration prior to March 20, 1933, and where payments could not be made because of the provisions of the act of March 20, 1933, or under the provisions of the act of June 16, 1933, may be adjudicated by the Veterans' Administration, and any person found entitled to yearly renewable term insurance benefits claimed shall be paid such benefits in accordance with and in the amounts provided by such prior laws.

SEC. 38. In the case of widows and dependents of officers and enlisted men of the Army, Navy, or Marine Corps, who served on the airships *Shenandoah*, *Akron*, and *J-3*, and who died in the accidents resulting in the destruction of such airships in April 1933, the amount of pension allowed shall be double that authorized by law or regulation of the President to be paid in cases where death results from an injury received or disease contracted in line of duty not the result of an aviation accident.

SEC. 39. That no part of the appropriation carried in this act, or any other general appropriation bill for the fiscal year ending June 30, 1935, shall be used in payment, in excess of 85 percent of any salary or compensation of any officer or employee of the Government (except judicial officers) where such salary or compensation is in excess of $6,000.

Mr. WOODRUM. Mr. Chairman, I move to disagree with Senate amendment no. 22, and to agree to the conference asked for by the Senate, and on that motion I ask recognition.

Mr. Chairman, if this motion I have offered carries, section 22 will go to conference. I confess that I am not very optimistic about the motion carrying, but may I say that it seems to me our proceedings this afternoon pretty clearly demonstrated the desirability of permitting the chosen Representatives of this House, whoever they may be, to get around a table in conference where all these various complex and sometimes unrelated matters may be laid out on the table and discussed and some sort of intelligent and orderly decision reached? So far as I am concerned, I have previously stated to the House that I wanted to see some additional benefits given Spanish War veterans and World War veterans and Federal employees. At the same time, Mr. Chairman, I very profoundly respect the right and the opinion of the Chief Executive of this Nation in trying to lead us out of this depression. [Applause.]

There are three separate and distinct parties to this unfortunate situation, the House of Representatives, the Senate, and the Chief Executive. I fancy there is not a great deal of difference of purpose in any of them. This being the case I still believe that if the committee would adopt the amendment I have offered and let this bill go to conference, the conferees of the House could yet bring back a bill that would have substantial benefits for the veterans, for the Federal employees, and at the same time maintain the position and be in accordance with the program of our Chief Executive. Perhaps the bill would not suit everybody in every respect.

For these reasons, I shall continue to vote against all amendments, hoping against hope that the bill will yet go to conference and that yet there may be an opportunity to work out of this unfortunate situation a piece of legislation that may be enacted into law.

Mr. CONNERY. Mr. Chairman, I rise in opposition to the motion.

Mr. TABER. Mr. Chairman, I have a preferential motion to recede and concur with an amendment.

The CHAIRMAN. The Chair will first recognize the gentleman from Massachusetts [Mr. CONNERY] in opposition to the pending motion.

Mr. CONNERY. Mr. Chairman, I simply rise at this time to say that after the gentleman from New York is recognized to offer his preferential motion to recede and concur with an amendment, I shall offer a motion to concur in Senate amendment no. 22.

Mr. TABER. Mr. Chairman, I move to recede and concur in Senate amendment no. 22 with an amendment.

Mr. COCHRAN of Missouri. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COCHRAN of Missouri. Is it now in order to offer a substitute for the gentleman's motion?

The CHAIRMAN. After the motion is reported the gentleman may offer his substitute.

The Clerk read as follows:

Mr. TABER moves to concur in Senate amendment no. 22 with an amendment as follows: In lieu of the matter proposed by the Senate amendment insert:

"TITLE III—VETERANS' PROVISIONS

"SEC. 26. Notwithstanding any provision of law to the contrary, in no event shall the compensation being paid on March 19, 1933, under subsections (3) and (5) of section 202 of the World War Veterans' Act, 1924, as amended, to veterans for the loss of the use of both eyes, where such veterans were, except by fraud, mistake, or misrepresentation, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under the act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, pertaining to hospitalized cases.

"SEC. 27. Where service connection for a disease, injury, or disability not caused by his own willful misconduct was on March 19, 1933, established in accordance with section 200 of the World War Veterans' Act, 1924, as amended, and such connection has been severed through the application of, or regulations or instructions promulgated under Public Law No. 2, Seventy-third Congress, or Public Law No. 78, Seventy-third Congress, service connection is hereby reestablished and as to such cases the provisions of the first paragraph of section 200 of the World

War Veterans' Act, 1924, as amended, are hereby reenacted: *Provided*, That the provisions of this section shall not apply (1) to persons entering the active military or naval service subsequent to the date of November 11, 1918, (2) to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service, (3) to persons as to whose cases service connection was established by fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of material facts; and as to all such cases enumerated in this proviso, all reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government: *Provided*, That the rate to be paid to anyone under this section shall be 75 percent of the amount received by him on March 19, 1933

"SEC. 28. The fourth paragraph of section 20, Public Law No. 78, Seventy-third Congress, is hereby amended to read as follows:

"'Notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, in no event shall the compensation being paid on March 19, 1933, for service-connected disabilities to those veterans who entered the active military or naval service on or before November 11, 1918, and whose disabilities are not the result of their own misconduct, where they were, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, in receipt of compensation on March 19, 1933, be reduced or discontinued, except in accordance with the regulations issued under Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases: *Provided*, That the provisions of this section shall not apply to persons as to whom clear and unmistakable evidence discloses that the disease, injury, or disability had inception before or after the period of active military or naval service, unless such disease, injury, or disability is shown to have been aggravated during service; and in any review of the case of any veteran to whom compensation was being paid on March 19, 1933, for service-connected disability, reasonable doubts shall be resolved in favor of the veteran, the burden of proof being on the Government: *Provided further*, That notwithstanding any of the provisions of Public Law No. 2, Seventy-third Congress, any veteran whose disease, injury, or disability was established on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, shall be entitled to receive compensation in accordance with the provisions of such act, as amended, and the rating schedule in effect on March 19, 1933: *Provided further*, That whenever there is a change in the degree of disability of any such veteran the amount of compensation to be paid shall be determined pursuant to the provisions of the World War Veterans' Act, 1924, as amended, and the rating schedule in effect on March 19, 1933, and such amount shall not be reduced or discontinued. In no event shall death compensation being paid, except by fraud, misrepresentation of a material fact, or unmistakable error as to conclusions of fact or law, to widows, children, and dependent parents of deceased World War veterans under the World War Veterans' Act, 1924, as amended, on March 19, 1933, be reduced or discontinued, whether the death of the veteran on whose account compensation is being paid was directly or presumptably connected with service. In any case where a World War veteran dies or has died from disease or injury, and service connection for such disease or injury has been reestablished on or after the date this paragraph as amended takes effect as service connected under section 200 of the World War Veterans' Act, 1924, as amended, or which would have been established under such section 200 had the veteran been living on March 19, 1933, and reestablished on or after the date this paragraph as amended takes effect, the surviving widow, child, or children and/or dependent parents shall be entitled to receive compensation at the rates prescribed in Veterans' Regulation No. 1 (a), part I, paragraph IV, and amendments thereto.'

"SEC. 29. Section 6 of Public Law No. 2, Seventy-third Congress, as amended by Public Law No. 78, Seventy-third Congress, is hereby amended by adding thereto the following proviso: '*Provided*, That any veteran of any war who was not dishonorably discharged, suffering from disability, disease, or defect, who is in need of hospitalization or domiciliary care, and is unable to defray the necessary expenses therefor (including transportation to and from the Veterans' Administration facility), shall be furnished necessary hospitalization or domiciliary care (including transportation) in any Veterans' Administration facility, within the limitations existing in such facilities, irrespective of whether the disability, disease, or defect was due to service. The statement under oath of the applicant on such form as may be prescribed by the Administrator of Veterans' Affairs shall be accepted as sufficient evidence of inability to defray necessary expenses.'

"SEC. 30 Notwithstanding any of the provisions of Public Law No 2, Seventy-third Congress, no pension being paid on March 19, 1933, to any veteran of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, or to the widow and/or dependents of any such veteran, shall be reduced by more than 25 percent, except in accordance with the regulations issued pursuant to Public Law No. 2, Seventy-third Congress, pertaining to hospitalized cases, and except where his disability is the result of his own willful misconduct: *Provided*, That the provisions of this section shall not apply (1) to persons to whom payments were being made on March 19, 1933, through fraud, clear or unmistakable error as to conclusions of fact or law, or misrepresentation of a material fact, except that decisions as to degree of disability rendered prior to March 20, 1933, shall be conclusive, or (2) to any person during any year following a year for which such person was not entitled to exemption from the payment of a Federal income tax: *Provided, however*, That a veteran in Federal employ shall not receive more than $6 per month if his salary, if single, exceeds $1,000, and if married $2,500: *Provided further*, That this section shall not apply to any person who enlisted after August 12, 1898, and who did not serve in either the Boxer rebellion or the Philippine insurrection.

"All laws in effect on March 19, 1933, granting monetary benefits to veterans of the Spanish-American War, including the Boxer rebellion and the Philippine insurrection, are hereby reenacted in their entirety, and such laws shall be effective from and after the effective date of this act, subject to the limitations of this section and to such reduction in pensions as may be made hereunder.

"SEC. 31. Where any veteran suffers or has suffered an injury, or an aggravation of any existing injury, as the result of training, hospitalization, or medical or surgical treatment, awarded him under any of the laws granting monetary or other benefits to World War veterans, or as the result of having submitted to examination under authority of the War Risk Insurance Act or the World War Veterans' Act, 1924, as amended, and not the result of his misconduct, and such injury or aggravation results in additional disability to or the death of such veteran, the benefits of Public Law No. 2, of Public Law No. 78, and of this title shall be awarded in the same manner as if such disability, aggravation, or death were service connected within the meaning of such laws; except that no benefits under this section shall be awarded unless application be made therefor within 2 years after such injury or aggravation was suffered, or such death occurred, or after the passage of this act, whichever is the later date. The benefits of this section shall be in lieu of the benefits under the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes', approved September 7, 1916, as amended.

"SEC. 32. The last sentence of section 9 of Public Law No. 2, Seventy-third Congress, is hereby repealed.

"SEC. 33. Service-connected money benefits payable to World War veterans under this title and Public Law No. 2, Seventy-third Congress, shall be entitled 'compensation' and not 'pension.'

"SEC. 34. This title shall take effect on the date of enactment of this act, and no payments of any benefits conferred under the provisions of this title shall be made for any period prior to such date.

"SEC. 35. That notwithstanding the provisions of section 17 of title I of an act entitled 'An act to maintain the credit of the United States Government', approved March 20, 1933, and section 20 of an act entitled 'An act making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes', approved June 16, 1933, any claim for yearly renewable term insurance under the provisions of laws repealed by said section 17, wherein claim was duly filed prior to March 20, 1933, and on which maturity of the insurance contract had been determined by the Veterans' Administration prior to March 20, 1933, and where payments could not be made because of the provisions of the act of March 20, 1933, or under the provisions of the act of June 16, 1933, may be adjudicated by the Veterans' Administration, and any person found entitled to yearly renewable term insurance benefits claimed shall be paid such benefits in accordance with and in the amounts provided by such prior laws."

Mr. WOODRUM. Mr. Chairman, I know the subject matter of the amendment. The amendment is very long and voluminous and I wonder if the Committee would not get a clearer understanding of the amendment and save time if the gentleman would explain his amendment without having it read.

Mr. TABER. Frankly, I think that is correct.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with and that the amendment be printed in the RECORD, and that the gentleman from New York proceed to explain the amendment to the Committee.

Mr. LEHLBACH. Mr. Chairman, reserving the right to object, we do not know what is in the amendment; and printing it in the RECORD tomorrow morning, if we are going to vote tonight, is not going to help us any.

Mr. TABER. If the gentleman will reserve his objection and permit me to go ahead and make my statement, perhaps he would be willing to waive the reading now.

Mr. LEHLBACH. Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. TABER. Mr. Chairman, I have offered an amendment which I hope will solve this problem. I have offered it, not representing exactly my own ideas but trying to work

out something that I hope may be accepted at the other end of the Avenue and at the same time take care of the situations which really ought to be taken care of.

If the Members have their bills before them, I will tell them what this amendment proposes.

Section 26 I have left as it was in the Senate amendment.

In section 27 I have inserted in line 10, after the word "disability", the words "not caused by his own willful misconduct", and I have limited the operations of section 27 to 75 percent of the amounts that the presumptive cases would be getting, because I believe this would come nearer providing something that might be approved.

Section 28 I have left as it stands now. This already prevents payments in case of misconduct.

Section 29, providing for hospitalization, I have left as it was.

In section 30, page 45, line 16, I have increased the figure by which the Spanish War pensions might be reduced from 10 percent to 25 percent, and I have added after the word "cases", in line 19, "and except where his disability is the result of his own willful misconduct." I have added another provision at the top of page 46, which provides that where a veteran is in the employ of the Government and is receiving $1,000 if single or $2,500 if married, he shall not receive more than $6 per month; and also another provision providing that if he entered the war after the date of the termination of the Spanish War, which I think is August 13, and did not serve in either the Philippine insurrection or the Boxer rebellion, he is not entitled to the benefits of this section.

Section 31, with reference to emergency officers, I have stricken out.

Section 32 I have left in, however, renumbering the sections.

Section 33 I have left in and section 34 has been left in, as well as section 35.

Section 36 has been left out. This is an item which I understand really ought not to be there, because they ought not to go to court to determine the amount of their disability.

Section 37 has been left in and sections 38 and 39 left out.

Mr. MARTIN of Colorado. Will the gentleman yield?

Mr. TABER. I yield.

Mr. MARTIN of Colorado. If the gentleman is through explaining his amendment, I should like to ask him a question as to the effect of the amendment. If the House were to adopt the amendment and the Senate were to refuse to accept it, might not this result in throwing the entire veterans' amendment into conference?

Mr. TABER. It might or it might come back here for further action.

Mr. MARTIN of Colorado. But it might be thrown into conference?

Mr. TABER. And I would much rather have it thrown into conference with these limitations, with a range between which the conferees must operate, than to have it go to conference the other way, or to have it go over to the White House and come back here with a veto which would result in no action at all. [Applause.]

Mr. WHITTINGTON. Will the gentleman yield?

Mr. TABER. I yield.

Mr. WHITTINGTON. The amendment proposed by the gentleman, as I caught it, is substantially the Byrnes amendment, as it was carried in the bill as reported to the Senate and as it was presented in the Senate?

Mr. TABER. No.

Mr. WHITTINGTON. Wherein does the gentleman's amendment differ?

[Here the gavel fell.]

Mr. SNELL. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TABER. Answering the gentleman from Mississippi [Mr. WHITTINGTON], I may say there is this difference. There is a provision that veterans shall be rated according to the schedule that was in effect on the 19th of March 1933. This is in my amendment, and it was not in the Byrnes amendment.

Mr. PATMAN. Will the gentleman yield?

Mr. TABER. I yield.

Mr. PATMAN. The gentleman's amendment leaves in the Legion's three points for the service-connected disabled, hospitalization, the presumptives, and strikes out the retired emergency officers and the Borah amendment.

Mr. TABER. That is right.

Mr. BAILEY. Will the gentleman yield?

Mr. TABER. I yield.

Mr. BAILEY. Would the gentleman object also to including an amendment providing that any widow of a Spanish-American War veteran not remarried should be included.

Mr. TABER. I would accept such an amendment.

Mr. HASTINGS. Will the gentleman yield?

Mr. TABER. Yes.

Mr. HASTINGS. I did not understand in section 27 whether or not there is any reduction of the compensation to be paid to World War veterans. Is there any reduction?

Mr. TABER. Section 27 is the presumptive section, and that provides that they shall be paid at the rate of 75 percent.

Mr. HASTINGS. Where would that language come in?

Mr. TABER. At the end of section 27.

Mr. HASTINGS. Would the gentleman have any objection to having that limitation read by the Clerk?

Mr. TABER. No. I will ask the Clerk to read that, on page 42, line 7.

The Clerk read as follows:

Provided, That the rate to be paid to anyone under this section shall be 75 percent of the amount received by him on March 19, 1933.

Mr. FORD. Will the gentleman yield?

Mr. TABER. I will.

Mr. FORD. Is it the gentleman's judgment that this is the best that we can get for the veterans under the circumstances?

Mr. TABER. I think it is more than you will get in any other way. I may be wrong; it may be more than you can get, but it is absolutely the best under any circumstances.

Mr. McGUGIN. Will the gentleman yield?

Mr. TABER. I will yield to the gentleman from Kansas.

Mr. McGUGIN. Under the circumstances, in the light of the President's statement heretofore, we would scarcely expect him to accept the amendment as it came from the Senate.

Mr. TABER. That is my understanding, and I hope the House will not get the idea that amending this will destroy the bill. I am afraid your bill is destroyed if you do not amend it. [Applause.]

Mr. BAILEY. I should like to offer the amendment that I referred to.

Mr. TABER. Let it be read.

The Clerk read as follows:

Proposed amendment by Mr. BAILEY: Page 45, line 15, after the words "or to the widow", insert "as long as she remains unmarried."

Mr. PATMAN. Will the gentleman yield?

Mr. TABER. I yield to the gentleman from Texas.

Mr. PATMAN. Would the gentleman agree to this amendment?—

Page 44, line 5, after the word "service", strike out the period, insert a colon and the following: "*Provided further*, That a widow and other dependents of a World War veteran who was receiving compensation for a service-connected total disability at the time of his death, regardless of the cause of his death, shall receive the same death compensation as if the death was caused by said service-connected total disability."

I have in mind this case, where the wife of a veteran waited on him for 15 years—he lost his eyesight in battle. A street car killed him. The Government does not pay death compensation because his death was not due to the service-connected disability.

[Here the gavel fell.]

(Mr. TABER was given 5 minutes more.)

Mr. TABER. I am afraid that that amendment might complicate the situation. I should like to stand for that sort of thing if it were in a bill by itself.

Mr. PATMAN. Then if I ask unanimous consent, the gentleman will not object. Is that right?

Mr. TABER. I do not think we ought to put anything in the bill that broadens it beyond the action of the Senate. I am afraid that we are going to get into a situation where, if we do something like that, we will be in trouble, and I want to see the House adopt something that is going to become law.

Mr. PATMAN. Under the circumstances I shall not insist, since a point of order will probably be made against it; but I do expect to insist upon its adoption in a bill for that purpose.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. TABER. Yes.

Mr. SNELL. As I understand the gentleman's amendment, that is to a certain extent a compromise all along the line and it protects nearly every single thing that the American Legion has asked for in their four-point program.

Mr. TABER. Except that it puts the presumptives at 75 percent of what they received on March 19, 1933, and it is much better to do that, in my opinion, than to let the bill go by the boards and receive nothing.

Mr. SNELL. This is a general compromise that all parties might agree to.

Mr. TABER. It would seem to me that this is the only way that we can work it so as to have something that is a compromise and that admittedly is a compromise to put it through.

Mr. McGUGIN. Mr. Chairman, will the gentleman yield?

Mr. TABER. If I have the time.

The CHAIRMAN. The gentleman has 2 minutes remaining.

Mr. McGUGIN. Will the gentleman yield to me in order to put something into the RECORD in the form of a statement from the Spanish-American War veterans?

Mr. TABER. Yes.

Mr. McGUGIN. I want to read to the House what I believe to be the honest feeling of the Spanish-American War veterans in this country. Here is a sentence from one of the camps in my district:

> This camp is unanimous that you accept any reasonable compromise that will restore those to the rolls that have been taken off, and I believe Spanish War veterans of your district will approve of your support of anything that is fair and just.

Here is another:

> Any kind of a compromise to help these men get even a small increase in their pensions to where they might live would be greatly appreciated by thousands of needy veterans and their families, I am sure.

Here is another one, from the United Spanish War Veterans:

> Of course, we would like to receive our former pensions again, with a 10-percent cut as Civil War veterans are receiving; but if that cannot go through, then any reasonable amount on which veterans can exist will be acceptable to us, and we ask that you work to the end that our comrades can exist without going to the poorhouse or the grave.

Mr. BROWNING. Mr. Chairman and gentlemen of the Committee, I hope the Committee accepts this amendment of the gentleman from New York [Mr. TABER]. I believe that the Membership, especially on the Democratic side, know that this is exactly what I have been fighting for for some time. I believe, further than that, that we will have some chance to get it into a law, and that it is the maximum we can hope for. I do not believe that we could possibly get the Senate amendments as they are. I have assurance that these will be accepted at the other end of the Capitol in 5 minutes after they are presented. I should like to see it go through. There is some of this amendment that I would not support as an individual proposition, but I am anxious for that part of it that restores 29,000 presumptives at 75 percent of what they were receiving last March. I am interested in that part of it that restores the Spanish War men, who were in during the war period, to 75 percent of what they were receiving last March, and on those two propositions I think that the House would be amply justified in agreeing to this amendment offered by the gentleman from New York, and sending the bill to conference.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. BROWNING. Yes.

Mr. BRITTEN. The gentleman undoubtedly knows that an amendment had been prepared on the Democratic side of the aisle by a distinguished leader, which was almost word for word the amendment offered by the gentleman from New York [Mr. TABER], so that there should be a feeling on both sides of the aisle to accept this amendment now pending.

Mr. BROWNING. Not only that, but I drew one in my handwriting, and hold it here now, that is practically identical with this, without knowing that the gentleman from New York was going to submit it.

Mr. BRITTEN. And there is still another in existence, I understand.

Mr. BROWNING. But, as the gentleman from New York is a member of the committee, he had a prior right to offer the amendment. I cheerfully support it and I hope everybody in the House will vote for the amendment. If we could possibly get the Senate amendment, I would be for most of its features. But the ex-service men are practical, and they know the limits now placed around what we can do.

Mr. CONNERY. Mr. Chairman, I rise in opposition to the amendment. I rise at this time to reiterate what I have been saying all afternoon, that if you want to please the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans, the United Spanish War Veterans, and the G.A.R. veterans, you will vote to concur in the Senate amendment without any amendment. If I were in the position of my distinguished friend from Tennessee [Mr. BROWNING] and the distinguished gentleman from New York [Mr. TABER], and felt as they do, that the amendment ought to go to conference, I would be doing just what they are doing, but I do not feel that way. I do not want the amendment to go to conference. I want to concur in the Senate amendment.

Mr. BROWN of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. JAMES. Will the gentleman yield?

Mr. CONNERY. Not right now; in a moment I will be glad to yield. But if you want what the American Legion asked for in their four-point program, if you want what the Spanish-American War veteran wants, regardless of the touching messages sent to the gentleman from Kansas, then you will vote to concur in the Senate amendment.

I yield to the Senator from Michigan [Mr. JAMES].

Mr. JAMES. As one Spanish-American War veteran who was a private in 1898 and never applied for a pension, I would say that the average Spanish-American War veteran, judging from my conversations with them, have the same idea as the gentleman from Massachusetts [Mr. CONNERY]. [Applause.]

Mr. BROWN of Kentucky. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. BROWN of Kentucky. The gentleman stated if we wanted to please the American Legion and the Veterans of Foreign Wars we would vote against this amendment. I want to ask the gentleman if he means to lay down to us the rule in voting that we shall ignore the merits of various propositions and vote to please organized minorities?

Mr. CONNERY. Oh, no. I would not say you should vote to please organized minorities, but I would say that every time veterans' legislation comes up here the Members have always asked how the organizations I have mentioned felt about the legislation, and they have been asking the same question during the past few weeks about this legislation.

Mr. BOYLAN. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. BOYLAN. I know the gentleman is a great friend of the veteran and a friend of the working people throughout the entire United States. I simply want to ask the gen-

tleman whether he wanted to give them a vote or whether he wanted to give them some benefits? [Laughter and applause.]

Mr. CONNERY. A vote?

Mr. BOYLAN. Yes.

Mr. CONNERY. Oh, no; I think my friend from New York ought to know that I am voting for what I believe to be right regardless of votes. I know what the gentleman implies, but it does not follow that because we have heard threats of a veto by the President that we will not get legislation through. I have been here 11 years and I have seen this same situation many, many times. I saw the soldiers' bonus voted over President Coolidge's veto when he was at the highest point of his power as President of the United States. So I am not appealing to the soldiers that vote. I am supporting the Senate amendments because I believe they are right. That is why I am voting for them and why I am talking for them. I do not want the gentleman to imply, and I do not think he really does mean to imply, that I am supporting the Senate amendments simply to obtain veterans' votes. I do not have to do that, I will say to the gentleman. I will probably lose more votes in my district from bankers and brokers by talking today than I will ever get from the veterans, because the veterans have always supported me solidly, and I have had votes from people who are not veterans who may leave me after my support today of the Senate amendments.

Mr. BOYLAN. The gentleman does not want an "i" dotted or a "t" crossed. He wants free and full discussion, and yet he does not want to yield the discussion to anyone else. He wants his way.

Mr. CONNERY. When this bill came up in the House originally it came up under a gag rule. Why did not the gentleman insist on his discussion then?

I yield to the gentleman from Michigan [Mr. WEIDEMAN].

Mr. WEIDEMAN. I want to make this remark, that when the securities bill legislation was being considered, the stock brokers came right into our committee room and told us what they wanted.

Mr. CONNERY. Yes. And the veterans ought to have more rights than they have; the veterans earned theirs. Mr. Chairman, I ask in my time if I will be recognized at this time to offer my motion to concur in the Senate amendment?

The CHAIRMAN. The Chair cannot say until the amendment offered by the gentleman from New York [Mr. TABER] is disposed of.

Mr. CONNERY. I can at least offer the motion to concur at this time.

The CHAIRMAN. The gentleman's motion is on the Clerk's desk, but the Chair cannot say when it may come up until the amendment offered by the gentleman from New York [Mr. TABER] is disposed of.

Mr. CONNERY. But I may offer it at this time. That is all I ask, so that it may be voted on if the amendment of the gentleman from New York should fail.

The CHAIRMAN. Yes.

Mr. RANKIN. Mr. Chairman, I sincerely hope the amendment offered by the gentleman from New York [Mr. TABER] will be adopted. [Applause.]

I yield to no one in my devotion to the ex-service man. As Chairman of the World War Veterans' Committee of the House, I believe I know as much about the conditions of the World War veterans and the effect of the so-called "economy bill" on them as any man in Congress or out of it. I fear that if we defeat this amendment we will not get anything. There are 15,000 tubercular World War veterans alone who are extending their pallid hands to us and appealing to us to do something for them. This amendment will put them on the roll at 75 percent of what they were drawing when the economy bill was passed.

There are 10,000 neuropsychiatric cases, men who are mentally disabled, who will go back on the roll at 75 percent of their original pay if this bill becomes a law. I am not willing to assume the responsibility of defeating this legislation and seeing those men continue in their present deplorable condition, many of them to die without drawing a penny.

This measure does not do for the Spanish War veterans what I should like to see done for them, but it gives them 75 percent of what they were getting when the economy bill was passed. That goes into thousands of homes of disabled Spanish War veterans, relieving their suffering until the time comes when we can do a fuller measure of justice to them.

The thing I regret most is the fact that the other point of the American Legion's program is not in here, and that is to take care of the widows and orphans of those men who have passed away. [Applause.]

Now, Mr. Chairman, I have not imposed myself on the House. I have not, as the saying goes, sought to lead you into any blind alley. I knew this fight was coming. I also conferred with the leaders of the American Legion and the Disabled Veterans of the World War. We had a conference when this bill first passed the Senate, and we agreed that it should go to conference. You are not voting against the leaders of these two organizations when you vote for the amendment of the gentleman from New York.

I love the distinguished gentleman from Massachusetts [Mr. CONNERY]; I always dislike to disagree with him on anything touching veterans' legislation; but these men are on my heart. I am one who voted against the economy bill, and I would do the same thing again under similar circumstances. [Applause.] I saw what it would do to these unfortunate men.

We have here this afternoon an opportunity to put them back on the roll at 75 percent of what they were getting at the time the Economy Act was passed. We can do at least this measure of justice; and I sincerely trust we will stop quibbling over other amendments or over holding the bill out of conference and vote unanimously to adopt this amendment, send the bill to conference, and get what we can for these unfortunate men.

Mr. CONNERY. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. CONNERY. Has my distinguished friend any assurance that the President will accept the 75 percent?

Mr. RANKIN. I have assurance that he will come nearer accepting 75 percent than 100 percent.

Mr. CONNERY. Has the gentleman any assurance that the President will accept 75 percent?

Mr. RANKIN. No; but in my own mind I am sure it will be accepted. I know another thing: It will come a great deal nearer becoming law than it would if we loaded it down with other amendments. [Applause.]

[Here the gavel fell.]

Mr. COCHRAN of Missouri. Mr. Chairman, I move to strike out the last word.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that all debate on this motion and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. COCHRAN of Missouri. Mr. Chairman, when the amendment affecting veterans was reached I secured recognition and advised the House that it was my purpose at the proper time to offer a substitute to the motion of the gentleman from Virginia [Mr. WOODRUM].

When the time arrived for the substitute to be offered the Chair very properly, under the rules, recognized the gentleman from New York, the ranking Republican member of the Committee on Appropriations, and the gentleman from New York has offered a substitute.

Mr. Chairman, the substitute of the gentleman from New York does not go as far as I would have gone with the Spanish War veterans. He confines, as I understand it, the restoration of 75 percent of what the veterans and their widows were drawing a year ago to those who enlisted prior to August 12, 1898, and to those who served in the Boxer uprising and Philippine insurrection. Now, Mr. Chairman, my reason for making this provision apply to others is a

letter I have from the War Department which shows that our soldiers were required to serve in Cuba and Puerto Rico until 1904. Further, the War Department holds the War with Spain terminated on April 11, 1899, the date of the signing of the treaty of peace.

Men who served in Cuba and Puerto Rico were there for several years in many instances. They were in a strange climate, one that they were not accustomed to, and many of them sustained disabilities during that period. He should not have closed the doors as of August 12, 1898. This, however, can be ironed out in conference, because the Senate amendment brings all those who were on the roll in.

I am going to support the amendment of the gentleman from New York because it seems to me it is the only opportunity for the Spanish War veteran to be recognized.

My amendment would have covered practically everything else the gentleman's amendment covers. I used in part the entire language of the amendment offered by Senator JAMES BYRNES, of South Carolina, who was looked upon as the President's spokesman in the Senate. Senator BYRNES will be one of the Senate conferees and as such my amendment which originated with him will probably be acceptable to him.

Mr. DIRKSEN. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. For a brief question.

Mr. DIRKSEN. I thought perhaps the gentleman from Mississippi, who preceded the gentleman from Missouri, left the inference that if we did turn down the Taber amendment and the President vetoed the bill when it went to the White House, that it would preclude any further legislation for presumptive and service-connected cases. Certainly he would not want that inference to be left with this body.

Mr. COCHRAN of Missouri. I cannot yield further. I may say to the gentleman from Illinois that the legislative committees of the House can bring in any legislation they desire. The bill under consideration, however, is an appropriation bill; and do not forget that it carries the appropriations for all veterans. The men who are drawing even 100-percent disability service-connection allowance, lying flat on their backs, are provided for in this bill; also all men drawing allowances for service-connected disabilities are affected by this bill. Should we fail to pass a continuing resolution, what would happen to them?

Mr. DIRKSEN. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I yield.

Mr. DIRKSEN. Many of these presumptive and service-connected cases were removed from the rolls and have waited since the 4th of last March, a year ago, until now to have their benefits restored.

Mr. COCHRAN of Missouri. I say to the gentleman in reply that we are now attempting to do something for them.

Mr. Chairman, I feel that the friends of the veterans should support this amendment because it is known the President will not accept the amendments as carried in the Senate bill. As I said earlier in the day, when you cannot get the loaf take a half loaf.

While we have, of course, no assurance that this amendment will be accepted either by the Senate or the President, still it is a step in the right direction.

When properly explained to the veterans, I am sure that they would be satisfied with this amendment if it becomes law.

The CHAIRMAN. Before putting the question on the motion of the gentleman from New York [Mr. TABER], the Chair inquires of the gentleman from Texas [Mr. BAILEY] whether the amendment he offered, but which has not been reported, is in the nature of an amendment to the motion of the gentleman from New York?

Mr. BAILEY. The Chair will remember that I offered it as an amendment to the motion of the gentleman from New York, and the gentleman from New York accepted it.

Mr. TABER. I would accept it.

Mr. CONNERY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CONNERY. I have offered an amendment. It has not yet been reported. May it not be reported?

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts.

The Clerk read as follows:

Mr. CONNERY moves to recede and concur in Senate amendment no. 22.

The CHAIRMAN. The Clerk will now report the amendment of the gentleman from Texas [Mr. BAILEY] to the motion of the gentleman from New York.

Mr. BAILEY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BAILEY. I understood the gentleman from New York accepted my amendment.

Mr. TABER. That is correct.

The CHAIRMAN. What the gentleman from New York means is that he has no objection to the amendment of the gentleman from Texas.

The Clerk will report the amendment of the gentleman from Texas.

The Clerk read as follows:

Amendment offered by Mr. BAILEY to the motion of the gentleman from New York, Mr. TABER: On page 45, in line 15, after the word "widow", insert "as long as she remains unmarried."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The amendment was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from New York as amended by the amendment of the gentleman from Texas [Mr. BAILEY].

The question was taken; and on a division (demanded by Mr. CONNERY) there were—ayes 189, noes 92.

So the motion was agreed to.

Mr. WOODRUM. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House, with the recommendation that senate amendment no. 14 be concurred in with an amendment and that Senate amendment no. 22 be concurred in with an amendment.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. OLIVER of New York, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill H.R. 6663, the independent offices appropriation bill, with Senate amendments no. 14 and no. 22, had directed him to report the same back to the House with the recommendation that Senate amendment no. 14 be concurred in with an amendment and that Senate amendment no. 22 be concurred in with an amendment.

Mr. WOODRUM. Mr. Speaker, I move the previous question on the recommendations of the Committee with respect to Senate amendments no. 14 and no. 22.

The previous question was ordered.

The SPEAKER. The Clerk will report the recommendation of the Whole House on the state of the Union on Senate amendment no. 14.

The Clerk read as follows:

The Committee of the Whole House on the state of the Union recommends that the House concur in Senate amendment no. 14 with the following amendment.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent that the reading of the amendment be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The SPEAKER. The question is on agreeing to the recommendation of the Committee of the Whole House on the state of the Union relating to Senate amendment no. 14.

Mr. CONNERY. Mr. Speaker, on that I ask for the yeas and nays.

The SPEAKER. The Chair will count. [After counting.] Fifty-four gentlemen have risen; not a sufficient number.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 185, noes 101.

So the recommendation of the Committee of the Whole House on the state of the Union on Senate amendment no. 14 was agreed to.

The SPEAKER. The Clerk will report the recommendation of the Committee of the Whole House on the state of the Union on Senate amendment no. 22.

The Clerk read as follows:

The Committee of the Whole House on the state of the Union recommends that the House concur in Senate amendment no. 22, with the following amendment.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent that the reading of the amendment be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. CONNERY. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 223, nays 191, not voting 18, as follows:

[Roll No. 104]

NOT VOTING—18

Beck	Green	Norton	Stokes
Buckbee	Hamilton	Pou	Underwood
Carley, N.Y.	Lesinski	Rayburn	Williams
Crowther	Lewis, Md.	Reid, Ill.	
Deen	Montague	Smith, W.Va.	

The SPEAKER. The Clerk will call my name.

The Clerk called Mr. RAINEY's name and he voted "aye."

So the recommendation of the Committee of the Whole House on the state of the Union on Senate amendment no. 22 was agreed to.

The Clerk announced the following pairs:

Mr. Montague (for) with Mr. Buckbee (against).
Mr. Hamilton (for) with Mr. Reid of Illinois (against).
Mr. Stokes (for) with Mr. Carley of New York (against).

General pairs:

Mr. Pou with Mr. Beck.
Mr. Rayburn with Mr. Crowther.
Mr. Underwood with Mr. Deen.
Mr. Lewis of Maryland with Mr. Lesinski.
Mrs. Norton with Mr. Smith of West Virginia.
Mr. Green with Mr. Williams.

Mr. BURKE of California. Mr. Speaker, I voted "no" for both the gentleman from Pennsylvania [Mr. BECK] and myself. Inadvertently I voted on the first call when the name of the gentleman from Pennsylvania was called. I am now sure the gentleman was not in the Chamber.

The SPEAKER. Without objection, the vote of the gentleman from Pennsylvania, Mr. BECK, will be vacated.

There was no objection.

Mr. BLAND. Mr. Speaker, my colleague, the gentleman from Virginia [Mr. MONTAGUE] has been here throughout the day, but the strain of the session proved too great, and he had to leave. If he were present, he would vote "aye."

Mr. UMSTEAD. Mr. Speaker, my colleague, the gentleman from North Carolina [Mr. POU], is unable to be present on account of illness. If present he would vote "aye."

The result of the vote was announced as above recorded.

On motion of Mr. WOODRUM, a motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints the following conferees:

Messrs. WOODRUM, BOYLAN, HASTINGS, GRANFIELD, WIGGLESWORTH, and GOSS.

Mr. WOODRUM. Mr. Speaker, in the beginning of this consideration, unanimous consent was given to send all of the Senate amendments to conference with the exception of amendments 14 and 22. I now ask unanimous consent that the conferees, as to those amendments, be given permission to present a full report as to the legislative amendments without regard to clause 2 of rule 20. One or two of the amendments we sent to conference by unanimous consent are legislative amendments and this will permit us to bring back a complete report.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their own remarks in the RECORD on this bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. SHOEMAKER. Mr. Speaker, a point of information.

The SPEAKER. The gentleman will state it.

Mr. SHOEMAKER. Just previous to the vote on this bill I asked as a parliamentary question if a vote of "yes" on this bill did not mean we were voting to raise our own salaries.

The SPEAKER. That is not a parliamentary inquiry.

EXTENSION OF REMARKS—H.R. 6663

Mr. KRAMER. Mr. Speaker, in August 1932, almost 2 years ago, an army of World War veterans marched down to Washington from the far corners of the country. They came with their families, leaving their homes and fields, to demand of their Government the immediate payment of the bonus, which they believed to be their right by reason of service and sacrifice, and as a last resort from imperative need. These men were victims of the economic crisis, men for whom there were no jobs and who were entirely without money for food and shelter.

They were met with rebuff and rebuke. It is true there was some semblance of providing temporary camping places and food. But they felt themselves unwelcome; there was resistance and struggle, and lives were lost, many of them through sickness, starvation, and hardship. Finally, after weeks of futile effort, a disappointed and baffled army turned their steps back to the homes they had left with courage and hope. They had not secured that for which they had come nor anything in its place, but they did not abandon hope or effort.

I was in Washington during the presence of the bonus army there and visited the veterans in their camps. I mingled with these men and talked intimately with them. I argued that they had taken the wrong method. I am still convinced that they had. But I heard nowhere among them any expression of disloyalty to our institutions or talk of use of violence. As I observed the men encamped there I formed a high opinion of their conduct, discipline, and personal integrity. The then Attorney General and administration failed utterly to appreciate the astonishing thing that a large percentage of these absolutely destitute veterans had not turned to crime. They failed to appreciate the fact that the orderliness and loyalty of the bonus army veterans in Washington amazed the entire country.

Last summer, 2 years after the first attempt, still fighting poverty and depression they were on their way back to Washington. Any recurrence of their first experience, however, was prevented by the great President today in the White House. Hospitality had taken the place of criticism. Under the Civilian Conservation Corps camps were organized with living quarters, food and medical care were provided, and many of the idle men put to work and given an opportunity to provide for their families. Southern California had its full share in this human sympathy and hospitality. When 120 veterans from the dispersed army in Washington arrived in Los Angeles, they were met at the station, given the first meal that they and their wives and children had eaten for 15 hours, and provided with housing facilities for the night. Later temporary shelter was provided for all these veterans until means could be found for returning them to their homes or providing for them through the established relief agencies.

The payment of the adjusted-service certificates would enable many of these veterans to pay off their obligations and rebuild their lives.

As of January 1, 1934, there are 3,545,284 of these adjusted-service certificates, with an aggregate face value of $3,543,981,515; 3,019,582 of these veterans, out of a total of $3,545,000, have borrowed money on their certificates. The amount borrowed is $1,340,659,199.38, leaving a remainder due of approximately $2,200,000,000. If this money is paid, it will go into every city and village of the Nation. It will benefit not only the veterans, but it will benefit everybody. It will find its way into general circulation, increasing the purchasing power of the people and benefiting all classes. It is clear that each State, county, city, and hamlet in the Nation will benefit by the payment of these adjusted-service certificates. In Los Angeles County, Calif., for example, there will be paid out in excess of $52,000,000; the total for the State of California would be in excess of $138,000,000, and this will be relatively the case in every State in the Union. In California we have more veterans than in many other States, perhaps because of the climatic conditions which attract those in poor health, and also because California is a large State, and we have many hospitals and soldiers' homes there.

We have legislated to provide for the C.C.C., the P.W.A., the C.W.A., to promote construction work in cities and counties. We have extended a helping hand to the banker, the insurance man, the builder, the railroads. We say that all this was done to stimulate prosperity and defeat depression. But I believe that these men who served in our wars are equally entitled to consideration when we extend helping hands as we have done for these other projects.

As an example of the effect of what is being accomplished under the N.R.A., I wish to quote the following from a letter which I have just received from one of my constituents, a clothing merchant in Los Angeles:

"We all realize what wonderful work is being done in Washington, and don't think for a minute that we do not feel obligated to you all there.

President Roosevelt with his administration is loved, trusted, and respected. You have the cooperation and the good wishes of the entire country with you. Keep up your marvelous work."

It has been remarked here that this is a political issue. But to me it is not. It is a human issue. We have legislated billions of dollars for other needs, but we are unwilling to make this payment, which would be of such untold human benefit and would not affect our Treasury in the least. It would, on the other hand, mean a saving to the Government in interest paid.

From a sense of duty, as well as from a human point of view, I feel that I must vote in favor of this bill. I have repeatedly assured the veterans in my district that I would give them every consideration and support to which they are justly entitled.

Mr. GLOVER. Mr. Speaker, ladies and gentlemen of the House, we are today considering legislation that will correct the wrong done to the soldiers of our wars in the past, following the passage of the economy measure. This is made possible by the voting-down of the gag rule proposed for the consideration of this measure.

It is now to be considered on its merit which is right in the consideration of any measure. This bill gives to the soldiers of the World War 3 of the 4 things asked for by them in their program of legislation. It will take care of the tubercular and mental cases and give hospital benefits to many that have been denied it in the past year. We have our hospitals built and equipped, and it is nonsensical not to use them for the sick and suffering soldiers in need of it. This bill does not go as far as many of us would like for it to, but it is a wonderful improvement of the existing law. I should have liked to see the Steiwer-McCarran amendment adopted, which takes care of the Spanish-American War veterans, but the majority of the House has refused to adopt that amendment, and now it is up to us to get the best for them that can be gotten. The Taber amendment restores all the Spanish-American soldiers to the pay roll, but does not restore the full 90 percent, but does restore to each of them 75 percent of what they were receiving before the Hines-Douglas order which cut many of them off the roll entirely. If this is the best we can get, we shall be delighted to see them restored to the amount of 75 percent of what they were formerly getting and then fight on until they are fully restored to where they were before the cut. When we think of the suffering they went through when they had no such facilities as we have now for caring for persons injured in war, we cer-

tainly will want to do justice by them now. Most of them are now old men. If anything is done for them, it must be now, because they will soon have passed on, as all must go. I believe this Congress wants to do the right thing by the soldiers of all wars, and will do so before the fight for them ever ceases. When we sent our boys overseas to fight for our liberty, we said, "Go, and we will see that you are cared for." Some of them did not come back. They sleep in Flanders Field. Many returned wounded, maimed; some with the loss of an eye, or limb, or gassed, and broken down in health, and we should see to it that they are properly cared for.

Mr. MARTIN of Colorado. Mr. Speaker, the Borah amendment was a lifesaver. The shades of night had fallen. The army of Democracy lay gasping on the floor of the House. It had been a bloody day. At the very outset of the engagement the strategy of the Democratic leaders had met with a smashing upset. Two weeks of maneuvering, including two party caucuses designed to take the Senate amendments to the cleaners, had ended in a complete rout for the organization. At the hour of 2 p.m. on Wednesday, March 14, 1934, a coalition of Democratic insurgents, 131 strong, together with 111 Republicans, being all but 2 of the enemy, and the entire detachment from the Cherokee Strip, numbering 5 effectives, were in command of the field. All was lost. The hands of the clock moved around, 3 o'clock, 4 o'clock, 5, 6 o'clock, and still the leaderless battle raged, while the breathless gallery looked down on the scene of carnage.

The Economy Act was doomed. A roll call, and all would be over. The Senate amendments should not pass to conference.

Then came the Borah amendment to the rescue. It gave its life that the Economy Act might live. The gentleman from New York [Mr. TABER], the ranking Republican member of the Committee on Appropriations, rushed to the "bloody well" with an amendment too long at that late hour to be read. It was agreed that the amendment might be printed in the RECORD and the House would take the gentleman's word for what was in it. The gentleman used 31 lines, according to the CONGRESSIONAL RECORD, and 3 minutes of time to explain an 8-page amendment. The last three sections were explained as follows:

Section 37 has been left in and sections 38 and 39 left out.

When it appeared that section 39, the Borah amendment, preventing salary restoration in the higher brackets, had been left out, a change came over the spirit of the scene. Fortunately, the Borah amendment was incorporated in the veterans' section of the bill. Had it been in the Government employees' section, where it belonged, history might have been different. The effect was revivifying to the war-worn remnants on the floor. A new alinement of forces behind the new majority leader forthwith took semblance. Order came out of chaos. The army which had taken the hill at 2 p.m. was well on its way down at 7.

In vain the brilliant strategist of the veterans from Massachusetts raged up and down the aisle, exhorting his wavering forces to hold their lines. The breech which for 2 weeks had seemed an unbridgeable chasm between the two Houses, and which had set the popular body, so-called, by the ears, had been healed. The roll was called. General TABER'S word for it was taken. And just before the clock struck 8, the army had reached its original position at the bottom of the hill. The battle was over. The Senate amendments had gone to conference. Seeing that the fight was won, a detachment of General TABER'S minority forces executed a tactical maneuver, changing their votes from "aye" to "nay", so whatever happens the party is sitting pretty both ways.

Quickly the great Chamber emptied. The wonted silence of its night watch reigned. The Clerk went out with a bundle of documents, but it was not the same bundle he had brought in at noon. Section 39 was missing. Somewhere in the deserted Hall, maybe a scrap of paper in the well, was all that was left of the Borah amendment. Missing in action. Let us drop a tear on the spot where it was last seen. It died for the flag!

Mr. DOBBINS. Mr. Speaker, the House only a short time ago, while in Committee of the Whole, we adopted by a vote of more than two to one the Taber amendment, which is in its nature a compromise whereby the present provisions of veterans' laws will be greatly liberalized. The minority held out for a greater degree of liberalization, which, however, was of such a nature that no one believes it would have been approved by the President, and an Executive veto would have left the veterans' laws as they are. I think there are very few of us who favor the laws as they are, without any liberalization. The attitude of some of the most outspoken among the minority produced the impression that they would rather lose fighting than to win by conciliation.

In approaching this issue, it is idle to debate the question as to whether the President's stand is right or wrong. Much can be said and much has been said in a very capable way on both sides of this question. As one of the President's consistent supporters I shall, of course, refuse to criticize his action. The judgment as to whether he is right or wrong must be rendered from the standpoint of all the people of the country, including the men who offered themselves for sacrifice in our wars, the disabled survivors of those wars, and the widows and dependents of deceased soldiers.

I have repeatedly announced my desire to see a liberalization of the provisions of the pension laws, and a legislative correction of some of their provisions. I was one of those who joined in the effort to secure that liberalization during the first session of the present Congress. When, following that effort, Executive orders were issued which provided for more liberal payments to disabled veterans, and for the resolving of all doubts in their favor, in the event of uncertainty as to whether the disabilities resulted from war service, I felt that much had been accomplished.

I regret to say that experience with the administration of the law and of the Executive orders I have referred to has not been as satisfactory as most of us anticipated when those orders were issued. Too much importance is still attached to statements of good health in soldiers' discharge certificates, and not enough attention is paid to sworn statements of the soldiers themselves, and corroborating affidavits tending to show service origin of present disabilities. The evils of this are particularly noticeable in the case of Spanish War veterans, and are none the less evident in many cases of World War veterans. Boards of review and appeal boards, acting under instructions of the Veterans' Administration, can be charged with the same fault, and it is regrettable that there has been a widespread lack of harmony in the percentage of reversals of the decisions of the Veterans' Administration. Out in my own State the percentage of reversals has been much less than throughout the rest of the country.

For these reasons I wish to see new legislation passed and administered in accordance with its spirit, which will compensate every service-connected disability in the most generous manner that the resources of the Nation will permit, and will indulge the most liberal rules of evidence and presumptions in the matter of establishing a veteran's claim that his disability results from his war service.

I am convinced that the Taber amendment approved a few minutes ago, and upon which we are about to vote again, provides the largest measure of liberalization of the pension laws for which there is any chance whatever of Executive approval, and that by such means Spanish War pensions in every deserving case will be restored to 75 percent of what they were on March 19, 1933, and a more liberal consideration and reward for all pension claims than we have been having will be assured.

If, however, we make the futile gesture of insisting upon passing the bill in its present form, with the Senate amendments unchanged, thus inviting a certain veto, we will have accomplished nothing for the veterans. It is a grand gesture to insist upon 90 percent, knowing we cannot get it,

and refusing to accept the 75 percent that we probably can get. But that will not help the needy veteran who is looking to this Congress for relief.

Speaking of this situation, it has been very aptly said that it is much better to have three fourths of something than 0.9 of nothing.

One of my regretful recollections of a busy law practice concerns an important case that I tried, in which, by way of compromise, my client's opponent offered to pay four fifths of a large disputed claim. We refused the offer. The case was fought through several courts. In the end my client got nothing; and it is perhaps natural that he has never appreciated his lawyer's determined, but unsuccessful, efforts to get the whole of his claim.

I have discussed these phases of the question with several Members who are voting against any compromise between the bill as amended by the Senate and the views of the President. Some of them frankly say that in their own minds they are satisfied that this compromise would be best for the veteran, but, they add, they will never get their veteran supporters to see it in that light. It is my conviction, Mr. Speaker, that we are here for the purpose of doing that which is best, as it appeals to the conscience of each of us. We should do that, regardless of the possibility of our being misjudged by those whom we seek to help. There is no truer passage in the writings of Shakespeare than in the advice that he gives through Polonius in Hamlet:

> This above all: To thine ownself be true,
> And it must follow, as the night the day,
> Thou canst not then be false to any man.

Mr. SABATH. Mr. Speaker, ladies and gentlemen of the House, day before yesterday I voted for the bonus bill, the same as I did in 1932. I believed then and believe now that it will be helpful and beneficial not only to the veterans but to the country at large if the bonus were paid now instead of 1945.

When we originally voted to make the bonus payable in 1945 we little dreamed that Republican misrule could bring such wreck and ruin to the country and force 2,000,000 veterans and 14,000,000 persons out of employment, and that the country would be obliged to feed the hungry and starving in every section of our land. I feel that payment of the bonus now will place nearly two billions of dollars into circulation, which moneys can easily be issued against our gold reserve.

Also, I voted a short while ago to send this independent offices appropriation bill with the Senate amendments to conference, being satisfied that the conferees on the part of the House and Senate could bring about an adjustment and agreement that would assure relief to the thousands of deserving Spanish-American War veterans and their widows, and, above all, to the many thousands of World War veterans.

In 1917, when, as a member of the Foreign Affairs Committee, I voted in committee and later on the floor of the House for the declaration of war, I pledged myself that I would at all times do my full share to aid and protect not only the men that volunteered but the men that were drafted and, when the time arrived, their widows and dependents. This I have done and, being desirous that a sane adjustment of the differences existing between the House and Senate be satisfactorily worked out, I followed that course.

As a member of the steering committee and as a member of the Rules Committee, I had ample opportunity to be informed and obtained satisfactory information that an equitable adjustment could be brought about, knowing that, notwithstanding the original provisions of the economy bill, the President is desirous of doing the righteous thing to all deserving men and women. Unfortunately for the country, known to those familiar with conditions, many undeserving men have been placed on the retired list and are drawing compensation to which they are not entitled.

We have heard many statements in the committee and on the floor of the House directing attention to the many undeserving officers placed on the rolls and drawing annually $5,000 and $6,000 in retirement pay. I have opposed this exorbitant retirement compensation to the thousands of undeserving officers, while denying to the rank and file the compensation which they deserve.

I repeat that it is in the best interest of the vast majority of ex-service men that the bill should go to conference and that we should not be carried away by a few highly paid Government officials who, in the hope of saving their 15-percent pay cut, are working to prevent the bill from going to conference so that they may benefit at the sacrifice of the ex-service men of the Nation. These practices should not be condoned by the House.

I, for one, am unwilling to be a party to any scheme that would make possible the abrogation of the 15-percent pay cut of officials and Members of Congress, which includes myself, at the expense of the ex-service men. Of course, I am appreciative that there are a great many Members just as honest as I am who are fearful of sending the bill to conference, but I feel with my many years of experience in this House that that is the only thing to do, as the conferees, if need be, can confer with the President and rewrite the provisions that will do the most good for the largest number. The President has already yielded on many of the most beneficial provisions and regardless of the many friends of the ex-service men, I know his heart is in the right place and he wants to do the right thing; so let us not do anything that would cause the Chief Executive to veto the bill, and thereby fail to bring relief to the many thousands of deserving veterans.

Mr. SMITH of Washington. Mr. Speaker, I vote "nay" on roll call no. 103 against the resolution to send this bill to conference because I am opposed to sending the bill to conference and am in favor of the Membership of the House being permitted to vote upon the Senate amendments.

I also vote "nay" on roll call no. 104, for I am in favor of the Senate amendments and against the substitute amendment offered by the Republican Member from New York [Mr. TABER] for the reasons which I will briefly state.

First. The Senate amendments, which I favor, would restore 90 percent of the pensions and benefits of the Spanish-American and World War veterans, and the Taber amendment restores only 75 percent.

Second. The Senate amendments include the Borah amendment, which provides that our own salaries shall not be restored at this time, and I therefore favor it, for I am not in favor of restoring our own salaries at the expense of the veterans, which is the effect of the Taber amendment.

Third. The Senate amendments restore the full 15 percent pay cut of the Federal employees, excepting the Members of Congress, which I consider to be in accord with the national recovery program of President Roosevelt to raise wages and farm prices and increase purchasing power. I favor it for the same reason that I favor high wages for the men employed in private industry, including the railroad employees, who received a wage cut of 10 percent in February 1932, and upon whom the railroads have been seeking to impose a further cut of 5 percent additional, which is contrary to everything that this administration is seeking to do. Instead, the railroad employees should have restored to them immediately the 10 percent pay cut they have been subjected to during the past 2 years, which has reduced to that extent the purchasing power of approximately 1,000,000 American citizens.

I voted the other day for the bill to restore the compensation to the substitute mail carriers for the same reason, and I also favor increasing the equipment allowance to the rural carriers, which has been reduced to a point where they cannot subsist. In other words, I am convinced that the Senate amendments are in more thorough accord with the splendid philosophy and noble purposes underlying the whole national recovery program of President Roosevelt and this Congress, which is to place an increased amount of money in the hands of the common, average citizen in every walk of life—laboring men and farmers, veterans, Federal

employees, railroad employees, employees of the Postal Department, and the employees in private industry.

Mr. Speaker, by increasing the income of these citizens we will increase their spending power so that they can purchase the goods, wares, and merchandise that are offered for sale by the merchants and storekeepers and business men in the local communities of the Nation, and the products of the farmers as well as the factories, and bring back prosperity to the homes and firesides of America.

Mr. McGRATH. Mr. Speaker, upon every test during the special session by word, influence, and vote I supported the program of the President. I have no regrets or apologies for my course. I am proud of the distinction of being known as a "yes" man. In this war against depression I am willing to take orders from the Commander in Chief. I have never hesitated to adopt the same policy in this session, nor shall I change now.

I voted for the enforcement of the gag rule when the independent offices bill came before the House for its original consideration, with the understanding that the committee bill, as presented, was an integral part of the unified program of recovery. I did this in the face of my conviction that the original measure in no manner complied with my ideas concerning adequate provision for either Federal employees in the lower brackets, veterans with service-connected disabilities, legitimate presumptive cases, emergency officers suffering under the interpretation of the "causative factors" in the regulations, Spanish-American War veterans, nor widows and dependents.

Today the bill is returned to us with material amendments passed by the Senate. These are not fully satisfactory to me. Both before and after my election, publicly and privately, I have pledged to stand upon the following platform:

First. That the absolute maximum of benefits of right belonged to and should be given to every truly disabled veteran with a service-connected disability incurred in any of our wars.

Second. That our Government and our people owe an obligation to every other honorable veteran which can never be fully repaid but which entitles that veteran to all of the assistance and help which the Government can give without injury to our citizens as a whole, whenever he is in distress.

Third. That the veterans of the Spanish-American War, Philippine insurrection, and Boxer rebellion are entitled to special consideration because of the impossibility almost of securing adequate records showing whether or not disabilities were of service origin.

Fourth. That the widows and orphans and dependents of veterans who died in service or as a result of service are entitled to the most liberal care and compensation.

Fifth. That the Government hospitals should be opened at all times to veterans suffering from service-connected disabilities and to other veterans permanently and totally disabled and needing hospitalization wherever such disability is not the result of misconduct.

Sixth. That to the limit of the facilities—and those facilities should be made adequate—Government hospitals should be opened to veterans suffering from non-service-connected disabilities not the result of misconduct wherever such veteran needs material medical or surgical care. In these times of emergency I believe that veterans suffering from non-service-connected disabilities should pay for hospitalization for these non-service-connected disabilities if such veterans are fairly able to pay for such treatment. Under no circumstances should there be a charge for treatment for service-connected disabilities.

Seventh. That the "causative factor" in connection with emergency officers' retirement should be so redefined as to permit retirement to any officer suffering from any permanent war-time service-connected disability of at least 30 percent.

In every emergency to his program the President has presented us with his wishes. He has given us marching orders. Now, he, in my judgment, expects each Member of Congress to exercise his constitutional and legislative functions in the light of each individual's conscience and judgment.

At the present time, thanks to the confidence inspired by his program, the President has felt justified in insisting with all his power upon a raise of wages and a shortening of hours in industry. He has stated that this is essential to recovery. I believe that the Government should set the example. The Treasury issues are eagerly sought. Government credit is restored. The program of economic recovery will be advanced by a full restoration to those Government employees in the lower-paid brackets, but this being out of my control, I favor full restoration for all Federal employees, and Senate amendment 14 seems to be to me the most effective method of showing good faith on the part of the Government.

When Public No. 2, the so-called "Economy Act", was passed, we were assured that no true disabled veteran with service connection would suffer. I am now convinced that some subordinate officials have not been in sympathy with either the President or the veterans. I know that much suffering has resulted, and that unwarranted cuts were made in service-connected cases. Truly, the regulations have been amended, but I believe that we can best express the President's real policy by throwing the protection of law around these cases as proposed by Senate amendment 22.

I have become convinced that the Spanish War veterans cannot prove service connection after 35 years, and my belief is that the 90-percent restoration in the Senate amendment is but simple justice to them.

The "causative factor", as required for emergency officers, is brutally unjustifiable. It should be removed from the regulations by law. I am supporting Senate amendment 22, and I consider it fortunate that we are to have a record vote upon the veterans' benefits.

This is no revolt against the President on my part. It is merely expressing by action what I consider to be fulfillment of his policy—justice for the common men and women.

Mr. WALTER. Mr, Speaker, I wish to speak briefly at this time on a subject which I feel is of great importance to us all, yet one which has been barely touched upon in any discussions which I have heard on the floor of this House.

In his explanation of the relief program which is about to be undertaken as a substitute for the C.W.A. project the President of the United States said:

> • • • The problem of unemployment must be faced on more than one front.

I wish at this time to project into the various expressions on the subject of relief for the unemployed the case of a very substantial class of individuals whose importance in the life of this country can be illustrated when we say that the perpetuation of our social and economic existence depends in the end upon them.

With this great class I am very familiar, owing to the presence in my constituency of a large number of schools and colleges. It is the plight of the graduates of these institutions in my district, and the similar plight of such young people in every constituency represented in this House, that I am convinced should not escape the attention of this body.

There are, you may be somewhat surprised to know, approximately 900,000 boys and girls graduated from the high schools of the Nation every year. In addition to this great aggregation of ambitious youth, are the 135,000 graduates of colleges and universities.

Here, then is a total of 1,035,000 persons varying in age from 15 or so to 22 or 23 years, or approximately 4,000,000 since 1930. I think that it may be said without contradiction that the general average of these young people rate well in potential intelligence and in potential service to their State and Nation. They have been through 4 years of high school, 4 years of college, and perhaps many of them are about to enter another 4 years or more of continuing education for professional careers in medicine, architecture, or some form of specialized engineering.

As the years of the depression have plowed great holes in the pocketbooks of many a parent of these youths, and

perhaps even a deeper furrow in their brows, the opportunities of these students have been reduced accordingly—the hope of happy realization of youthful ambitions has been greatly diminished.

So it is natural that they are even more eager, because of the increasing necessity in which they find themselves, to obtain work—work with which to earn money to continue their education, let us say, to its projected conclusion in school and college. They are more eager to be at any task perhaps than ever before, because only through their own efforts in this way will it be possible to continue their education, for no more can they obtain money from home. There is, together with those who may continue through their own efforts, another great group who find it utterly hopeless, absolutely impossible, to go further with their books. Why? Simply because every cent which they can wrest from any labor whatsoever must be contributed to the common family pocketbook to keep the family together. Earning a living then becomes their sole and exclusive task. Education for these unfortunate youths—and they are thousands upon thousands—is an utter luxury far beyond their reach or even their aspiration.

It is this great body of young men and women that arouses in me a fear. It is the fear that, through the bitter circumstances which confront them as they emerge, diploma in hand, across the threshold of some educational institution, they will quickly be thrust into a period of discouragement, of despair, and disillusionment from which recovery is, at best, slow and in many cases impossible.

I think that every Member of this body can recall, and recall with considerable pride and tender memory, the day that he or she stepped through the door of the little red schoolhouse, the big brick high school, or the college for the last time. I think you can all recall the emotion that surged through your soul at the thought of the great things before you, of the opportunities which by dint of hard, healthy work would open to you, and the accomplishments which you saw along your ambitious path. That is an emotion, the expression of a worthy ambition, to which all the world responds.

Consider a similar situation today—a young man or young woman with all the life still ahead, an institutional education behind. The young man or young woman is now about to begin that great task of making a living in a world in which he or she has the utmost confidence. In your day and my day the chance of stepping into the world with comparative certainty of at least obtaining an opportunity for testing the stuff whereof you were made was good.

Consider the circumstances today. Remember the eight, or nine, or ten million able-bodied men, many of them the heads of families of their own, who are unemployed. Look about you and see the number of factories, shops, stores, and even schools that are closed with no prospect of immediate reopening. Consider the absolute limitation of opportunities for work, even work with a pick and shovel, which face this host of youth who stand ready to tackle the world that you and I have had a hand, however slight, in making for them.

Mr. Speaker, it is hard enough, it is cruel enough for a grown man, already a veteran in the economic struggle, to be deprived of the opportunity of work. We frequently consider his plight on this floor. We have passed many laws in the hope of bettering his tragic position, of putting him back once more at the head of his family, as it were. His problem is, you might say, the immediate problem with which we have concerned ourselves. It is to him that we have held out the offer of such work as by legislation we could provide. In the background has stood this other great group of our population, these 1,035,000 young men and young women, who, without ever being tried in the fire of labor, have, practically speaking, been consigned to the scrap heap of our economic system. That was not the intention of our system, of course, but it is the inescapable fact, that if industry, the professions, the mercantile pursuits cannot support the fathers and mothers of this body of youth, how, may I ask, can we expect it to give work to that youth itself?

In the matter of the education of this youth, where that education has been cut short or rendered impossible by economic factors arising out of this depression, there is little we may do. That is the immediate concern of State, county, or municipality, and unfortunately, from the financial statistics of those political divisions, it would appear that there is little that they can do.

You realize, I presume, that there are in this country thousands of school teachers unemployed, other thousands who are paid less than the average worker on a Public Works project, while countless schools, some in virtually every State, stand empty, their pupils frequently scattered among hungry homes, because there is no money to keep them open.

So much for that, Mr. Speaker. And so much is the tragedy that it is indeed surprising to me that we have devoted so little attention to such deplorable and, in fact, such dangerous circumstances.

I was hopeful, modestly, I must admit, when the Civil Works Administration was instituted. There, I found, were some opportunities at least for young men and young women to obtain decent work, even professional work, in engineering and art. There was, in this aspect of the C.W.A. program in particular, something impressive to me. A great variety of work became available, work for which many a youth had fitted himself by the education he had just completed. Many of these young men and women were quick to grasp the opportunity, and in that moment they once more experienced a revival of hope, of courage, and became again self-respecting earners of a livelihood, humble though it might be.

I have seen men, and so, too, have you, with the mark of early twenties upon their faces begging on the street. They have been driven to it by the forces from which they should have been saved. It is not a good sight to see a young man, strong and broad of shoulder, approach you on a public street, utterly desperate, and fast losing the respect for himself that was his by nature. It is not good to hear him ask for a nickel or a dime for a cup of coffee, or car fare to a prospective job that never seems to materialize.

But this sight we see and this voice we hear day after day. I found that during the height of employment by the C.W.A. there seemed to be less of these young men about, and I know that many got work on Civil Works projects.

And now, Mr. Speaker, they are once more being forced back to the streets to beg for their very existence, or become robbers and thieves, which is just a step down from beggary and not a difficult step to take when you have been shoved as low as many of these youths.

And so, Mr. Speaker, I do not take kindly to the proposal before this House to increase the salaries of this and that group in the Federal service. I will go along with those who would grant a restoration of the levels existing before the 15-percent reduction when those levels do not exceed $2,500 per annum. I cannot bring myself to see the justice of a wholesale increase for all classes, including myself and my colleagues on both sides of this Capitol, when it is necessary, apparently, to reduce the funds available for such a project as the Civil Works Administration.

It is true that a substitute has been evolved for Civil Works. I have studied that substitute insofar as there has been any information about it available. I must say that upon the basis of the information I have been able to elicit I do not see what this great class of young men and young women may expect from it by comparison with what they could have expected under the Civil Works Administration.

Perhaps I am wrong. Perhaps the opportunities will be even greater, but they do not seem readily apparent to me at present.

What are we to have? Well, first, seems to be relief for distressed families in rural areas. That, I presume, means primarily the heads of distressed families in rural areas.

Second, come those so-called "stranded populations", meaning—it has been explained—those living in single-industry communities where there is no hope of future employment. A specific case is a mining community where the mine has been closed.

Finally we come to the unemployed in large cities. This, I presume, from the standpoint of numbers at least, is the most important group. What is held out to them? Six months of work, the nature of which, to me at least, is not immediately clear. Six months of work will take us into the late fall. Then what? Will industry and commerce be sufficiently restored by that time to absorb, as it is hoped, the great numbers who must be placed upon public pay rolls in the meantime? I do not think that where human existence, human life is concerned, we should count too heavily upon that. If industry and commerce still appear tardy in their support of the workers, then greater will be the public burden beginning next November.

Here, I think, we stand in need of a little careful thought, and even more careful planning. The President and the country are insistent, quite naturally and laudably, in moderating in every way possible, the expenditure of Federal moneys. That indeed is a necessity which we cannot ignore, even, I fear, in the face of such distress as we still see about us.

For that reason, and for that reason only, I urge this House to proceed with the utmost caution in the matter of restoring pay levels which existed when conditions were quite different from what they are now. The restoration of all Federal classes to their normal levels appears to me to be a most inconsiderate step at this time.

I repeat what I said before. Up to $2,500 per annum, well and good. I will support that program with determination. But above the $2,500 salary, I think restoration of the 15-percent reduction would be utter folly in the face of potential demands upon the Treasury for necessary expenditures.

There is much talk about the Federal Government's "setting the example" in the matter of pay increases. That kind of talk at this time seems nonsense to me. The Federal Government is in a vastly different financial situation than the United States Steel Co., or any other private industrial enterprise. The Government is already supporting countless unfortunate persons who should be supported by private industry were that industry conducted in the past as it should have been.

The Federal Government's responsibilities for the feeding and clothing of millions in this depression has been increased to proportions which, I dare say, no man ever before thought possible. At the same time the responsibility of private enterprise has been proportionately diminished, and in some cases, I regret to say, eagerly shirked by private enterprise. The business of assuming this great burden which now rests upon the Federal Government lies with private industry. Let private industry accept it and thus permit the Federal Government to reduce its vast expenditures for public works and all similar relief activities. Then, and only then, will the Federal Government be in a position to begin promiscuously raising pay that was reduced only as a last resort to enable the Government to take over the task which by right belongs to industry.

No, Mr. Speaker, those individuals who prate about "setting the example" in the Federal Government in the matter of pay increases are sublimely unconscious of the magnitude of the Government's financial labors at present, or they speak for purely selfish reasons.

So, in conclusion, I return to the more than 1,000,000 young men and young women of our land who face this monster of unemployment, little realizing what may be in store for them.

Every cent we increase pay for those already being paid, if we are to stay within the Budget the President has wisely set for us, the fewer will be the opportunities for youth to obtain a foothold.

Failing to obtain that foothold, and failing because such money as might have made it possible has been diverted to less necessary functions, is a prospect which I, for one, do not contemplate with equanimity.

Remember, it is upon this youth which the future of our country rests. This graduating class, as they might be called, is increasing by over 1,000,000 every year, to say nothing of the boys and girls who now find it impossible even to finish high school.

This is a responsibility, Mr. Speaker, which cannot be ignored because a clamor of misinformed or selfish people demand that the Federal Government "set the example."

Let the Federal Government turn its attention for a moment to the future custodians of the Nation's fate, and, in the meantime, let private industry turn its attention to taking over some of the responsibility it has shifted to the United States Treasury. Then I will be willing to talk about pay raises for everyone.

But just now let us keep the record straight in our mind, and we can do that best, I think, by taking the figure for the number of people who were on the Federal pay roll, directly or indirectly, in 1928–29 and compare that with the number of people on the Federal pay roll directly or indirectly today. And, I might add, the total will run very close to 1 out of every 6 of our people.

Show that comparison to the next man who asks you why the Federal Government does not "set the example" and see what he says. Ask him if he knows of any private industry which has so increased its disbursements since 1929?

When private industry can show any such record of social conscience as this administration has since March 4, 1933, in the matter of increased pay rolls and care for the worker and his family, then private industry will have been purged of the Wiggins, the Mitchells, the Kreugers, and Insulls, and that, I hope, is what this Congress intends to do.

ENROLLED BILLS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 7808. An act to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on March 13, 1934, present to the President, for his approval, a bill of the House of the following title:

H.R. 7199. An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1935, and for other purposes.

ADJOURNMENT

Mr. BYRNS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly, at 7 o'clock and 48 minutes p.m., the House adjourned until tomorrow, Thursday, March 15, 1934, at 12 o'clock noon.

COMMITTEE HEARING

COMMITTEE ON THE PUBLIC LANDS

(Thursday, Mar. 15, 10:30 a.m.)

Room 328, House Office Building.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BLAND: Committee on Merchant Marine, Radio, and Fisheries. H.R. 5038. A bill authorizing pursers or licensed deck officers of vessels to perform the duties of the masters of such vessels in relation to entrance and clearance of same; without amendment (Rept. No. 970). Referred to the House Calendar.

Mr. McREYNOLDS: Committee on Foreign Affairs. S. 682. An act to prohibit financial transactions with any foreign government in default on its obligations to the United States; without amendment (Rept. No. 974). Referred to the House Calendar.

Mr. McREYNOLDS: Committee on Foreign Affairs. Senate Joint Resolution 59. Joint resolution to provide for the expenses of delegates of the United States to the Ninth Pan American Sanitary Conference; with amendment (Rept. No. 975). Referred to the Committee of the Whole House on the state of the Union.

Mr. RUFFIN: Committee on the Judiciary. S. 2550. An act granting an easement over certain lands to the Springfield Special Road District in the county of Greene, State of Missouri, for road purposes; without amendment (Rept. No. 976). Referred to the Committee of the Whole House on the state of the Union.

Mr. DEROUEN: Committee on the Public Lands. H.R. 7306. A bill to amend section 10 of the act entitled "An act extending the homestead laws and providing for right-of-way for railroads in the District of Alaska, and for other purposes", approved May 14, 1898, as amended; with amendment (Rept. No. 977). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BLACK: Committee on Claims. H.R. 452. A bill for the relief of Laura B. Crampton; with amendment (Rept. No. 969). Referred to the Committee of the Whole House.

Mr. BLAND: Committee on Merchant Marine, Radio, and Fisheries. H.R. 6622. A bill authorizing the Secretary of Commerce to lease certain Government land at Woods Hole, Mass.; with amendment (Rept. No. 971). Referred to the Committee of the Whole House.

Mr. RUDD: Committee on Foreign Affairs. H.R. 7788. A bill for the relief of the estate of William Brooks Sorsby; without amendment (Rept. No. 972). Referred to the Committee of the Whole House.

Mr. CASTELLOW: Committee on Foreign Affairs. H.R. 8589. A bill for the relief of Lucy Stewart; without amendment (Rept. No. 973). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. LUDLOW: A bill (H.R. 8638) to authorize the Reconstruction Finance Corporation to make loans to aid in the operation and maintenance of institutions for religious instruction and worship, and for other purposes; to the Committee on Banking and Currency.

By Mr. DIMOND: A bill (H.R. 8639) to repeal certain laws providing for the protection of sea lions in Alaska waters; to the Committee on Merchant Marine, Radio, and Fisheries.

By Mr. PIERCE: A bill (H.R. 8640) to add certain lands to the Malheur National Forest in the State of Oregon; to the Committee on Agriculture.

By Mr. CONNERY: A bill (H.R. 8641) to protect labor in its old age; to the Committee on Labor.

By Mr. RAMSAY: A bill (H.R. 8642) authorizing the city of Wheeling, a municipal corporation, to construct, maintain, and operate a bridge across the Ohio River at Wheeling, W.Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. COFFIN: A bill (H.R. 8643) to amend section 36 of the Emergency Farm Mortgage Act of 1933 and amendments thereto; to the Committee on Agriculture.

By Mr. WARREN: A bill (H.R. 8644) to provide warrant officers of the Coast Guard parity of promotion with warrant officers of the Navy; to the Committee on Interstate and Foreign Commerce.

By Mr. EICHER: A bill (H.R. 8645) to authorize the Secretary of War, upon the recommendation of the Chief of Engineers, to adjust, settle, and pay claims of drainage districts and levee districts for damages on account of increased seepage and/or increased cost of drainage resulting from certain improvements on the Mississippi River and its tributaries; to the Committee on Rivers and Harbors.

By Mr. McFARLANE: Resolution (H.Res. 300) inquiring as to the status and activities of one Maj. C. J. H. MacKeanzie-Kennedy; to the Committee on Foreign Affairs.

By Mr. DICKSTEIN: Resolution (H.Res. 301) to designate one legislative day for consideration of bills reported from the Committee on Immigration and Naturalization; to the Committee on Rules.

By Mr. CARTER of California: Resolution (H.Res. 302) creating an Old Age, Disabled, and Unemployment Insurance Committee; to the Committee on Rules.

By Mr. McREYNOLDS: Joint resolution (H.J.Res. 295) authorizing appropriation for expenses of Representatives of United States to meet at Istanbul, Turkey, with representatives of Turkish Republic for purpose of examining claims of either Government against the other and for expense of proceedings before an umpire, if necessary; to the Committee on Foreign Affairs.

By Mr. DIMOND: Joint resolution (H.J.Res. 296) authorizing a preliminary examination or survey of Juneau Harbor, Alaska; to the Committee on Rivers and Harbors.

By Mr. CHURCH: Joint Resolution (H.J.Res. 297) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. IGLESIAS: Joint resolution (H.J.Res. 298) to amend a joint resolution entitled "Joint resolution for the relief of Puerto Rico", approved December 21, 1928; to the Committee on Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN: A bill (H.R. 8646) granting an increase of pension to Emma McLees; to the Committee on Invalid Pensions.

By Mr. BAILEY (by request): A bill (H.R. 8647) authorizing the appointment of Roy M. Kisner as a captain, Dental Corps, Regular Army; to the Committee on Military Affairs.

By Mr. DINGELL: A bill (H.R. 8648) authorizing the President of the United States to appoint Capt. Henry M. Tunis, Air Corps Reserve, a captain in the United States Army and then place him on the retired list; to the Committee on Military Affairs.

By Mr. FOCHT: A bill (H.R. 8649) granting a pension to Lucy A. Spencer; to the Committee on Invalid Pensions.

By Mr. FULMER: A bill (H.R. 8650) for the relief of B. J. Sample; to the Committee on Claims.

By Mr. GLOVER: A bill (H.R. 8651) to reimburse depositors for loss suffered in the failure of the National Bank of Arkansas, Pine Bluff, Ark., on July 21, 1930; to the Committee on Claims.

By Mr. GRANFIELD: A bill (H.R. 8652) to authorize the Secretary of War to convey to the International Young Men's Christian Association College and to the trustees of the Gunn Realty Trust all right, title, and interest of the United States in and to certain lands in Hampden County, Mass.; to the Committee on Military Affairs.

By Mr. KURTZ: A bill (H.R. 8653) for the relief of George Valentine; to the Committee on Claims.

Also, a bill (H.R. 8654) for the relief of Elizabeth Burket; to the Committee on Military Affairs.

By Mr. MARLAND: A bill (H.R. 8655) renewing and extending Patent No. 1245858; to the Committee on Patents.

By Mr. POU: A bill (H.R. 8656) for the relief of the Brewer Paint & Wall Paper Co., Inc.; to the Committee on Claims.

By Mr. REECE: A bill (H.R. 8657) to allow credit to homestead settlers and entrymen for certain military service; to the Committee on the Public Lands.

By Mr. SNYDER: A bill (H.R. 8658) granting a pension to Lillian Jeffries; to the Committee on Pensions.

By Mr. TARVER: A bill (H.R. 8659) for the relief of sundry churches and schools damaged or destroyed during the War between the States; to the Committee on War Claims.

By Mr. WITHROW: A bill (H.R. 8660) granting a pension to Anna Sheets Rogers; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2978. By Mr. BOYLAN: Letter from the National Cooperative Milk Producer's Federation, Washington, D.C., endorsing the La Follette amendment to the Jones bill; to the Committee on Agriculture.

2979. By Mr. COLLINS of California: Petition of Guy E. Hazen, Harry Zumwalt, and 74 other residents of Beaumont, Calif., requesting restoration of pension benefits to Spanish War veterans and their dependents; to the Committee on Pensions.

2980. By Mr. EVANS: Petition of Frank Fairbanks and approximately 2,000 others for restoration of benefits to Spanish War veterans; to the Committee on Appropriations.

2981. Also, petition of Norman M. Grahn and approximately 140 others; to the Committee on Pensions.

2982. By Mr. HILDEBRANDT: Resolution of the Civic Study Club and the Congregational Ladies' Aid Society of Letcher, S.Dak., urging support of House bill 6097 for supervision of motion pictures; to the Committee on Interstate and Foreign Commerce.

2983. By Mr. JAMES: Petition of J. August Anderson, of the Anderson Fish Co., and other residents of Marquette, Mich., favoring House bill 7419; to the Committee on Ways and Means.

2984. Also, petition of J. August Anderson, of the Anderson Fish Co., and other residents of Marquette, Mich., favoring House bill 7147; to the Committee on Merchant Marine, Radio, and Fisheries.

2985. By Mr. JOHNSON of Texas: Petition of N. E. Marr, of Malone, Tex., favoring House bill 6836, Rayburn truck and bus bill; to the Committee on Interstate and Foreign Commerce.

2986. By Mr. KNIFFIN: Memorial of the Springfield Grange, No. 499, of Stryker, Williams County, Ohio, protesting against the Tugwell bill, and urging the enactment of the Black bill; to the Committee on Interstate and Foreign Commerce.

2987. By Mr. KURTZ: Petition of the citizens of Centre County, Pa., urging support of legislation affecting the sale of oleomargarine, and suggesting an adequate tax so that it ceases to be a cheap substitute for butter; to the Committee on Ways and Means.

2988. By Mr. LINDSAY: Petition of A. M. Capen's Sons, Inc., New York City, favoring the passage of House bill 8430; to the Committee on Ways and Means.

2989. By Mr. MEAD: Petition of the Young Peoples Federation of the Buffalo Council of Churches, Buffalo, N.Y.; to the Committee on Naval Affairs.

2990. Also, petition of the Central Labor Council of Buffalo, Buffalo, N.Y., urging adoption of Connery 30 hour bill; to the Committee on Labor.

2991. Also, petition of the New York State Legislature, asking that the Federal Government supplement the appropriations of the State of New York for adequate river regulation and flood control of waterways within the State; to the Committee on Flood Control.

2992. By Mr. RICH: Petition of the Woman's Christian Temperance Union, Westfield, Pa., favoring House bill 6097; to the Committee on Interstate and Foreign Commerce.

2993. Also, petition from the official board of the Methodist Episcopal Church of Duke Center, Pa., favoring House bill 6097; to the Committee on Interstate and Foreign Commerce.

2994. By Mrs. ROGERS of Massachusetts: Petition of the House of Representatives of the General Court of Massachusetts, requesting the Navy Department to enshrine the U.S.S. *Constitution* as a national museum in its home port of Boston, Mass.; to the Committee on Naval Affairs.

2995. By Mr. RUDD: Petition of A. M. Capen's Sons, Inc., New York City, favoring the passage of House bill 8430; to the Committee on Ways and Means.

2996. Also, petition of Harold J. Fries, 9512 One Hundred and Fifteenth Street, Richmond Hill, Long Island, N.Y., and four other citizens of Richmond Hill, against participation in the League of Nations and World Court; to the Committee on Foreign Affairs.

2997. By Mr. STRONG of Pennsylvania: Petition of the Students' Club of Johnstown, Pa., favoring the Patman motion picture bill, H.R. 6097; to the Committee on Interstate and Foreign Commerce.

2998.
